

# Dead Doctors Don't Lie Program 27 February 2012

[Download File](#)

## **Monologue**

Dr. Wallach starts the show discussing genetic and autoimmune diseases. Doc contends that he believes there are no diseases caused by genetics or immunity problems. Outlining several disease states including arthritis, osteoporosis, dementias, Alzheimer's and diabetes. Asserting these are either nutritional deficiency diseases or caused by pharmaceutical drug side effects or interaction with the medical system.

## **Pearls of Wisdom**

Doug Winfrey and Dr. Wallach discuss a news article concerning macular degeneration. It outlines the story of the author's experiences with her own parents and AMD (age-related macular degeneration). The article outlines some of the popular treatments such as injecting a drug called Lucentis into the eye every six weeks. Costing up to \$2000 per injection so if the patient has it in both eyes that's \$4000 every six weeks translating into nearly 35,000 a year.

## **Callers**
