Re: Freedom of Information Act (FOIA) Request
Dear Mrs. HOPKINS:

This is in response to your FOIA request dated June 25, 2021. We have provided you with the following record(s): the entire VA claims folder on file at this office.

This office will be providing your records on a compact disc (CD) for use on your personal computer. Only records of 10 pages or more are eligible for CD printing. The CD can be viewed on all computers through the use of Adobe Reader software, which is available online for free.

Please do not submit any of the enclosed documents to the VA as evidence to support a claim, as they are duplicates of existing records in your VA claims folder (and will not be considered as new and material evidence for the purpose of claims processing).

My review of the documents responsive to your request revealed that they contained information that falls within the disclosure protections of FOIA Exemption 6, 5 U.S.C. § 552(b)(6). FOIA Exemption 6 permits VA to withhold a document or information contained within a document if disclosure of the information would constitute a clearly unwarranted invasion of a living individual's personal privacy. Stated another way, VA may withhold information under FOIA Exemption 6 where disclosure of the information, either by itself or in conjunction with other information available to either the public or the FOIA requester, would result in an unwarranted invasion of an individual's personal privacy without contributing significantly to the public's understanding of the activities of the federal government. Specifically, the information I am withholding, as indicated on the enclosed documents, under FOIA Exemption 6 consists of the Third-Party Information and Third-Party Social Security Numbers as the individuals associated with this information have a personal privacy interest in it.

Your request was processed by the undersigned. You may appeal the determination made in this response to:

General Counsel (024)
Department of Veterans Affairs

(b) (6)

HOPKINS, MARSHALL

810 Vermont Avenue, N.W.
Washington, D.C. 20420

If you should choose to make an appeal, your appeal must be postmarked no later than sixty (60) calendar days after the date of the adverse determination. It must clearly identify the determination being appealed and must include any assigned request number.

The appeal should also include:

1. The name of the FOIA Officer, Marvis Harvey
2. The address of the component
3. The date of the component's determination, if any
4. The precise subject matter of the appeal

If you choose to appeal only a portion of the determination, you must specify which part of the determination you are appealing.

The appeal should include a copy of the request and VA's response, if any. The appeal should be marked FOIA Appeal.

Thank you for your interest in the Department of Veterans Affairs. Customer service is very important to us. If you have questions or concerns regarding your request for records under the Privacy Act or Freedom of Information Act, entitlement to VA benefits or the status of your claim, please contact the VA National Call Center at 1-800-827-1000. Refer to your reference/assigned case number on the upper right-hand corner of this letter when inquiring about your Privacy Act or Freedom of Information Act request.

Sincerely yours,

Regional Office Director

VA DATE STAMP
(DO NOT WRITE IN THIS SPACE)

STATEMENT IN SUPPORT OF CLAIM

INSTRUCTIONS: Read the Privacy Act and Respondent Burden on Page 2 before completing the form. Complete as much of Section I as possible. The information requested will help process your claim for benefits. If you need any additional room, use the second page.

SECTION I: VETERAN/BENEFICIARY'S IDENTIFICATION INFORMATION

NOTE: You will *either* complete the form online or by hand. Please print the information request in ink, neatly, and legibly to help process the form.

1. VETERAN/BENEFICIARY'S NAME *(First, Middle Initial, Last)*

Darlene R Hopkins

(b) (6)

4. VETERAN'S DATE OF BIRTH *(MM/DD/YYYY)*

Month 07 – Day 20 – Year 1943

5. VETERAN'S SERVICE NUMBER *(If applicable)*

6. TELEPHONE NUMBER *(Include Area Code)*

(620) 272-4822

7. E-MAIL ADDRESS *(Optional)*

themasterherbalist@yahoo.com

8. MAILING ADDRESS *(Number and street or rural route, P.O. Box, City, State, ZIP Code and Country)*

No. & Street: 310 Main St

Apt./Unit Number:

City: Altamont

State/Province: MO

Country:

ZIP Code/Postal Code: 64620-8185

SECTION II: REMARKS

(The following statement is made in connection with a claim for benefits in the case of the above-named veteran/beneficiary.)

In response to FOIAXpress#: 21-04507-F, I receive written correspondence that I was being sent my Husbands VA claims file on disc but no CD disc was ever sent.

Please re-establish my request for a complete copy of my husbands VA claims file so I can file for my survivor benefits.

VETERAN'S SOCIAL SECURITY NO. (b) (6) [redacted]

SECTION II: REMARKS *(Continued)*
(The following statement is made in connection with a claim for benefits in the case of the above-named veteran/beneficiary.)

SECTION III: DECLARATION OF INTENT

I CERTIFY THAT the statements on this form are true and correct to the best of my knowledge and belief.

9. SIGNATURE *(Sign in ink)*	10. DATE SIGNED *(MM/DD/YYYY)*
Darlene Hopkins	06/25/2020

PENALTY: The law provides severe penalties which include fine or imprisonment, or both, for the willful submission of any statement or evidence of a material fact, knowing it to be false.

PRIVACY ACT INFORMATION: The VA will not disclose information collected on this form to any source other than what has been authorized under the Privacy Act of 1974 or Title 38, Code of Federal Regulations 1.576 for routine uses (i.e., civil or criminal law enforcement, congressional communications, epidemiological or research studies, the collection of money owed to the United States, litigation in which the United States is a party or has an interest, the administration of VA Programs and delivery of VA benefits, verification of identity and status, and personnel administration) as identified in the VA system of records, 58VA21/22/28, Compensation, Pension, Education, and Vocational Rehabilitation and Employment Records - VA, published in the Federal Register. Your obligation to respond is required to obtain or retain benefits. VA uses your SSN to identify your claim file. Providing your SSN will help ensure that your records are properly associated with your claim file. Giving us your SSN account information is voluntary. Refusal to provide your SSN by itself will not result in the denial of benefits. The VA will not deny an individual benefits for refusing to provide his or her SSN unless the disclosure of the SSN is required by Federal Statute of law in effect prior to January 1, 1975, and still in effect. The requested information is considered relevant and necessary to determine maximum benefits under the law. The responses you submit are considered confidential (38 U.S.C. 5701). Information submitted is subject to verification through computer matching programs with other agencies.

RESPONDENT BURDEN: We need this information to obtain evidence in support of your claim for benefits (38 U.S.C. 501(a) and (b)). Title 38, United States Code, allows us to ask for this information. We estimate that you will need an average of 15 minutes to review the instructions, find the information, and complete this form. VA cannot conduct or sponsor a collection of information unless a valid OMB control number is displayed. You are not required to respond to a collection of information if this number is not displayed. Valid OMB control numbers can be located on the OMB Internet Page at **www.reginfo.gov/public/do/PRAMain**. If desired, you can call 1-800-827-1000 to get information on where to send comments or suggestions about this form.

Re: Freedom of Information Act (FOIA) Request
Dear Mrs. HOPKINS:

This is in response to your FOIA request dated March 11, 2021. We have provided you with the following record(s): the entire VA claims folder on file at this office.

This office will be providing your records on a compact disc (CD) for use on your personal computer. Only records of 10 pages or more are eligible for CD printing. The CD can be viewed on all computers through the use of Adobe Reader software, which is available online for free.

Please do not submit any of the enclosed documents to the VA as evidence to support a claim, as they are duplicates of existing records in your VA claims folder (and will not be considered as new and material evidence for the purpose of claims processing).

My review of the documents responsive to your request revealed that they contained information that falls within the disclosure protections of FOIA Exemption 6, 5 U.S.C. § 552(b)(6). FOIA Exemption 6 permits VA to withhold a document or information contained within a document if disclosure of the information would constitute a clearly unwarranted invasion of a living individual's personal privacy. Stated another way, VA may withhold information under FOIA Exemption 6 where disclosure of the information, either by itself or in conjunction with other information available to either the public or the FOIA requester, would result in an unwarranted invasion of an individual's personal privacy without contributing significantly to the public's understanding of the activities of the federal government. Specifically, the information I am withholding, as indicated on the enclosed documents, under FOIA Exemption 6 consists of the Social Security Numbers as the individuals associated with this information have a personal privacy interest in it.

Your request was processed by the undersigned. You may appeal the determination made in this response to:

General Counsel (024)

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

(b) (6)

HOPKINS, MARSHALL

Department of Veterans Affairs
810 Vermont Avenue, N.W.
Washington, D.C. 20420

If you should choose to make an appeal, your appeal must be postmarked no later than sixty (60) calendar days after the date of the adverse determination. It must clearly identify the determination being appealed and must include any assigned request number.

The appeal should also include:

1. The name of the FOIA Officer, Marvis Harvey
2. The address of the component
3. The date of the component's determination, if any
4. The precise subject matter of the appeal

If you choose to appeal only a portion of the determination, you must specify which part of the determination you are appealing.

The appeal should include a copy of the request and VA's response, if any. The appeal should be marked FOIA Appeal.

Thank you for your interest in the Department of Veterans Affairs. Customer service is very important to us. If you have questions or concerns regarding your request for records under the Privacy Act or Freedom of Information Act, entitlement to VA benefits or the status of your claim, please contact the VA National Call Center at 1-800-827-1000. Refer to your reference/assigned case number on the upper right-hand corner of this letter when inquiring about your Privacy Act or Freedom of Information Act request.

Sincerely yours,

Regional Office Director

Re: Freedom of Information Act (FOIA) Request
Dear Mrs. HOPKINS:

This letter acknowledges receipt of your FOIA request dated March 11, 2021. Your VA claim number or social security number will serve as your reference number. Please refer to this number when communicating with our office about your request.

We will begin searching for records responsive to your request that are within our holdings. We will grant you access to the requested records, *if found*, providing the records are not exempted from disclosure by law. Any releasable sections of the requested records shall be provided to you after redaction of the parts that are exempt.

Your request will be processed in the order of receipt. You may expect to receive a response as soon as possible. This office provides records of 10 pages or more on a compact disc (CD) for use on your personal computer. Records fewer than 10 total pages will be provided as paper copies. The CD can be viewed on all computers through the use of Adobe Reader software, which is available online for free. Responsive records will be sent via certified mail.

To request your responsive records on paper, please mail your request to:

Department of Veterans Affairs
Evidence Intake Center
Attn: Paper Copy Request
P.O. Box 4444
Janesville, WI 53547-4444

Thank you for your interest in the Department of Veterans Affairs. Customer service is very important to us. If you have questions or concerns regarding your request for records under the Privacy Act or Freedom of Information Act, entitlement to VA benefits or the status of your

VA DATE STAMP
(DO NOT WRITE IN THIS SPACE)

INTENT TO FILE A CLAIM FOR COMPENSATION AND/OR PENSION, OR SURVIVORS PENSION AND/OR DIC

(This Form Is Used to Notify VA of Your Intent to File for the General Benefit(s) Checked Below)

NOTE: Please read the Privacy Act and Respondent Burden below before completing the form.

SECTION I: CLAIMANT/VETERAN IDENTIFICATION

NOTE: You can *either* complete the form online or by hand. If completed by hand, print the information requested in ink, neatly and legibly to expedite processing of the form.

1. CLAIMANT'S NAME *(First, Middle Initial, Last)*: Darlene R Hopkins

(b) (6)

4. VETERAN'S DATE OF BIRTH (MM,DD,YYYY): Month 07 – Day 20 – Year 1943

5. VETERAN'S NAME *(First, Middle Initial, Last)* ***(If different from claimant)***: Marshall H Hopkins

(b) (6)

7. VETERAN'S SEX: ☐ MALE ☐ FEMALE

8. VETERAN'S SERVICE NUMBER *(If applicable)*:

9. CURRENT MAILING ADDRESS *(Number and street or rural route, P.O. Box, City, State, ZIP Code and Country)*

No. & Street: 310 Main St

Apt./Unit Number:

City: Altamont

State/Province: MO

Country:

ZIP Code/Postal Code: 64620 –

10. HAS THE VETERAN EVER FILED A CLAIM WITH VA? ☒ YES ☐ NO

11. TELEPHONE NUMBER *(Include Area Code)*: (620) 272-4822

12. EMAIL ADDRESS *(If applicable)*: themasterherbalist@yahoo.com

SECTION II: GENERAL BENEFIT ELECTION

IMPORTANT: *VA may not be able to use this form to establish an effective date for benefits if you **do not** select one or more of the general benefits listed below.*

13. I intend to file for the general benefit(s) checked below: ***(Choose all that apply)***

☐ COMPENSATION ☐ PENSION

NOTE: Only check the box below if you are a surviving dependent of the veteran.

☒ SURVIVORS PENSION AND/OR DEPENDENCY AND INDEMNITY COMPENSATION (DIC)

IMPORTANT: After receiving this form, VA will give you the appropriate application to file for the general benefit you select above. You can also apply for VA disability compensation online through eBenefits at **www.ebenefits.va.gov**. If you give VA a completed application for the selected general benefit within ***one*** year of filing this form, your completed application will be considered filed as of the date of receipt of this form. Only the ***first*** completed application for each selected general benefit that is received after you file this form will be considered filed as of the date of receipt of this form. You may indicate your intent to file for more than one general benefit on this form or you may submit a separate intent to file for each general benefit. Please complete as many fields in Section II as possible. VA cannot process this form if we cannot identify the claimant and veteran.

SECTION III: DECLARATION OF INTENT

By filing this form, I hereby indicate my intent to apply for one or more general benefits under the laws administered by VA. I acknowledge that: (1) this is ***not a claim for benefits***; (2) I must file a complete application for each general benefit with VA before VA will process my claim; and (3) a complete application for the same general benefit(s) as indicated on this form must be received within one year of the date VA receives this form for my application to be considered filed as of the date of this form.

14A. SIGNATURE OF CLAIMANT/AUTHORIZED REPRESENTATIVE: Darlene R Hopkins

14B. DATE SIGNED *(MM,DD,YYYY)*: 11 March 2021

15. NAME OF ATTORNEY, AGENT, OR VETERANS SERVICE ORGANIZATION *(Please Print)*

(NOTE: This form may only be completed by a Veterans Service Organization, attorney, or agent if a valid power of attorney has been completed.)

PRIVACY ACT NOTICE: VA will not disclose information collected on this form to any source other than what has been authorized under the Privacy Act of 1974 or Title 38, Code of Federal Regulations 1.576 for routine uses (i.e., civil or criminal law enforcement, congressional communications, epidemiological or research studies, the collection of money owed to the United States, litigation in which the United States is a party or has an interest, the administration of VA programs and delivery of benefits, verification of identity and status, and personnel administration) as identified in the VA system of records, 58VA21/22/28, Compensation, Pension, Education, and Vocational Rehabilitation and Employment Records - VA, published in the Federal Register. Your obligation to respond is required only to preserve a date of claim for an application that is received within one year of receipt of this form. VA uses your Social Security number to identify if you have a claim file and to ensure that your records are properly associated with your claim file. VA will not deny an individual benefits for refusing to provide his or her SSN unless the disclosure of the SSN is required by Federal Statute of law in effect prior to January 1, 1975, and still in effect. The requested information is considered relevant and necessary to determine the appropriate application and provide it to the claimant.

RESPONDENT BURDEN: We need this information to determine and to provide the claimant with the appropriate application for VA benefits (38 U.S.C. 5102). Title 38, United States Code, allows us to ask for this information. We estimate that you will need an average of 15 minutes to review the instructions, find the information, and complete this form. VA cannot conduct or sponsor a collection of information unless a valid OMB control number is displayed. You are not required to respond to a collection of information if this number is not displayed. Valid OMB control numbers can be located on the OMB Internet Page at www.reginfo.gov/public/do/PRAMain. If desired, you can call 1-800-827-1000 to get information on where to send comments or suggestions about this form.

DARLENE HOPKINS
310 MAIN ST
ALTAMONT MO 64620

MARSHALL H HOPKINS

Dear DARLENE HOPKINS:

We received your intent to file on March 11, 2021. You indicated you would like to file a claim for survivor benefits.

If your completed application is received within one year from the date that your intent to file was received and we decide that you are entitled to VA benefits, we may be able to compensate you from the date we received your intent to file.

If your completed application is not received within one year from the date that your intent to file was received and we decide that you are entitled to VA benefits, we can only compensate you from the date we received your completed application.

What Should You Do?

In order for us to start processing your claim, you must complete, sign, and return a VA Form 21-534EZ, *Application for DIC, Death Pension, and/or Accrued Benefits*, if you are the spouse or child of the Veteran.

If you are the parent of the Veteran, you must complete, sign, and return a VA Form 21-535, *Application for Dependency and Indemnity Compensation by Parent(s) (Including Accrued Benefits and Death Compensation When Applicable)*.

We will take no further action until we receive your completed application. To locate the appropriate form(s), please visit the following website: **www.va.gov/vaforms**.

Our records indicate that you have appointed DISABLED AMERICAN VETERANS as your authorized representative to assist you with your claim. We encourage you to consult with them prior to submission of your claim as they can assist with any questions you may have and help ensure that all necessary evidence has been submitted with your claim.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

If You Have Questions or Need Assistance

If you have any questions or need assistance with filing your claim, you may contact us by telephone, e-mail, or letter. You may also contact your appointed Veterans Service Organization and/or representative for assistance. If you are not represented, additional information on how to obtain representation is provided below.

If you	**Here is what to do.**
Telephone	Call us at 1-800-827-1000. If you use a Telecommunications Device for the Deaf (TDD), the Federal number is 711.
Use the Internet	Send electronic inquiries through the Internet at **https://iris.custhelp.com/**.
Write	VA now uses a centralized mail system. For all written communications, put your full name and VA file number on the letter. Please mail all written correspondence to the appropriate address listed on the attached *Where to Send Your Written Correspondence* chart, below.

In all cases, be sure to refer to your VA file number 529 56 7575.

If you are looking for general information about benefits and eligibility, you should visit our web site at **http://www.va.gov** or search the Frequently Asked Questions (FAQs) at **https://iris.custhelp.com/**.

We notified your appointed representative, DISABLED AMERICAN VETERANS, of VA's receipt of your intent to file. If you have questions or need assistance, you can also contact your representative.

Sincerely yours,

Regional Office Director

Where to Send Your Written Correspondence

The time it takes your response to reach VA affects how long it takes us to process your claim. We recommend responding electronically whenever possible. Only claimants or representatives can upload responses electronically currently. If you are not a claimant or representative, please send any correspondence to the appropriate mailing address noted below.

The **fastest** way to respond to VA is to upload your response electronically through VA.gov.

Visit **https://www.va.gov** and under **Disability** click "**Upload evidence to support your claim**."

VA.gov provides one easy location to upload correspondence as well as learn about filing claims, check claim status, find out how much money you have left to pay for school or training, or refill prescriptions and communicate with your health care team among many items.

If you need to mail your correspondence, identify the benefit type; then, use the corresponding mailing address below:

VA DATE STAMP
(DO NOT WRITE IN THIS SPACE)

FREEDOM OF INFORMATION ACT (FOIA) OR PRIVACY ACT(PA) REQUEST

INSTRUCTIONS: Read the Privacy Act and Respondent Burden information on Page 4 before completing the form. This form must be signed by the requester, authorized organization, or third party who has been authorized by the requester. For additional information on VA FOIA and PA requests visit our website at https://www.va.gov/FOIA/Requests.asp. You may also contact the VA at https://iris.custhelp.va.gov or call us toll-free at 1-800-827-1000. If you use a Telecommunications device for the deaf (TDD),the Federal Relay number is 711. VA forms are available at www.va.gov/vaforms.

SECTION I: REQUEST FOR INFORMATION ON YOURSELF

(If you are seeking information on yourself, complete Sections I, III, V and VI. Complete Section IV, If applicable.)

NOTE: You may complete the form on-line or by hand. If completed by hand, print the information requested in ink, neatly and legibly, and completely fill in each applicable circle to help expedite processing of the form.

1. NAME (First, Middle Initial, Last)

(b) (6)

3. ALIEN REGISTRATION NUMBER (A-number) (If applicable)

4. VA FILE NUMBER (If applicable)

5. DATE OF BIRTH
Month Day Year

6. PLACE OF BIRTH (Provide City and State, County and State or City and Country)

7. CURRENT MAILING ADDRESS (Number and street or rural route, P.O. Box, City, State, ZIP Code and Country)

No. & Street

Apt./Unit Number City

State/Province Country ZIP Code/Postal Code –

- ( ) PENSION BENEFIT DOCUMENTS
- ( ) EDUCATION BENEFIT RECORDS
- ( ) FINANCIAL RECORDS
- ( ) OTHER (Specify)

SECTION IV: REMARKS

18. REMARKS (If any)

I wish to request a complete copy of my husbands VA claims file

SECTION V: WILLINGNESS TO PAY FEES

19. **IMPORTANT**: For the purpose of fees only, FOIA divides requesters into three categories: (1) commercial requesters may be charged fees for searching for records, reviewing the records, and photocopying them; (2) educational, non-commercial scientific institutions, and representatives of the news media are charged for photocopying after the first 100 pages; (3) all other requesters (requesters who do not fall into any of the other two categories) are charged for photocopying after the first 100 pages and for time spent searching for records in excess of two hours. VA charges $0.15 per single-sided page for photocopying. Actual costs are charged for a format other than paper copies.

An agency may grant fee waivers if the requester successfully demonstrates that the disclosure of information is in the publics interest because it is likely to contribute significantly to the public understanding of the operations or activities of the government and is not primarily in the commercial interest of the requester.

( ) I AM WILLING TO PAY THE APPLICABLE FEES UP TO THE AMOUNT OF $ .00

(●) IF YOU BELIEVE YOU ARE ENTITLED TO A FEE WAIVER OR EXPEDITED PROCESSING, INDICATE HERE: Veterans Spouse

SECTION VIII: POWER OF ATTORNEY (POA) CERTIFICATION AND SIGNATURE
(Valid only if Section II has been completed and requester has authorized POA representation)

I CERTIFY THAT the requester has authorized me as the undersigned representative and certifies the truth and completion of the information contained in this document to the best of the requesters knowledge and belief.

NOTE: A POA's signature ***will not*** be accepted unless a valid VA Form 21-22, *Appointment of Veterans Service Organization as Claimant's Representative* or VA Form 21-22a, *Appointment of Individual as Claimant's Representative* is of record or attached to this request.

22A. POA/AUTHORIZED REPRESENTATIVE SIGNATURE)	22B. DATE SIGNED
	Month – Day – Year

PENALTY: The law provides severe penalties which include fine or imprisonment, or both, for the willful submission of any statement or evidence of a material fact knowing it to be false, or for fraudulent receipt of any document to which you are not entitled.

PRIVACY ACT NOTICE: VA will not disclose information collected on this form to any source other than what has been authorized under the Privacy Act of 1974 or Title 38, Code of Federal Regulations 1.576 for routine uses (i.e., civil or criminal law enforcement, congressional communications, epidemiological or research studies, the collection of money owed to the United States, litigation in which the United States is a party or has an interest, the administration of VA programs and delivery of VA benefits, verification of identity and status, and personnel administration) as identified in the VA system of records, 58VA21/22/28, Compensation, Pension, Education, Vocational Rehabilitation and Employment Records - VA, published in the Federal Register. Your obligation to respond is voluntary.

RESPONDENT BURDEN: We need this information to identify and obtain the information you are requesting. Title 38, United States Code, allows us to ask for this information. We estimate that you will need an average of 5 minutes to review the instructions, find the information, and complete this form. VA cannot conduct or sponsor a collection of information unless a valid OMB control number is displayed. You are not required to respond to a collection of information if this number is not displayed. Valid OMB control numbers can be located on the OMB Internet Page at www.reginfo.gov/public/do/PRAMain. If desired, you can call 1-800-827-1000 to get information on where to send comments or suggestions about this form.

VETERAN'S SOCIAL SECURITY NUMBER (b) (6) [redacted]

SECTION IV: AUTHORIZATION INFORMATION

19. AUTHORIZATION FOR REPRESENTATIVE'S ACCESS TO RECORDS PROTECTED BY SECTION 7332, TITLE 38, U.S.C. - By checking the box below I authorize VA to disclose to the service organization named on this appointment form any records that may be in my file relating to treatment for drug abuse, alcoholism or alcohol abuse, infection with the human immunodeficiency virus (HIV), or sickle cell anemia.

☒ **I authorize** the VA facility having custody of my VA claimant records to disclose to the service organization named in Item 15 all treatment records relating to drug abuse, alcoholism or alcohol abuse, infection with the human immunodeficiency virus (HIV), or sickle cell anemia. Redisclosure of these records by my service organization representative, other than to VA or the Court of Appeals for Veterans Claims, is not authorized without my further written consent. This authorization will remain in effect until the earlier of the following events: (1) I revoke this authorization by filing a written revocation with VA; or (2) I revoke the appointment of the service organization named in Item 15, either by explicit revocation or the appointment of another representative.

20. LIMITATION OF CONSENT- I authorize disclosure of records related to treatment for all conditions listed in Item 19 except:

☐ DRUG ABUSE ☐ INFECTION WITH THE HUMAN IMMUNODEFICIENCY VIRUS (HIV)

☐ ALCOHOLISM OR ALCOHOL ABUSE ☐ SICKLE CELL ANEMIA

21. AUTHORIZATION TO CHANGE CLAIMANT'S ADDRESS - By checking the box below, I authorize the organization named in Item 15 to act on my behalf to change my address in my VA records.

☒ **I authorize** any official representative of the organization named in Item 15 to act on my behalf to change my address in my VA records. This authorization does not extend to any other organization without my further written consent. This authorization will remain in effect until the earlier of the following events: (1) I file a written revocation with VA; or (2) I appoint another representative, or (3) I have been determined unable to manage my financial affairs and the individual or organization named in Item 16A is not my appointed fiduciary.

I, the claimant named in Items 1 *or* 10, hereby **appoint** the service organization named in Item 15 as my representative to prepare, present and prosecute my claim(s) for any and all benefits from the Department of Veterans Affairs (VA) based on the service of the veteran named in Item 1. I authorize VA to release any and all of my records, to include disclosure of my Federal tax information (other than as provided in Items 19 and 20), to my appointed service organization. I understand that my appointed representative will not charge any fee or compensation for service rendered pursuant to this appointment. I understand that the service organization I have appointed as my representative may revoke this appointment at any time, subject to 38 CFR 20.608. *Additionally, in some cases a veteran's income is developed because a match with the Internal Revenue Service necessitated income verification. In such cases, the assignment of the service organization as the veteran's representative is valid for only five years from the date the claimant signs this form for purposes restricted to the verification match.* Signed and accepted subject to the foregoing conditions.

SECTION V: SIGNATURES

NOTE: THIS POWER OF ATTORNEY DOES NOT REQUIRE EXECUTION BEFORE A NOTARY PUBLIC

22A. SIGNATURE OF VETERAN OR CLAIMANT *(Do Not Print)*	22B. DATE SIGNED *(MM/DD/YYYY)*
Darlene D Hopkins	11 march 2021
23A. SIGNATURE OF VETERANS SERVICE ORGANIZATION REPRESENTATIVE NAMED IN ITEM 16A *(Do Not Print)*	23B. DATE SIGNED *(MM/DD/YYYY)*
Daniel Knabe	03/11/2021

NOTE: As long as this appointment is in effect, the organization named herein will be recognized as the sole representative for preparation, presentation and prosecution of your claim before the Department of Veterans Affairs in connection with your claim or any portion thereof.

VA USE ONLY	COPY OF VA FORM 21-22 SENT TO:	DATE SENT	ACKNOWLEDGED *(Date)*	REVOKED *(Reason and date)*
	☐ VR&E FILE ☐ EDU FILE ☐ LG FILE ☐ INSURANCE FILE			

PENALTY: The law provides severe penalties which include fine or imprisonment, or both, for the willful submission of any statement of a material fact, knowing it to be false or for the fraudulent acceptance of any payment to which you are not entitled.

DEPARTMENT OF VETERANS AFFAIRS

In Reply Refer To: 330/22R4/MJR
(b) (6) H

DARLENE HOPKINS
310 MAIN ST
ALTAMONT, MO 64620

Dear Ms. Hopkins:

We are writing to you about your claim for dependency indemnity compensation, survivors' pension, and accrued benefits.

How We Made Our Decision

We have enclosed a copy of our Rating Decision for your review. It provides a detailed explanation about our decision. You can find the evidence we considered in the section titled "*Evidence*." The reasons for our decision can be found in the portion of the rating titled "*Reasons for Decision*" or "*Reasons and Bases*".

Favorable Findings

Favorable Finding(s) applicable to the decision on your claim for benefits are listed below:

Active Duty Service	The Veteran had the minimum active duty requirements in order to qualify for pension.
Wartime Service	The Veteran had wartime service.
Character of Service	The Veteran's character of service meets the requirements to qualify for pension.

Elements Not Met

For the elements not met that are required to grant benefits, please see the denial reasons below.

Please refer to the enclosed VA Form 21P-10199, "*Legal Summary - Survivors Pension, Dependency and Indemnity Compensation, and Accrued Benefits*" for the laws used in deciding your claim.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

(b) (6)
Hopkins, Marshall H

What We Decided

Entitlement to Dependency and Indemnity Compensation under 38 U.S.C. 1318 is denied.

Entitlement to Dependency and Indemnity Compensation under 38 USC 1151 is denied.

Service connection for cause of death is denied.

The evidence you submitted shows your income effective July 27, 2020 exceeds the maximum annual pension limit. Therefore, we have disallowed your claim for benefits.

The rate of pension payable depends upon the amount of your family income and number of dependents. If your family income exceeds the applicable pension limit, benefits are not payable.

The income limit for a surviving spouse with one dependent is $12,072.00.

Your income for VA purposes is $23,316.00 based on the following income and allowable expenses:

INCOME	SOURCE
$9,888.00	Retirement Income Annually
$13,428.00	Social Security Income Annually - Child

You Reported Receiving Social Security Income

On your application you did not report you child Kerri Hopkin's Social Security income. However, the Social Security Administration (SSA) has reported her rate of entitlement effective December 2019 was $1,119.00. The law requires that we count the amount of $1,119.00 when determining your eligibility for VA pension. If this information is incorrect, please provide us with a copy of her Social Security benefit letter and we will reconsider this decision.

What Can You Do?

If your income decreases or your medical expenses increase you may reapply for VA pension benefits.

If you would like us to determine your eligibility from (the earliest entitlement date), please complete, sign, and return the following enclosed forms:

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

- VA Form 20-0995, Decision Review Request: Supplemental Claim;
- VA Form 21P-0519s-1, Improved Pension Eligibility Verification Report (EVR), for the period of July 27, 2020 through July 31, 2021. We have also enclosed VA Form 21P-0510, Eligibility Verification Report Instructions, to assist you in filling out this form.;
- VA Form 21P-8416, Medical Expense Report, for the period of July 27, 2020 through July 31, 2021.

You cannot claim expenses for the following:

- bills paid by someone else
- bills paid by insurance
- bills you paid, if an insurance company reimbursed you
- bills that are not for health expenses

To claim an income change and family medical expenses, you must return the completed forms to this office no later than December 31, 2022. We may consider family medical expenses you paid after July 27, 2020.

If you wish to file a claim for special monthly pension, please make your claim on the enclosed VA Form 21-2680, *Examination for Housebound Status or Permanent Need for Regular Aid and Attendance.*

Accrued Denied

Accrued benefits (benefits due and not paid to the veteran at the time of death) cannot be paid as there are no accrued amounts available.

What You Should Do If You Disagree With Our Decision

If you do not agree with this decision, you have one year from the date of this letter to select a review option to preserve your earliest effective benefit date. The review options and their proper applications are as follows, for a(n):

- **Supplemental Claim**, complete **VA Form 20-0995**, *Decision Review Request: Supplemental Claim*
- **Higher-Level Review**, complete **VA Form 20-0996**, *Decision Review Request: Higher-Level Review*
- **Appeal to the Board**, complete **VA Form 10182**, *Decision Review Request: Board Appeal (Notice of Disagreement)*

Hopkins, Marshall H

Please see the enclosed VA Form 20-0998, *Your Rights to Seek Further Review of Our Decision.* It explains your options for an additional review. You may obtain any of the required applications by downloading them from www.va.gov/vaforms/ or by contacting us. You can also learn more about the disagreement process at www.va.gov/decision-reviews. If you would like to obtain or access evidence used in making this decision, please contact us as noted below. Some evidence may be obtained by signing in at www.va.gov.

Where to Send Your Written Correspondence

VA now uses a centralized mail system. For all written communications, put your full name and VA file number on the letter. Please send all correspondence to the appropriate location listed on the attached *Where to Send Your Written Correspondence.*

Do You Have Questions Or Need Assistance?

