

Services Report

SERVICES VIRTUAL ITEM RESPONSES

This report displays your 5 most biologically coherent, or preferable, service Virtual Items with descriptions, followed by the dR responses to all service items scanned for.

TOP Services w/ Descriptions

83.53 **Tuning Fork Therapy**

Just as music effects the psyche, singular and specifically applied frequencies can impact the organs and systems of the body. Tuning Fork Therapy applies these principles to restore balance and harmony within the body.

82.74 **Steam Shower**

Steam showers can be used therapeutically for respiratory and sinus conditions such as asthma, bronchitis, and allergies. Steam showers may also assist in detoxifying the body and improving circulation throughout the body, leaving a patient feeling revitalized and relaxed. It may also improve and hydrate the skin, soothe sore muscles and joints and treat cellulite.

73.82 **Thai Body**

Thai Body work is a 2500 year old Ayurvedic based body science. It helps de-stress and is great for sore muscles and joints. A practitioner uses acupressure, reflexology, rocking, and slow assisted stretching. A client is fully clothed, on a cushioned mat on the floor.

73.00 **ZYTO SCAN**

Getting a ZYTO biocommunication scan is a simple and painless process. Simply place your hand on the ZYTO hand cradle while a scan is run. During the scan, subtle energetic impulses are introduced to your body through multiple input channels including the hand cradle. Your body will naturally respond to this communication and the ZYTO software records each response.

Scans are organized into what are called biosurveys. You've probably filled out a survey before; a series of questions that you provide answers to. A biosurvey is essentially the same thing, only you don't answer the 'questions' consciously, your body answers them directly. With biocommunication scanning, the 'question' is the Virtual Stimulus Item or (Virtual Items) and your response, which is recorded and analyzed by the ZYTO software, is a change in the electrical properties of your skin.

Different biosurveys will include different Virtual Items. Some biosurveys are general in nature and include Virtual Items concerned with overall wellness, others include Virtual Items relating to specific areas of the body or body processes, and some may deal with environmental factors like toxins or allergens.

Health practitioners use ZYTO products to help them make better decisions for their patients and clients. That's why ZYTO technology is referred to as decision support technology. It's important to note that ZYTO scans do not treat or diagnose.

72.20 **Wellness Coaching**

Whether you want to lose weight, build strength, release pain, feel better, sleep deeper, or improve health, we don't want to waste time, money or energy on your healing journey. You need an accountability coach and consultations to short circuit your journey to wellness.

All Services by dR

Tuning Fork Therapy 83.53	Steam Shower 82.74	Thai Body 73.82
ZYTO SCAN 73.00	Wellness Coaching 72.20	Russian-Stimulation 70.58
Vitamin B Injections 69.74	Rife Machine 69.11	Infrared Foot Massager 67.49
