I started taking Serrapeptase about 10 months ago as it is suppose to reduce inflammation and help clean and renew damaged arteries. The result has been that my blood pressure has been reduced from 155/98 to 98/68 which is telling me that my arteries are starting to be flexible again.

I started taking this for severe knee pain. I was told I would need knee replacement (bone on bone). After taking this I found my knee pain was reduced considerably. As an added benefit my addiction to sweets has disappeared. I exercise(30 min. on stationary bike and other exercises for knee pain. I am grateful for the internet as I looked up anti inflammatory and serrapeptase popped up. I tell friends and family about this miracle enzyme. I feel terrific!

I took a Doctor's Best High Potency Serrapeptase capsule last night, and I have had a terrible time with diarrhea. It is almost like cleansing for a colonoscopy. Is this a virus in my gut?

I have used this along with my regular medication (Celebrex) for osteoarthritis. There has been no change in condition. I have only noticed a change in anxiety.

I was diagnosed with mild to moderate PAD in the left leg. I took Serrapeptase 120,000 unit caps for several months. My doctor gave me an ultrasound test which showed no evidence of the disease.

After a heart attack in 2007 my doctor put me on a statin...although my cholesterol was never over 147, it was poison to my system, he also had me take a blood pressure which was 134/74. The BP Med caused a sudden hearing loss so I stopped both meds. I started taking Serrapeptase in 2009 and I feel much better and my BP is now stable at 130/70. I am 72 and have experienced no side effects from Serrapeptase. I take two 80,000 mg tablets per day

I use the Arthur Andrew Medical brand called Serretia as an anti inflammatory after suffering an acute disc injury from overtraining. I can play two hard hours of squash without aching afterwards, then or the next day. I have had no back pain for 5 years now, or any other muscle related pain, for that matter. One pill a day suffices.

Wow arthritis and joint back and hip was so bad sitting for more than 15 or 20 mins was impossible without starting to twitch about then having to either stand move about or lay down to get comfortable. The second day after taking Serrapeptase I could feel a difference Now 2 months later I feel 20 years younger It really is a miracle enzyme

I was looking for something to counteract arteriosclerosis which has shown up on some scans. I took 120000 iu's a day for 6 mo. About a month after starting a chronic dry skin rash on my shins cleared up. I have not had arterial scans to see what effect it might have had. Hard to prove for sure, but seems to be worth looking

further into. I feel better physically. I am supposing there is some benefit but I have also been exercising more and eating better.