If you have any questions, call us toll-free by dialing 1-800-827-1000. Our TDD number for the hearing impaired is 711. Our TDD number for international callers is 1-800-829-4833. *If you call, please have this letter with you.*

Sincerely yours,

RO Director

MARSHALL HOPKINS

VA File Number
(b) (6) [redacted]

Represented By:
MISSOURI VETERANS COMMISSION
Rating Decision
01/07/2021

INTRODUCTION

The records reflect that MARSHALL H. HOPKINS was a Veteran of the Gulf War Era, Peacetime and Vietnam Era. The veteran served in the Air Force from December 2, 1963 to June 9, 1967 and the Air Force Reserves from December 28, 1990 to February 25, 1991. You filed a new claim for benefits that was received on August 17, 2020. Based on a review of the evidence listed below, we have made the following decision(s) on your claim.

DECISION

1. Entitlement to Dependency and Indemnity Compensation under 38 U.S.C. 1318 is denied.

2. Entitlement to Dependency and Indemnity Compensation under 38 USC 1151 is denied.

3. Service connection for cause of death is denied.

EVIDENCE

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

- VA Form 21-0966, Intent to File a Claim for Compensation and/or Pension, or Survivors pension and/or DIC received 07/27/2020
- VA notification letter dated 07/31/2020
- VA Form 21-534EZ, Application for Dependency and Indemnity Compensation, Death Pension and/or Accrued Benefits received 08/17/2020
- Death Certificate of the Veteran received 08/17/2020
- VA Form 21P-0969, Income and Asset Statement in Support of a Claim for Pension or Parents' Dependency and Indemnity Compensation (DIC) received 08/17/2020
- VA development letter dated 09/03/2020
- VA Form 21-4138, Statement in Support of Claim received 09/25/2020
- VA development letter dated 10/08/2020
- VA treatment reports, Kansas City, Amarillo, Memphis, Denver, and Albuquerque VAMCs, for the time period of 10/28/2003 through 10/17/2015
- VA notification letter dated 11/12/2020
- We have been unable to obtain records from Amarillo VAMC for the period of 01/14/2003 through 05/01/2006. We have determined that these records do not exist. We will now make a decision based on the evidence of record.
- VA Medical Opinion dated 01/05/2020
- VA notification letter dated 11/12/2020
- Review of the electronic claims folder of the veteran
- Service records of the veteran (to include service treatment records and copies of documents from the official military personnel file for the veteran's periods of active and reserve service), for the time period of 11/1963 through 07/1994, received on 10/22/1996

REASONS FOR DECISION

1. Entitlement to Dependency and Indemnity Compensation under 38 U.S.C. 1318.

Although the veteran's death may not be due to service-related conditions, Dependency and Indemnity Compensation benefits may be payable as if the cause of death were service connected if the cause of the veteran's death was not due to willful misconduct and the veteran was continuously rated totally disabled by reason of service connected disabilities for a period of 10 years or more immediately preceding death; or for five years if the total evaluation was continuously in effect from the date of discharge from military service; or for one year if the veteran was a former POW who died after September 30, 1999. (38 CFR 3.22, 38 USC 1318)

Although the veteran met the schedular requirements (based on service-connected disabilities) for a potential total evaluation during his lifetime, the Veteran was not considered totally disabled from service-connected disabilities for any period prior to his death.

Entitlement to Dependency and Indemnity Compensation is not established because a total evaluation had not been in effect for more than 10 continuous years preceding death. Entitlement to Dependency and Indemnity Compensation (DIC) under 38 U.S.C. 1318 is denied.

2. Entitlement to Dependency and Indemnity Compensation under 38 USC 1151.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

We have denied entitlement to Dependency and Indemnity Compensation (DIC) under 38 USC 1151 because the evidence fails to establish that VA medical or educational services were the proximate cause of death.

Entitlement to Dependency and Indemnity Compensation (DIC) under 38 USC 1151 may be established for the death of a veteran if the evidence shows that the veteran's death was caused by VA hospitalization, medical or surgical treatment, vocational rehabilitation, compensated work therapy program (CWT), or as the result of having submitted to a VA medical examination. The evidence must show that the veteran's death is actually the result of the VA care. Specifically, carelessness, negligence, lack of proper skill, error in judgment, or similar instance of fault on the part of the Department in furnishing the hospital care, medical or surgical treatment, or examination must be shown; or the proximate cause of death must be an event not reasonably foreseeable. For training and rehabilitation services or compensated work therapy program, it must be shown that the veteran's participation in an essential activity or function of the training, services, or CWT program provided or authorized by VA proximately caused the veteran's death.

To establish causation, the evidence must show that the hospital care, medical or surgical treatment, or examination resulted in the veteran's death. Merely showing that a veteran received care, treatment, or examination and that that the veteran has died does not establish cause. 38 C.F.R. § 3.361(c)(1). Hospital care, medical or surgical treatment, or examination cannot cause the continuance or natural progress of a disease or injury for which the care, treatment, or examination was furnished unless VA's failure to timely diagnoses and properly treat the disease or injury proximately caused the continuance or natural progress. 38 C.F.R. § 3.361(c)(2). Death caused by a veteran's failure to follow properly given medical instructions is not caused by hospital care, medical or surgical treatment, or examination. 38 C.F.R. § 3.361(c)(3).

To establish that carelessness, negligence, lack of proper skill, error in judgment, or similar instance of fault on VA's part in furnishing hospital care, medical or surgical treatment, or examination proximately caused a veteran's death, it must be shown that VA failed to exercise the degree of care that would be expected of a reasonable health care provider; or, that VA furnished the hospital care, medical or surgical treatment, or examination without the Veteran's informed consent. 38 C.F.R. § 3.361(d)(1).

Whether the proximate cause of a Veteran's death was an event not reasonably foreseeable is in each claim to be determined based on what a reasonable health care provider would have foreseen. The event need not be completely unforeseeable or unimaginable but must be one that a reasonable health care provider would not have considered to be an ordinary risk of the treatment provided. 38 C.F.R. § 3.361(d)(2).

As specified in 38 C.F.R. § 3.361(d)(2), in determining whether an event was reasonably foreseeable, VA will consider whether the risk of that event was the type of risk that a reasonable health care provider would have disclosed in connection with the informed consent procedures of 38 C.F.R. § 17.32.

On your correspondence that we received on 09/25/2020, you stated that you were seeking

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

entitlement to compensation under 38 U.S.C. 1151, claiming that the veteran was given a clean bill of health by VA doctors from the Amarillo VAMC after a colonoscopy/follow-up visit for hernia surgery in August 2015. The claimant stated that "apparently during the colonoscopy his bowels were nicked", and that the veteran was subsequently admitted to the Memphis VAMC and had 3/4 of his colon surgically removed, but later passed away.

A layperson may provide competent medical evidence regarding symptoms. However, a lay opinion is not entitled to any weight when the determinative issue involves questions of medical causation and a medical diagnosis (Espiritu v. Derwinski). The record does not reflect that you possess the medical training and expertise to diagnose or offer an opinion as to the etiology of any claimed disability. When the determinative issue is one of medical causation or a diagnosis, only those with specialized training or expertise are competent to provided evidence on an issue (Jones v. Brown, Espiritu v. Derwinski).

The instructions with your FDC application explained how the application should be filled out and explained what evidence should be submitted to support your claim. The instructions also included full notification of your rights under the Veterans Claims Assistance Act. Specifically, in regard to your claim for entitlement to Dependency and Indemnity Compensation under 38 USC 1151, we informed you that you must provide evidence showing that the veteran's death was a result of undergoing VA hospitalization, medical or surgical treatment, examination, or training, AND that the veteran's death was the direct result of VA fault such as carelessness, negligence, lack of proper skill, or error in judgment: OR, the direct result of an event that was not a reasonably expected result or complication of the VA care or treatment; OR, or the direct result of participation in a VA Vocational Rehabilitation and Employment or compensated work therapy program.

Further, in our VA development letter to you dated 10/08/2020, we requested medical evidence to support your claim for Dependency and Indemnity Compensation under 38 U.S.C. 1151.

Specifically, in regard to your claim for entitlement to Dependency and Indemnity Compensation under 38 USC 1151, we informed you that you must provide evidence that shows that as a result of VA hospitalization, medical or surgical treatment, examination, or training, the veteran had an additional disability or disabilities, or an aggravation of an existing injury or disease, and that the disability was the direct result of VA fault such as carelessness, negligence, lack of proper skill, or error in judgment, or not a reasonably expected result or complication of the VA care or treatment, or the direct result of participation in a VA Vocational Rehabilitation and Employment or compensated work therapy program.

You did not provide us with any additional medical evidence; however, we were able to review the veteran's private treatment reports of record from we were able to review the veteran's VA treatment reports from the Kansas City, Amarillo, Memphis, Denver, and Albuquerque VAMCs, for the time period of 10/28/2003 through 10/17/2015. These VA medical records contain findings of small bowel infarction; however, none of these reports specifically relate the death of the veteran to treatment at the Amarillo VAMC.

Therefore, we submitted the veteran's claim folder to a VA examiner to further evaluate a

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

possible relationship between the cause of the veteran's death and the VA medical treatment that he received. After a review of the evidence of record, the examiner opined that the veteran's death was less likely than not (less than 50 percent probability) a result of the VA medical treatment that he received.

In the rational that he provided for his opinion, the VA examiner stated that "Medical records document that the Veteran presented to the Memphis VAMC with necrotic small bowel, associated small bowel perforation, requiring extensive small bowel resection. There is no documentation of colonic pathology or the need for colonic resection. There is no documentation in the medical record that the Veteran had a colonoscopy at any point either prior to or during his hospitalization at the Amarillo VAMC in 8/2015. In fact, he repeatedly refused evaluation with colonoscopy. He underwent cystoscopy at the time as he presented to the Amarillo VAMC 8/2015, with obstructive uropathy, bilateral hydronephrosis and hydroureters and pyelonephritis. There is no indication in the medical records that his bowel was nicked either at the time of his recurrent right inguinal hernia repair 8/2015 or during the cystoscopy that was performed shortly after his right inguinal hernia surgery. Both procedures are documented in the medical record to have been performed without complication. The Veteran's presentation at the Memphis VAMC 9/2015, with necrotic small bowel, and small perforation, as well as sepsis and multiorgan system failure was unanticipated and the clearly the result of an event not reasonably foreseeable. The etiology of the Veteran's small bowel infarct was never elucidated, although he was noted to have the new onset of atrial fibrillation at the time of his hospitalization 9/2015 at the Memphis VAMC. It is possible that his infarcted small bowel was due to cardiac embolization. Review of medical records documents appropriate medical and surgical care at the Kansas City VAMC, the Amarillo VAMC and the Memphis VAMC. There is no indication whatsoever that the veterans death was the result of carelessness, negligence, lack of proper skill, error in judgment, or similar fault on the part of the department of veterans affairs in furnishing the hospital care, medical or surgical treatment, or examination."

Further, the VA examiner stated "a review of medical records documents the Veteran's history of preexisting poorly controlled DM. He underwent uncomplicated repair of recurrent right inguinal hernia 8/2015. Following his discharge from the hospital after the hernia repair, he developed bladder outlet obstruction with bilateral hydronephrosis, hydroureter and pyelonephritis. He was appropriately managed for this condition at the Amarillo VAMC. He was subsequently admitted emergently to the Memphis VAMC with small bowel necrosis/gangrene and perforation with sepsis, and multisystem organ failure. His presentation was complicated by hyponatremia, acute kidney injury, altered mental status and CHF. He was noted to have new onset atrial fibrillation. The Veteran received appropriate treatment at the Memphis VAMC, including intubation, mechanical ventilation, pressor support, antibiotics, crystalloid administration, insulin, and emergent surgery with bowel resection for gangrenous necrotic small bowel complicated by bowel perforation. The only iatrogenic complication that occurred during the terminal hospitalization was pneumothorax that occurred during subclavian line placement, managed with chest tube placement. This complication did not contribute to the Veteran's death. His extensive small bowel infarction with small bowel gangrene, necrosis and perforation were the proximate cause of the Veteran's death. Such extensive small infarction is typically a terminal event despite appropriate and aggressive management as the Veteran received. The treatment the veteran received in connection with his/her death recorded as small bowel infarction with contributing conditions (not resulting in the immediate cause of death), to include diabetes, hyperlipidemia,

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

and inguinal hernias, was the not result of carelessness, negligence, lack of proper skill, error in judgment, or similar instance of fault on VA's part in furnishing care, medical or surgical treatment, or examination."

From the plain language of the statute, it is clear that to establish entitlement to Dependency and Indemnity Compensation (DIC) under 38 USC 1151, all three of the following factors must be shown: (1) Disability/additional disability, (2) that VA hospitalization, treatment, surgery, examination, or training was the cause of such disability, and (3) that there was an element of fault on the part of VA in providing the treatment, hospitalization, surgery, etc., or that the disability resulted from an event not reasonably foreseeable.

To establish causation, the evidence must show that the hospital care, medical or surgical treatment, or examination resulted in the veteran's additional disability or death. Merely showing that a veteran received care, treatment, or examination and that the veteran has an additional disability or died does not establish causation. 38 C.F.R. § 3.361(c)(1).

Therefore, entitlement to Dependency and Indemnity Compensation (DIC) under 38 USC 1151 is not established as the veteran's death was not caused by VA hospitalization, medical or surgical treatment, vocational rehabilitation, compensated work therapy program (CWT), or as the result of having submitted to a VA medical examination. {38 USC 1151}. For medical services, the evidence must show that fault on VA's part or an event not reasonably foreseeable proximately caused death. Entitlement to Dependency and Indemnity Compensation (DIC) under 38 USC 1151 is denied because the evidence fails to establish that VA medical or educational services were the proximate cause of death.

3. Service connection for the cause of death.

Service connection may be granted for a disability which began in or was caused by some event or experience in military service, or if a disability pre-existed such service, was aggravated therein. (38 CFR 3.303)

Service connection may also be granted on a presumptive basis if an applicable chronic disability is manifested to a compensable degree (severe enough to be evaluated at least 10 percent disabling) within a year after military discharge. (38 CFR 3.309)

The death of a veteran will be considered as having been due to a service-connected disability when the evidence establishes that such disability was either the principal or a contributory cause of death. (38 CFR 3.312)

Service connection for the cause of death may be granted to a reserve or National Guard service member if the
service person was disabled during "active" duty for training (ADT or ACDUTRA) due to a disease or injury incurred in the line of duty, AND the disease or injury caused or contributed to the service person's death. Service connection for the cause of death may also be granted to a reserve or National Guard service member if the service person was disabled during " inactive"

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

duty training (IADT) due to an injury incurred or aggravated in the line of duty AND that injury caused or contributed to the service person's death, OR if the service member suffered an acute myocardial infarction, cardiac arrest, or cerebrovascular accident that occurred during such training; AND that injury (acute myocardial infarction, cardiac arrest, or cerebrovascular accident) caused or contributed to the service person's death. (38 CFR 3.6)

We received your claim for Dependency and Indemnity Compensation (DIC) under our Fully Developed Claim (FDC) Program on 08/17/2020. The instructions with your FDC application explained how the application should be filled out and explained what evidence should be submitted to support your claim. The instructions also included full notification of your rights under the Veterans Claims Assistance Act. As you submitted and signed your claim on a VA Form 21-534EZ, Application for Dependency and Indemnity Compensation, Death Pension and/or Accrued Benefits under our FDC Program, you were informed of the evidence which was needed in order to support your claim, and you have certified that you have enclosed all the information or evidence to support your claim, and that you have no other information or evidence to give VA to support your claim.

The death certificate documents that the veteran died on 09/18/2015. The cause of death is shown as small bowel infarction with contributing conditions (not resulting in the immediate cause of death), to include diabetes, hyperlipidemia, and inguinal hernias.

According to 38 CFR 3.159 (c)(2), VA will make as many requests as are necessary to obtain relevant records from a Federal department or agency. These records include but are not limited to military records, including service medical records; medical and other records from VA medical facilities; records from non-VA facilities providing examination or treatment at VA expense; and records from other Federal agencies, such as the Social Security Administration. VA will end its efforts to obtain records from a Federal department or agency only if VA concludes that the records sought do not exist or that further efforts to obtain those records would be futile. Cases in which VA may conclude that no further efforts are required include those in which the Federal department or agency advises VA that the requested records do not exist or the custodian does not have them.

The claimant must cooperate fully with VA's reasonable efforts to obtain relevant records from Federal agency or department custodians. If requested by VA, the claimant must provide enough information to identify and locate the existing records, including the custodian or agency holding the records; the approximate time frame covered by the records; and, in the case of medical treatment records, the condition for which treatment was provided. In the case of records requested to corroborate a claimed stressful event in service, the claimant must provide information sufficient for the records custodian to conduct a search of the corroborative records. If necessary, the claimant must authorize the release of existing records in a form acceptable to the custodian or agency holding the records.

Collectively, we were able to review the veteran’s VA treatment reports from the Kansas City, Amarillo, Memphis, Denver, and Albuquerque VAMCs, for the time period of 10/28/2003 through 10/17/2015.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

You informed us that the veteran's treatment from the Memphis VAMC (from 09/18/2015) and Amarillo VAMC (from 01/14/2003) were pertinent to your claim. We were able to review the veteran's VA treatment records from the Memphis VAMC for the time period of 09/16/2015 through 10/17/2015. We were also able to obtain the veteran's records from the Amarillo VAMC from 05/02/2006 through 10/18/2016. (If you feel that there are additional records prior to May 2, 2006 which would be pertinent to your claim, please tell us.)

These VA medical records contain findings of small bowel infarction, diabetes, hyperlipidemia, and inguinal hernias. However, none of these reports specifically relate the death of the veteran to military service.

As of the date of this Rating Decision, evidence establishing a relationship between the death of the veteran and military service has not been received. Lastly, the evidence of record did not reveal that the veteran was disabled due to an injury incurred or aggravated during a period of "active" or "inactive" duty for training. The evidence of record also did not reveal that the veteran suffered an acute myocardial infarction, cardiac arrest, or cerebrovascular accident during a period of "inactive" duty for training.

Therefore, we have denied service connection for the cause of death because there was no evidence supporting a relationship between the listed cause of death and the military service of the veteran, nor was diabetes shown to be manifested to a compensable degree (severe enough to be evaluated at least 10 percent disabling) within one year of military discharge. Also, the evidence did not reveal that the veteran's death was due to an injury incurred or aggravated during a period of "active" or "inactive" duty for training, nor did the evidence show that the veteran suffered an acute myocardial infarction, cardiac arrest, or cerebrovascular accident during a period of "inactive" duty for training.

Department of Veterans Affairs

YOUR RIGHTS TO SEEK FURTHER REVIEW OF OUR DECISION

After careful and compassionate consideration of the matter(s) before VA, we have reached a decision. This document outlines your rights to seek further review of our decision on any issue with which you are dissatisfied or disagree. This document does not apply to decisions issued by the Board of Veterans' Appeals (Board), which have a separate rights notice. For **most VA benefits**, you must elect one of the review options discussed below within **one year** of the date on your decision notice letter to preserve your right to receive the maximum possible benefit. **Consult your decision notice letter for specific filing time limits.** If you are a party to a **contested claim**, you must file an appeal to the Board within **60 days** of the date on your decision notice letter in order to seek review. All parties to a contested claim will have received notice of the decision. See the section below regarding filing an appeal to the Board. You may select different review options for each issue decided by VA. The options are as follows:

Review Options	VA Benefit Claim	Parties to a Contested Claim	Insurance Claim	Fiduciary Decision
Supplemental Claim	✓	Not Available	✓	Not Available
Higher-Level Review	✓	Not Available	✓	✓
Appeal to the Board	✓	✓	✓	✓
U.S. District Court Complaint	Not Available	Not Available	✓	Not Available

VA benefits include Compensation, Pension/Survivors Benefits, Education, Loan Guaranty, Vocational Rehabilitation & Employment, Veterans Health Administration, or National Cemetery Administration.

You **MAY NOT** concurrently file for review of any single issue using more than one option at a time. The following is an overview of each option to help you select the most appropriate course of action. You can also find detailed information on all of the available review options and apply at www.vets.gov.

Descriptions of Review Options

Supplemental Claim

Use this option when you have additional evidence that is NEW AND RELEVANT to support granting the benefit(s) sought or you can identify existing relevant records that you would like VA to obtain. (**NEW evidence** means information not previously submitted to VA, and **RELEVANT evidence** means information that tends to prove or disprove a matter at issue.)

VA will assist you in gathering new and relevant evidence to support a Supplemental Claim.

Higher-Level Review

Use this option when you have NO additional evidence to submit, or that you would like VA to obtain, in support of a previously decided issue.

You ***may not*** request a Higher-Level Review of a Higher-Level Review decision or a Board decision.

The designated reviewer will conduct a brand new review of the issue(s) based on the evidence that was before VA at the time of the prior decision(s). An **informal conference** is available to you and/or your representative, if you choose to exercise this option. The purpose of this telephonic contact is to point out specific errors in the case. VA will not consider any new evidence.

Appeal to the Board

Use this option to appeal to the Board for consideration by a Veterans Law Judge. You may appeal to the Board from a Supplemental Claim decision or a Higher-Level Review decision.

When appealing to the Board, you may request a hearing with a Veterans Law Judge and/or the opportunity to submit additional evidence. You may also choose for the Board to review your claim without any additional evidence or a hearing, which may result in a faster decision. By selecting one of these options, the Board will place your appeal onto a list for consideration in the order it was received.

The Board does not have a duty to assist you in obtaining additional evidence, but may review whether VA properly fulfilled its duty to assist you in the original claim process and may remand your claim on that basis.

U. S. District Court

(INSURANCE CLAIMS ONLY)

You may challenge VA's decision on your insurance application or claim by filing a complaint with a United States district court in the jurisdiction in which you reside within six years from when the right of action first accrues.

To find a district court, use the map at: www.uscourts.gov/court_locator.aspx.

(Please continue reading on page 2)

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

How do I request review by VA of my decision?

To select a review option, you must submit the appropriate form to the appropriate office for review.

For a **Supplemental Claim**, consult your decision notice letter for the required forms and ways to submit the request.

For a **Higher-Level Review**, complete **VA Form 20-0996, Decision Review Request: Higher-Level Review** (available at www.va.gov/vaforms/), and consult your decision notice letter for the required ways to submit the request.

To **Appeal to the Board**, complete **VA Form 10182 - Decision Review Request: Board Appeal (Notice of Disagreement)** (available at www.va.gov/vaforms/), and send the form to:

Board of Veterans' Appeals
P.O. Box 27063
Washington, DC 20038
Fax: 844-678-8979

Can someone help me with my request for review?

Yes, VA recognizes and accredits attorneys, claims agents, and Veterans Service Organizations (VSOs) representatives to assist VA claimants with their benefits claims. VSOs and their representatives are not permitted to charge fees or accept gifts for their services. Only VA-accredited attorneys and claims agents may charge you fees for assisting in a claim for VA benefits, and only after VA has issued an initial decision on the claim and the attorney or claims agent has complied with the power-of-attorney and the fee agreement requirements. For more information on the types of representatives available, *see* www.va.gov/ogc/accreditation.asp.

If you have not already selected a representative, or if you want to change your representative, a searchable database of VA-recognized VSOs and VA-accredited attorneys, claims agents, and VSO representatives is available at www.va.gov/ogc/apps/accreditation/index.asp. Contact your local VA office for assistance with appointing a representative or visit www.ebenefits.va.gov.

What happens if I do not submit my request for review on time?

If you do not request a review option within the required time limit, you may only seek review through the following options:

- File a request for revision of the decision based on a clear and unmistakable error in the decision;
- File a Supplemental Claim along with new and relevant evidence to support your issue(s). Where a Supplemental Claim is filed after the time limit to seek review of a decision, the effective date for any resulting award of benefits generally will be tied to the date that VA receives the Supplemental Claim.

For more information on all the available review options visit: www.va.gov, or www.vets.gov or contact us at 1-800-827-1000.

NOTE: This form supersedes VA Forms 4107, 4107C, 4107VHA, 4107VRE, 4107INS for VA decisions after the publication in the Federal Register of the applicability date on which the *Veterans Appeals Improvement and Modernization Act of 2017* goes into effect.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Department of Veterans Affairs

OMB Control No. 2900-0101
Respondent Burden: 30 minutes
Expiration Date: 06/30/2021

ELIGIBILITY VERIFICATION REPORT INSTRUCTIONS

NOTE: Read very carefully and keep these instruction sheets for your reference.

The Eligibility Verification Report (EVR) form will refer you to the instruction paragraphs that apply to you. There are specific instructions for each type of EVR. You can determine what type of EVR you have by looking at the number in the upper right hand corner on the front of this form. This number is next to the form title "Eligibility Verification Report."

General Information

A. How can I contact VA if I have questions?

If you have questions about this form, how to fill it out, or about benefits, contact VA at 1-877-294-6380 (for the Hearing Impaired TDD line 711). You may also contact VA by Internet at: https://iris.custhelp.com/. The mailing address of the nearest VA regional office can be found in your telephone book blue pages under "United States Government," or at www.va.gov/directory.

B. How do I complete my EVR?

Print all answers clearly. If you must write an answer do so very clearly and plainly. If an answer is "none" or "0," write that or line through the space provided. Answer all questions unless the instructions specifically indicate that the item does not have to be answered. For additional space, attach a separate sheet, indicating the item number to which the answers apply. Make sure to write the veteran's name and VA claim number on any attachments to the EVR.

C. What do I do when I have completed my EVR?

Make sure you sign and date the EVR. When you have completed the EVR, mail it or take it to the VA address shown on the front of the EVR. If no address is shown, mail or take the EVR to the nearest VA regional office. Be sure to attach any materials that support and explain your claim. Also, make a photocopy of your EVR and everything that you submit to VA before you mail it.

D. What are aid and attendance and housebound benefits?

VA may pay a higher rate of benefits to a veteran, surviving spouse, or surviving parent who is blind, a patient in a nursing home, or otherwise needs regular aid and attendance. VA may also pay a higher rate of pension to a veteran who is permanently confined to his or her home because of a disability. A surviving spouse must be receiving or entitled to receive Improved Pension to qualify for a higher rate of pension based on being permanently confined to his or her home because of a disability. You are receiving Improved Pension if entitlement to pension was established on or after January 1, 1979. If you wish to claim any of these benefits and are not in a nursing home, attach a separate sheet of paper stating the benefits you are claiming. Also, submit a statement from your doctor showing the extent of your disabilities. If you are in a nursing home, be sure to complete the items on the EVR pertaining to nursing home care and provide the complete address and phone number of the nursing home.

E. How does receiving Medicaid-covered nursing home care affect my pension?

Pension payments may be reduced to $90 per month if you have no dependents and are receiving nursing home care which is covered by Medicaid. This reduction only applies if you are receiving Improved Pension. The reduction does not apply if you receive Parents' Dependency and Indemnity Compensation (DIC), Old Law Pension, or Section 306 Pension. You are receiving Old Law Pension, or Section 306 Pension if entitlement to pension was established before January 1, 1979.

F. What if my income or dependency information changes after I return the EVR?

If there is a significant increase in your family income or net worth, or if there is any change in your marital status or the status of your dependents after you return your EVR, notify VA immediately. Fully describe the change and furnish your name, VA claim number, and Social Security number. Do not wait to report the change on next year's EVR. If you do not promptly notify us of these changes, this may result in an overpayment in your account.

G. What if I believe that VA has made an error in processing or deciding my benefits ?

You have a right at any time to submit additional information or to have a personal hearing to explain or clarify your statements. You also have the right to be represented at a hearing by the representative of your choice. For more information about personal hearings or assigning a representative, contact VA as shown in Item A.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

INSTRUCTION PARAGRAPHS

1. NUMBER OF UNMARRIED, DEPENDENT CHILDREN

VA recognizes the veteran's biological children, adopted children, and stepchildren as dependents. But these children must be unmarried and:

- under age 18, or
- between 18 and 23 and pursuing an approved course of education, or
- of any age if they became permanently unable to support themselves before reaching age 18.

Report a child living in your household as "in your custody." Report a child who is not living with you as "not in your custody."

If a child between the ages of 18 and 23 who is receiving benefits or has been established as your dependent based on school attendance has stopped attending school, show this change on the EVR. If a child (regardless of age or status) has married, this must be shown on the EVR also. If a change in a child's school or marital status occurs after you complete the EVR, notify VA immediately.

2. INCOME

You are required to report **all** income unless the instructions in this paragraph specifically indicate that the item does not apply to you. If you are not sure about a particular type of income, report it and provide a full explanation of the source of the income. If any income does not count, VA will exclude it when computing your income for VA purposes. If you do not receive income from a particular source, write "0" or "none" in the space provided. **Do not leave the space blank.**

Report the gross amounts before you take out deductions for taxes, insurance, etc.

EXAMPLE: Your monthly Civil Service check is $365.60. The deduction for taxes is $15. The deduction for health insurance is $19.40.

$365.60 Check Amount
15.00 Deduction for Taxes
+19.40 Deduction for Insurance
Amount to report on EVR $400.00

<table>
<tr><th>Do report:</th><th>Do NOT report:</th></tr>
<tr><td>VA pension that you receive under another claim number. Report as "other" monthly income.</td><td>VA pension that you receive under this claim number.</td></tr>
<tr><td>VA compensation that you receive under this or another claim number. Report as "other" monthly income.</td><td rowspan="2">Any income you or your dependents received before the effective date of your award of benefits, if the effective date is during the first year shown on your EVR form.</td></tr>
<tr><td rowspan="2">Type 2S, 2V, 3 EVRs only: If you receive Old Law Pension (fixed rate of pension since 1960), report Supplemental Security Income (SSI) benefits.</td></tr>
<tr><td>SSI benefits unless you receive Old Law Pension (fixed rate of pension since 1960).</td></tr>
<tr><td>Type 6, 7, 8, 9C, 9S EVRs only: VA insurance benefits. Report as "other" annual income.</td><td rowspan="3"></td></tr>
<tr><td>Type 6, 7, 8, 9C, 9S EVRs only: all income received by each child. If each of your children has exactly the same income and your EVR has a space for reporting a child's income, you may write "all" at the top of the child income column on the EVR.</td></tr>
<tr><td>VA education benefits. Report as "other" annual income.</td></tr>
</table>

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

2. INCOME *(Continued)*

If you are not sure whether to report income as "monthly income" or "annual income," don't worry. You may report it in either category. The important thing is to report all income, clearly state its source, and not to report the same income twice on the EVR.

Report under "monthly income:"	**Report under "annual income:"**
Gross monthly amount of income you receive such as government, retirement or annuity checks.	Gross annual wages from employment.
	Annual interest and dividends. This includes but is not limited to interest on savings accounts, checking accounts, certificates of deposit, mutual funds, and VA insurance.
	All other income that is not shown in another section (for example, VA education benefits, rental income, insurance, net income from the operation of a business, unemployment compensation, IRA distributions, gifts, inheritances, gambling winnings, etc.)

3. MONTHLY INCOME

Social Security benefits: VA receives information from the Social Security Administration (SSA) about the rates paid to most individuals who receive benefits from both VA and SSA. If an amount is preprinted in the Social Security block on your EVR, it came from Social Security records or is based on information you have furnished in the past. The amount shown is the sum of your monthly amount and your Medicare premium (if any). See the EXAMPLE under Item 2. If the preprinted amount is correct or is within $1 of the correct rate, do not make any entry. If the preprinted amount is wrong by more than $1, cross it out, enter the correct amount, and, if possible, attach to your EVR an award letter or other notice from SSA showing your correct rate. If any Social Security block does not contain a preprinted amount, enter the applicable Social Security rate or "0," as appropriate.

Military retirement: Military retirement means a monthly check from the Army, Navy, Air Force, Coast Guard or Marine Corps and is usually based on 20 or 30 years service. Do not report your VA benefits as military retirement. Report VA benefits as "other income."

4. ANNUAL INCOME

Last year column: The income reported for the past year should be the actual amounts of gross income received. Use your W-2 forms, bank statements, etc. Do not rely on your memory, and do not estimate the amount of income already received.

Next year column: The income you report for the coming year should be your best estimate at this time. If there is a significant increase in your income after you complete this EVR, notify VA immediately. **DO NOT** wait until VA sends you another EVR next year.

5. NET WORTH

Net worth is the market value of all interest and rights you have in any kind of property less any mortgages or other claims against the property. However, net worth does not include the house you live in or a reasonable area of land it sits on. Net worth also does not include the value of personal things you use everyday like your vehicle, clothing, and furniture. If property is owned jointly by yourself and your spouse, report one-half of the total value held jointly for each of you.

Type 2S, 2V, 3 EVRs: Report your net worth only if you receive Section 306 Pension (fixed rate of pension since 1978). Do not report the net worth of your spouse.

Type 6, 7, 8, 9S EVRs: You must report net worth for yourself and all dependents for whom you are receiving benefits.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

5. NET WORTH *(Continued)*

Type 9C EVR: If you are a child claiming or receiving pension in your own right, report your net worth. If you are claiming or receiving pension as the custodian of a child or children, report the child's net worth and your net worth unless you are an institutional custodian. If you are also the child's parent, you are married, and you live with your spouse, report your and your spouse's net worth.

6. FAMILY MEDICAL EXPENSES

Note: Do not report medical expenses if your only income is VA pension or SSI. If VA pension or SSI is your only income, please skip to paragraph 7 of the instructions.

Family medical expenses actually paid by you may be deductible from your income. Report the amount of unreimbursed medical expenses, including the Medicare deduction, you paid for yourself or relatives who are members of your household. Any expenses reasonably related to medical or dental care of yourself or dependents (including health insurance premiums) may be allowed as medical expenses. If you are not sure whether a particular expense can be allowed, furnish a complete description of the purpose of the payment. We will let you know if an expense cannot be allowed.

Do not include any expenses for which you were or will be reimbursed. **Do not** report any medical expenses paid *before* the effective date of your benefits.

Type 2S, 2V, 3 EVR:	Do not report medical expenses unless you receive Section 306 Pension and have been notified by VA that your pension will be terminated due to excessive income. Note: Allowable medical expenses may be used to reduce your countable income; however, these expenses cannot be used to increase the protected rate of pension that you receive.
Type 4 EVR:	If you have income other than VA benefits or SSI, you should report medical expenses. Generally your rate will not be increased unless the medical expenses you paid (including Medicare premiums) exceed 5 percent of your countable annual income. Note: If your spouse is the veteran's other parent and you live together, your spouse will receive a separate EVR and VA Form 21P-8416. You may report all your and your spouse's medical expenses on a single VA Form 21P-8416 or each parent may report his or her medical expenses on separate VA Forms 21P-8416. If you paid medical expenses from a joint account, one parent can claim all the expenses or you may divide up the expenses. Do not report the same medical expenses.
Type 6, 7, 8, 9C, 9S EVR:	If you have income other than VA benefits or SSI, you should report medical expenses. Generally your rate of pension will not be increased unless the medical expenses you paid (including Medicare premiums) exceed 5 percent of the Maximum Annual Pension Rate (MAPR). Rates are frequently changed, so it is not possible to keep this information current in these instructions. You can find out what the current MAPR is by contacting your nearest VA regional office at 1-877-294-6380 (Hearing Impaired TDD line 1-800-829-4833).

If the amount of medical expenses **is not** preprinted on your EVR, you must itemize any medical expenses you wish to claim. Report unreimbursed medical expenses on VA Form 21P-8416, "Medical Expense Report." If you need a copy of this form, contact the VA at 1-877-294-6380 (Hearing Impaired TDD line 711). You may also download the form at www.va.gov/vaforms. **Note:** If your current rate of benefits is based on allowance of a continuing deduction for nursing home fees or other recurring medical expenses, you must complete VA Form 21P-8416 to confirm that you actually paid these expenses or your award will be adjusted retroactively to remove the deduction. This will result in an overpayment in your account and possible termination of benefits.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

6. FAMILY MEDICAL EXPENSES *(Continued)*

If the amount of medical expenses is preprinted on your EVR, write in the total amount of unreimbursed medical expenses you actually paid and the amount you expect to pay during the next income reporting year. If the amounts you enter are substantially the same as the amount preprinted on the EVR, you may submit the EVR without itemizing your medical expenses on VA Form 21P-8416.

IMPORTANT

You may be asked to verify the amounts you actually paid, so keep all receipts or other documentation of payments for at least 3 years after we make a decision on your medical expense claim. If you are unable to provide documentation of the claimed medical expenses when asked to do so by VA, your benefits will be retroactively reduced or terminated.

7. EDUCATIONAL OR VOCATIONAL REHABILITATION EXPENSES

Type 6, 7, 8, 9C, 9S EVRs: Educational or vocational rehabilitation expenses actually paid by you may be deductible from your income. Educational or vocational rehabilitation expenses are amounts paid for courses of education or vocational rehabilitation that you are pursuing, including tuition, fees, and materials. Report only **your** educational expenses. **Do not** include any expenses for which you were or will be reimbursed. **Do not** report your dependents' expenses.

Note: Do not report educational or vocational rehabilitation expenses if you are using the EVR to supplement a pending claim. If entitlement is established, you will have an opportunity to report your expenses at the end of the year.

8. FAMILY MAINTENANCE (Hardship) EXPENSES

Report hardship expenses on the EVR *only* if VA is currently excluding your children's income on the grounds of hardship. If this applies to you, show the total expenses for family maintenance expected for the next 12 months.

VA can exclude all or part of a dependent child's income if it is not reasonably available to you or if it would cause hardship to consider this income in determining your rate of pension. If VA is not currently excluding your children's income and you feel that it should be, you will need to complete VA Form 21-0571, "Application for Exclusion of Children's Income." Contact VA at the address shown at the top of the EVR form and we will send you this form. You may also download this form at www.va.gov/vaforms/**.**

9. SIGNATURE

The EVR form must be signed by the payee who is recognized by VA. Normally, this will be the person to whom the monthly check is payable. The EVR cannot be signed by another person on behalf of the beneficiary unless that person has been recognized as the payee by VA. If you are capable of handling your VA funds but are unable to sign your name, you may sign by "X" mark or thumb print.. If you sign by "X" mark or thumb print, furnish the following statement on a separate sheet which should be attached to the EVR: "I hereby certify that the information on this form is true and correct to the best of my knowledge and belief." Place your mark or thumb print under this statement and have it signed by two witnesses who must also print their names and addresses. Be sure to write the veteran's name and VA claim number on the attachment.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Privacy Act Notice: The VA will not disclose information collected on this form to any source other than what has been authorized under the Privacy Act of 1974 or Title 38, Code of Federal Regulations 1.576 for routine uses (i.e., civil or criminal law enforcement, congressional communications, epidemiological or research studies, the collection of money owed to the United States, litigation in which the United States is a party or has an interest, the administration of VA programs and delivery of VA benefits, verification of identity and status, and personnel administration) as identified in the VA system of records, 58VA21/22/28, Compensation, Pension, Education, and Vocational Rehabilitation and Employment Records - VA, published in the Federal Register. Your obligation to respond is required to obtain or retain benefits. Giving us your and your dependents SSN account information is mandatory. Applicants are required to provide their SSN and the SSN of any dependents for whom benefits are claimed under Title 38 USC 5101 (c) (1). The VA will not deny an individual benefits for refusing to provide his or her SSN unless the disclosure of the SSN is required by a Federal Statute of law in effect prior to January 1, 1975, and still in effect. The requested information is considered relevant and necessary to determine maximum benefits under the law. The responses you submit are considered confidential (38 USC 5701). Information submitted is subject to verification through computer matching programs with other agencies.

Respondent Burden: We need this information to verify eligibility for pension or Parents' DIC (38 U.S.C. 1506 and 1315). Title 38, United States Code, allows us to ask for this information. We estimate that you will need an average of 30 minutes to review the instructions, find the information, and complete this form. VA cannot conduct or sponsor a collection of information unless a valid OMB control number is displayed. Valid OMB control numbers can be located on the OMB Internet Page at **www.reginfo.gov/public/do/PRAMain**. If desired, you can call 1-877-294-6380 to get information on where to send comments or suggestions about this form.

Department of Veterans Affairs

INSTRUCTIONS FOR MEDICAL EXPENSE REPORT

VA may be able to pay you a higher benefit rate if you identify expenses VA can deduct from your income. Your benefit rate is based on your income. Your out-of-pocket payments for medical and dental expenses may be deductible.

Report any medical or dental expenses that you paid for yourself or for a relative who is a member of your household (spouse, grandchild, parent, etc.) for which you were not reimbursed and do not expect to be reimbursed. Below are examples of expenses you should include, if applicable:

- Hospital expenses
- Doctor's office fees
- Dental fees
- Prescription/non-prescription drug costs
- Vision care costs
- Medical insurance premiums
- Nursing home costs
- Hearing aid costs
- Home health service expenses
- Expenses related to transportation to a hospital, doctor, or other medical facility
- Monthly Medicare deduction

IMPORTANT NOTES

- Do not include any expenses for which you were or will be reimbursed. If you receive reimbursement after you have filed this claim, promptly notify the VA office handling your claim.
- If you are a veteran, VA can deduct allowable expenses paid by either you or your spouse.
- If you are not sure whether VA can deduct a payment for a particular expense, furnish a complete description of the purpose of the payment. We will let you know if we cannot deduct an expense.
- If you are claiming expenses for an in-home care provider or for assisted living or similar care, you ***must*** complete the appropriate worksheet on page 5 ***or*** 6 to determine whether VA may deduct all or some of your payments to the provider or facility.
- VA may require you to verify the amounts you paid, so keep all receipts or other documentation of payments for at least 3 years after we make a decision on your medical expense claim. If you are unable to provide documentation of your claimed medical expenses when VA asks you to do so, your benefits may be retroactively reduced or discontinued.
- If you need more space to report expenses, attach a separate sheet of paper with columns corresponding to those on this form. Be sure to write your VA file number on any attachments.

PRIVACY ACT NOTICE: VA will not disclose information collected on this form to any source other than what has been authorized under the Privacy Act of 1974 or Title 38, code of Federal Regulations 1.576 for routine uses (i.e., civil or criminal law enforcement, congressional communications, epidemiological or research studies, the collection of money owed to the United States, litigation in which the United States is a party or has an interest, the administration of VA programs and delivery of VA benefits, verification of identity and status, and personnel administration) as identified in the VA system of records, 58VA21/22/28, Compensation, Pension, Education, and Vocational Rehabilitation and Employment Records - VA, published in the Federal Register. Your obligation to respond is required to obtain or retain benefits. The requested information is considered relevant and necessary to determine maximum benefits provided under law. VA uses your SSN to identify your claim file. Providing your SSN will help ensure that your records are properly associated with your claim file. Giving us your SSN account information is voluntary. Refusal to provide your SSN by itself will not result in the denial of benefits. VA will not deny an individual benefits for refusing to provide his or her SSN unless the disclosure of the SSN is required by a Federal Statute of law in effect prior to January 1, 1975, and still in effect. The responses you submit are considered confidential (38 U.S.C. 5701). Information submitted is subject to verification through computer matching programs with other agencies.

RESPONDENT BURDEN: We need this information to determine whether medical expenses you paid may be used to reduce the amount of income we count in determining eligibility to benefits (38 U.S.C. 1503). Title 38, United States Code, allows us to ask for this information. We estimate that you will need an average of 30 minutes to review the instructions, find the information, and complete this form. VA cannot conduct or sponsor a collection of information unless a valid OMB control number is displayed. You are not required to respond to a collection of information if this number is not displayed. Valid OMB control numbers can be located on the OMB Internet Page at **www.reginfo.gov/public/do/PRAMain**. If desired, you can call 1-800-827-1000 to get information on where to send comments or suggestions about this form.

20. MILEAGE FOR PRIVATELY OWNED VEHICLE TRAVEL FOR MEDICAL PURPOSES

Report miles traveled to a hospital, doctor, or other medical facility in a privately owned vehicle (POV) such as a car, truck, or motorcycle. Itemize travel occurring between the dates 07/27/2020 and 12/31/2020. If no dates appear on this line, refer to the accompanying letter for the dates you should report medical expenses. If you do not have a letter, please report unreimbursed medical expenses on a calendar year basis (ex. 01/01/XXXX thru 12/31/XXXX). We will calculate the allowable deduction for your mileage based on the current POV mileage reimbursement rate for automobiles specified by the United States General Services Administration (GSA).

NOTE: You may also claim deductions for other payments related to travel for medical purposes, such as taxi fares, buses, or other forms of public transportation. Report these types of medical travel expenses in Item 22.

A. MEDICAL FACILITY TO WHICH TRAVELED	B. TOTAL ROUNDTRIP MILES TRAVELED	C. AMOUNT REIMBURSED FROM ANOTHER SOURCE *(Such as a VA Medical Center)*	D. DATE TRAVELED *(Month/Day/Year)*	E. WHO NEEDED TO TRAVEL? *(Self, spouse, child)*

IMPORTANT: Be sure to sign and date this form in Items 23A & 23B on page 4. Unsigned reports will be returned.

WORKSHEET FOR IN-HOME ATTENDANT EXPENSES

NOTE: Only complete this worksheet if you are claiming expenses for in-home care.

IMPORTANT: VA recognizes the following five activities as Activities of Daily Living (ADLs) for medical expense purposes:

(1) Eating
(2) Bathing/Showering
(3) Dressing
(4) Transferring (for example, from bed to chair)
(5) Using the toilet

Custodial Care is regular -
- assistance with two or more ADLs, ***or***
- supervision because a person with a mental disorder is unsafe if left alone due to the mental disorder

IMPORTANT: The following activities are examples of Instrumental Activities of Daily Living (IADLs) for VA purposes. VA generally ***does not*** recognize assistance with these activities as medical expenses: (1) Shopping; (2) Food Preparation; (3) Housekeeping; (4) Laundering; (5) Handling medications; (6) Using the telephone; (7) Transportation (except for medical purposes such as transportation to a doctor's appointment).

INSTRUCTIONS: Use this worksheet if you are claiming payments to a disabled person's in-home attendant as an unreimbursed medical expense.

Follow the steps below to determine whether or not:

- the attendant must be a health care provider for VA purposes ***and***
- VA may deduct payment for assistance with IADLs as well as assistance with ADLs and custodial care

STEP 1. Are you (the claimant) the disabled person?

☐ YES ☐ NO (If "NO," skip to Step 6)

STEP 2. Has VA determined that you are eligible for special monthly pension? (Special monthly pension means pension at the aid and attendance or housebound rate ***or*** Parents' DIC at the aid and attendance level)

☐ YES ☐ NO (If "YES," the attendant does not need to be a health care provider. Skip to Step 3)
(If "NO," skip to Step 4)

STEP 3. Is the ***primary responsibility*** of the in-home attendant to provide you with health care services or custodial care?

☐ YES ☐ NO (If "YES," payments to this in-home attendant qualify as medical expenses (even if the attendant also assists you with IADLs). You may claim these expenses in Item 21. Skip to Step 8)
(If "NO," payments to this in-home attendant for assistance with IADLs ***do not*** qualify as medical expenses. Payments for health care services and custodial care qualify as medical expenses. You may claim these expenses in Item 21. Skip to Step 8)

STEP 4. Are you claiming special monthly pension?

☐ YES ☐ NO (If "YES," please complete and attach with this application VA Form 21-2680, *Examination for Housebound Status or Permanent Need for Regular Aid and Attendance*. Please make sure every item on this form is complete and signed by a Physician, Physician Assistant (PA), Certified Nurse Practitioner (CNP), or Clinical Nurse Specialist (CNS))
(If "NO," the attendant ***must be a health care provider*** and payments for assistance with IADLs ***do not*** qualify as medical expenses. Payments for health care services or assistance with ADLs qualify as medical expenses. You may claim these expenses in Item 21. Skip to Step 8)

STEP 5. Is the ***primary responsibility*** of the in-home attendant to provide you with health care or custodial care?

☐ YES ☐ NO (If "YES," payments to this in-home attendant may qualify as medical expenses ***if*** VA rates you as eligible for special monthly pension. Please report separately in Item 21 amounts you pay an in-home attendant for: (1) health care services or assistance with ADLs provided by a health care provider, (2) assistance with IADLs; and (3) custodial care. Skip to Step 8)
(If "NO," payments to this in-home attendant for assistance with IADLs ***do not*** qualify as medical expenses. Please report separately in Item 21 applicable amounts you pay an in-home attendant for: (1) health care services or assistance with ADLs provided by a health care provider, and (2) custodial care. Skip to Step 8)

STEP 6. Does the disabled person require the health care services or custodial care that the in-home attendant provides to him or her because of the disabled person's mental or physical disability?

☐ YES ☐ NO (If "YES," you must submit a statement from a physician or physician assistant that: (1) the disabled person requires the health care services or custodial care that the attendant provides him or her because of mental or physical disability, and (2) describes the mental or physical disability. The in-home attendant ***does not*** need to be a health care provider)
(If "NO," the attendant ***must be a health care provider*** and payments for assistance with IADLs ***do not*** qualify as medical expenses. Payments to the in-home attendant for health care services or assistance with ADLs provided by a health care provider qualify as medical expenses.. You may claim these expenses in Item 21. Skip to Step 8)

STEP 7. Is the primary responsibility of the in-home attendant to provide the disabled person with health care and/or custodial care?

☐ YES ☐ NO (If "YES," payments to the in-home attendant qualify as medical expenses (even if the attendant also assists the disabled person with IADLs. You may claim these expenses in Item 21)
(If "NO," payments to the in-home attendant for assistance with IADLs ***do not*** qualify as medical expenses. Payments to the in-home attendant for ***health care or custodial care*** qualify as medical expenses. You may report these expenses in Item 21)

STEP 8. Check all activities below that the attendant assists the disabled person with:

ADLs: ☐ EATING ☐ BATHING/SHOWERING ☐ DRESSING ☐ TRANSFERRING ☐ USING THE TOILET ☐ SHOPPING ☐ FOOD PREPARATION
☐ HOUSEKEEPING ☐ LAUNDERING ☐ MANAGING FINANCES ☐ HANDLING MEDICATIONS

IADLs: ☐ USING THE TELEPHONE ☐ TRANSPORTANTION FOR NON-MEDICAL PURPOSES

STEP 9. **In-Home Attendant Certification**: Please submit a current breakdown of the time the attendant spends assisting the disabled person with health care services, ADLs and IADLs.

I CERTIFY that the information stated within this WORKSHEET FOR IN-HOME ATTENDANT EXPENSES is accurate and reflects the current environment pertaining to _____ and his or her care from _____.
(Name of Person Requiring Care)
(Name of Attendant)

_____ _____
(Name, Signature and Title of Certifying Official) (Date Certified)

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

WORKSHEET FOR AN ASSISTED LIVING, ADULT DAY CARE, OR A SIMILAR FACILITY

NOTE: Only complete this worksheet if you are claiming expenses for an assisted living facility, adult day care or similar facility.

IMPORTANT: VA recognizes the following five activities as Activities of Daily Living (ADLs) for medical expense purposes:

(1) Eating

(2) Bathing/Showering

(3) Dressing

(4) Transferring (for example, from bed to chair)

(5) Using the toilet

Custodial Care is regular -
- assistance with two or more ADLs, ***or***
- supervision because a person with a mental disorder is unsafe if left alone due to the mental disorder.

INSTRUCTIONS: Use this worksheet if you are claiming a disabled person's care in an assisted living facility, adult day care, or similar facility as unreimbursed medical expenses. Follow the steps below to determine whether VA may deduct all or some of your out-of-pocket payments to the facility.

STEP 1. Are the expenses you wish to claim due to the disabled person's treatment in a hospital, inpatient treatment center, nursing home, or VA approved medical foster home?

☐ YES ☐ NO (If "NO," continue to Step 2)

(If "YES," ***all*** payments to the facility qualify as medical expenses. You may claim these expenses in Item 22. You are finished completing this worksheet)

STEP 2. Do ***all*** of the following apply to the facility?
- The facility is licensed (if the State or country requires it)
- The facility's staff (or the facility's contracted staff) provides the disabled person with health care or custodial care or both.
- If the facility is residential, it is staffed 24 hours per day with caregivers

☐ YES ☐ NO (If "NO," payments to the facility ***do not*** qualify as medical expenses. You are finished completing this worksheet)

STEP 3. Are you (the claimant) the disabled person? Are you a veteran, surviving spouse, or Parents' DIC claimant?

☐ YES ☐ NO (If "NO," to either of these questions, skip to Step 8)

STEP 4. Has VA determined that you are eligible for special monthly pension? (Special monthly pension means pension at the aid and attendance or housebound rate or Parents' DIC at the aid and attendance level)

☐ YES ☐ NO (If "NO," skip to Step 6)

STEP 5. If you answered "YES" in Step 2, you stated that the facility provides you with health care and/or custodial care. Is this the ***primary reason*** you live in the facility (or attend day care in the facility)?

☐ YES ☐ NO (If "YES," all payments to this facility qualify as medical expenses. You may claim these expenses in Item 22. Skip to Step 10)
(If "NO," payments to this facility for meals and lodging ***do not*** qualify as medical expenses. Only claim amounts you pay the facility for health care services or custodial care)

STEP 6. Are you claiming special monthly pension?

☐ YES ☐ NO (If "YES," please complete and attach with this application VA Form 21-2680, *Examination for Housebound Status or Permanent Need for Regular Aid and Attendance*. Please make sure every item is complete and the form is signed by a Physician, Physician Assistant (PA), Certified Nurse Practitioner (CNP), or Clinical Nurse Specialist (CNS))
(If "NO," payments to this facility for meals and lodging ***do not*** qualify as medical expenses**.** Only claim amounts you pay the facility for ***health care services or assistance with ADLs provided by a health care provider*** in Item 22. Skip to Step 10)

STEP 7. If you answered "YES" in Step 2, you stated that the facility provides you with health care and/or custodial care. Is this the ***primary reason*** you live in the facility (or attend day care in the facility)?

☐ YES ☐ NO (If "YES," all payments to this facility ***may*** qualify as medical expenses ***if*** VA rates you as eligible for special monthly pension or Parents' DIC. Please report separately in Item 22 applicable amounts you pay the facility for: (1) lodging and meals, (2) ***health care services or assistance with ADLs provided by a health care provider***, and (3) custodial care. Skip to Step 10)
(If "NO," payments to this facility for meals and lodging ***do not*** qualify as medical expenses. Please report separately in Item 22 applicable amounts you pay the facility for: (1) ***health care services or assistance with ADLs provided by a health care provider***, and (2) ***custodial care***. Skip to Step 10)

STEP 8. Does the disabled person require the health care services or custodial care that the facility provides to him or her because of the disabled person's mental or physical disability?

☐ YES ☐ NO (If "YES," you must submit a statement from a physician or physician assistant that: (1) the disabled person requires the health care services or custodial care that the facility provides to him or her because of mental or physical disability, and (2) describes the mental or physical disability)
(If "NO," claim only amounts you pay the facility for ***health care services or assistance with ADLs provided by a health care provider*** in Item 22. Skip to Step 10)

STEP 9. If you answered "YES" in Step 2, you stated that the facility provides the disabled person with health care and/or custodial care. Is this the ***primary reason*** the disabled person lives in the facility or attends day care in the facility?

☐ YES ☐ NO (If "YES," claim ***all*** payments to this facility (to include meals and lodging) as medical expenses in Item 22)
(If "NO," payments to this facility for meals and lodging ***do not*** qualify as medical expenses. ***Only*** claim amounts you pay the facility for ***health care services or custodial care*** in Item 22)

STEP 10. Facility Certification: Please submit a current statement showing the fees claimant pays to your facility and breakdown of the care received.

I CERTIFY that the information stated within this WORKSHEET FOR AN ASSISTED LIVING, ADULT DAY CARE, OR SIMILAR FACILITY is accurate and reflects the current environment pertaining to _____ and his or her care at this facility_____.

(Name of person staying at your facility)

(Name and address of facility)

(Name, Signature and Title of Person Certifying for the Facility) (Date Certified)

Department of Veterans Affairs

INSTRUCTIONS FOR MEDICAL EXPENSE REPORT

VA may be able to pay you a higher benefit rate if you identify expenses VA can deduct from your income. Your benefit rate is based on your income. Your out-of-pocket payments for medical and dental expenses may be deductible.

Report any medical or dental expenses that you paid for yourself or for a relative who is a member of your household (spouse, grandchild, parent, etc.) for which you were not reimbursed and do not expect to be reimbursed. Below are examples of expenses you should include, if applicable:

- Hospital expenses
- Doctor's office fees
- Dental fees
- Prescription/non-prescription drug costs
- Vision care costs
- Medical insurance premiums
- Nursing home costs
- Hearing aid costs
- Home health service expenses
- Expenses related to transportation to a hospital, doctor, or other medical facility
- Monthly Medicare deduction

IMPORTANT NOTES

- Do not include any expenses for which you were or will be reimbursed. If you receive reimbursement after you have filed this claim, promptly notify the VA office handling your claim.
- If you are a veteran, VA can deduct allowable expenses paid by either you or your spouse.
- If you are not sure whether VA can deduct a payment for a particular expense, furnish a complete description of the purpose of the payment. We will let you know if we cannot deduct an expense.
- If you are claiming expenses for an in-home care provider or for assisted living or similar care, you ***must*** complete the appropriate worksheet on page 5 ***or*** 6 to determine whether VA may deduct all or some of your payments to the provider or facility.
- VA may require you to verify the amounts you paid, so keep all receipts or other documentation of payments for at least 3 years after we make a decision on your medical expense claim. If you are unable to provide documentation of your claimed medical expenses when VA asks you to do so, your benefits may be retroactively reduced or discontinued.
- If you need more space to report expenses, attach a separate sheet of paper with columns corresponding to those on this form. Be sure to write your VA file number on any attachments.

PRIVACY ACT NOTICE: VA will not disclose information collected on this form to any source other than what has been authorized under the Privacy Act of 1974 or Title 38, code of Federal Regulations 1.576 for routine uses (i.e., civil or criminal law enforcement, congressional communications, epidemiological or research studies, the collection of money owed to the United States, litigation in which the United States is a party or has an interest, the administration of VA programs and delivery of VA benefits, verification of identity and status, and personnel administration) as identified in the VA system of records, 58VA21/22/28, Compensation, Pension, Education, and Vocational Rehabilitation and Employment Records - VA, published in the Federal Register. Your obligation to respond is required to obtain or retain benefits. The requested information is considered relevant and necessary to determine maximum benefits provided under law. VA uses your SSN to identify your claim file. Providing your SSN will help ensure that your records are properly associated with your claim file. Giving us your SSN account information is voluntary. Refusal to provide your SSN by itself will not result in the denial of benefits. VA will not deny an individual benefits for refusing to provide his or her SSN unless the disclosure of the SSN is required by a Federal Statute of law in effect prior to January 1, 1975, and still in effect. The responses you submit are considered confidential (38 U.S.C. 5701). Information submitted is subject to verification through computer matching programs with other agencies.

RESPONDENT BURDEN: We need this information to determine whether medical expenses you paid may be used to reduce the amount of income we count in determining eligibility to benefits (38 U.S.C. 1503). Title 38, United States Code, allows us to ask for this information. We estimate that you will need an average of 30 minutes to review the instructions, find the information, and complete this form. VA cannot conduct or sponsor a collection of information unless a valid OMB control number is displayed. You are not required to respond to a collection of information if this number is not displayed. Valid OMB control numbers can be located on the OMB Internet Page at **www.reginfo.gov/public/do/PRAMain**. If desired, you can call 1-800-827-1000 to get information on where to send comments or suggestions about this form.

EXAMINATION FOR HOUSEBOUND STATUS OR PERMANENT NEED FOR REGULAR AID AND ATTENDANCE

SECTION I: VETERAN'S IDENTIFICATION INFORMATION

NOTE: You can *either* complete the form online or by hand. Please print the information requested in ink, neatly and legibly to help process the form.

1. VETERAN/BENEFICARY NAME *(First, Middle Initial, Last)*

2. SOCIAL SECURITY NUMBER ___ – ___ – ____

3. VA FILE NUMBER *(If applicable)*

4. DATE OF BIRTH *(MM/DD/YYYY)* Month ___ – Day ___ – Year ____

5. VETERAN'S SERVICE NUMBER *(If applicable)*

6. GENDER ☐ MALE ☐ FEMALE

7. TELEPHONE NUMBER *(Include Area Code)*

8. PREFERRED E-MAIL ADDRESS *(Optional)*

9. PREFERRED MAILING ADDRESS (*Number and street or rural route, P. O. Box, City, State, ZIP Code and Country*)

No. & Street

Apt./Unit Number

City

State/Province

Country

ZIP Code/Postal Code

SECTION II: CLAIM INFORMATION

10. CLAIMANT'S NAME *(First, Middle Initial, Last)*

11. CLAIMANT'S SOCIAL SECURITY NUMBER ___ – ___ – ____

12. RELATIONSHIP OF CLAIMANT TO VETERAN

13. BENEFIT YOU ARE APPLYING FOR (*Choose One*)

☐ **Special Monthly Compensation (SMC) -** Veterans and surviving spouses or parents who are eligible to receive VA compensation due to a service-related disability or death and require aid and attendance of another person to perform personal functions required in everyday living such as bathing, feeding, dressing, attending to the wants of nature, adjusting prosthetic devices, or protecting oneself from the hazards of the daily environment may be eligible for Special Monthly Compensation. A Veteran or a deceased Veteran's surviving spouse may also be eligible for Special Monthly Compensation based on being housebound (substantially confined to the immediate premises because of permanent disability). For a Veteran, the disability causing the need for aid and attendance or housebound status must be related to service. These benefits are paid in addition to monthly compensation. They are not paid <u>without</u> eligibility to compensation.

☐ **Special Monthly Pension (SMP) -** Veterans and survivors who are eligible for Veteran's Pension and/or Survivors benefits and require the aid and attendance of another person in order to perform personal functions required in everyday living, such as bathing, feeding, dressing, attending to the wants of nature, adjusting prosthetic devices, or protecting him/her from the hazards of his/her daily environment, or are housebound (substantially confined to his/her immediate premises because of permanent disability), may be eligible for Special Monthly Pension (SMP). This benefit is an increased monthly amount paid to a Veteran or survivor who is eligible for Veterans Pension or Survivors benefits.

SECTION III: INFORMATION OF EXAMINATION

14. DATE OF EXAMINATION

15. HOME ADDRESS

16A. IS CLAIMANT HOSPITALIZED?

☐ YES ☐ NO *(If "Yes," complete Items 16B and 16C)*

16B. DATE ADMITTED

16C. NAME AND ADDRESS OF HOSPITAL

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

PATIENT/VETERAN'S SOCIAL SECURITY NO. ☐☐☐ – ☐☐ – ☐☐☐☐

NOTE: EXAMINER PLEASE READ CAREFULLY

The purpose of this examination is to record manifestations and findings pertinent to the question of whether the claimant is housebound (confined to the home or immediate premises) or in need of the regular aid and attendance of another person. The report should be in sufficient detail for the VA decision makers to determine the extent that disease or injury produces physical or mental impairment, that loss of coordination or enfeeblement affects the ability: to dress and undress; to feed him/herself; to attend to the wants of nature; or keep him/herself ordinarily clean and presentable. Findings should be recorded to show whether the claimant is blind or bedridden. Whether the claimant seeks housebound or aid and attendance benefits, the report should reflect how well he/she ambulates, where he/she goes, and what he/she is able to do during a typical day.

17. COMPLETE DIAGNOSIS *(Diagnosis needs to equate to the level of assistance described in questions 25 through 39)*

18A. AGE	18B. WEIGHT	18C. HEIGHT
	ACTUAL: LBS. ESTIMATED: LBS.	FEET: INCHES:

19. NUTRITION	20. GAIT

21. BLOOD PRESSURE	22. PULSE RATE	23. RESPIRATORY RATE	24. WHAT DISABILITIES RESTRICT THE LISTED ACTIVITIES/FUNCTIONS?

25. IF THE CLAIMANT IS CONFINED TO BED, INDICATE THE NUMBER OF HOURS IN BED

From 9 PM to 9 AM: From 9 AM to 9 PM:

26. IS THE CLAIMANT ABLE TO FEED HIM/HERSELF? *(If "No," provide explanation)*

☐ YES ☐ NO

27. IS CLAIMANT ABLE TO PREPARE OWN MEALS? *(If "No," provide explanation)*

☐ YES ☐ NO

28. DOES THE CLAIMANT NEED ASSISTANCE IN BATHING AND TENDING TO OTHER HYGIENE NEEDS? *(If "Yes," provide explanation)*

☐ YES ☐ NO

29A. IS THE CLAIMANT LEGALLY BLIND? *(If "Yes," provide explanation)*	29B. CORRECTED VISION	
	LEFT EYE	RIGHT EYE
☐ YES ☐ NO		

30. DOES THE CLAIMANT REQUIRE NURSING HOME CARE? *(If "Yes," provide explanation)*

☐ YES ☐ NO

31. DOES THE CLAIMANT REQUIRE MEDICATION MANAGEMENT? *(If "Yes," provide explanation)*

☐ YES ☐ NO

32. IN YOUR JUDGMENT, DOES THE VETERAN/CLAIMANT HAVE THE MENTAL CAPACITY TO MANAGE HIS OR HER BENEFIT PAYMENTS, OR IS HE OR SHE ABLE TO DIRECT SOMEONE TO DO SO? *(If "No," provide examples and rationale to support your conclusion.)*

☐ YES ☐ NO

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

PATIENT/VETERAN'S SOCIAL SECURITY NO. ☐☐☐ – ☐☐ – ☐☐☐☐

33. POSTURE AND GENERAL APPEARANCE *(Attach a separate sheet of paper if additional space is needed)*

34. DESCRIBE RESTRICTIONS OF EACH UPPER EXTREMITY WITH PARTICULAR REFERENCE TO GRIP, FINE MOVEMENTS, AND ABILITY TO FEED HIM/HERSELF, TO BUTTON CLOTHING, SHAVE AND ATTEND TO THE NEEDS OF NATURE *(Attach a separate sheet of paper if additional space is needed)*

35. DESCRIBE RESTRICTIONS OF EACH LOWER EXTREMITY WITH PARTICULAR REFERENCE TO THE EXTENT OF LIMITATION OF MOTION, ATROPHY, AND CONTRACTURESOR OTHER INTERFERENCE. IF INDICATED, COMMENT SPECIFICALLY ON WEIGHT BEARING, BALANCE AND PROPULSION OF EACH LOWER EXTREMITY.

36. DESCRIBE RESTRICTION OF THE SPINE, TRUNK AND NECK

37. SET FORTH ALL OTHER PATHOLOGY INCLUDING THE LOSS OF BOWEL OR BLADDER CONTROL OR THE EFFECTS OF ADVANCING AGE, SUCH AS DIZZINESS, LOSS OF MEMORY OR POOR BALANCE, THAT AFFECTS CLAIMANT'S ABILITY TO PERFORM SELF-CARE, AMBULATE OR TRAVEL BEYOND THE PREMISES OF THE HOME, OR, IF HOSPITALIZED, BEYOND THE WARD OR CLINICAL AREA. DESCRIBE WHERE THE CLAIMANT GOES AND WHAT HE OR SHE DOES DURING A TYPICAL DAY.

38. DESCRIBE HOW OFTEN PER DAY OR WEEK AND UNDER WHAT CIRCUMSTANCES THE CLAIMANT IS ABLE TO LEAVE THE HOME OR IMMEDIATE PREMISES

39. ARE AIDS SUCH AS CANES, BRACES, CRUTCHES, OR THE ASSISTANCE OF ANOTHER PERSON REQUIRED FOR LOCOMOTION? *(If so, specify and describe effectiveness in terms of distance that can be traveled, as in Item 32 above)*

☐ YES
☐ NO

(If "YES," give distance) (Check applicable box or specify distance)

☐ 1 BLOCK ☐ 5 or 6 BLOCKS ☐ 1 MILE OTHER *(Specify distance)* _____

40A. PRINTED NAME OF EXAMINING PHYSICIAN	40B. SIGNATURE AND TITLE OF EXAMINING PHYSICIAN	40C. DATE SIGNED

41A. NAME AND ADDRESS OF MEDICAL FACILITY	41B. TELEPHONE NUMBER OF MEDICAL FACILITY *(Include Area Code)*

PRIVACY ACT NOTICE: The VA will not disclose information collected on this form to any source other than what has been authorized under the Privacy Act of 1974 or Title 38, code of Federal Regulations 1.576 for routine uses (i.e., civil or criminal law enforcement, congressional communications, epidemiological or research studies, the collection of money owed to the United States, litigation in which the United States is a party or has an interest, the administration of VA programs and delivery of VA benefits, verification of identity and status, and personnel administration) as identified in the VA system of records. 58VA21/22/28, Compensation, Pension, Education and Vocational Rehabilitation and Employment Records - VA, published in the Federal Register. Your obligation to respond is required to obtain or retain benefits. Giving us your Social Security Number (SSN) account information is mandatory. Applicants are required to provide their SSN under Title 38, U.S.C. 5701(c)(1). The VA will not deny an individual benefits for refusing to provide his or her SSN unless the disclosure is required by a Federal Statute of law in effect prior to January 1, 1975, and still in effect. The requested information is considered relevant and necessary to determine maximum benefits provided under the law. The responses you submit are considered confidential (38 U.S.C. 5701). Information that you furnish may be utilized in computer matching programs with other Federal or state agencies for the purpose of determining your eligibility to receive VA benefits, as well as to collect any amount owed to the United States by virtue of your participation in any benefit program administered by the Department of Veterans Affairs.

RESPONDENT BURDEN: We need this information to determine your eligibility for aid and attendance or housebound benefits. Title 38, United States Code 1521 (d) and (e), 1115(1)(e), 1311(c) and (d), 1315(h), 1122, 1541(d)(e), and 1502 (b) and (c) allows us to ask for this information. We estimate that you will need an average of 30 minutes to review the instructions, find the information, and complete this form. VA cannot conduct or sponsor a collection of information unless a valid OMB control number is displayed. You are not required to respond to a collection of information if this number is not displayed. Valid OMB control numbers can be located on the OMB Internet pate at **http://www.reginfo.gov/public/do/PRAMain**. If desired, you can call 1-800-827-1000 to get information on where to send comments or suggestions about this form.

INFORMATION AND INSTRUCTIONS FOR COMPLETING DECISION REVIEW REQUEST: SUPPLEMENTAL CLAIM

IMPORTANT: Please read the information below carefully to help you complete this form quickly and accurately. Some parts of the form also contain notes or specific instructions for completing that part.

Use this form to request a SUPPLEMENTAL CLAIM of the decision you received that you disagree with. A **SUPPLEMENTAL CLAIM** is a new review of an issue(s) previously decided by the Department of Veterans Affairs (VA) based on submission of new and relevant evidence. For additional information on the **SUPPLEMENTAL CLAIM** process or other decision review options such as a higher-level review and appeal to the Board of Veterans' Appeals, visit https://www.va.gov/decision-reviews/.

.

Submit your **SUPPLEMENTAL CLAIM** request to the local VA office or processing center identified on your decision notification letter. It is important that you keep a copy of all completed forms and materials you give to VA. This form has several key components, which, when filled out completely and accurately, will decrease the amount of time it takes to process your **SUPPLEMENTAL CLAIM** request. This form may only be submitted for review of an issue(s) related to one benefit type *(Compensation, Pension/Survivors Benefits, Fiduciary, Insurance, Education, Loan Guaranty, Vocational Rehabilitation & Employment, Veterans Health Administration, or National Cemetery Administration).* If you would like to file for multiple benefit types, you must complete a separate **SUPPLEMENTAL CLAIM** request form for each benefit type.

You may contact your accredited representative (attorney, claims agent, and Veterans Service Organizations (VSOs) representative) to assist you in completing this request form. If you have not already selected a representative, or if you want to change your representative, a searchable database of VA-recognized VSOs, VA-accredited attorneys, claims agents, and VSO representatives is available at https://www.va.gov/ogc/apps/accreditation/index.asp. Contact your local VA office for assistance with appointing a representative or visit www.ebenefits.va.gov.

You can also ask VA to help you fill out the form by contacting us at the number provided on your decision notification letter or at 1-800-827-1000. Before you contact us, please make sure you gather the necessary information and materials (decision notification letter, etc.), and complete as much of the form as you can.

SPECIFIC INSTRUCTIONS FOR DECISION REVIEW REQUEST: SUPPLEMENTAL CLAIM

Part I - Claimant's Identifying Information

Please note that it would assist VA if you provide all the personal information in Part I. However, if you provide certain information specific to the claimant such as the claimant's last name and Social Security Number or VA file number, VA will be able to identify the claimant in our system and would not necessarily consider this request incomplete if other information in Part I, such as the claimant's address and telephone number, is excluded. This request form may only be completed for review of an issue(s) related to one benefit type. **Select only one benefit type in Item 12.** If you would like to file for multiple benefit types, you must complete a separate **SUPPLEMENTAL CLAIM** request for each benefit type.

Part II - Information to identify the issues for SUPPLEMENTAL CLAIM

The purpose of this section is for you to identify, in item 13A, each issue decided by VA that you would like VA to review as a **SUPPLEMENTAL CLAIM**. Please refer to your decision notification letter(s) for a list of adjudicated issues. You should also enter the date of VA's decision notice letter for each issue, if possible. Only those issue(s) that you list on this form will be considered as part of your **SUPPLEMENTAL CLAIM**. For those issues you do not list on this form, you will still have ***one*** year from the date of the decision notification letter to file a **SUPPLEMENTAL CLAIM** for those issues to maintain eligibility for the earliest effective date for any granted benefits , or to have them reviewed in a different lane.

Upon receipt of a Statement of the Case (SOC) or Supplemental Statement of the Case (SSOC) in the legacy appeals system, you may elect to continue your appeal either in the legacy appeals system or in the modernized review system. Your decision notice contains further details. If you are filing this form to opt-in to the modernized review system for any issues decided in the SOC or SSOC, you must provide notice to VA of your decision to leave the legacy appeal process for those issues. To do so when using this form, please check the box for "**OPT-IN** from SOC/SSOC" in item 13 and list the issue(s) in the SOC or SSOC for which you are seeking review under item 13A as instructed above. Your selection of the **SUPPLEMENTAL CLAIM** option does not prevent you from changing the review option under the modernized review system (in accordance with applicable procedures) before VA renders the supplemental claim decision on an issue.

Please note that by checking the "OPT-IN from SOC/SSOC" box in item 13 you are acknowledging the following: I elect to participate in the modernized review system. I am withdrawing all eligible appeal issues listed on this form in their entirety, and any associated hearing requests, from the legacy appeals system to seek review of those issues in VA's modernized review system. I understand that I cannot return to the legacy appeals process for the issue(s) withdrawn.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Part III - New and Relevant Evidence

For your **SUPPLEMENTAL CLAIM** application to be complete, you must submit additional evidence that is **NEW AND RELEVANT** to support granting the benefit(s) sought or you must identify existing relevant records that you would like VA to obtain. (**NEW** evidence means information not previously submitted to VA, and **RELEVANT** evidence means information that tends to prove or disprove a matter at issue.)

If you know of evidence not in your possession and want VA to try to get it for you, give VA enough information about the evidence so that we can request it from the person or agency that has it. List all relevant evidence in the custody of a VA medical center (VAMC) or other Federal department or agency in PART II of this application in item 14.A and 14.B. VA will retrieve relevant records from a Federal facility or VAMC, that you adequately identify and authorize VA to obtain. If the holder of the evidence declines to give it to VA, asks for a fee to provide it, or otherwise cannot get the evidence, VA will notify you and provide you with an opportunity to submit the information or evidence.

VA will make every reasonable effort to obtain relevant records **not held** by a Federal facility that you adequately identify and authorize VA to obtain. These may include records from State or local governments and privately held evidence and information you tell us about, such as private doctor or hospital records from current or former employers. Please review your decision notification letter for the appropriate authorization forms to complete and submit those forms to VA with this request form. The form is available at www.va.gov/vaforms.

Part IV - Certification and Signature

Please be sure to sign this **SUPPLEMENTAL CLAIM** application, certifying that the statements on the form are true and correct to the best of the claimant's or authorized representative's knowledge and belief.

For Compensation claims: If you are filing for review of an issue more than one year after VA provided notice of our decision, please visit www.va.gov/disability-evidence to review the 38 U.S.C. 5103 information regarding evidence necessary to substantiate your claim. Then, check the "**5103 Notice Acknowledgement**" box in item 16 to confirm your receipt of this information. If you cannot review the information online and would like the information mailed to you, do not check the box in item 16 and VA will send you this notice through the mail or other electronic communication.

Privacy Act Notice: VA will not disclose information collected on this form to any source other than what has been authorized under the Privacy Act of 1974 or Title 38, Code of Federal Regulations 1.576 for routine uses (i.e., civil or criminal law enforcement, congressional communications, epidemiological or research studies, the collection of money owed to the United States, litigation in which the United States is a party or has an interest, the administration of VA programs and delivery of VA benefits, verification of identity and status, and personnel administration) as identified in the following VA systems of records published in the Federal Register: 58/VA21/22/28, Compensation, Pension, Education and Vocational Rehabilitation and Employment Records -VA; 55VA26 Loan Guaranty Home, Condominium and Manufactured Home Loan Applicant Records, Specially Adapted Housing Applicant Records, and Vendee Loan Applicant Records -VA; and 36VA29, Veterans and Armed Forces Personnel Programs of Government Life Insurance -VA. Your obligation to respond is required to obtain or retain benefits. VA uses your SSN to identify your claims file. Providing your SSN will help ensure that your records are properly associated with your claim file. Giving us your SSN account information is voluntary. Refusal to provide your SSN by itself will not result in the denial of benefits. VA will not deny an individual benefits for refusing to provide his or her SSN unless the disclosure of the SSN is required by a Federal Statute of law in effect prior to January 1, 1975, and still in effect. The requested information is considered relevant and necessary to determine maximum benefits under the law. The responses you submit are considered confidential (38 U.S.C. 5701). Information submitted is subject to verification through computer matching programs with other agencies.

Respondent Burden: We need this information to determine entitlement to benefits (38 U.S.C. 501). Title 38, United States Code, allows us to ask for this information. We estimate that you will need an average of 15 minutes to review the instructions, find the information, and complete the form. VA cannot conduct or sponsor a collection of information unless a valid OMB control number is displayed. You are not required to respond to a collection of information if this number is not displayed. Valid OMB control numbers can be located on the OMB Internet Page at www.reginfo.gov/public/do/PRAMain.

DECISION REVIEW REQUEST: SUPPLEMENTAL CLAIM

INSTRUCTIONS: PLEASE READ THE PRIVACY ACT NOTICE AND RESPONDENT BURDEN INFORMATION ON PAGE 2 BEFORE COMPLETING THIS FORM.

PART I - CLAIMANT'S IDENTIFYING INFORMATION

NOTE: You can either complete the form online or by hand. If completed by hand, print the information requested in ink, neatly, and legibly to expedite processing the form.

1. VETERAN'S NAME *(First, Middle Initial, Last)*

2. VETERAN'S SOCIAL SECURITY NUMBER

3. VA FILE NUMBER *(If applicable)*

4. VETERAN'S DATE OF BIRTH *(MM/DD/YYYY)*
Month Day Year

5. VETERAN'S SERVICE NUMBER *(If applicable)*

6. INSURANCE POLICY NUMBER *(If applicable)*

7. CLAIMANT'S NAME *(First, Middle Initial, Last) (If **other** than veteran)*

8. CLAIMANT TYPE:
☐ VETERAN ☐ VETERAN'S SPOUSE ☐ VETERAN'S CHILD ☐ VETERAN'S PARENT ☐ OTHER *(Specify)*

9. CURRENT MAILING ADDRESS *(Number, street or rural route, City or P.O. Box, State and ZIP Code and Country)*
No. & Street
Apt./Unit Number City
State/Province Country ZIP Code/Postal Code

10. TELEPHONE NUMBER *(Include Area Code)*

11. E-MAIL ADDRESS *(Optional)*

12. BENEFIT TYPE: **PLEASE CHECK <u>ONLY ONE</u>** *(If you would like to file for multiple benefit types, **you must complete a separate request form** for each benefit type.)*
☐ COMPENSATION ☐ PENSION/SURVIVORS BENEFITS ☐ FIDUCIARY ☐ INSURANCE ☐ VETERANS HEALTH ADMINISTRATION
☐ VOCATIONAL REHABILITATION AND EMPLOYMENT ☐ LOAN GUARANTY ☐ EDUCATION ☐ NATIONAL CEMETERY ADMINISTRATION

PART II - ISSUE(S) FOR SUPPLEMENTAL CLAIM

13. YOU MUST LIST EACH ISSUE DECIDED BY VA THAT YOU WOULD LIKE VA TO REVIEW AS PART OF YOUR **SUPPLEMENTAL CLAIM.** *Please refer to your decision notice(s) for a list of adjudicated issues. For each issue, please identify the date of VA's decision. (You may attach additional sheets of paper, if necessary. Include your name and file number on each additional sheet.*

Check this box if any issue listed below is being withdrawn from the legacy appeals process. ☐ **OPT-IN from SOC/SSOC**

13A. SPECIFIC ISSUE(S)	13B. DATE OF VA DECISION NOTICE

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

PART III - NEW AND RELEVANT EVIDENCE

14. To complete your application, you must submit new and relevant evidence to VA or tell us about new and relevant evidence that VA can assist you in gathering in support of your supplemental claim. If you have records in your possession, please attach the records to this form. Please list your name and file number on each page. If you would like VA to obtain **non-federal records,** please review your decision notification letter for the appropriate authorization forms to complete and submit those forms to VA with this request form.

15. DO YOU WANT VA TO GET FEDERAL RECORDS?

LIST BELOW ANY **VA MEDICAL CENTER(S) (VAMC), VA TREATMENT FACILITIES, OR FEDERAL DEPARTMENTS OR AGENCIES** THAT HAVE NEW AND RELEVANT EVIDENCE THAT YOU ARE AUTHORIZING VA TO OBTAIN IN SUPPORT OF YOUR SUPPLEMENTAL CLAIM: *You may attach additional sheets of paper, if necessary. Please list your name and file number on each additional sheet.*

15A. NAME AND LOCATION	15B. DATE(S) OF RECORDS

PART IV - CERTIFICATION AND SIGNATURE

NOTE: This section is **MANDATORY** and completion is required to process your claim, any omission may delay claim processing time.

VA AUTHORIZED REPRESENTATIVES ONLY: I certify that the claimant has authorized the undersigned representative to file this supplemental claim on behalf of the claimant and that the claimant is aware and accepts the information provided in this document. I certify that the claimant has authorized the undersigned representative to state that the claimant certifies the truth and completion of the information contained in this document to the best of claimant's knowledge.

NOTE: A POA's signature ***will not*** be accepted unless at the time of submission of this claim a valid VA Form 21-22, *Appointment of Veterans Service Organization as Claimant's Representative,* or VA Form 21-22a, *Appointment of Individual As Claimant's Representative,* indicating the appropriate POA is of record with VA.

16. **I CERTIFY THAT** the statements on this form are true and correct to the best of my knowledge and belief.

COMPENSATION BENEFIT CLAIMS ONLY:

☐ **5103 NOTICE Acknowledgment** - I certify I have received the notice to this application titled, ***Notice to Veteran/Service Member of Evidence Necessary to Substantiate a Claim for Veterans Disability Compensation and Related Compensation Benefits*** as provided at ***www.va.gov/disability-evidence***.
If the box is not checked, VA will send you this information through an electronic communication or written correspondence sent to the address on file with VA if your application is being submitted more than one year after VA provided notice of our decision for any issue listed in item 13.

16A. SIGNATURE OF VETERAN OR CLAIMANT OR VA AUTHORIZED REPRESENTATIVE *(Sign in ink)*	16B. DATE SIGNED

16C. NAME OF VA AUTHORIZED REPRESENTATIVE *(Please Print)*

ALTERNATE SIGNER CERTIFICATION AND SIGNATURE

17. **I CERTIFY THAT** by signing on behalf of the claimant, that I am a court-appointed representative; **OR**, an attorney in fact or agent authorized to act on behalf of a claimant under a durable power of attorney; **OR**, a person who is responsible for the care of the claimant, to include but not limited to a spouse or other relative; **OR**, a manager or principal officer acting on behalf of an institution which is responsible for the care of an individual; **AND**, that the claimant is under the age of 18; **OR**, is mentally incompetent to provide substantially accurate information needed to complete the form, or to certify that the statements made on the form are true and complete; **OR**, is physically unable to sign this form.

I understand that I may be asked to confirm the truthfulness of the answers to the best of my knowledge under penalty of perjury. I also understand that VA may request further documentation or evidence to verify or confirm my authorization to sign or complete an application on behalf of the claimant if necessary. Examples of evidence which VA may request include: Social Security Number (SSN) or Taxpayer Identification Number (TIN); a certificate or order from a court with competent jurisdiction showing your authority to act for the claimant with a judge's signature and a date/time stamp; copy of documentation showing appointment of fiduciary; durable power of attorney showing the name and signature of the claimant and your authority as attorney in fact or agent; health care power of attorney, affidavit or notarized statement from an institution or person responsible for the care of the claimant indicating the capacity or responsibility of care provided; or any other documentation showing such authorization.

17A. SIGNATURE OF ALTERNATE SIGNER *(Sign in ink)*	17B. DATE SIGNED

17C. NAME OF ALTERNATE SIGNER *(Please Print)*

PENALTY: The law provides severe penalties which include a fine, imprisonment, or both, for the willful submission of any statement or evidence of a material fact, knowing it to be false.

WHERE TO SEND YOUR WRITTEN CORRESPONDENCE

The time it takes your response to reach VA affects how long it takes us to process your claim. We recommend responding electronically whenever possible to minimize the time we spend waiting for mail. Only claimants or representatives can upload responses electronically right now. If you are not a claimant or representative, we recommend faxing so VA can receive your responses immediately.

The **fastest** way to respond to VA is to upload your correspondence electronically through VA.gov.

Visit https://www.va.gov. Under **Disability** click "Upload Evidence to support your claim".

If you cannot upload your correspondence, fax or mail it to the applicable address below. These addresses serve **all United States and foreign locations**.

To determine where to send your correspondence, identify your benefit type (Compensation, Veterans Pension, or Survivor Benefits); then, locate the applicable fax number or mailing address.

HOPKINS, Marshall H

DARLENE HOPKINS
310 MAIN ST
ALTAMONT, MO 64620

Dear Ms. Hopkins:

We are writing to you about your claim for dependency indemnity compensation, survivors' pension, and accrued benefits.

How We Made Our Decision

We have enclosed a copy of our Rating Decision for your review. It provides a detailed explanation about our decision. You can find the evidence we considered in the section titled "*Evidence*." The reasons for our decision can be found in the portion of the rating titled "*Reasons for Decision*" or "*Reasons and Bases*".

Favorable Findings

Favorable Finding(s) applicable to the decision on your claim for benefits are listed below:

Active Duty Service	The Veteran had the minimum active duty requirements in order to qualify for pension.
Wartime Service	The Veteran had wartime service.
Character of Service	The Veteran's character of service meets the requirements to qualify for pension.

Elements Not Met

For the elements not met that are required to grant benefits, please see the denial reasons below.

Please refer to the enclosed VA Form 21P-10199, "*Legal Summary - Survivors Pension, Dependency and Indemnity Compensation, and Accrued Benefits*" for the laws used in deciding your claim.

(b) (6)

Hopkins, Marshall H

What We Decided

Entitlement to Dependency and Indemnity Compensation under 38 U.S.C. 1318 is denied.

Entitlement to Dependency and Indemnity Compensation under 38 USC 1151 is denied.

Service connection for cause of death is denied.

The evidence you submitted shows your income effective July 27, 2020 exceeds the maximum annual pension limit. Therefore, we have disallowed your claim for benefits.

The rate of pension payable depends upon the amount of your family income and number of dependents. If your family income exceeds the applicable pension limit, benefits are not payable.

The income limit for a surviving spouse with one dependent is $12,072.00.

Your income for VA purposes is $23,316.00 based on the following income and allowable expenses:

INCOME	SOURCE
$9,888.00	Retirement Income Annually
$13,428.00	Social Security Income Annually - Child

You Reported Receiving Social Security Income

On your application you did not report you child Kerri Hopkin's Social Security income. However, the Social Security Administration (SSA) has reported her rate of entitlement effective December 2019 was $1,119.00. The law requires that we count the amount of $1,119.00 when determining your eligibility for VA pension. If this information is incorrect, please provide us with a copy of her Social Security benefit letter and we will reconsider this decision.

What Can You Do?

If your income decreases or your medical expenses increase you may reapply for VA pension benefits.

If you would like us to determine your eligibility from (the earliest entitlement date), please complete, sign, and return the following enclosed forms:

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

- VA Form 20-0995, Decision Review Request: Supplemental Claim;
- VA Form 21P-0519s-1, Improved Pension Eligibility Verification Report (EVR), for the period of July 27, 2020 through July 31, 2021. We have also enclosed VA Form 21P-0510, Eligibility Verification Report Instructions, to assist you in filling out this form.;
- VA Form 21P-8416, Medical Expense Report, for the period of July 27, 2020 through July 31, 2021.

You cannot claim expenses for the following:

- bills paid by someone else
- bills paid by insurance
- bills you paid, if an insurance company reimbursed you
- bills that are not for health expenses

To claim an income change and family medical expenses, you must return the completed forms to this office no later than December 31, 2022. We may consider family medical expenses you paid after July 27, 2020.

If you wish to file a claim for special monthly pension, please make your claim on the enclosed VA Form 21-2680, *Examination for Housebound Status or Permanent Need for Regular Aid and Attendance.*

Accrued Denied

Accrued benefits (benefits due and not paid to the veteran at the time of death) cannot be paid as there are no accrued amounts available.

What You Should Do If You Disagree With Our Decision

If you do not agree with this decision, you have one year from the date of this letter to select a review option to preserve your earliest effective benefit date. The review options and their proper applications are as follows, for a(n):

- **Supplemental Claim**, complete **VA Form 20-0995**, *Decision Review Request: Supplemental Claim*
- **Higher-Level Review**, complete **VA Form 20-0996**, *Decision Review Request: Higher-Level Review*
- **Appeal to the Board**, complete **VA Form 10182**, *Decision Review Request: Board Appeal (Notice of Disagreement)*

MARSHALL HOPKINS

VA File Number
(b) (6) [redacted]

Represented By:
MISSOURI VETERANS COMMISSION
Rating Decision
01/07/2021

INTRODUCTION

The records reflect that MARSHALL H. HOPKINS was a Veteran of the Gulf War Era, Peacetime and Vietnam Era. The veteran served in the Air Force from December 2, 1963 to June 9, 1967 and the Air Force Reserves from December 28, 1990 to February 25, 1991. You filed a new claim for benefits that was received on August 17, 2020. Based on a review of the evidence listed below, we have made the following decision(s) on your claim.

DECISION

1. Entitlement to Dependency and Indemnity Compensation under 38 U.S.C. 1318 is denied.

2. Entitlement to Dependency and Indemnity Compensation under 38 USC 1151 is denied.

3. Service connection for cause of death is denied.

EVIDENCE

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

- VA Form 21-0966, Intent to File a Claim for Compensation and/or Pension, or Survivors pension and/or DIC received 07/27/2020
- VA notification letter dated 07/31/2020
- VA Form 21-534EZ, Application for Dependency and Indemnity Compensation, Death Pension and/or Accrued Benefits received 08/17/2020
- Death Certificate of the Veteran received 08/17/2020
- VA Form 21P-0969, Income and Asset Statement in Support of a Claim for Pension or Parents' Dependency and Indemnity Compensation (DIC) received 08/17/2020
- VA development letter dated 09/03/2020
- VA Form 21-4138, Statement in Support of Claim received 09/25/2020
- VA development letter dated 10/08/2020
- VA treatment reports, Kansas City, Amarillo, Memphis, Denver, and Albuquerque VAMCs, for the time period of 10/28/2003 through 10/17/2015
- VA notification letter dated 11/12/2020
- We have been unable to obtain records from Amarillo VAMC for the period of 01/14/2003 through 05/01/2006. We have determined that these records do not exist. We will now make a decision based on the evidence of record.
- VA Medical Opinion dated 01/05/2020
- VA notification letter dated 11/12/2020
- Review of the electronic claims folder of the veteran
- Service records of the veteran (to include service treatment records and copies of documents from the official military personnel file for the veteran's periods of active and reserve service), for the time period of 11/1963 through 07/1994, received on 10/22/1996

REASONS FOR DECISION

1. Entitlement to Dependency and Indemnity Compensation under 38 U.S.C. 1318.

Although the veteran's death may not be due to service-related conditions, Dependency and Indemnity Compensation benefits may be payable as if the cause of death were service connected if the cause of the veteran's death was not due to willful misconduct and the veteran was continuously rated totally disabled by reason of service connected disabilities for a period of 10 years or more immediately preceding death; or for five years if the total evaluation was continuously in effect from the date of discharge from military service; or for one year if the veteran was a former POW who died after September 30, 1999. (38 CFR 3.22, 38 USC 1318)

Although the veteran met the schedular requirements (based on service-connected disabilities) for a potential total evaluation during his lifetime, the Veteran was not considered totally disabled from service-connected disabilities for any period prior to his death.

Entitlement to Dependency and Indemnity Compensation is not established because a total evaluation had not been in effect for more than 10 continuous years preceding death. Entitlement to Dependency and Indemnity Compensation (DIC) under 38 U.S.C. 1318 is denied.

2. Entitlement to Dependency and Indemnity Compensation under 38 USC 1151.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

We have denied entitlement to Dependency and Indemnity Compensation (DIC) under 38 USC 1151 because the evidence fails to establish that VA medical or educational services were the proximate cause of death.

Entitlement to Dependency and Indemnity Compensation (DIC) under 38 USC 1151 may be established for the death of a veteran if the evidence shows that the veteran's death was caused by VA hospitalization, medical or surgical treatment, vocational rehabilitation, compensated work therapy program (CWT), or as the result of having submitted to a VA medical examination. The evidence must show that the veteran's death is actually the result of the VA care. Specifically, carelessness, negligence, lack of proper skill, error in judgment, or similar instance of fault on the part of the Department in furnishing the hospital care, medical or surgical treatment, or examination must be shown; or the proximate cause of death must be an event not reasonably foreseeable. For training and rehabilitation services or compensated work therapy program, it must be shown that the veteran's participation in an essential activity or function of the training, services, or CWT program provided or authorized by VA proximately caused the veteran's death.

To establish causation, the evidence must show that the hospital care, medical or surgical treatment, or examination resulted in the veteran's death. Merely showing that a veteran received care, treatment, or examination and that that the veteran has died does not establish cause. 38 C.F.R. § 3.361(c)(1). Hospital care, medical or surgical treatment, or examination cannot cause the continuance or natural progress of a disease or injury for which the care, treatment, or examination was furnished unless VA's failure to timely diagnoses and properly treat the disease or injury proximately caused the continuance or natural progress. 38 C.F.R. § 3.361(c)(2). Death caused by a veteran's failure to follow properly given medical instructions is not caused by hospital care, medical or surgical treatment, or examination. 38 C.F.R. § 3.361(c)(3).

To establish that carelessness, negligence, lack of proper skill, error in judgment, or similar instance of fault on VA's part in furnishing hospital care, medical or surgical treatment, or examination proximately caused a veteran's death, it must be shown that VA failed to exercise the degree of care that would be expected of a reasonable health care provider; or, that VA furnished the hospital care, medical or surgical treatment, or examination without the Veteran's informed consent. 38 C.F.R. § 3.361(d)(1).

Whether the proximate cause of a Veteran's death was an event not reasonably foreseeable is in each claim to be determined based on what a reasonable health care provider would have foreseen. The event need not be completely unforeseeable or unimaginable but must be one that a reasonable health care provider would not have considered to be an ordinary risk of the treatment provided. 38 C.F.R. § 3.361(d)(2).

As specified in 38 C.F.R. § 3.361(d)(2), in determining whether an event was reasonably foreseeable, VA will consider whether the risk of that event was the type of risk that a reasonable health care provider would have disclosed in connection with the informed consent procedures of 38 C.F.R. § 17.32.

On your correspondence that we received on 09/25/2020, you stated that you were seeking

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

entitlement to compensation under 38 U.S.C. 1151, claiming that the veteran was given a clean bill of health by VA doctors from the Amarillo VAMC after a colonoscopy/follow-up visit for hernia surgery in August 2015. The claimant stated that "apparently during the colonoscopy his bowels were nicked", and that the veteran was subsequently admitted to the Memphis VAMC and had 3/4 of his colon surgically removed, but later passed away.

A layperson may provide competent medical evidence regarding symptoms. However, a lay opinion is not entitled to any weight when the determinative issue involves questions of medical causation and a medical diagnosis (Espiritu v. Derwinski). The record does not reflect that you possess the medical training and expertise to diagnose or offer an opinion as to the etiology of any claimed disability. When the determinative issue is one of medical causation or a diagnosis, only those with specialized training or expertise are competent to provided evidence on an issue (Jones v. Brown, Espiritu v. Derwinski).

The instructions with your FDC application explained how the application should be filled out and explained what evidence should be submitted to support your claim. The instructions also included full notification of your rights under the Veterans Claims Assistance Act. Specifically, in regard to your claim for entitlement to Dependency and Indemnity Compensation under 38 USC 1151, we informed you that you must provide evidence showing that the veteran's death was a result of undergoing VA hospitalization, medical or surgical treatment, examination, or training, AND that the veteran's death was the direct result of VA fault such as carelessness, negligence, lack of proper skill, or error in judgment: OR, the direct result of an event that was not a reasonably expected result or complication of the VA care or treatment; OR, or the direct result of participation in a VA Vocational Rehabilitation and Employment or compensated work therapy program.

Further, in our VA development letter to you dated 10/08/2020, we requested medical evidence to support your claim for Dependency and Indemnity Compensation under 38 U.S.C. 1151.

Specifically, in regard to your claim for entitlement to Dependency and Indemnity Compensation under 38 USC 1151, we informed you that you must provide evidence that shows that as a result of VA hospitalization, medical or surgical treatment, examination, or training, the veteran had an additional disability or disabilities, or an aggravation of an existing injury or disease, and that the disability was the direct result of VA fault such as carelessness, negligence, lack of proper skill, or error in judgment, or not a reasonably expected result or complication of the VA care or treatment, or the direct result of participation in a VA Vocational Rehabilitation and Employment or compensated work therapy program.

You did not provide us with any additional medical evidence; however, we were able to review the veteran's private treatment reports of record from we were able to review the veteran's VA treatment reports from the Kansas City, Amarillo, Memphis, Denver, and Albuquerque VAMCs, for the time period of 10/28/2003 through 10/17/2015. These VA medical records contain findings of small bowel infarction; however, none of these reports specifically relate the death of the veteran to treatment at the Amarillo VAMC.

Therefore, we submitted the veteran's claim folder to a VA examiner to further evaluate a

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

possible relationship between the cause of the veteran's death and the VA medical treatment that he received. After a review of the evidence of record, the examiner opined that the veteran's death was less likely than not (less than 50 percent probability) a result of the VA medical treatment that he received.

In the rational that he provided for his opinion, the VA examiner stated that "Medical records document that the Veteran presented to the Memphis VAMC with necrotic small bowel, associated small bowel perforation, requiring extensive small bowel resection. There is no documentation of colonic pathology or the need for colonic resection. There is no documentation in the medical record that the Veteran had a colonoscopy at any point either prior to or during his hospitalization at the Amarillo VAMC in 8/2015. In fact, he repeatedly refused evaluation with colonoscopy. He underwent cystoscopy at the time as he presented to the Amarillo VAMC 8/2015, with obstructive uropathy, bilateral hydronephrosis and hydroureters and pyelonephritis. There is no indication in the medical records that his bowel was nicked either at the time of his recurrent right inguinal hernia repair 8/2015 or during the cystoscopy that was performed shortly after his right inguinal hernia surgery. Both procedures are documented in the medical record to have been performed without complication. The Veteran's presentation at the Memphis VAMC 9/2015, with necrotic small bowel, and small perforation, as well as sepsis and multiorgan system failure was unanticipated and the clearly the result of an event not reasonably foreseeable. The etiology of the Veteran's small bowel infarct was never elucidated, although he was noted to have the new onset of atrial fibrillation at the time of his hospitalization 9/2015 at the Memphis VAMC. It is possible that his infarcted small bowel was due to cardiac embolization. Review of medical records documents appropriate medical and surgical care at the Kansas City VAMC, the Amarillo VAMC and the Memphis VAMC. There is no indication whatsoever that the veterans death was the result of carelessness, negligence, lack of proper skill, error in judgment, or similar fault on the part of the department of veterans affairs in furnishing the hospital care, medical or surgical treatment, or examination."

Further, the VA examiner stated "a review of medical records documents the Veteran's history of preexisting poorly controlled DM. He underwent uncomplicated repair of recurrent right inguinal hernia 8/2015. Following his discharge from the hospital after the hernia repair, he developed bladder outlet obstruction with bilateral hydronephrosis, hydroureter and pyelonephritis. He was appropriately managed for this condition at the Amarillo VAMC. He was subsequently admitted emergently to the Memphis VAMC with small bowel necrosis/gangrene and perforation with sepsis, and multisystem organ failure. His presentation was complicated by hyponatremia, acute kidney injury, altered mental status and CHF. He was noted to have new onset atrial fibrillation. The Veteran received appropriate treatment at the Memphis VAMC, including intubation, mechanical ventilation, pressor support, antibiotics, crystalloid administration, insulin, and emergent surgery with bowel resection for gangrenous necrotic small bowel complicated by bowel perforation. The only iatrogenic complication that occurred during the terminal hospitalization was pneumothorax that occurred during subclavian line placement, managed with chest tube placement. This complication did not contribute to the Veteran's death. His extensive small bowel infarction with small bowel gangrene, necrosis and perforation were the proximate cause of the Veteran's death. Such extensive small infarction is typically a terminal event despite appropriate and aggressive management as the Veteran received. The treatment the veteran received in connection with his/her death recorded as small bowel infarction with contributing conditions (not resulting in the immediate cause of death), to include diabetes, hyperlipidemia,

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

and inguinal hernias, was the not result of carelessness, negligence, lack of proper skill, error in judgment, or similar instance of fault on VA's part in furnishing care, medical or surgical treatment, or examination."

From the plain language of the statute, it is clear that to establish entitlement to Dependency and Indemnity Compensation (DIC) under 38 USC 1151, all three of the following factors must be shown: (1) Disability/additional disability, (2) that VA hospitalization, treatment, surgery, examination, or training was the cause of such disability, and (3) that there was an element of fault on the part of VA in providing the treatment, hospitalization, surgery, etc., or that the disability resulted from an event not reasonably foreseeable.

To establish causation, the evidence must show that the hospital care, medical or surgical treatment, or examination resulted in the veteran's additional disability or death. Merely showing that a veteran received care, treatment, or examination and that the veteran has an additional disability or died does not establish causation. 38 C.F.R. § 3.361(c)(1).

Therefore, entitlement to Dependency and Indemnity Compensation (DIC) under 38 USC 1151 is not established as the veteran's death was not caused by VA hospitalization, medical or surgical treatment, vocational rehabilitation, compensated work therapy program (CWT), or as the result of having submitted to a VA medical examination. {38 USC 1151}. For medical services, the evidence must show that fault on VA's part or an event not reasonably foreseeable proximately caused death. Entitlement to Dependency and Indemnity Compensation (DIC) under 38 USC 1151 is denied because the evidence fails to establish that VA medical or educational services were the proximate cause of death.

3. Service connection for the cause of death.

Service connection may be granted for a disability which began in or was caused by some event or experience in military service, or if a disability pre-existed such service, was aggravated therein. (38 CFR 3.303)

Service connection may also be granted on a presumptive basis if an applicable chronic disability is manifested to a compensable degree (severe enough to be evaluated at least 10 percent disabling) within a year after military discharge. (38 CFR 3.309)

The death of a veteran will be considered as having been due to a service-connected disability when the evidence establishes that such disability was either the principal or a contributory cause of death. (38 CFR 3.312)

Service connection for the cause of death may be granted to a reserve or National Guard service member if the
service person was disabled during "active" duty for training (ADT or ACDUTRA) due to a disease or injury incurred in the line of duty, AND the disease or injury caused or contributed to the service person's death. Service connection for the cause of death may also be granted to a reserve or National Guard service member if the service person was disabled during " inactive"

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

duty training (IADT) due to an injury incurred or aggravated in the line of duty AND that injury caused or contributed to the service person's death, OR if the service member suffered an acute myocardial infarction, cardiac arrest, or cerebrovascular accident that occurred during such training; AND that injury (acute myocardial infarction, cardiac arrest, or cerebrovascular accident) caused or contributed to the service person's death. (38 CFR 3.6)

We received your claim for Dependency and Indemnity Compensation (DIC) under our Fully Developed Claim (FDC) Program on 08/17/2020. The instructions with your FDC application explained how the application should be filled out and explained what evidence should be submitted to support your claim. The instructions also included full notification of your rights under the Veterans Claims Assistance Act. As you submitted and signed your claim on a VA Form 21-534EZ, Application for Dependency and Indemnity Compensation, Death Pension and/or Accrued Benefits under our FDC Program, you were informed of the evidence which was needed in order to support your claim, and you have certified that you have enclosed all the information or evidence to support your claim, and that you have no other information or evidence to give VA to support your claim.

The death certificate documents that the veteran died on 09/18/2015. The cause of death is shown as small bowel infarction with contributing conditions (not resulting in the immediate cause of death), to include diabetes, hyperlipidemia, and inguinal hernias.

According to 38 CFR 3.159 (c)(2), VA will make as many requests as are necessary to obtain relevant records from a Federal department or agency. These records include but are not limited to military records, including service medical records; medical and other records from VA medical facilities; records from non-VA facilities providing examination or treatment at VA expense; and records from other Federal agencies, such as the Social Security Administration. VA will end its efforts to obtain records from a Federal department or agency only if VA concludes that the records sought do not exist or that further efforts to obtain those records would be futile. Cases in which VA may conclude that no further efforts are required include those in which the Federal department or agency advises VA that the requested records do not exist or the custodian does not have them.

The claimant must cooperate fully with VA's reasonable efforts to obtain relevant records from Federal agency or department custodians. If requested by VA, the claimant must provide enough information to identify and locate the existing records, including the custodian or agency holding the records; the approximate time frame covered by the records; and, in the case of medical treatment records, the condition for which treatment was provided. In the case of records requested to corroborate a claimed stressful event in service, the claimant must provide information sufficient for the records custodian to conduct a search of the corroborative records. If necessary, the claimant must authorize the release of existing records in a form acceptable to the custodian or agency holding the records.

Collectively, we were able to review the veteran’s VA treatment reports from the Kansas City, Amarillo, Memphis, Denver, and Albuquerque VAMCs, for the time period of 10/28/2003 through 10/17/2015.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

You informed us that the veteran's treatment from the Memphis VAMC (from 09/18/2015) and Amarillo VAMC (from 01/14/2003) were pertinent to your claim. We were able to review the veteran's VA treatment records from the Memphis VAMC for the time period of 09/16/2015 through 10/17/2015. We were also able to obtain the veteran's records from the Amarillo VAMC from 05/02/2006 through 10/18/2016. (If you feel that there are additional records prior to May 2, 2006 which would be pertinent to your claim, please tell us.)

These VA medical records contain findings of small bowel infarction, diabetes, hyperlipidemia, and inguinal hernias. However, none of these reports specifically relate the death of the veteran to military service.

As of the date of this Rating Decision, evidence establishing a relationship between the death of the veteran and military service has not been received. Lastly, the evidence of record did not reveal that the veteran was disabled due to an injury incurred or aggravated during a period of "active" or "inactive" duty for training. The evidence of record also did not reveal that the veteran suffered an acute myocardial infarction, cardiac arrest, or cerebrovascular accident during a period of "inactive" duty for training.

Therefore, we have denied service connection for the cause of death because there was no evidence supporting a relationship between the listed cause of death and the military service of the veteran, nor was diabetes shown to be manifested to a compensable degree (severe enough to be evaluated at least 10 percent disabling) within one year of military discharge. Also, the evidence did not reveal that the veteran's death was due to an injury incurred or aggravated during a period of "active" or "inactive" duty for training, nor did the evidence show that the veteran suffered an acute myocardial infarction, cardiac arrest, or cerebrovascular accident during a period of "inactive" duty for training.

MISSOURI VETERANS COMMISSION
Rating Decision
01/07/2021

INTRODUCTION

The records reflect that MARSHALL H. HOPKINS was a Veteran of the Gulf War Era, Peacetime and Vietnam Era. The veteran served in the Air Force from December 2, 1963 to June 9, 1967 and the Air Force Reserves from December 28, 1990 to February 25, 1991. You filed a new claim for benefits that was received on August 17, 2020. Based on a review of the evidence listed below, we have made the following decision(s) on your claim.

DECISION

1. Entitlement to Dependency and Indemnity Compensation under 38 U.S.C. 1318 is denied.

2. Entitlement to Dependency and Indemnity Compensation under 38 USC 1151 is denied.

3. Service connection for cause of death is denied.

EVIDENCE

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

- VA Form 21-0966, Intent to File a Claim for Compensation and/or Pension, or Survivors pension and/or DIC received 07/27/2020
- VA notification letter dated 07/31/2020
- VA Form 21-534EZ, Application for Dependency and Indemnity Compensation, Death Pension and/or Accrued Benefits received 08/17/2020
- Death Certificate of the Veteran received 08/17/2020
- VA Form 21P-0969, Income and Asset Statement in Support of a Claim for Pension or Parents' Dependency and Indemnity Compensation (DIC) received 08/17/2020
- VA development letter dated 09/03/2020
- VA Form 21-4138, Statement in Support of Claim received 09/25/2020
- VA development letter dated 10/08/2020
- VA treatment reports, Kansas City, Amarillo, Memphis, Denver, and Albuquerque VAMCs, for the time period of 10/28/2003 through 10/17/2015
- VA notification letter dated 11/12/2020
- We have been unable to obtain records from Amarillo VAMC for the period of 01/14/2003 through 05/01/2006. We have determined that these records do not exist. We will now make a decision based on the evidence of record.
- VA Medical Opinion dated 01/05/2020
- VA notification letter dated 11/12/2020
- Review of the electronic claims folder of the veteran
- Service records of the veteran (to include service treatment records and copies of documents from the official military personnel file for the veteran's periods of active and reserve service), for the time period of 11/1963 through 07/1994, received on 10/22/1996

REASONS FOR DECISION

1. Entitlement to Dependency and Indemnity Compensation under 38 U.S.C. 1318.

Although the veteran's death may not be due to service-related conditions, Dependency and Indemnity Compensation benefits may be payable as if the cause of death were service connected if the cause of the veteran's death was not due to willful misconduct and the veteran was continuously rated totally disabled by reason of service connected disabilities for a period of 10 years or more immediately preceding death; or for five years if the total evaluation was continuously in effect from the date of discharge from military service; or for one year if the veteran was a former POW who died after September 30, 1999. (38 CFR 3.22, 38 USC 1318)

Although the veteran met the schedular requirements (based on service-connected disabilities) for a potential total evaluation during his lifetime, the Veteran was not considered totally disabled from service-connected disabilities for any period prior to his death.

Entitlement to Dependency and Indemnity Compensation is not established because a total evaluation had not been in effect for more than 10 continuous years preceding death. Entitlement to Dependency and Indemnity Compensation (DIC) under 38 U.S.C. 1318 is denied.

2. Entitlement to Dependency and Indemnity Compensation under 38 USC 1151.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

We have denied entitlement to Dependency and Indemnity Compensation (DIC) under 38 USC 1151 because the evidence fails to establish that VA medical or educational services were the proximate cause of death.

Entitlement to Dependency and Indemnity Compensation (DIC) under 38 USC 1151 may be established for the death of a veteran if the evidence shows that the veteran's death was caused by VA hospitalization, medical or surgical treatment, vocational rehabilitation, compensated work therapy program (CWT), or as the result of having submitted to a VA medical examination. The evidence must show that the veteran's death is actually the result of the VA care. Specifically, carelessness, negligence, lack of proper skill, error in judgment, or similar instance of fault on the part of the Department in furnishing the hospital care, medical or surgical treatment, or examination must be shown; or the proximate cause of death must be an event not reasonably foreseeable. For training and rehabilitation services or compensated work therapy program, it must be shown that the veteran's participation in an essential activity or function of the training, services, or CWT program provided or authorized by VA proximately caused the veteran's death.

To establish causation, the evidence must show that the hospital care, medical or surgical treatment, or examination resulted in the veteran's death. Merely showing that a veteran received care, treatment, or examination and that that the veteran has died does not establish cause. 38 C.F.R. § 3.361(c)(1). Hospital care, medical or surgical treatment, or examination cannot cause the continuance or natural progress of a disease or injury for which the care, treatment, or examination was furnished unless VA's failure to timely diagnoses and properly treat the disease or injury proximately caused the continuance or natural progress. 38 C.F.R. § 3.361(c)(2). Death caused by a veteran's failure to follow properly given medical instructions is not caused by hospital care, medical or surgical treatment, or examination. 38 C.F.R. § 3.361(c)(3).

To establish that carelessness, negligence, lack of proper skill, error in judgment, or similar instance of fault on VA's part in furnishing hospital care, medical or surgical treatment, or examination proximately caused a veteran's death, it must be shown that VA failed to exercise the degree of care that would be expected of a reasonable health care provider; or, that VA furnished the hospital care, medical or surgical treatment, or examination without the Veteran's informed consent. 38 C.F.R. § 3.361(d)(1).

Whether the proximate cause of a Veteran's death was an event not reasonably foreseeable is in each claim to be determined based on what a reasonable health care provider would have foreseen. The event need not be completely unforeseeable or unimaginable but must be one that a reasonable health care provider would not have considered to be an ordinary risk of the treatment provided. 38 C.F.R. § 3.361(d)(2).

As specified in 38 C.F.R. § 3.361(d)(2), in determining whether an event was reasonably foreseeable, VA will consider whether the risk of that event was the type of risk that a reasonable health care provider would have disclosed in connection with the informed consent procedures of 38 C.F.R. § 17.32.

On your correspondence that we received on 09/25/2020, you stated that you were seeking

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

entitlement to compensation under 38 U.S.C. 1151, claiming that the veteran was given a clean bill of health by VA doctors from the Amarillo VAMC after a colonoscopy/follow-up visit for hernia surgery in August 2015. The claimant stated that "apparently during the colonoscopy his bowels were nicked", and that the veteran was subsequently admitted to the Memphis VAMC and had 3/4 of his colon surgically removed, but later passed away.

A layperson may provide competent medical evidence regarding symptoms. However, a lay opinion is not entitled to any weight when the determinative issue involves questions of medical causation and a medical diagnosis (Espiritu v. Derwinski). The record does not reflect that you possess the medical training and expertise to diagnose or offer an opinion as to the etiology of any claimed disability. When the determinative issue is one of medical causation or a diagnosis, only those with specialized training or expertise are competent to provided evidence on an issue (Jones v. Brown, Espiritu v. Derwinski).

The instructions with your FDC application explained how the application should be filled out and explained what evidence should be submitted to support your claim. The instructions also included full notification of your rights under the Veterans Claims Assistance Act. Specifically, in regard to your claim for entitlement to Dependency and Indemnity Compensation under 38 USC 1151, we informed you that you must provide evidence showing that the veteran's death was a result of undergoing VA hospitalization, medical or surgical treatment, examination, or training, AND that the veteran's death was the direct result of VA fault such as carelessness, negligence, lack of proper skill, or error in judgment: OR, the direct result of an event that was not a reasonably expected result or complication of the VA care or treatment; OR, or the direct result of participation in a VA Vocational Rehabilitation and Employment or compensated work therapy program.

Further, in our VA development letter to you dated 10/08/2020, we requested medical evidence to support your claim for Dependency and Indemnity Compensation under 38 U.S.C. 1151.

Specifically, in regard to your claim for entitlement to Dependency and Indemnity Compensation under 38 USC 1151, we informed you that you must provide evidence that shows that as a result of VA hospitalization, medical or surgical treatment, examination, or training, the veteran had an additional disability or disabilities, or an aggravation of an existing injury or disease, and that the disability was the direct result of VA fault such as carelessness, negligence, lack of proper skill, or error in judgment, or not a reasonably expected result or complication of the VA care or treatment, or the direct result of participation in a VA Vocational Rehabilitation and Employment or compensated work therapy program.

You did not provide us with any additional medical evidence; however, we were able to review the veteran's private treatment reports of record from we were able to review the veteran's VA treatment reports from the Kansas City, Amarillo, Memphis, Denver, and Albuquerque VAMCs, for the time period of 10/28/2003 through 10/17/2015. These VA medical records contain findings of small bowel infarction; however, none of these reports specifically relate the death of the veteran to treatment at the Amarillo VAMC.

Therefore, we submitted the veteran's claim folder to a VA examiner to further evaluate a

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

possible relationship between the cause of the veteran's death and the VA medical treatment that he received. After a review of the evidence of record, the examiner opined that the veteran's death was less likely than not (less than 50 percent probability) a result of the VA medical treatment that he received.

In the rational that he provided for his opinion, the VA examiner stated that "Medical records document that the Veteran presented to the Memphis VAMC with necrotic small bowel, associated small bowel perforation, requiring extensive small bowel resection. There is no documentation of colonic pathology or the need for colonic resection. There is no documentation in the medical record that the Veteran had a colonoscopy at any point either prior to or during his hospitalization at the Amarillo VAMC in 8/2015. In fact, he repeatedly refused evaluation with colonoscopy. He underwent cystoscopy at the time as he presented to the Amarillo VAMC 8/2015, with obstructive uropathy, bilateral hydronephrosis and hydroureters and pyelonephritis. There is no indication in the medical records that his bowel was nicked either at the time of his recurrent right inguinal hernia repair 8/2015 or during the cystoscopy that was performed shortly after his right inguinal hernia surgery. Both procedures are documented in the medical record to have been performed without complication. The Veteran's presentation at the Memphis VAMC 9/2015, with necrotic small bowel, and small perforation, as well as sepsis and multiorgan system failure was unanticipated and the clearly the result of an event not reasonably foreseeable. The etiology of the Veteran's small bowel infarct was never elucidated, although he was noted to have the new onset of atrial fibrillation at the time of his hospitalization 9/2015 at the Memphis VAMC. It is possible that his infarcted small bowel was due to cardiac embolization. Review of medical records documents appropriate medical and surgical care at the Kansas City VAMC, the Amarillo VAMC and the Memphis VAMC. There is no indication whatsoever that the veterans death was the result of carelessness, negligence, lack of proper skill, error in judgment, or similar fault on the part of the department of veterans affairs in furnishing the hospital care, medical or surgical treatment, or examination."

Further, the VA examiner stated "a review of medical records documents the Veteran's history of preexisting poorly controlled DM. He underwent uncomplicated repair of recurrent right inguinal hernia 8/2015. Following his discharge from the hospital after the hernia repair, he developed bladder outlet obstruction with bilateral hydronephrosis, hydroureter and pyelonephritis. He was appropriately managed for this condition at the Amarillo VAMC. He was subsequently admitted emergently to the Memphis VAMC with small bowel necrosis/gangrene and perforation with sepsis, and multisystem organ failure. His presentation was complicated by hyponatremia, acute kidney injury, altered mental status and CHF. He was noted to have new onset atrial fibrillation. The Veteran received appropriate treatment at the Memphis VAMC, including intubation, mechanical ventilation, pressor support, antibiotics, crystalloid administration, insulin, and emergent surgery with bowel resection for gangrenous necrotic small bowel complicated by bowel perforation. The only iatrogenic complication that occurred during the terminal hospitalization was pneumothorax that occurred during subclavian line placement, managed with chest tube placement. This complication did not contribute to the Veteran's death. His extensive small bowel infarction with small bowel gangrene, necrosis and perforation were the proximate cause of the Veteran's death. Such extensive small infarction is typically a terminal event despite appropriate and aggressive management as the Veteran received. The treatment the veteran received in connection with his/her death recorded as small bowel infarction with contributing conditions (not resulting in the immediate cause of death), to include diabetes, hyperlipidemia,

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

and inguinal hernias, was the not result of carelessness, negligence, lack of proper skill, error in judgment, or similar instance of fault on VA's part in furnishing care, medical or surgical treatment, or examination."

From the plain language of the statute, it is clear that to establish entitlement to Dependency and Indemnity Compensation (DIC) under 38 USC 1151, all three of the following factors must be shown: (1) Disability/additional disability, (2) that VA hospitalization, treatment, surgery, examination, or training was the cause of such disability, and (3) that there was an element of fault on the part of VA in providing the treatment, hospitalization, surgery, etc., or that the disability resulted from an event not reasonably foreseeable.

To establish causation, the evidence must show that the hospital care, medical or surgical treatment, or examination resulted in the veteran's additional disability or death. Merely showing that a veteran received care, treatment, or examination and that the veteran has an additional disability or died does not establish causation. 38 C.F.R. § 3.361(c)(1).

Therefore, entitlement to Dependency and Indemnity Compensation (DIC) under 38 USC 1151 is not established as the veteran's death was not caused by VA hospitalization, medical or surgical treatment, vocational rehabilitation, compensated work therapy program (CWT), or as the result of having submitted to a VA medical examination. {38 USC 1151}. For medical services, the evidence must show that fault on VA's part or an event not reasonably foreseeable proximately caused death. Entitlement to Dependency and Indemnity Compensation (DIC) under 38 USC 1151 is denied because the evidence fails to establish that VA medical or educational services were the proximate cause of death.

3. Service connection for the cause of death.

Service connection may be granted for a disability which began in or was caused by some event or experience in military service, or if a disability pre-existed such service, was aggravated therein. (38 CFR 3.303)

Service connection may also be granted on a presumptive basis if an applicable chronic disability is manifested to a compensable degree (severe enough to be evaluated at least 10 percent disabling) within a year after military discharge. (38 CFR 3.309)

The death of a veteran will be considered as having been due to a service-connected disability when the evidence establishes that such disability was either the principal or a contributory cause of death. (38 CFR 3.312)

Service connection for the cause of death may be granted to a reserve or National Guard service member if the
service person was disabled during "active" duty for training (ADT or ACDUTRA) due to a disease or injury incurred in the line of duty, AND the disease or injury caused or contributed to the service person's death. Service connection for the cause of death may also be granted to a reserve or National Guard service member if the service person was disabled during " inactive"

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

duty training (IADT) due to an injury incurred or aggravated in the line of duty AND that injury caused or contributed to the service person's death, OR if the service member suffered an acute myocardial infarction, cardiac arrest, or cerebrovascular accident that occurred during such training; AND that injury (acute myocardial infarction, cardiac arrest, or cerebrovascular accident) caused or contributed to the service person's death. (38 CFR 3.6)

We received your claim for Dependency and Indemnity Compensation (DIC) under our Fully Developed Claim (FDC) Program on 08/17/2020. The instructions with your FDC application explained how the application should be filled out and explained what evidence should be submitted to support your claim. The instructions also included full notification of your rights under the Veterans Claims Assistance Act. As you submitted and signed your claim on a VA Form 21-534EZ, Application for Dependency and Indemnity Compensation, Death Pension and/or Accrued Benefits under our FDC Program, you were informed of the evidence which was needed in order to support your claim, and you have certified that you have enclosed all the information or evidence to support your claim, and that you have no other information or evidence to give VA to support your claim.

The death certificate documents that the veteran died on 09/18/2015. The cause of death is shown as small bowel infarction with contributing conditions (not resulting in the immediate cause of death), to include diabetes, hyperlipidemia, and inguinal hernias.

According to 38 CFR 3.159 (c)(2), VA will make as many requests as are necessary to obtain relevant records from a Federal department or agency. These records include but are not limited to military records, including service medical records; medical and other records from VA medical facilities; records from non-VA facilities providing examination or treatment at VA expense; and records from other Federal agencies, such as the Social Security Administration. VA will end its efforts to obtain records from a Federal department or agency only if VA concludes that the records sought do not exist or that further efforts to obtain those records would be futile. Cases in which VA may conclude that no further efforts are required include those in which the Federal department or agency advises VA that the requested records do not exist or the custodian does not have them.

The claimant must cooperate fully with VA's reasonable efforts to obtain relevant records from Federal agency or department custodians. If requested by VA, the claimant must provide enough information to identify and locate the existing records, including the custodian or agency holding the records; the approximate time frame covered by the records; and, in the case of medical treatment records, the condition for which treatment was provided. In the case of records requested to corroborate a claimed stressful event in service, the claimant must provide information sufficient for the records custodian to conduct a search of the corroborative records. If necessary, the claimant must authorize the release of existing records in a form acceptable to the custodian or agency holding the records.

Collectively, we were able to review the veteran’s VA treatment reports from the Kansas City, Amarillo, Memphis, Denver, and Albuquerque VAMCs, for the time period of 10/28/2003 through 10/17/2015.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

You informed us that the veteran's treatment from the Memphis VAMC (from 09/18/2015) and Amarillo VAMC (from 01/14/2003) were pertinent to your claim. We were able to review the veteran's VA treatment records from the Memphis VAMC for the time period of 09/16/2015 through 10/17/2015. We were also able to obtain the veteran's records from the Amarillo VAMC from 05/02/2006 through 10/18/2016. (If you feel that there are additional records prior to May 2, 2006 which would be pertinent to your claim, please tell us.)

These VA medical records contain findings of small bowel infarction, diabetes, hyperlipidemia, and inguinal hernias. However, none of these reports specifically relate the death of the veteran to military service.

As of the date of this Rating Decision, evidence establishing a relationship between the death of the veteran and military service has not been received. Lastly, the evidence of record did not reveal that the veteran was disabled due to an injury incurred or aggravated during a period of "active" or "inactive" duty for training. The evidence of record also did not reveal that the veteran suffered an acute myocardial infarction, cardiac arrest, or cerebrovascular accident during a period of "inactive" duty for training.

Therefore, we have denied service connection for the cause of death because there was no evidence supporting a relationship between the listed cause of death and the military service of the veteran, nor was diabetes shown to be manifested to a compensable degree (severe enough to be evaluated at least 10 percent disabling) within one year of military discharge. Also, the evidence did not reveal that the veteran's death was due to an injury incurred or aggravated during a period of "active" or "inactive" duty for training, nor did the evidence show that the veteran suffered an acute myocardial infarction, cardiac arrest, or cerebrovascular accident during a period of "inactive" duty for training.

REFERENCES:

Title 38 of the Code of Federal Regulations, Pensions, Bonuses and Veterans' Relief contains the regulations of the Department of Veterans Affairs which govern entitlement to all veteran benefits. For additional information regarding applicable laws and regulations, please consult your local library, or visit us at our website, www.va.gov.

Veterans Evaluation Services

Ph: 1.877.637.8387 vesservices.com

MARSHALL HOPKINS
310 MAIN ST
ALTAMONT, MO 64620

DATE : 12/31/2020
VES #: 22620740930

Veterans Evaluation Services (VES) is currently working with the VA to assist in addressing the backlog of Veterans requiring compensation and/or pension evaluations. A request was sent to us by the VA to handle your compensation/pension exams, for a record review only.

APPOINTMENT INFORMATION

Provider: **ARTHUR CANTOR, M.D.**

Please note this is a record review only. You will not need to report for an examination. This letter is simply to notify you of the VA's request.

VES is working to complete your case on an expedited basis. The results are a critical component in determining your eligibility for VA disability compensation and/or pension benefits.

- **Please contact VES with any questions. You can do this via our website at www.vesservices.com by clicking the Contact – Veteran Contact tab, or by calling 1-877-637-8387.**

NOTICE OF PRIVACY PRACTICES AND FREQUENTLY ASKED QUESTIONS

The evaluation services provided by Veterans Evaluation Services (VES) are covered under the Privacy Rule of Health Insurance Portability and Accountability Act (HIPAA). Your claim-related medical information is received directly from the VA and is shared only with the C&P medical examiners. VES is merely the temporary custodian of this information, and therefore it can only be released back to the VA. Should you require any of your own medical information, or wish to obtain a copy of your exam report, please contact the VA at 1-800-827-1000.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

About your examiner:
Name: ARTHUR CANTOR; Specialty/Field: GenMed ; M.D. ; License Number: 1326131863 / MD11288 OR; State: OR; Board Certifications: Internal Medicine; Education: UNIVERSITY OF PENNSYLVANIA SCHOOL OF MEDICINE; C&P Experience: 0-1 Year; Years of Medical Experience: 43.

Compensation and pension related training received: Traumatic Brain Injury, MST, Medical Opinion, Musculoskeletal, Aggravated Opinion, Gulf War Examination, General Trained, MST Trained, VES Demo.

IMPORTANT - THE DEPARTMENT OF VETERANS AFFAIRS (VA) ***WILL NOT PAY*** OR ***REIMBURSE*** ANY EXPENSES OR COST INCURRED IN THE PROCESS OF COMPLETING AND/OR SUBMITTING THIS FORM. PLEASE READ THE PRIVACY ACT AND RESPONDENT BURDEN INFORMATION ON REVERSE BEFORE COMPLETING FORM.

NOTE TO EXAMINER - The Veteran is applying to the U.S. Department of Veterans Affairs (VA) for disability benefits. VA will consider the information you provide on this questionnaire as part of their evaluation in processing the Veteran's claim.

For the Claimed Compensation Condition of - SERVICE-CONNECTION FOR CAUSE OF DEATH

Is this questionnaire being completed in conjunction with a VA21-2507, C&P examination request?
[X] Yes [] No

How was the examination completed? (check all that apply)
[] In-person examination
[X] Records reviewed
[] Examination via approved video telehealth
[] Other, please specify in comments box:

Comments:
IMO ONLY, VETERAN IS DECEASED

ACCEPTABLE CLINICAL EVIDENCE (ACE)

Indicate the method used to obtain medical information to complete this document:

[] Review of available records (without in-person or video telehealth examination) using the Acceptable Clinical Evidence (ACE) process because the existing medical evidence provided sufficient information on which to prepare the questionnaire and such an examination will likely provide no additional relevant evidence.

[] Review of available records in conjunction with an interview with the Veteran (without in-person or telehealth examination) using the ACE process because the existing medical evidence supplemented with a telephone interview provided sufficient information on which to prepare the questionnaire and such an examination would likely provide no additional relevant evidence.

EVIDENCE REVIEW

[] Not requested
[] VA claims file (hard copy paper C-file)
[X] VA e-folder
[] VA electronic health record
[] Other, please identify other evidence reviewed:

[] No records were reviewed

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Evidence comments:

Recommendations of treating team/consultants: Patient went for emergency surgery on night of 9/16/15- found to have necrotic small bowel and underwent resection with temporary closure- has remained on multiple pressors with little improvement in his clinical status and has remained a GCS of 3 despite no sedation medications- wife stated her husband would not want to live like this on "life support"

-Veteran is a 72 yo CM w/ pmhx significant for DM who presented to the Memphis VA ER with complaints of coffee ground emesis, lethargy, and decreased mental status. Patient was found to be hypotensive in the ED to the low 60s. Imaging was concerning for pneumoperitoneum taken back to the OR for emergent ex lap with small bowel resection this AM now POD#1 72 yo CM w PMHx DM, HTN, HLD s/p RIHR 1 mo ago who presented in septic shock due to ischemic bowel now POD 1 ex lap, SBR, temporary abdominal closure

HPI: Pt is a 72 yo M with PMH of Dm, Hl, BPH who was en route to north Carolina and had hematemesis and melena and was found to be hypotensive when brought to the ER last night. Pt. had free air in abdomen on KUB and was taken for exploratory laparotomy during which he was found to have ischemic bowel now s/p resection. He remains in ICU with temporary abdominal closure and is being treated for septic shock. He was noted to have hematuria, for which urology is being consulted along with a request to be present for his repeat exploration tomorrow 9/18 to evaluate the bladder.
Of note pt had a inguinal hernia repair about 1 month ago and had been having issues with urinary retention after that. he was admitted for bladder outlet obstruction and was found to have hydronephrosis/pyelo and was treated with rocephin. per the wife, he has since been seen by Urology in Amarillo, Texas and had cystoscopy, which was negative for concerning findings.

SECTION I - DEFINITIONS

Aggravation of preexisting nonservice-connected disabilities. A preexisting injury or disease will be considered to have been aggravated by active military, naval, or air service, where there is an increase in disability during such service, unless there is a specific finding that the increase in disability is due to the natural progress of the disease.

Aggravation of nonservice-connected disabilities. Any increase in severity of a nonservice-connected disease or injury that is proximately due to or the result of a service-connected disease or injury, and not due to the natural progress of the nonservice-connected disease, will be service connected.

SECTION II – RESTATEMENT OF REQUESTED OPINION

2A. Insert requested opinion from general remarks:

PLEASE REVIEW THE VETERAN'S PREVIOUS EXAMS, ALONG WITH MEDICAL RECORDS.

PLEASE NOTE THIS IMO IS TO ACKNOWLEDGE THAT RECORDS HAVE BEEN REVIEWED AS WELL AS ADDRESSING ANY ADDITIONAL QUESTIONS NOTED AT THE BOTTOM OF THE DBQ.

THE SURVIVING SPOUSE IS SEEKING ENTITLEMENT TO COMPENSATION UNDER 38 U.S.C. 1151, CLAIMING THAT THE VETERAN WAS GIVEN A CLEAN BILL OF HEALTH BY VA DOCTORS FROM THE AMIRRILLO VAMC AFTER A COLONOSCOPY/FOLLOW-UP VISIT FOR HERNIA SURGERY IN AUGUST 2015. THE CLAIMANT STATED THAT APPARENTLY DURING THE COLONOSCOPY HIS BOWELS WERE NICKED, AND THAT THE VETERAN WAS SUBSEQUENTLY ADMITTED TO THE MEMPHIS VAMC AND HAD OF HIS COLON SURGICALLY REMOVED, BUT LATER PASSED AWAY. THE DEATH CERTIFICATE DOCUMENTS THAT THE VETERAN DIED ON 09/18/2015. THE CAUSE OF DEATH IS SHOWN AS SMALL BOWEL INFARCTION WITH CONTRIBUTING CONDITIONS (NOT RESULTING IN THE IMMEDIATE CAUSE OF DEATH), TO INCLUDE DIABETES, HYPERLIPIDEMIA, AND INGUINAL HERNIAS.

2B. Indicate type of exam for which opinion has been requested *(e.g. skin diseases)*:

IMO – Independent Medical Opinion only

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

SECTION III – MEDICAL OPINION FOR DIRECT SERVICE CONNECTION

Choose the statement that most closely approximates the etiology of the claimed condition.
3A. [] The claimed condition was at least as likely as not *(50 percent or greater probability)* incurred in or caused by the claimed in-service injury, event, or illness.

Provide rationale in section c.

3B. [] The claimed condition was less likely than not *(less than 50 percent probability)* incurred in or caused by the claimed in-service injury, event, or illness.

Provide rationale in section c.

3C. Rationale:

SECTION IV - MEDICAL OPINION FOR SECONDARY SERVICE CONNECTION

4A. [] The claimed condition is at least as likely as not *(50 percent or greater probability)* proximately due to or the result of the Veteran's service connected condition.

Provide rationale in section c.

4B. [] The claimed condition is less likely than not *(less than 50 percent probability)* proximately due to or the result of the Veteran's service connected condition.

Provide rationale in section c.

4C. Rationale:

SECTION V - MEDICAL OPINION FOR AGGRAVATION OF A CONDITION THAT EXISTED PRIOR TO SERVICE

5A. [] The claimed condition, which clearly and unmistakably existed prior to service, was aggravated beyond its natural progression by an in-service injury, event, or illness.

Provide rationale in section c.

5B. [] The claimed condition, which clearly and unmistakably existed prior to service, was clearly and unmistakably not aggravated beyond its natural progression by an in-service injury, event, or illness.

Provide rationale in section c.

5C. Rationale:

SECTION VI - MEDICAL OPINION FOR AGGRAVATION OF A NONSERVICE CONNECTED CONDITION BY A SERVICE CONNECTED CONDITION

6A. Can you determine a baseline level of severity of *(claimed condition/diagnosis)* based upon medical evidence available prior to aggravation or the earliest medical evidence following aggravation by *(service connected condition)*?
[] Yes [] No

If "Yes" to question 6A, answer the following:

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

I. Describe the baseline level of severity of *(claimed condition/diagnosis)* based upon medical evidence available prior to aggravation or the earliest medical evidence following aggravation by *(service connected condition)*:

II. Provide the date and nature of the medical evidence used to provide the baseline:

III. Is the current severity of the *(claimed condition/diagnosis)* greater than the baseline?
[] Yes [] No
If yes, was the Veteran's *(claimed condition/diagnosis)* at least as likely as not aggravated beyond its natural progression by *(insert "service connected condition")*?
[] Yes *(provide rationale in section 6B.)*
[] No *(provide rationale in section 6B.)*

If "No" to question 6A, answer the following:

I. Provide rationale as to why a baseline cannot be established *(e.g. medical evidence is not sufficient to support a determination of baseline level of severity)*:

II. Regardless of an established baseline, was the Veteran's *(claimed condition/diagnosis)* at least as likely as not aggravated beyond its natural progression by (insert "service connected condition")?
[] Yes *(provide rationale in section 6B.)*
[] No *(provide rationale in section 6B.)*

6B. Provide rationale:

SECTION VII - OPINION REGARDING CONFLICTING MEDICAL EVIDENCE

7. I have reviewed the conflicting medical evidence and am providing the following opinion:

Is there a need for the Veteran to follow up with his/her primary care provider regarding any life threatening findings in this examination (not limited to claimed condition(s))?
[] Yes [X] No

Additional Question 1:	PLEASE OPINE AS TO WHETHER IT IS AS LEAST AS LIKELY AS NOT THAT THE VETERANS DEATH WAS THE RESULT OF CARELESSNESS, NEGLIGENCE, LACK OF PROPER SKILL, ERROR IN JUDGMENT, OR SIMILAR FAULT ON THE PART OF THE DEPARTMENT OF VETERANS AFFAIRS IN FURNISHING THE HOSPITAL CARE, MEDICAL OR SURGICAL TREATMENT, OR EXAMINATION; OR IF IT WAS THE RESULT OF AN EVENT NOT REASONABLY FORESEEABLE.
Answer Question 1:	RECORDS HAVE BEEN REVIEWED. IT IS AS LESS LIKELY THAN NOT THAT THE VETERANS DEATH WAS THE RESULT OF CARELESSNESS, NEGLIGENCE, LACK OF PROPER SKILL, ERROR IN JUDGMENT, OR SIMILAR FAULT ON THE PART OF THE DEPARTMENT OF VETERANS AFFAIRS IN FURNISHING THE HOSPITAL CARE, MEDICAL OR SURGICAL TREATMENT, OR EXAMINATION; OR IF IT WAS THE RESULT OF AN EVENT NOT REASONABLY FORESEEABLE.
Additional Question 2:	PLEASE PROVIDE YOUR MEDICAL RATIONALE.
Answer Question 2:	The Veteran's wife claims the Veteran had colonscopy following repair of recurrent right inguinal hernia in August, 2015. She claims that his bowel was nicked with that procedure and that he required colon resection 9/2015. Medical records docuent that the Veteran presented to the Memphis VAMC with necrotic small bowel, associated small bowel perforation, requiring extensive small bowel

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

resection. There is no documentation of colonic pathology or the need for colonic resection. There is no documentation in the medical record that the Veteran had a colonscopy at any point either prior to or during his hospitalization at the Amarillo VAMC in 8/2015. In fact, he repeatedly refused evaluation with colonscopy. He underwent cystoscopy at the time as he presented to the Amarillo VAMC 8/2015, with obstructive uropathy, bilateral hydronephrosis and hydroureters and pyelonephritis. There is no indication in the medical records that his bowel was nicked either at the time of his recurrent right inguinal hernia repair 8/2015 or during the cystoscopy that was performed shortly after his right inguinal hernia surgery. Both procedures are documented in the medical record to have been performed without complication. The Veteran's presentation at the Memphis VAMC 9/2015, with necrotic small bowel, and small perforation, as well as sepsis and mutiorgan system failure was unanticipated and the clearly the result of an event not reasonably foreseeable. The etiology of the Veteran's small bowel infarct was never elucidated, athough he was noted to have the new onset of atrial fibrillation at the time of his hospitalization 9/2015 at the Memphis VAMC. It is possible that his infarcted small bowel was due to cardiac embolization. Review of medical records documents appropriate medical and surgical care at the Kansas City VAMC, the Amarillo VAMC and the Memphis VAMC. There is no indication whatsoever THAT THE VETERANS DEATH WAS THE RESULT OF CARELESSNESS, NEGLIGENCE, LACK OF PROPER SKILL, ERROR IN JUDGMENT, OR SIMILAR FAULT ON THE PART OF THE DEPARTMENT OF VETERANS AFFAIRS IN FURNISHING THE HOSPITAL CARE, MEDICAL OR SURGICAL TREATMENT, OR EXAMINATION.

Additional Question 3: PLEASE PROVIDE AN OPINION AS TO WHETHER THE TREATMENT THE VETERAN RECEIVED IN CONNECTION WITH HIS/HER DEATH RECORDED AS SMALL BOWEL INFARCTION WITH CONTRIBUTING CONDITIONS (NOT RESULTING IN THE IMMEDIATE CAUSE OF DEATH), TO INCLUDE DIABETES, HYPERLIPIDEMIA, AND INGUINAL HERNIAS, WAS THE RESULT OF CARELESSNESS, NEGLIGENCE, LACK OF PROPER SKILL, ERROR IN JUDGMENT, OR SIMILAR INSTANCE OF FAULT ON VA'S PART IN FURNISHING CARE, MEDICAL OR SURGICAL TREATMENT, OR EXAMINATION. IF SO, PLEASE PROVIDE AN OPINION AS TO WHETHER THE TREATMENT CONTRIBUTED TO OR CAUSED THE VETERAN'S DEATH.

Answer Question 3: THE TREATMENT THE VETERAN RECEIVED IN CONNECTION WITH HIS/HER DEATH RECORDED AS SMALL BOWEL INFARCTION WITH CONTRIBUTING CONDITIONS (NOT RESULTING IN THE IMMEDIATE CAUSE OF DEATH), TO INCLUDE DIABETES, HYPERLIPIDEMIA, AND INGUINAL HERNIAS, WAS THE NOT RESULT OF CARELESSNESS, NEGLIGENCE, LACK OF PROPER SKILL, ERROR IN JUDGMENT, OR SIMILAR INSTANCE OF FAULT ON VA'S PART IN FURNISHING CARE, MEDICAL OR SURGICAL TREATMENT, OR EXAMINATION.

Additional Question 4: PLEASE PROVIDE YOUR MEDICAL RATIONALE.

Answer Question 4: Review of medical records documents the Veteran's history of preexisting poorly controlled DM. He underwent uncomplicated repair of recurrent right inguinal hernia 8/2015. Following his discharge from the hospital after the hernia repair, he developed bladder outlet obstruction with bilateral hydronephrosis, hydroureter and pyelonephritis. He was appropriately managed for this condition at the Amarillo VAMC. He was subsequently admitted emergently to the Memphis VAMC with small bowel necrosis/gangrene and peforation with sepsis, and multisystem organ failure. His presentation was complicated by hyponatremia, acute kidney injury, altered mental status and CHF. He was noted to have new onset atrial fibrillation. The Veteran received approporiate treatment at the Memphis VAMC, including intubation, mechanical ventilation, pressor support, antibiotics, crystalloid administration, insulin, and emergent surgery with bowel resection for gangrenous necrotic small bowel complicated by bowel perforation. The only iatragenic complication that occurred during the terminal hospitalization was pneumothorax that occurred during subclavian line placement, managed with chest tube placement. This complication did not contribute to the Veteran's death. His extensive small bowel infarction with small bowel gangrene, necrosis and perforation were the proximate cause of the Veteran's death. Such extensive small infarction is typically a terminal event despite appropriate and aggressive management as the Veteran received. THE TREATMENT THE VETERAN RECEIVED IN CONNECTION WITH HIS/HER DEATH RECORDED AS SMALL BOWEL INFARCTION WITH CONTRIBUTING CONDITIONS (NOT RESULTING IN THE IMMEDIATE CAUSE OF DEATH), TO INCLUDE

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

DIABETES, HYPERLIPIDEMIA, AND INGUINAL HERNIAS, WAS THE NOT RESULT OF CARELESSNESS, NEGLIGENCE, LACK OF PROPER SKILL, ERROR IN JUDGMENT, OR SIMILAR INSTANCE OF FAULT ON VA'S PART IN FURNISHING CARE, MEDICAL OR SURGICAL TREATMENT, OR EXAMINATION.

SECTION VIII - PHYSICIAN'S CERTIFICATION AND SIGNATURE

CERTIFICATION - To the best of my knowledge, the information contained herein is accurate, complete and current.

8A. PHYSICIAN'S SIGNATURE:	ARTHUR S CANTOR MD ARTHUR S CANTOR MD (Jan 5, 2021 07:33 PST)
8B. PHYSICIAN'S PRINTED NAME:	ARTHUR S. CANTOR, M.D.
8C. DATE SIGNED:	See date in digital signature above.
8D. PHYSICIAN'S PHONE/FAX NUMBERS:	1-877-637-8387 Fax: 1-800-320-3908
8E. NATIONAL PROVIDER IDENTIFIER (NPI) NUMBER AND MEDICAL LICENSE NUMBER AND STATE:	1326131863 / MD11288 OR
8F. PHYSICIAN'S ADDRESS:	VA-IMO OREGON 123 IMO ONLY, OREGON, OR 99999
8G. PHYSICIAN'S SPECIALTY:	Internal Medicine

NOTE: VA may request additional medical information, including additional examinations, if necessary to complete VA's review of the Veteran's application.

We are still processing your application for Dependency and Indemnity Compensation. We apologize for the delay. You will be notified upon completion of processing. If you need to contact us, be sure to show the file number and full name of the veteran.

If your mailing address is different than that shown above, please advise us of your new mailing address. You should notify us immediately of any changes in your mailing address.

If you reside in the Continental United States, Alaska, Hawaii, Guam, the Northern Marianas, or Puerto Rico, you may contact VA with questions and receive free help by calling our toll-free number 1-800-827-1000 (for hearing impaired TDD 1-800-829-4833). From American Samoa you may dial toll free 684-699-3730. Philippines residents call 632-550-3888.

Note: TDD phone number 1-800-829-4833 does not work for callers residing in Guam and the Northern Marianas.

Sincerely yours,

Regional Office Director

This Exam Scheduling Request has been requested on behalf of a dependent of the Veteran.

Veteran Priority Issues:
- Claims made concerning deceased Veteran that may need an opinion

dependency and indemnity compensation
Classification: Service Connected Death
Type: NEW

Contention Priority Issues:
- 1151 Claim and Tort Claim

Standard Language Output Text:
TYPE OF MEDICAL OPINION REQUESTED: Service-connection for cause of death based on U.S.C. 1151.

Please provide an opinion as to whether the treatment the Veteran received in connection with his/her Death recorded as:small bowel infarction with contributing conditions (not resulting in the immediate cause of death), to include diabetes, hyperlipidemia, and inguinal hernias. , was the result of carelessness, negligence, lack of proper skill, error in judgment, or similar instance of fault on VA's part in furnishing care, medical or surgical treatment, or examination. If so, please provide an opinion as to whether the treatment contributed to or caused the Veteran's death.

Rationale must be provided in the appropriate section.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Please review the Veteran's electronic folder(s) and state that it was reviewed in your report.

Your review is not limited to the evidence identified on this request form, or tabbed in the claims folder. If an examination or additional testing is required, obtain them prior to rendering your opinion.

POTENTIALLY RELEVANT EVIDENCE: Please enter all tab descriptions of evidence, locations, and dates.

NOTE: Your (examiner) review of the record is NOT restricted to the evidence listed below. This list is provided in an effort to assist the examiner in locating potentially relevant evidence.
Contention:
The surviving spouse is seeking entitlement to compensation under 38 U.S.C. 1151, claiming that the veteran was given a clean bill of health by VA doctors from the Amirrillo VAMC after a colonoscopy/follow-up visit for hernia surgery in August 2015. The claimant stated that “apparently during the colonoscopy his bowels were nicked”, and that the veteran was subsequently admitted to the Memphis VAMC and had ¾ of his colon surgically removed, but later passed away.

The death certificate documents that the veteran died on 09/18/2015. The cause of death is shown as small bowel infarction with contributing conditions (not resulting in the immediate cause of death), to include diabetes, hyperlipidemia, and inguinal hernias.

Benefits Pursuant to 38 U.S.C.A. § 1151:
Benefits pursuant to 38 U.S.C.A. § 1151 may be awarded, if the evidence shows that the Veteran's death was not the result of the veteran's willful misconduct, the death was caused by hospital care or medical treatment furnished by the VA, and the death was proximately caused by carelessness, negligence, lack of proper skill, error in judgment, or similar instance of fault on the part of VA in furnishing the hospital care, medical or surgical treatment, or examination, or by an event not reasonably foreseeable. See 38 U.S.C.A. § 1151 (West 2002); 38 C.F.R. §§ 3.358, 3.361 (2010).

To establish causation, the evidence must show that the hospital care, medical or surgical treatment, or examination resulted in the veteran's death. Merely showing that a veteran received care, treatment, or examination and that that the veteran has died does not establish cause. 38 C.F.R. § 3.361(c)(1). Hospital care, medical or surgical treatment, or examination cannot cause the continuance or natural progress of a disease or injury for which the care, treatment, or examination was furnished unless VA's failure to timely diagnoses and properly treat the disease or injury proximately caused the continuance or natural progress. 38 C.F.R. § 3.361(c)(2). Death caused by a veteran's failure to follow properly given medical instructions is not caused by hospital care, medical or surgical treatment, or examination. 38 C.F.R. § 3.361(c)(3).

To establish that carelessness, negligence, lack of proper skill, error in judgment, or similar instance of fault on VA's part in furnishing hospital care, medical or surgical treatment, or examination proximately caused a veteran's death, it must be shown that VA failed to exercise the degree of care that would be expected of a reasonable health care provider; or, that VA furnished the hospital care, medical or surgical treatment, or examination without the Veteran's informed consent. 38 C.F.R. § 3.361(d)(1).

Whether the proximate cause of a Veteran's death was an event not reasonably foreseeable is in each claim to be determined based on what a reasonable health care provider would have foreseen. The event need not be completely unforeseeable or unimaginable but must be one that a reasonable health care provider would not have considered to be an ordinary risk of the treatment provided. 38 C.F.R. § 3.361(d)(2). As specified in 38 C.F.R. § 3.361(d)(2), in determining whether an event was reasonably foreseeable, VA will consider whether the risk of that event was the type of risk that a reasonable health care provider would have disclosed in connection with the informed consent procedures of 38 C.F.R. § 17.32.

Opinion Requested:
Please opine as to whether it is as least as likely as not that the veteran’s death was the result of carelessness, negligence, lack of proper skill, error in judgment, or similar fault on the part of the Department of Veteran’s Affairs in furnishing the hospital care, medical or surgical treatment, or examination; or if it was the result of an event not reasonably foreseeable.

Special Instructions:
Contention:

C&P Examination Request Routing Assistant (ERRA) 2.7

Welcome to ERRA! This tool is designed to assist in the routing of C&P examination requests. Input the ZIP code where the claimant is located. For more information, please view these tips.

ZIP Code: 64620 Submit Display Maps? **No** **Yes** BDD/IDES Claim? **No** **Yes** **Exam Request Date:** 12/16/2020

As of December 16, 2020 please route examination requests based on the following guidance except for excluded examination types noted in M21-1 III.iv.3.A.1.k. These determinations were made based on capacity calculations for the parent VA medical facility **(589) Kansas City, MO HCS**. Please closely review routing location and exam list comments at the nearest VA facility (see below) for local issues impacting VA performance and capabilities. To ask a VA medical facility a question, please consult the C&P Clinic POC list (available on the DMA Publication Library page) for a contact at the VA facility. Local issues may necessitate sending work to a contract examiner and not to the next VA facility on the list. ZIP code 64620 was historically under the jurisdiction of **St. Louis, MO (331) VARO**.

Exam Category:	*Audio*	*Dental*	*Eye*	*Gynecology*	*Mental Health*	*POW*	*Sleep*	*TBI*	*All Other Exam Types*

DEPARTMENT OF VETERANS AFFAIRS

November 12, 2020

DARLENE HOPKINS
310 MAIN ST
ALTAMONT MO 64620

In reply, refer to:
330/22R4/KLB
File Number: (b) (6)
Marshall H. Hopkins

IMPORTANT -- reply needed

Dear Darlene Hopkins:

We are working on your claim for:

- Accrued Benefits
- Survivors Pension
- Dependency and Indemnity Compensation

What Do We Still Need from You?

We need additional evidence from you. Please put your VA file number on the first page of every document you send us.

We are continuing to work on your claim.
We received your claim and your request to participate in the Fully Developed Claim (FDC) Program. If you have information or evidence not previously submitted to VA that supports your claim, we recommend you submit it. As a reminder, if you identify or submit any additional information or evidence at this point, VA will remove your claim from the FDC Program and process it under standard claims-processing procedures.
We requested the Veteran's Medical Records from the Amarillo Veterans Affairs Medical Center form January 14, 2003 until the Veteran's passing.
We have determined that records cannot be located from January 14, 2003, through May 1, 2006, and therefore are unavailable for review. All efforts to obtain the needed information have been exhausted, and based on these facts, we have determined that further attempts to obtain the records would be futile. Your claim file contains documentation of the written efforts we made to attempt to obtain these records.
We have taken the following actions in an effort to obtain these records:
We submitted a request to the Amarillo Veterans Affairs Medical Center requesting submission of the Veteran's Medical Records.
We received a positive reply for these records from the Amarillo Veterans Affairs Medical Center for dates May 2, 2006 to October 18, 2016. There were no records prior to May 2, 2006.

What Do We Still Need From You?

Please submit any relevant documents in your possession including:

- Any available copies of the veteran's Medical records.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

- Any other relevant evidence or information that you think will support your claim.

You may be able to furnish documents that can substitute for Medical records. Submit any copies of the following documents you have that relate to the veteran's disability during service:

- Statements from military medical personnel (nurses, medics, corpsmen, doctors)
- "Buddy" certificates or affidavits - (A "buddy" certificate or affidavit is a statement by a person who knew him when he was in service and knows of any disability he had while on active duty. The statement should state the dates and places they saw the condition(s) and should describe what they saw. If the person making the statement was on active duty at the time, they should show their service number and unit of assignment.)
- State or local accident and police reports
- Employment physical examinations
- Medical evidence from hospitals, clinics and private physicians by which or by whom you may have been treated after separation
- Letters written during service
- Photographs taken during service
- Pharmacy prescription records
- Insurance examinations

How Soon Should You Send What We Need?

We strongly encourage you to send any information or evidence as soon as you can. VA will decide your claim based on the evidence of record.

Where Should You Send What We Need?

VA now uses a centralized mail system. For all written communications, put your full name and VA file number on the letter. Please send all correspondence to the appropriate location listed on the attached *Where to Send Your Written Correspondence.*

How Soon Should You Send What We Need?

We strongly encourage you to send any information or evidence as soon as you can. If we do not hear from you, we may make a decision on your claim after 30 days. However, you have up to one year from the date of this letter to submit the information and evidence necessary to support your claim. If we decide your claim before one year from the date of this letter, you will still

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

have the remainder of the one-year period to submit additional information or evidence necessary to support your claim.

What is eBenefits?

eBenefits provides electronic resources in a self-service environment to Servicemembers, Veterans, and their families. Use of these resources often helps us serve you faster! Through the eBenefits website you can:

- Submit claims for benefits and/or upload documents directly to the VA
- Request to add or change your dependents
- Update your contact and direct deposit information and view payment history
- Request a Veterans Service Officer to represent you
- Track the status of your claim or appeal
- Obtain verification of military service, civil service preference, or VA benefits
- And much more!

Enrolling in eBenefits is easy. Just visit www.eBenefits.va.gov for more information. If you submit a claim in the future, consider filing through eBenefits. Filing electronically, especially if you participate in our fully developed claim program, may result in a faster decision than if you submit your claim through the mail.

How Can You Contact Us?

If you are looking for general information about benefits and eligibility, you should visit our web site at http://www.va.gov. Otherwise, you can contact us in several ways. Please give us your VA file number, **529 56 7575**, when you do contact us.

- Call us at 1-800-827-1000. If you use a Telecommunications Device for the Deaf (TDD), the Federal number is 711 (international number is 1-800-829-4833).
- Send us an inquiry using the Internet at https://iris.va.gov.

We look forward to resolving your claim in a fair and timely manner.

We sent a copy of this letter to the Missouri Veterans Commission. You appointed that organization to represent you. We will continue to send copies of all correspondence to that organization.

Sincerely yours,

SECTION II: REMARKS ***(Continued)***
(The following statement is made in connection with a claim for benefits in the case of the above-named veteran/beneficiary.)

SECTION III: DECLARATION OF INTENT

I CERTIFY THAT the statements on this form are true and correct to the best of my knowledge and belief.

9. SIGNATURE *(Sign in ink)*	10. DATE SIGNED *(MM/DD/YYYY)*

PENALTY: The law provides severe penalties which include fine or imprisonment, or both, for the willful submission of any statement or evidence of a material fact, knowing it to be false.

PRIVACY ACT INFORMATION: The VA will not disclose information collected on this form to any source other than what has been authorized under the Privacy Act of 1974 or Title 38, Code of Federal Regulations 1.576 for routine uses (i.e., civil or criminal law enforcement, congressional communications, epidemiological or research studies, the collection of money owed to the United States, litigation in which the United States is a party or has an interest, the administration of VA Programs and delivery of VA benefits, verification of identity and status, and personnel administration) as identified in the VA system of records, 58VA21/22/28, Compensation, Pension, Education, and Vocational Rehabilitation and Employment Records - VA, published in the Federal Register. Your obligation to respond is required to obtain or retain benefits. VA uses your SSN to identify your claim file. Providing your SSN will help ensure that your records are properly associated with your claim file. Giving us your SSN account information is voluntary. Refusal to provide your SSN by itself will not result in the denial of benefits. The VA will not deny an individual benefits for refusing to provide his or her SSN unless the disclosure of the SSN is required by Federal Statute of law in effect prior to January 1, 1975, and still in effect. The requested information is considered relevant and necessary to determine maximum benefits under the law. The responses you submit are considered confidential (38 U.S.C. 5701). Information submitted is subject to verification through computer matching programs with other agencies.

RESPONDENT BURDEN: We need this information to obtain evidence in support of your claim for benefits (38 U.S.C. 501(a) and (b)). Title 38, United States Code, allows us to ask for this information. We estimate that you will need an average of 15 minutes to review the instructions, find the information, and complete this form. VA cannot conduct or sponsor a collection of information unless a valid OMB control number is displayed. You are not required to respond to a collection of information if this number is not displayed. Valid OMB control numbers can be located on the OMB Internet Page at **www.reginfo.gov/public/do/PRAMain**. If desired, you can call 1-800-827-1000 to get information on where to send comments or suggestions about this form.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

WHERE TO SEND YOUR WRITTEN CORRESPONDENCE

The time it takes your response to reach VA affects how long it takes us to process your claim. We recommend responding electronically whenever possible to minimize the time we spend waiting for mail. Only claimants or representatives can upload responses electronically right now. If you are not a claimant or representative, we recommend faxing so VA can receive your responses immediately.

The **fastest** way to respond to VA is to upload your correspondence electronically through VA.gov.

Visit https://www.va.gov. Under **Disability** click "Upload Evidence to support your claim".

If you cannot upload your correspondence, fax or mail it to the applicable address below. These addresses serve **all United States and foreign locations**.

To determine where to send your correspondence, identify your benefit type (Compensation, Veterans Pension, or Survivor Benefits); then, locate the applicable fax number or mailing address.

Compensation Claims	**Veterans Pension** and **Survivor Benefit Claims**
Fax Toll Free: 844-531-7818	Fax Toll Free: 844-655-1604
Or mail to:	**Or mail to:**
Department of Veterans Affairs Evidence Intake Center **P.O. Box 4444** Janesville, WI, 53547-4444	Department of Veterans Affairs Pension Intake Center **P.O. Box 5365** Janesville, WI 53547-5365

You can also send a text message to 838255 to receive confidential support 24 hours a day, 7 days a week, 365 days a year. For more information, visit www.veteranscrisisline.net

Cystoscopy procedure discussed with patient. Verbal and written consent for the procedure were obtained. Patient verbalized understanding of procedure and follow-up care.

Patient instructed that he may have some blood in his urine for several voidings. He may also experience burning, pain and frequency. Patient instructed to drink plenty of fluids to flush the bladder. If any of these symptoms persist for more than a couple of days he should contact the clinic. Contact information and written instructions given to the patient. Patient voiced understanding of post cysto instructions.

Post procedure pain level 0 on a scale of 0-10.

5. Surrogate (if applicable):
6. Reason for the treatment (diagnosis, condition, or indication): To examine the urethra and bladder for disease or abnormality. Treatment(s) may be performed depending on findings.
7. Treatment/procedure: Your doctor will look at your bladder and urethra with a scope. A scope is a thin, lighted tube. It is used to see inside the urethra and bladder. The scope is passed through the urethra into the bladder. In males, it passes through the

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

prostate. Your doctor may also do other procedures, including:
Bladder biopsy: a small amount of tissue is taken for examination.
Cytology: the bladder is flushed with a salt-water solution. The fluid is collected and examined.
Dilation: narrow parts of your urethra may be stretched.

8. Neither anesthesia nor moderate sedation will be used.
9. Consent to Blood Products (if applicable):
It is not expected that blood products will be used in this treatment/procedure.
10. Practitioner obtaining consent: Rice,Eric T (PHYSICIAN ASSISTANT)
11. Supervising practitioner: Ford,Ronald W (PHYSICIAN)
12. Practitioner(s) performing or supervising treatment/procedure (if not listed above):
13. Witness Name(s):

14. Comments:

PATIENT NAME: HOPKINS, MARSHALL

DATE: 09/10/2015

HISTORY OF PRESENT ILLNESS: 72-year-old gentleman with a history of postoperative urinary retention. He has failed multiple voiding trials, most recently following his encounter with me earlier this month. No history of

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

significant voiding problems prior to surgery. He currently complains of penile discomfort since catheter was replaced in the Emergency Department on September 3, 2015. No associated fever or chills. Patient comes in today for diagnostic cystoscopy.

PROCEDURE: Informed consent was obtained. External examination revealed inguinal and scrotal candidiasis. Area was copiously cleaned with betadine solution and patient draped in the usual fashion. Cystoscopy was performed revealing prostatic hyperplasia without significant obstruction. Bladder appeared to be irritated but visualization was limited due to snow effect consistent with candiduria. Procedure was well tolerated. Postprocedure void residual was 470 mL.

ASSESSMENT/PLAN: Urinary retention, without significant outlet obstruction. I suspect patient has detrusor incompetence aggraviated by poorly controlled diabetes. He also has inguinal candidiasis and suspected candiduria. Start Diflucan 200 milligrams daily for 14 days. Patient will finish out previously issued Cipro as directed. We elected to defer replacing indwelling catheter. Patient was educated on self-catheterization which he performed in clinic without difficulty. Issued Betadine scrub solution to clean groin and scrotal area twice daily as directed. Return to clinic in 1 month for re-evaluation, sooner if any problems develop.

09/01/15 UROLOGY-OUTPATIENT (C):
PATIENT NAME: HOPKINS, MARSHALL

DATE: 09/01/2015

HISTORY OF PRESENT ILLNESS: 72-year-old gentleman presents in consultation regarding postoperative urinary retention. Patient underwent hernia repair last month and developed postoperative urinary retention. He initially presented to the hospital in Liberal, Kansas. CT at that time reported bilateral hydroureteronephrosis and bladder distention (films are not available for my review). Foley catheter was placed and patient was transferred to this facility for continued care.

Hospital course was uneventful and patient was discharged with indwelling catheter. No previous history of urinary retention or bothersome lower urinary tract symptoms prior to surgery. He currently denies fever, chills, dysuria, or gross hematuria.

LABORATORY DATA: PSA 1.04 and serum creatinine 0.77 a few weeks ago.

PHYSICAL EXAMINATION: EXTERNAL GENITALIA: Indwelling Foley catheter with clear urine output. DIGITAL RECTAL EXAMINATION: Prostate estimated be 40 cc in volume with a boggy consistency. No suspicious induration or nodularity appreciated.

ASSESSMENT/PLAN: Postoperative urinary retention, as above. Foley catheter is removed for voiding trial. Patient will continue tamsulosin as prescribed. Will issue an empiric course of antibiotics and repeat computed tomography (CT) abdomen and pelvis today. Return to clinic later this month for a postvoid residual. Routine urinary retention warnings were given. Schedule routine urology follow up in 3 months for re-evaluation.

Pt presents to ED ambulatory from home c/o not being able to urinate the last 2 days. While driving to the ER pt felt urge to void so he pulled over and was able to get some relief. Pt made 3 simular stops like this on his way to the VA today. On arrival to ER post void bladder scan revealed >999ml. An 18c foley using sterile technique was inserted and 1350ml was drained from pt's bladder. Pt voiced relief put c/o lower abdominal pain. I instructed pt that he had a urology appt on 9/17/2015 for PVR, pt will need to keep this foley in place until he follows up with urology. Pt not happy but willing to do so. A leg bag with stat lock was applied to pt's rt leg to keep in place. Pt denies any complaints with todays visit and will follow up with urology as scheduled.

Patient was discharged to home/self care.

Patient Discharge Instructions
Today's Date: AUG 27, 2015
Patient's Doctor/Provider: Wan
Patient's Discharge Diagnosis: Urinary incontinance, diabetes, Inguinal hernia s/p surgical repair
Discharge Instructions given to Patient
Patient Assessment at time of discharge:
OrientedStable
****NOTE TO PATIENT: PLEASE CAREFULLY FOLLOW THE INSTRUCTIONS BELOW*******
Resume home medications as prescribed? Yes
Activity:
Up and about as desired and tolerated
List personal items brought to hospital documented on the Nursing Admission Assessment:
black cell phone, glasses, phone charger, Grey overalls, brown sandal, hygiene items
YES--Were these items returned to Patient at discharge?
NO--Did the patient acknowledge having cash in the Nursing Admission Assessment

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Note?
NA--If yes, did the patient secure cash with the Agent Cashier?
(If the patient secured cash with the Agent Cashier, information to contact the Agent Cashier at 806-355-9703 ext. 7364 was provided.)
NA--Did you get assistance with any fears or anxieties that you had during your admission?
NA--Do you have any further concerns that we can help you with before you are discharged?
Explanation of above responses:

****
Does Patient have Congestive Heart Failure?
No
****
Is the patient going home with a Foley catheter? Yes
If yes, Foley Catheter Care pamphlet provided Yes
****
Does the patient have MRSA? No
MRSA pamphlet provided NA
****
Post-op instructions (Pacemaker/ICD/Loop recorder) provided NA
****
Central Line IV Site Care pamphlet provided NA
****
Post Cardiac Procedure Education Sheet provided NA
****
Pain Scale at discharge: 0
(See Focus note or Daily Assessment note for comphrehensive assessment of pain greater than 0)
****
Patient does not have Wounds or Pressure Ulcer.
Diet: Other: Diabetic
****
Call your doctor for any signs / or symptoms of: Reddened wound, wound drainage, swelling,red streaks, increased pain, temperature 101 or higher, or bleeding.
CALL:
Your admitting doctor (name at top of page) 355-9703 ask operator anytime.
Your primary care provider (8am - 4pm) 355-9703 ask operator.
Emergency Department(anytime) 355-9703, ask operator for Emergency Department.
Day Surgery (6am-6pm) 355-9703 ext. 7200 or ask operator.

As part of your discharge today, you will receive a printout of upcoming appointments;
including this post-discharge follow-up phone call. At any time after leaving today,
if you know you will be unavailable for the scheduled phone call; please contact Telephone Triage at (806)354-7837 or 1 (800) 687-8633 between the hours of 8:00a.m to 4:00p.m. Monday through Friday.

Keep all previously scheduled appointments.
Your return appointment is: Sep 4,2015@10:00 with Dr Rodriquez
Letter will be sent for follow up date and time, approx 1 week

Or you will receive a letter in the mail with your appointment. IF YOU DO NOT

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

RECEIVE A
LETTER, PLEASE CALL YOUR ADMITTING DOCTOR to arrange an appointment.
Other instructions:
Mode of Discharge: Wheelchair
Accompanied by: friend
Relationship: Friend
****
Patient was given a current list of medications on discharge.
Patient verbalizes understanding of discharge instructions: Yes

This patient has received Healthy Lifestyle Instructions which include instructions
for Heart Failure including: activity level, diet/fluid intake, discharge medications,
follow-up care, weight monitoring, and what to do if symptoms worsen.

This patient has received a copy of the Passport to Healthy Living which includes the following list of stroke symptoms:
  Sudden numbness or weakness of the face, arm or leg, especially on one side of the body
  Sudden confusion, trouble speaking or understanding
  Sudden trouble seeing in one or both eyes
  Sudden trouble walking, dizziness, loss of balance or coordination
  Sudden, severe headache with no known cause

If you experience any of the above symptoms of stroke, call 911 and go to your nearest stroke facility.
****
A COPY OF THIS NOTE IS TO BE PROVIDED FOR THE PATIENT PRIOR TO
LEAVING THE MEDICAL CENTER.

MRSA Education provided.
Informed verbal consent obtained.
MRSA nares culture obtained.

Nurse's Signature Date

I have received and understand these Discharge Instructions:

PRIMARY DIAGNOSIS: Abnormality of gait
TREATMENT DIAGNOSIS: Abnormality of gait
ONSET DATE: 08/27/15
EVALUATION DATE: 08/27/15

GENERAL INFO: pt. is a 72 year old male presents to 3N medical floor for evaluation of sudden onset abnormality of gait. Pt. underwent hernia surgery last week, and incurred sudden onset of urinary incontinence and unsteady gait. Pt. was admitted to a hospital in Kansas and subsequently transferred to this VA. Pt. has folley catheter present and is supine in bed with no complaints of pain upon arrival. Also noted in the medical record is previously uncontrolled DM.

PRIOR FUNCTIONAL LEVEL: I with all ambulation, functional activities and transfers

EXPECTED DC LOCATION: (x)Home with family/independent ( )SNF ( )LTC facility
( )Hospice care ( )Other:

PERTINENT MEDICAL HX: DM, hyperlipidemia, MDD, inguinal hernia (surgically repaired)

S: CHIEF COMPLAINT: pt. states that he had experienced some unsteady gait and imbalance, but now these sx's have resolved and he was able to walk to<>from the bathroom independently this morning.

PAIN INDEX: none stated

PATIENT'S GOAL(S): to go home

O:
Pt assessed- (x)at bedside ( )in PT clinic.

RANGE OF MOTION
UE- WNL B

LE- WNL B

STRENGTH TESTING

UEs- (x)Functional UE strength testing exhibits no gross deficits
( )UE strength deficit noted as follows (specify):

LEs- B LE strength grossly 4+/5 throughout

FUNCTIONAL ASSESSMENT
Mental status: A&O X 3

Communication: (x)No deficits noted ( )Hard of hearing
( )Other (specify):

Functional Mobility Status:

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Bed mobility ( )Stand by Assist
(x)Independent with siderails ( )Min assist of 1
( )Mod assist of 1 ( )Max assist of 1 ( )Total assist

( ) Stand by Assist
( )Min assist of 1 ( )Mod assist of 1 ( )Max assist of 1
( )Total assist

Sit->stand (x)Independent
( )Modified Independent with assistive device
( )Stand by Assist
( )Min assist of 1 ( )Mod assist of 1 ( )Max assist of 1
( )Total assist

Bed<->chair transfer (x)Independent
( )Modified Independent with assistive device
( )Stand by Assist
( )Min assist of 1 ( )Mod assist of 1 ( )Max assist of 1
( )Total assist

Gait assessment: pt. ambulated 150' independently in hall way while this therapist carried catheter bag; pt. demonstrates good dynamic balance, cadence and equal stride length and toe clearance. Pt. reports no dizziness or feelings of unsteadiness; no LOB observed

Fall risk: ( )yes (x)no

BALANCE
Sitting: (x)Good ( )Fair ( )Poor
Static standing: (x)Good ( )Fair ( )Poor
Dynamic standing: (x)Good ( )Fair ( )Poor

OTHER INFORMATION- pt. reports he does not want to take any medications and has not taken any since 1991

PATIENT EDUCATION- educated pt. on the possibility of uncontrolled DM contributing to unsteady gait and dizziness; also educated on contacting primary care for prosthetics consult if grab bars are needed in his new home

A:
Patient education barriers to learning-
(x)None ( )Cognitive ( )Physical ( )Emotional
( )Cultural ( )Other(explain):

Description of disability- pt. demonstrates resolve of unsteady gait, good dynamic balance, independent ambulation and 4+/5 strength throughout B LE's. Pt. does not require skilled therapy services at this time, and is appropriate for d/c home when medically cleared.

Precautions: ( )cardiac ( )monitor vitals ( )frequent rests needed
( )limited WB status (specify):
(x)other: folley cath in place

One time evaluation, no goals needed

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

P: pt. does not require skilled therapy services at this time and will not be picked up for PT during hospital stay.

Turgor: Within normal limits

SKIN PROBLEMS
Wound -location, type, description
surgical wound to right leg/groin, redness and swelling to scrotum

INTERVENTIONS
Education
Provide patient/caregiver education regarding causes and prevention of pressure ulcers.
Teach patient/caregiver importance of changing position frequently for pressure ulcer prevention.
Provide patient/caregiver with education materials.
Pressure-Redistribution Measures
Use specialty bed
Specify type: atmos air
Encourage small, frequent position changes
Turn and reposition every 2 hours while in bed, using pillows to separate pressure areas
Avoid turning/position on side at greater than 30 degree angle
Maximize Mobilization
Encourage activity as tolerated
Limit sitting out of bed to less than two hours at a time
Manage Moisture
Maintain clean and dry skin
Offer bedpan or urinal at scheduled intervals if patient is bed-bound
Instruct patient/caregiver to request assistance as needed
Manage Nutrition
Encourage eating and assist with meals
Encourage meals and assist with meals as needed
Provide or encourage oral care prn
Offer liquids every 2 hours when turning
Monitor fluid/food intake
Reduce Friction and Shear
Use a bed trapeze or pull sheet to lift up in bed or turn
Elevate head of bed for meals, then lower within 1 hour after eating (unless contraindicated)

If any of the below indications are marked, pressure ulcer risk interventions must be initiated and added to the care plan. These should be reviewed and updated with each assessment and PRN as the patient's needs change.

Please mark all that apply: Medical Device (artificial limb, brace,

==========

Plan/Assessment:
1. Obstructive uropathy 2/2 to elarged prostate (BPH vs malignancy). PSA is 1.0. We will keep him on foley cather and he will see urologist on an outpatient basis next week.

2. Loss of balance: He has been complaining of loss of balance since after hernia surgery 10 days ago. However he is better today and was able to walk without problems. He was evaluated by PT and he is cleared for discharge.

2. UTI VS bactriuria in presence of obstructive uropathy which necessiate Abx treatment. No evidence of urine infection from urinalysis reports obtained from kansas. will continue Rocephin
3. Uncontrolled DM II: We have d/c'ed his sliding scale and put him on lantus and glipizide.
4. AKI. resolved.
5. VTE. declined anticoagulations. kept on SCDs.
6. Moderate protein cal malnutrition.
[ ] Medication reconciliation was completed with the patient/caregiver.

Indwelling catheter assessment of continuing need:
Catheter present.

Central venous line assessment of continuing need:
No Central Venous Line present.

Patient seen, examed and discussed with team.

72 y/o male with h/o HLD, DM2, and depression was transferred from Liberal, Kasas hospital for urinary retention and b/l hydronephrosis and hydroureter. He had right inguinal hernia repair on 8/19/15 here. According to the patient, after he was discharged after the surgery, he had unsteady gait, urinary

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

incontinence and hick up. On questioning, he reported that he did not have urinary hecitency or dribbling. No feelings or incomplete voiding or urinary urgency. He went to Liberal OPC and was sent to local hospital on 8/24/15. There CT abd/pelvis revealed b/l hydronephrosis and hydroureter. Bladder scan showed 700cc residue. A Foley was inserted that resulted in 500cc of urine. He was hospitalized and started on flomax and rocephin there. At admission, he has mildly elevated BUN/creatinine. These went back to baselin in 2 days. Transferred here for further care because it was unsure there if he was able to walk since the patient declined rehab evaluation there. During mmorning round, the patient reported that he fould his unsteadiness resolved this morning and he was able to walk to the bathroom and back with no difficulty. He was not taking any medicine before he was hospitalized in Liberal although he has DM2. His BS was >400 when he presented to Liberal Hosital.

Assessment:
1) Urinary incontinence, most commen cause in a male at this age is overflow incontinence 2' to BPH. The patient's lack of subjective incomplete voiding or urinary urgency and his uncontroled DM2 makes neurogenic bladder another possibility.
2) DM2, BS not well controlled.

Plan:
1) Discharge with indwelling Foley, leg bag and follow in Urology Clinic in 1 to 2 weeks for voiding trial. He had a Surgical Clinic follow up on 9/1/15, will try to arrange the Urology Clinic follow up on the same day.
3) He needs out patient hypoglycemics. will start him on glipizide and ask him to follow up with PCP in Liberal Clinic.

ADMITTING PHYSICIAN: Abdelrazig Suliman, MD

ATTENDING PHYSICIAN: Bang Wan, MD

This patient will be admitted to team 1.

CHIEF COMPLAINT: The patient was transferred from Kansas because of obstructive uropathy and uncontrolled diabetes mellitus.

HISTORY OF PRESENTING ILLNESS: This is a 72-year-old male with past medical history of diabetes mellitus type 2. The patient was not on any kind of medication. The patient's story started on August 20 after he underwent right hernia repair surgery here in Amarillo. Patient was discharged home the next day after the surgery. He stated that on his way to his home town in Kansas he noticed that he became incontinent with his urine. On the next day, the patient also stated that he had some transient hiccup and some sort of unsteady gait. The patient was send out here on hydrocodone to control his pain and he has been taking that as well. Because of the patient's urinary incontinence and hiccup, he called the Amarillo VA here and he was told to go to the nearest medical facility. The patient was admitted there in Southwest Medical Center in Kansas and CT scan abdomen was done and that showed bilateral hydronephrosis and hydroureters indicative of obstructive uropathy. The patient received a Foley catheter and he also was started on antibiotic for UTI infection. The patient also was found to have some mild kidney injury at that time with a creatinine level of 1.5, but he responded quite well to IV fluids and his creatinine went back to normal. The patient denied any history of prostatism or any kind of other urinary symptoms during the last few months. He also denied taking any kind of medication and he assumed that he was able to control his diabetes only with diet and he did not believe that he had diabetes but he kept saying that he had high blood sugar but his blood sugar was almost always controlled.

REVIEW OF SYSTEMS: All systems including head and neck, cardiovascular, pulmonary, gastrointestinal, hematology, neurology, musculoskeletal, genitourinary, and dermatology are all negative except what is mentioned above.

ALLERGIES: None.

PAST MEDICAL HISTORY: Type 2 diabetes mellitus and per records he has history of vitamin D deficiency, history of dyslipidemia, history of microscopic hematuria, history of vitamin B12 deficiency, and history of depression and have.

MEDICATION: Patient was not on any medication at home but his hospital medication that he came in taking from Kansas include per records:
1. Ambien 5 mg.
2. Flomax 0.4 mg.
3. Senna.
4. Ceftriaxone injection.

PAST SURGICAL HISTORY: Include right hernia repair, which is recent.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

SOCIAL HISTORY: The patient quit smoking in 1972. He denied alcohol and denied drugs.

PHYSICAL EXAMINATION:
VITAL SIGNS: Blood pressure 125/74, heart rate 81, respiratory rate 16, temperature 97.8, and oxygen saturation 98% on ambient air.
SKIN EXAMINATION: Patient is alert, oriented, very nice veteran, in no acute distress.
HEENT: Normocephalic, atraumatic. Extraocular movements intact. Pupils are equal, round, reactive to light and accommodation. There is no conjunctival pallor, jaundice, or cyanosis.
NECK: Supple. No JVD. No lymphadenopathy. No thyromegaly.
PULMONARY EXAMINATION: Clear to auscultation bilaterally. There are no added sounds.
CARDIOVASCULAR EXAMINATION: Regular rate and rhythm. S1, S2 are normal. No murmur. No gallop. No rub.
ABDOMEN: Soft, nontender. No organomegaly. Bowel sounds are normoactive in all quadrants.
CNS EXAMINATION: Cranial nerves II through XII appear grossly to be intact. Strength 5/5 in all muscle groups with normal tone and normal deep tender reflexes, proximal and distal. Sensation intact to pinprick, touch, and temperature in all dermatomes, with normal proprioception and normal vibration sense. Coordination is intact on the right side. The patient is slightly having some sort of dysdiadochokinesia on repetitive movement on the left hand. This is probably because the patient is right handed.
EXTREMITIES: There is no pedal edema. Peripheral pulses are intact.

DIAGNOSTIC DATA: Laboratory data includes labs from August 24 in Kansas. CBC: White cell count 13.4; hemoglobin 13.7; hematocrit 40.9; and platelets 285,000,. Chemistry from August 25, also from Kansas, sodium 141, potassium 3.4, chloride 104, bicarbonate 25, BUN 24, creatinine 0.8, blood glucose 213, calcium 8.5, magnesium 1.3, total protein 5.9, albumin 2.8, alkaline phosphatase 56, AST 64, ALT 50. Cardiac markers are negative. Urinalysis shows rbc's 5 to 10. Imaging studies: EKG normal sinus rhythm with first-degree heart block and multiple PVCs. He also has T-wave inversion in the lateral leads and kind of flat T-waves in the anterior leads with left axis.

IMPRESSION AND PLAN:
1. Obstructive uropathy with overflow incontinence most likely secondary to enlarged prostate. We cannot rule out prostate cancer at this time. Patient is having Foley catheter right now and he is making a good amount of urine. He is also started on Flomax 0.4 milligrams and we will have the patient to be assessed by Urology for possible prostate surgery.
2. Urinary tract infection. The patient actually was on Rocephin that was started in Kansas. His urinalysis does not show much of infection, but his computed tomography (CT) scan showed some stranding in the perinephric area and in the periureteric area, second possible inflammation. Also, I could not find any bacteria in his urine that could also justify him being on Rocephin. For now, we will continue his Rocephin as he has some inflammatory markers and we will check his procalcitonin as well.
3. Uncontrolled diabetes. Patient has been diabetic for the last 4

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

years, but he has never been on any kind of antidiabetic medication. His hemoglobin A1c is 10.8, which is obviously uncontrolled, so we will keep him on sliding scale insulin for now and he will probably need to be started on oral antidiabetic medication to take care of his uncontrolled diabetes.
4. Deep vein thrombosis (DVT) prophylaxis. The patient is moderate risk for deep vein thrombosis (DVT), but he declined anticoagulant shots and he agreed on receiving sequential compression devices (SCDs) instead.
5. Resolved acute kidney injury. The patient's creatinine from 2 days ago was 1.5 and since yesterday it came back to his baseline of 0.8. So for now, we will increase oral hydration and we will monitor his kidney function as well.
6. Case will be discussed with the team in the morning.

72 year old veteran male from Kansas. PMH of DMII not on meds. Has been transfered to VA amarillo for obstructive uropathy. patient underwent surgery for hernia repair a week ago here in the VA and was discharged the next day. stated that On his way to Kansas he some urinary incontinence accident for the first time. No prior history of prostatism or diagnosis of BPH. He aslo had a few episodes of hiccups and what he describes as unsteady gait. He called VA amarillo and was told to seek a medical advice close to his residence. He was admitted to southwest medical center in Kansas after his CT scan showed bilateral hydronephrosis and hydroureters with periureteric and perinephric stranding, prominent prostate and distended bladder. Placement of indweling foley catheter retrieved considerable amount of urine. He was also found to have some kidney injury with creatinine of 1.5 that came back to normal after 24 hours of obstruction relief.
He was also not on any antidiabetic meds with HbA1c of 10.8. patient has an unshakable believes in not taking meds, he would prefer taking herbs to treat his medical problems.
VS BP125/74. HR 81. RR 16. Tem 97.8. physical exam unremarkable except for mild dysdiadochokinesia in left hand. patient is right-handed. DRE not done.
most recent labs from yesterday remarkable for: WCC 13.4, HB 13.7, BUN/Crea 24/0.8, HbA1c 10.8, Albumin 2.8.

plan: Admitted for:
1. Obstructive uropathy 2/2 to elarged prostate (BPH vs malignancy). will check DRE and PSA for possible cancer. keep foley cather and urology consult .
2. UTI VS bactriuria in presence of obstructive uropathy which necessiate Abx treatment. No evidence of urine infection from urinalysis reports obtained from kansas. will continue Rocephin and team will decide upon it.
3. Uncontrolled DM II. SSI with aspart.
4. AKI. resolved.
5. VTE. declined anticoagulations. kept on SCDs.
6. Moderate protein cal malnutrition.

ACTIVITY INTOLERANCE
related to Prolonged bed rest

EXPECTED OUTCOME
Target date Aug 29,2015
Maintains activity level within capabilities as evidenced by normal heart rate and BP, Verbalizes use of oxygen and conservation techniques

ACTION/INTERVENTIONS
Assess patient's level of physical activity before experiencing angina, Evaluate factors that may precipitate fatigue or discomfort, Encourage adequate rest periods between activities, Assess nutritional status, Assess needs for assistive devices, Observe and document response to activity

INCONTINENCE WITH BOWEL/BLADDER
related to Lack of bladder/bowel control, Spontaneous voiding/evacuation

EXPECTED OUTCOME
Target date Aug 29,2015
Regular bladder and bowel habits, Perineal skin remain intact, Decreased episodes of bladder/bowel incontinence
ACTION/INTERVENTION
Assess patient's normal bladder/bowel elimination pattern, Encourage mobility or exercise as tolerated, Establish bladder and bowel training program by toileting patient every two hours, Give perineal care after each episode of incontinence, Mark bathroom doors conspicuously, Allow privacy and respect patient's dignity, Culture urine as ordered

ALCOHOL SCREENING (AUDIT C)

How often did you have a drink containing alcohol in the past year? Never (0 points)

How many drinks containing alcohol did you have on a typical day when you were drinking in the past year? 0 drinks (o points)

How often did you have six or more drinks on one occasion in the past year? Never (0 points)

Total score of above questions: 0

DRUG USE SCREENING

In the last 6 months, have you used any illegal drugs or misused any prescription medications?
NO

MENTAL STATUS SCREENING
Is the patient threatening to hurt or kill self?
No
Is the patient looking for ways to kill self; seeking access to pills, weapons or other means?
No
Is the patient talking or writing about death, dying or suicide?
No
Does the patient have concerns about hospitalization? No
If yes, please explain:

Does the patient have trouble sleeping? No
If yes, please explain:

Does the patient have any fears about this admission or the treatment plan? No
If yes, please explain:

Does the patient have family or friends for emotional support? Yes

What usually helps the patient relieve stress? uses mental relaxation, work

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Affect: appropriate

Mood: calm

Behavior: cooperative, friendly

Thought process: organized

TOBACCO SCREENING
Patient has not used any forms of tobacco in the past 30 days.

NUTRITIONAL/METABOLIC SCREENING
The patient has the following nutritional/metabolic issues:
  No problems identified.
ORAL SCREEN

Patient:
has own natural teeth
DYSPHAGIA SCREENING

Dysphagia Risk Factors:
No problems identified
  Swallowing Status Screen:
  No abnormality observed

ADVANCE DIRECTIVE SCREENING
  Patient has an advance directive and it is scanned into record. (see
  postings)

          Does the advance directive still reflect the patient's wishes?
    Yes

ORGAN/TISSUE DONATION
  Patient is an organ/tissue donor.

OBSERVATION FOR ABUSE/NEGLECT
Does the patient have unaccounted for bruises or other trauma?
No
Is the patient's hygiene adequate?
No - social work consult placed.
Does the patient seem fearful or withdrawn around caregiver?
No

INFLUENZA SCREEN
Patient refused the influenza vaccine. Patient was advised of risks and
benefits of influenza vaccine.

Caller Area: AMARILLO
Type of call: INFORMATION.

Comments:
Caller states her husband had hernia repair on 8/19, reports his wound is doing good and he is not requiring pain meds. Her concern today is "he has no bladder control and no balance". Stated he has had not bladder control since he went home 4 days ago and has been in bed for the past 3 days.

She reports concern that they live 2 1/2 hours away from Amarillo and she feels he needs to be seen. Encouraged her to bring him to the ED for evaluation, she did NOT want to because of the distance. Spouse stated she plans to try to have him seen at the Liberal, Kansas VA Clinic if possible. She did acknowledge that he needs to be evaluated and the ED is available 24/7. She did verbalize a plan to have him seen today.

Chief Complaint: Not applicable to call.
Identified problem: OTH UNSP COUNSEL.

Spouse will bring the Vet to the ED if unable to access care at the Liberal VA Clinic.

Caller Response: *OTHER

Patient/Caller agrees with plan.

Procedure:Right inguinal hernia
Physician:Dr Ahmed
Admission Date:Aug 19,2015
Discharge Date:
Current condition:

Were discharge instructions understood?

Do you know what medications were prescribed for you? Do you understand how and when to take it?

Emotional support: Was the staff caring and supportive during your visit?

How is your pain (related to the procedure)? Is it adequately controlled with your pain medicine?

Do you have a dressing? Is it clean and dry and still on? Do you know when to remove it?

Could we have done anything to make the stay more pleasant?

Do you have any questions or comments for me?

Follow up call attempted on this date: AUG 20, 2015
No follow up call accomplished:

Patient was discharged to home/self care.

Patient Discharge Instructions
Today's Date: AUG 20, 2015
Patient's Doctor/Provider: AHMED
Patient's Discharge Diagnosis: S/P LAP CHOLE,HERNIA REPAIR
Discharge Instructions given to
Patient Assessment at time of discharge:
OrientedStable
****NOTE TO PATIENT: PLEASE CAREFULLY FOLLOW THE INSTRUCTIONS BELOW*******
Resume home medications as prescribed? NA
Activity:
Up and about as desired and tolerated, Shower only, Avoid heavy lifting and/or exercise
List personal items brought to hospital documented on the Nursing Admission Assessment:
GLASSES, BOOK, CLOTHES, CELL PHONE
YES--Were these items returned to Patient at discharge?
NO--Did the patient acknowledge having cash in the Nursing Admission Assessment Note?
NA--If yes, did the patient secure cash with the Agent Cashier?
(If the patient secured cash with the Agent Cashier, information to contact the Agent Cashier at 806-355-9703 ext. 7364 was provided.)
NA--Did you get assistance with any fears or anxieties that you had during your admission?
NA--Do you have any further concerns that we can help you with before you are discharged?
Explanation of above responses:

****
Does Patient have Congestive Heart Failure?
No
****
Is the patient going home with a Foley catheter? No
If yes, Foley Catheter Care pamphlet provided NA
****
Does the patient have MRSA? No
MRSA pamphlet provided NA
****
Post-op instructions (Pacemaker/ICD/Loop recorder) provided NA
****
Central Line IV Site Care pamphlet provided NA
****
Post Cardiac Procedure Education Sheet provided NA
****
Pain Scale at discharge:
(See Focus note or Daily Assessment note for comphrehensive assessment of pain greater than 0)
****
Patient has Wound(s) or unhealed Pressure Ulcer(s).
Patient/caregiver received instructions for performing care
Wound Care:

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

May remove dressing on:Aug 21,2015
Diet: Resume the diet you were on before
****
Call your doctor for any signs / or symptoms of: Reddened wound, wound drainage, swelling,red streaks, increased pain, temperature 101 or higher, or bleeding.
CALL:
Your admitting doctor (name at top of page) 355-9703 ask operator anytime.
Your primary care provider (8am - 4pm) 355-9703 ask operator.
Emergency Department(anytime) 355-9703, ask operator for Emergency Department.
Day Surgery (6am-6pm) 355-9703 ext. 7200 or ask operator.

As part of your discharge today, you will receive a printout of upcoming appointments;
including this post-discharge follow-up phone call. At any time after leaving today,
if you know you will be unavailable for the scheduled phone call; please contact Telephone Triage at (806)354-7837 or 1 (800) 687-8633 between the hours of 8:00a.m to 4:00p.m. Monday through Friday.

Keep all previously scheduled appointments.
Your return appointment is: Sep 1,2015@11:00
Or you will receive a letter in the mail with your appointment. IF YOU DO NOT RECEIVE A
LETTER, PLEASE CALL YOUR ADMITTING DOCTOR to arrange an appointment.
Other instructions:
Mode of Discharge: Wheelchair
Accompanied by: WIFE
Relationship:
****
Patient was given a current list of medications on discharge.
Patient verbalizes understanding of discharge instructions: Yes

This patient has received Healthy Lifestyle Instructions which include instructions
for Heart Failure including: activity level, diet/fluid intake, discharge medications,
follow-up care, weight monitoring, and what to do if symptoms worsen.

This patient has received a copy of the Passport to Healthy Living which includes the following list of stroke symptoms:
  Sudden numbness or weakness of the face, arm or leg, especially on one side of the body
  Sudden confusion, trouble speaking or understanding
  Sudden trouble seeing in one or both eyes
  Sudden trouble walking, dizziness, loss of balance or coordination
  Sudden, severe headache with no known cause

If you experience any of the above symptoms of stroke, call 911 and go to your nearest stroke facility.
****
A COPY OF THIS NOTE IS TO BE PROVIDED FOR THE PATIENT PRIOR TO LEAVING THE MEDICAL CENTER.

Is the patient threatening to hurt or kill self?
No
Is the patient looking for ways to kill self; seeking access to pills, weapons or other means?
No
Is the patient talking or writing about death, dying or suicide?
No
Does the patient have concerns about hospitalization? No
If yes, please explain:

Does the patient have trouble sleeping? No
If yes, please explain:

Does the patient have any fears about this admission or the treatment plan? No
If yes, please explain:

Does the patient have family or friends for emotional support? No

What usually helps the patient relieve stress? "food is my passion"

Affect: appropriate

Mood: calm

Behavior: cooperative

Thought process: organized

TOBACCO SCREENING
Patient has not used any forms of tobacco in the past 30 days.

NUTRITIONAL/METABOLIC SCREENING
The patient has the following nutritional/metabolic issues:
No problems identified.
ORAL SCREEN

Patient:
has own natural teeth
DYSPHAGIA SCREENING

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Dysphagia Risk Factors:
No problems identified
  Swallowing Status Screen:
  Abnormality observed

ADVANCE DIRECTIVE SCREENING
  Patient has an advance directive and it is scanned into record. (see
  postings)

          Does the advance directive still reflect the patient's wishes?
    Yes

ORGAN/TISSUE DONATION
  Patient declines organ donation information.

OBSERVATION FOR ABUSE/NEGLECT
Does the patient have unaccounted for bruises or other trauma?
No
Is the patient's hygiene adequate?
Yes
Does the patient seem fearful or withdrawn around caregiver?
No

INFLUENZA SCREEN
Patient refused the influenza vaccine. Patient was advised of risks and
benefits of influenza vaccine.

PAIN MANAGEMENT DISCUSSED iv pain meds

I have informed the patient, or the person authorized to extend the patient's consent, of the methods of anesthesia proposed. I have explained, consistent with accepted medical judgment, the nature and purposes of the anesthesia, the reasonable alternative methods,the risks involved and possiblity of complications.

I have explained that the anesthetic which is proposed to be used is a General but that an alternative form of anesthesia may be used if required by conditions arising before or during the procedure.

OTHER PROCEDURES DISCUSSED:
Anesthesia awareness

Risks, benefits, and postoperative pain management options have been discussed and are acceptable to the patient.

Patient states understanding and wishes to proceed.

COMMENTS:

Note: See scanned image of anesthesia record.

LOCAL TITLE: PERIOPERATIVE NURSING CARE PLAN
STANDARD TITLE: SURGERY NURSING NOTE
DATE OF NOTE: AUG 19, 2015@07:22 ENTRY DATE: AUG 19, 2015@07:22:25
AUTHOR: BLACKWELL,APRIL L EXP COSIGNER:
INSTITUTION: AMARILLO HCS
DIVISION: VAMC AMARILLO
URGENCY: STATUS: COMPLETED

NURSING DIAGNOSIS:
1. Potential for injury related to allergies to medications, prep solutions, contrast dyes.
2. Potential for injury related to prosthetic devices.
3. Potential for injury related to jewelry
4. Potential for injury related to electrical equipment used during surgical procedure.
5. Alterations in urine elimination related to altered level of consciousness and sensation.
6. Potential for skin impairment related to physical immobilization during surgery.
7. Potential for skin impairment related to hypothermia.
8. Potential for skin impairment related to altered circulation & sensation.
9. Potential for skin impairment related to use of protective devices.
10. Potential for infection related to break in skin integrity.

Goals:
1. No evidence of injury during or immediately post-op related to medications or prep solutions
2. No evidence of injury related to prosthetic device left on during surgical procedure
3. No injury related to jewelry worn during surgical procedure
4. No evidence of injury resulting from use of electrical equipment

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

5. Prevent bladder distention during procedure and immediately post op
6. Absence of preventable injuries incurred while in the OR area
7. Patient will maintain temperature of 35 degrees C. (95 F.)
8. Patient will present with adequate airway
9. DNR status will be communicated
10.Adequate information will be communicated to receiving nurse upon transfer

Interventions:
1. Ask about allergies to medications, prep solutions, contrast dyes
2. Verify NPO status, procedure and site with patient; communicate to surgical team.
3. Verify Informed Consent for procedure, (Blood consent obtained when required), History and Physical completed as required.
4. Ask patient about prosthetic devices
5. Remove prosthetic devices
6. Visual check to assure that all jewelry is removed prior to coming to OR
7. If jewelry not removable, it will be secured with tape
8. Ambient room temperature warmed prior to prepping and draping
9. Assure warming blanket in place prior to draping
10. Remind anesthesia about prophylactic antibiotics prior to incision
11. Use grounding pads, check connections and placement
12. Insure no body part touching uncovered bed sections
13. Check length of proposed surgical procedure and type of procedure
14. Pad bony prominences
15. Position carefully, pad and/or support body parts as needed
16. Check pressure points
17. Apply Safety straps
18. Establish sterile field
19. Monitor for breaks in sterile technique, correct and document as needed
20. Maintain sterile field
21. Apply sterile wound cover
22. Assist with maintaining patient airway during transport post procedure
23. Verbally communicate procedure, meds given, type of anesthesia
24. Verbally communicate patient's condition
25. Surgical site infection prevention teaching conducted.

Goals met upon discharge to: PACU
-- No evidence of injury during or immediately post-op related to medications or prep solutions
-- No evidence of injury related to prosthetic device left on during surgical procedure
-- No injury related to jewelry worn during surgical procedure
-- No evidence of injury resulting from use of electrical equipment
-- Prevent bladder distention during procedure and immediately post op
-- Absence of preventable injuries incurred while in the OR area
-- Surgical site infection prevention teaching completed.
-- No evidence of infection on post-op period
-- Patient will maintain temperature of 35 degrees C. (95 F.)
-- Patient will present with adequate airway
-- DNR status will be communicated
-- Adequate information will be communicated to recieving nurse upon transfer

Signature Informed Consent for
GROIN - HERNIA INGUINAL (OPEN) (HERNIA INGUINAL (OPEN))
1. Anatomical Location: Repair of right inguinal hernia
2. Informed consent was obtained at 2:03 PM on August 13, 2015.
The full consent document can be accessed through Vista Imaging.
3. Patient name: HOPKINS, MARSHALL HUGH
4. The patient HAS decision-making capacity.
5. Surrogate (if applicable):

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

6. Reason for the treatment (diagnosis, condition, or indication):
This procedure is performed in patients with an inguinal hernia (an abnormal bulge in the groin area, due to a weakness in the abdominal wall).

7. Treatment/procedure: The goal of this procedure is to surgically repair an inguinal hernia (the intestines push through a weak spot on the inguinal canal, a triangle-shaped opening in the abdominal wall near the groin).

During the operation, the surgeon makes an incision (cut) in the groin. The segment of intestine that is bulging through the abdominal wall is located and placed back into the abdominal cavity. Next, the muscle and fascia (a sheet of tissue that envelops or binds soft body structures together) are stitched closed to repair the opening in the abdominal wall. Often, a piece of plastic mesh is used to reinforce the closure.
Once the hernia repair is performed, the surgeon closes the incision in layers and places a dressing over the surgical site.

8. Anesthesia will be administered.
9. Consent to Blood Products (if applicable):
It is not expected that blood products will be used in this treatment/procedure.
10. Practitioner obtaining consent: Ahmed,Syed H (PHYSICIAN)
11. Supervising practitioner:
12. Practitioner(s) performing or supervising treatment/procedure (if not listed above):
13. Witness Name(s):

14. Comments:
Tissues removed during the course of this treatment/procedure will be disposed of in accordance with hospital procedures.

The patient was offered referral to GI for colonoscopy/sigmoidoscopy and declines to accept the referral.
Reason: DOES NOT BELIVE IS NECESSARY
DIABETIC EYE EXAM:
Patient had eye exam previously.
Location: AMA- VA
MONTH AND YEAR (REQUIRED): FEB.2015
Diabetic Foot Exam:
Patient declined Diabetic Foot Exam.
Comment: DOES NOT BELIVE HE IS DIABETIC
PROSTATE CANCER EDUCATION:
PROSTATE CANCER SCREENING
PROVIDER EDUCATION: Today, the patient received written information and/or verbal counseling, including risks and benefits, about prostate cancer screening and had an opportunity to ask questions.
Level of Understanding: Good
Hemoglobin A1C:
Patient refused diabetic education consult.
ELEVATED BP >140/90:
Patient has a blood pressure cuff at home.
DIABETIC ELEVATED HEMOGLOBIN A1C:
Patient refused Diabetic Education.
MEDICATION RECONCILIATION-PACT:

Active and Recently Expired Outpatient Medications (including Supplies):

No Medications Found

IV Medications
==========
=== No data available

Home medications or patient's list of medications reviewed.

No Medication discrepancies found.

Current medication list reviewed with patient and/or caregiver. List of current medications given to patient and/or caregiver at discharge.

Encouraged to keep list of current medications with them in case of an emergency.

--- Original Document ---

07/14/15 CLINICAL REMINDER NOTE:
Pneumococcal PCV13 (Prevnar13):
The patient declines to receive the recommended dose of pneumococcal conjugate vaccine PCV13 (Prevnar 13).
Comment: "I don't take any medicines or shots"
HEALTHY LIVING/COPING SKILLS:
Exercise Screening:

Yes--Are you physically active, exercise 3 times a week 20-30 min.
Patient received education regarding exercise.
Weight/Nutrition Screening:

Yes Does your diet contain more fruit, grain, and vegetables than meats?
No Have you had your stool checked for blood in the last year?
Weight/Nutrition Education was provided to patient.
Miscellaneous:

No 1. Have you had a flex sig by an outside provider or at the Amarillo VA within the last 5 years?
No 2. Have you had a colonoscopy by an outside provider or at the Amarillo VA within the last 10 years?
No 4. Do you take an aspirin daily?
Depression Screening:
PHQ-2

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

A PHQ-2 screen was performed. The score was 4 which is a positive screen for depression.

1. Little interest or pleasure in doing things
More than half the days

2. Feeling down, depressed, or hopeless
More than half the days

Alcohol Screening:
AUDC (Mental Health Instrument)
An alcohol screening test (AUDIT-C) was negative (score=0).

1. How often did you have a drink containing alcohol in the past year?
Never

2. How many drinks containing alcohol did you have on a typical day when you were drinking in the past year?
Response not required due to responses to other questions.

3. How often did you have six or more drinks on one occasion in the past year?
Response not required due to responses to other questions.

Tetanus Reminder:
Patient refused Tetanus immunization.

ELEVATED BP >140/90:
Blood Pressure taken at this visit.
B/P: 146/92
Patient is not on blood pressure medication.

Tobacco Use Screen:
Patient states they are a former tobacco user but has quit more than 12 months ago.

MINI-COGNITIVE IMPAIRMENT SCREENING:
Give 1 point for each recalled word after the CDT distracter.

Score=3 (0-3 for recall).

Give 2 points for a normal CDT, and 0 points for an abnormal CDT. The CDT is considered normal if all numbers are depicted, once each, in the correct sequence and position, and the hands readably display the requested time.

Score=2 (0 or 2 for CDT).

Total Score=5 (Add the word recall and CDT scores together to get the Mini-Cog Score).
Patient tested negative in the screen for cognitive impairment.

My HealtheVet Education:
The patient does not have access and does not use the internet.

Homelessness Screening:
In the past 2 months, have you been living in stable housing that you own, rent, or stay in as part of a household? Yes - Living in stable housing.
Are you worried or concerned that in the next 2 months you may NOT have stable housing that you own, rent, or stay in as part of a household?

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

No - Not worried about housing near future
PRIMARY CARE PRESSURE ULCER RISK:
1. Is the Veteran bed-confined or a wheelchair-user (wheelchair-user defined as being wheelchair bound for >50% of wake hours)?
No

2. Does the Veteran require assistance to transfer/change positions?
No

3. Does the Veteran report any current pressure ulcers, a history of pressure ulcers, or a wound from a medical device, such as artificial limb, braces, spling, implanted pump, automatic implanted cardioverter-defibrillator, oxygen tubing, Foley or condom catheter, tracheostomy, feeding tube, or other medical device?
No

The patient is NEGATIVE for pressure ulcer risk.

Mr. Hopkins was seen for 60 minutes to address depression. He was last seen in this clinic on 10/24/12. He stated he continues to struggle with sleep issues despite having a sleep study and starting on the CPAP. Mr. Hopkins also reports lack of motivation, loss of interest in activities, and emotional numbing. He feels like he has ran out of dreams and has accomplished everything he wants to accomplish. He is struggling with finding a purpose in life. He stated he is volunteering and finds that to be rewarding and also likes to study religion. He is working but does not enjoy what he is doing. He stated he has retired in the past and doesn't like not having a job. He does not relate his purpose with his family saying "they're doing fine on their own."

Mr. Hopkins stated he wants to know why he is depressed. Provided information to veteran regarding depression, however; he appeared fixated on wanting to know the exact cause of his depression.

URGENCY: STATUS: COMPLETED

Pt observed the Watch PAT-100 training DVD. After DVD, operation of the equipment was demonstrated by me. Pt did not have any questions at this time. Pt issued equipment #21019, return postage and instructed to mail it back tomorrow. Pt reminded that there is an instruction card inside the carrying case. Pt advised to refrain from driving and operating heavy machinery while going through the testing phases for sleep apnea and at least until pt receives therapy if needed.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Pt's resting room air spo2 = 92%. Pt states he quit smoking in 1972, but smoked 1.5 pks a day for 22 years. Pt fitted for a large full face mask #61203 in case he qualifies for CPAP therapy.

Pt Signed Authorization to Release Medical Information for sleep study Equipment and it will be sent to be scanned into CPRS.

08/23/12 AMBULATORY CARE NOTE:

PATIENT NAME: HOPKINS, MARSHALL H

DATE: 08/23/2012

SUBJECTIVE: The patient reports today earlier than his annual followup. The patient was last seen in April 2012. Reported depression and wanted it to be evaluated. The patient has a depression listed as a service-connected disability. Discussed about his other chronic comorbidities, as well, at the current interview.

PAST MEDICAL HISTORY: Reviewed.

CURRENT MEDICATIONS:
1. Cholecalciferol.
2. Ergocalciferol.
3. Cyanocobalamin injections.

ALLERGIES: Patient is not known to have allergy to prescription medications.

REVIEW OF SYSTEMS: Negative for most systems.

PHYSICAL EXAMINATION:

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

VITAL SIGNS: Temperature 97.9, pulse 70. Respiratory rate is 18, blood pressure 142/90. Weight is 207 pounds. Pain is 4/10, 10 being the worst pain on a scale of 10, pulse oximetry 96% on room air. BMI is 28.
GENERAL: Alert, oriented x3, cooperative, in no acute distress.
ABDOMEN: Soft and nontender. Bowel sounds heard.
EXTREMITIES: No pedal edema.
NEUROLOGIC: Cranial nerves II through XII normal. Strength 5/5. Balance and gait normal. Sensation preserved.

ASSESSMENT AND PLAN:
1. Depression. Ran Patient Health Questionnaire-9 (PHQ9) questionnaire. Patient reported weired dreams recently and, hence, introduced patient to the Mental Health social worker for definitive management.
2. Vitamin B12 deficiency. The patient received vitamin B12 injection at the clinic, and we agreed to take on a once-a-week basis for a total of 18 more injections.
3. Vitamin D deficiency. As the patient did not have any financial obligation, gave not only ergocalciferol but also cholecalciferol through the Veterans Affairs (VA).
4. Patient consistently refusing preventive vaccines of influenza (flu) and pneumonia, colorectal cancer screening. Patient is refusing also treatment for diabetes mellitus type 2 and dyslipidemia. Offered patient to get started on aspirin for stroke and heart protection, which was also refused by the patient. Patient to be followed up as needed.

LOCAL TITLE: MHS-GENERAL NOTE (NON-S.O.A.P.)
STANDARD TITLE: MENTAL HEALTH NOTE
DATE OF NOTE: OCT 24, 2012@10:54 ENTRY DATE: OCT 24, 2012@10:54:35
AUTHOR: HARRIS,HEATHER R EXP COSIGNER:
INSTITUTION: AMARILLO HCS
DIVISION: VAMC AMARILLO
URGENCY: STATUS: COMPLETED

Mr. Hopkins was referred for individual counseling by Rosalinda Barrera, LMSW. Veteran had a full intake on 9/20/12. Mr. Hopkins stated his main concern is that he is "tired of being tired." He reports waking up tired and not having energy throughout the day. He stated he doesn't have any difficulty falling asleep but he does wake up several times throughout the night. He reports he wakes up because he is snoring or quits breathing. Per Mr. Hopkins, his wife has also commented on his snoring. Discussed sleep hygiene techniques which veteran feels he is already doing. He denied any nightmares or waking due to dreams.

Mr. Hopkins denied feeling depressed, down, or hopeless. He does report some issues with motivation. He feels that he has reached all of the goals he has set for himself and doesn't have any goals he wants to work on. He has started a new project after talking to a social worker in primary care. Mr. Hopkins is skeptical of medication and prefers holistic/natural remedies to health concerns.

Discussed counseling options and he declined counseling at this time. He would like a referral for a sleep study to rule out sleep apnea. He believes his sleep issues are "mechanical." Will forward this request to his primary care provider.

Impressions:
Appearance: dress appropriately with good hygiene
Behavior: Appropriate.
Speech: normal rate and volume
Mood: "good"
Affects: euthymic
Thought processes: coherent and logic.
Thought content: No delusion.
Suicidal ideation: thoughts, no plan or intent
Homicidal ideation: No
Cognition: alert and oriented.
Insight: good.
Judgment: good

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Plan: Gave veteran clinic contact information should he desire counseling services in the future. Will forward request for sleep study to primary care provider.

09/20/12 MHS-INITIAL BIOPSYCHOSOCIAL ASSESSMENT(T):
xxxAge:69
SERVICE CONNECTION:SERVICE CONNECTED % - 70 GENDER:MALE RACE: WHITE
MARITAL STATUS: Married.

CLINICAL HISTORY

PRESENTING CHIEF COMPLAINT/REFERRAL QUESTION:
Veteran was referred by primary care. He is complaining of tiredness/lethargy. He has noticed within the last 6 months a lack of energy. He says he has lived out every dream he has ever had and now life is boring. He spoke with Rita Sandoval last week who recommended that he come up with some new goals/dreams and he has done that. He has started on a new project which he says he enjoys and has energy while doing that but when he is not working on it he feels tired. His grand idea is to "build the world's largest railroad museum". He figures he "might as well go big or go home".

He also has some trouble sleeping, will wake up feeling just as tired as when he went to bed, not feeling rested and has started taking naps during the day. He is unsure of why he is feeling this way. He feels his PCP has not been very

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

helpful in finding out the cause if it is medical so he is willing to try and figure out the reason for the symptoms if they may be mental health related.

HISTORY OF CURRENT ILLNESS:
Veteran reports symptoms for the last 6 months.

PAST PSYCHIATRIC HISTORY:
None

CURRENT AND HISTORY OF SUICIDAL ACTS AND SELF HARM
None
Passive thoughts but denies any plan or intent. Occasionally thinks "why live the
rest of my life like this". He has recently developed a faith in God and says that would be disappointing to God so he would never do that.

CURRENT AND HISTORY OF VIOLENCE/ASSUALTING OTHERS:
None

SUBSTANCE USE HISTORY TO INCLUDE PAST TREATMENT, RELAPSE HISTORY, AND RESPONSE TO TREATMENT:
Former alcoholic. Has been sober since 1972. He went to a rehab program. He says he did not know he had a drinking problem, it was just a way of life until he started having medical problems with his liver and kidneys.

MENTAL ILLNESS AND SUBSTANCE ABUSE IN FAMILY MEMBERS:
Nonveteran does not know much about his family.

PSYCHOSOCIAL HISTORY:

Childhood/Developmental History: Veteran grew up all over the US. His family were migrant farm workers so they
followed the crops. He was raised by both parents until age 12 when he was on his own after that. He had gotten a job and lied about his age and left his family behind to work that job. His family took off on to the next job and he never saw them again. He says he found his mother 35 years later and helped care for her until she died. He had two brothers. They have both passed.

He says his father was married 7 times and he has brothers and sisters he does not know. He has multiple half siblings.

Physical, sexual and emotional trauma:
None

Family Circumstances: Veterans mother in law recently went under surgery for a hysterectomy and woke
up mentally "messed up". The anesthesia affected her brain.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Adult Relationship History: Veterans wife teaches health and wellness. He and his wife have a 9 year old daughter that they are raising.

Current significant family and/or peer group relationships:
Veteran was married once before. He currently has been married 10 years. He had 5 children in his first marriage whom he remains close with. He says they all turned out good and he is proud of them. He and his wife have a 9 yr old daughter together. His current wife did not have any kids or married before so they had one together. They are looking at adopting more children or providing foster care for teenagers. Veteran loves to travel. He says he has had "lots of windshield time".

MILITARY HISTORY:
Branch:
US Air Force, Air Force guard and reserve for a total of 32 years. He received disability retirement. He had a bad car wreck and was forced to retire due to medical issues that left him unable to fly anymore. He spent 24 years on the same plane. The wreck happened while on duty so he now gets SC disability.

He has been all over the world and was deployed to multiple places.

Veteran's perception of most distressing events while in the military:

MEDICAL INFORMATION

CURRENT AND PAST MEDICAL PROBLEMS:
Active problems - Computerized Problem List is the source for the following:

1. Chronic Back Pain
2. Hyperlipidemia *
3. Microscopic Hematuria
4. Diabetes Mellitus without mention of Complication, type II or unspecified ty
5. Depression *
6. Vitamin D Deficiency
7. Vitamin B 12 Deficiency

Are there any new medical problems to report?

CURRENT MEDICATIONS:
Active Outpatient Medications (including Supplies):

	Active Outpatient Medications	Status
1)	CHOLECALCIFEROL 1000IU TAB (OTC) TAKE TWO TABLETS BY MOUTH EVERY DAY VIT D	ACTIVE
2)	CYANOCOBALAMIN 1000MCG/ML INJ, (PER ML) INJECT 1000MCG (1ML) INTRAMUSCULAR EVERY 7 DAYS VIT B12	ACTIVE

  details: normal forgetfulness

FUND OF KNOWLEDGE
    Above Average
MENTAL STATUS COMMENTS:

Needs Assessment:
Education and Learning Needs Assessment

Educational Background:

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Highest grade achieved: less than high school with GED8th grade then GED

Educational/learning difficulties: no known educational learning disability

Attitudes toward learning: not interested in academic achievement

Assessment of primary language spoken in the home and veteran's preference of language for clinical communication: English

Legal Status Screening:
Is there evidence from the interview that the veteran has legal issues or concerns that would warrant a more in-depth assessment?
No. No further assessment indicated.
Housing and Income Assessment:
Do you currently have a stable place to live?
Yes
What is your current income and sources of income?
$0 per month
Sources:

Nutritional Status Screening:
Is there evidence from the interview that the veteran has nutritional issues or concerns (including weight gain or loss of more than 5% in last 3 months or 10% in last year, dietary concerns, eating disorder signs or symptoms) that would warrant a more in-depth assessment?
No. No further assessment indicated.

Screening for Abuse, Neglect, or Exploitation:
Is there any evidence from the interview that the veteran is a victim of physical assault, rape, sexual molestation, domestic abuse, elder neglect or abuse, or other serious abuse or exploitation?
No. No further assessment indicated.

Screening for Bereavement Issues:
Is there evidence from the interview that the veteran is actively suffering from bereavement issues?
No. No further assessment indicated.

Screening for Vocational Needs Assessment:
Is there evidence from the interview that the veteran has any vocational deficits or needs?
No. No further assessment indicated.

Spiritual and Religious Orientation: Personal spiritual beliefs but does not attend organized religious activities

INITIAL DSM-IV DIAGNOSES:
Axis I Clinical Disorder:
Depressive Disorder: NOS (Not Otherwise Specified)
General Categories None
Axis II Personality Disorders/Traits:
None
Axis III Current Medical Conditions: See Medical History above
Axis IV Current Psychosocial Stressors:
None

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Axis V GAF Score (current level of functioning): 60-65
(past year level of functioning):

SUMMARY AND FORMULATION: This is a 69 yr old 70%SC Vietnam era veteran who was referred by primary care. He is reporting symptoms of lethargy and trouble sleeping. He is unsure if the cause of the problem is medical or mental so he is wanting to be evaluated and try therapy here in the mental health clinic. He denied any SI/HI today.

Preliminary Treatment Plan:
-The veteran was given social workers business card along with clinic numbers and the crisis hotline number
-The veteran was educated on all emergency procedures
-He will be referred for therapy

Patient does not desire to have family members, significant others, or advocates to participate in patient chart.

None

Family Circumstances: Veterans mother in law recently went under surgery for a hysterectomy and woke
up mentally "messed up". The anesthesia affected her brain.

Adult Relationship History: Veterans wife teaches health and wellness. He and his wife have a 9 year old daughter that they are raising.

Current significant family and/or peer group relationships:
Veteran was married once before. He currently has been married 10 years. He had 5 children in his first marriage whom he remains close with. He says they all turned out good and he is proud of them. He and his wife have a 9 yr old daughter together. His current wife did not have any kids or married before so they had one together. They are looking at adopting more children or providing foster care for teenagers. Veteran loves to travel. He says he has had "lots of windshield time".

MILITARY HISTORY:
Branch:
US Air Force, Air Force guard and reserve for a total of 32 years. He received disability retirement. He had a bad car wreck and was forced to retire due to medical issues that left him unable to fly anymore. He spent 24 years on the same plane. The wreck happened while on duty so he now gets SC disability.

He has been all over the world and was deployed to multiple places.

Veteran's perception of most distressing events while in the military:

Depressive Disorder: NOS (Not Otherwise Specified)
General Categories None
Axis II Personality Disorders/Traits:
None
Axis III Current Medical Conditions: See Medical History above
Axis IV Current Psychosocial Stressors:
None

Axis V GAF Score (current level of functioning): 60-65
(past year level of functioning):

SUMMARY AND FORMULATION: This is a 69 yr old 70%SC Vietnam era veteran who was referred by primary care. He is reporting symptoms of lethargy and trouble sleeping. He is unsure if the cause of the problem is medical or mental so he is wanting to be evaluated and try therapy here in the mental health clinic. He denied any SI/HI today.

Preliminary Treatment Plan:
-The veteran was given social workers business card along with clinic numbers and the crisis hotline number
-The veteran was educated on all emergency procedures
-He will be referred for therapy

Patient does not desire to have family members, significant others, or advocates to participate in patient chart.

09/20/12 MHS-INITIAL BIOPSYCHOSOCIAL ASSESSMENT(T):
xxxAge:69
SERVICE CONNECTION:SERVICE CONNECTED % - 70 GENDER:MALE RACE: WHITE
MARITAL STATUS: Married.

CLINICAL HISTORY

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

PRESENTING CHIEF COMPLAINT/REFERRAL QUESTION:
Veteran was referred by primary care. He is complaining of tiredness/lethargy. He has noticed within the last 6 months a lack of energy. He says he has lived out every dream he has ever had and now life is boring. He spoke with Rita Sandoval last week who recommended that he come up with some new goals/dreams and he has done that. He has started on a new project which he says he enjoys and has energy while doing that but when he is not working on it he feels tired. His grand idea is to "build the world's largest railroad museum". He figures he "might as well go big or go home".

He also has some trouble sleeping, will wake up feeling just as tired as when he went to bed, not feeling rested and has started taking naps during the day. He is unsure of why he is feeling this way. He feels his PCP has not been very helpful in finding out the cause if it is medical so he is willing to try and figure out the reason for the symptoms if they may be mental health related.

HISTORY OF CURRENT ILLNESS:
Veteran reports symptoms for the last 6 months.

PAST PSYCHIATRIC HISTORY:
None

CURRENT AND HISTORY OF SUICIDAL ACTS AND SELF HARM
None
Passive thoughts but denies any plan or intent. Occasionally thinks "why live the
rest of my life like this". He has recently developed a faith in God and says that would be disappointing to God so he would never do that.

CURRENT AND HISTORY OF VIOLENCE/ASSUALTING OTHERS:
None

SUBSTANCE USE HISTORY TO INCLUDE PAST TREATMENT, RELAPSE HISTORY, AND RESPONSE TO TREATMENT:
Former alcoholic. Has been sober since 1972. He went to a rehab program. He says he did not know he had a drinking problem, it was just a way of life until he started having medical problems with his liver and kidneys.

MENTAL ILLNESS AND SUBSTANCE ABUSE IN FAMILY MEMBERS:
Nonveteran does not know much about his family.

PSYCHOSOCIAL HISTORY:

Childhood/Developmental History: Veteran grew up all over the US. His family were migrant farm workers so they
followed the crops. He was raised by both parents until age 12 when he was on his own after that. He had gotten a job and lied about his age and left his family behind to work that job. His family took off on to the next job and he

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

never saw them again. He says he found his mother 35 years later and helped care for her until she died. He had two brothers. They have both passed.

He says his father was married 7 times and he has brothers and sisters he does not know. He has multiple half siblings.

Physical, sexual and emotional trauma:
None

Family Circumstances: Veterans mother in law recently went under surgery for a hysterectomy and woke
up mentally "messed up". The anesthesia affected her brain.

Adult Relationship History: Veterans wife teaches health and wellness. He and his wife have a 9 year old daughter that they are raising.

Current significant family and/or peer group relationships:
Veteran was married once before. He currently has been married 10 years. He had 5 children in his first marriage whom he remains close with. He says they all turned out good and he is proud of them. He and his wife have a 9 yr old daughter together. His current wife did not have any kids or married before so they had one together. They are looking at adopting more children or providing foster care for teenagers. Veteran loves to travel. He says he has had "lots of windshield time".

SUICIDE RISK ASSESSMENT

SADPERSONS 10-POINT SUICIDE RISK ASSESSMENT

Each letter represents one risk factor and one point. The scale emphasizes long term risk. High scores may occur due to demographic risk factors in the absence of imminent suicidal ideation or intent. The scale does not correct for mitigating factors such as investment in family, treatment, or religious beliefs.

S (gender)	M = 1 Fem = 0	1
A (age)	>65 = 1 <65 = 0	1
D (depression)	Yes = 1 No = 0	1
P (prev attempt)	Yes = 1 No = 0	0
E (EtOH excess)	Yes = 1 No = 0	0
R (Irrational)	Yes = 1 No = 0	0
S (low social support)	Yes = 1 No = 0	0
O (organized plan)	Yes = 1 No = 0	0
N (no spouse)	Yes = 1 No = 0	0
S (serious sickness)	Yes = 1 No = 0	0
	TOTAL SCORE:	3

Interpretation: 0-2="no" risk; 3-4=low risk; 5-6=moderate risk; 7-10=high risk

Additional Suicide Risk Assessment

1. CURRENT IDEATION, INTENT and PLAN
The patient denies having current thoughts or plans of harming self.

2. RISK FACTORS:

Is Male gender, Does have some signs of depression, Has chronic pain syndrome

3. PROTECTIVE FACTORS:

Veteran has significant attachments to a family member, dependent, friend, pet, or other, Has some family and friend social support, Has cultural or religious beliefs deterring suicide, Shows capacity to make treatment alliance, Is concerned about self and family , Is future oriented

4. CLINICIAN'S OVERALL IMPRESSION

Based on risk factors and protective factors and my interview and history, it is my opinion that this patient :

Is not at imminent danger to self at this time , Is appropriate for continued outpatient management

5. Interventions and Follow-up

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

National VA suicide prevention hotline was provided: 1-800-273-TALK 1-800-273-8255)., The patient was advised on how to reach this clinic at numbers provided or go to our emergency department at any time.

INSTITUTION: AMARILLO HCS
DIVISION: VAMC AMARILLO
URGENCY: STATUS: COMPLETED

SESSION DURATION: 90 Minutes
TYPE: Individual/warm hand off
REFERRING PCP: Dr. Kadakia
REASON FOR REFERRAL: Veteran voicing depressive symptoms.
BEHAVIORAL HEALTH PROVIDER ROLE EXPLAINED: Yes
SESSION FOCUS: This is a 69 year old Veteran who is 30% SC for Depressive disorder. Veteran indicates that he has been feeling very tired lately, voices being "tired of living". Veteran states that he experiences very poor sleep and indicates that he had been diagnosed with sleep apnea, but does not use a CPAP machine. He states that for the last 3 months he has just been feeling "down" and "tired", no real interest in anything. Veteran begins to describe a very full and productive life during which he states that he has been very successful. States that he has done everything he has ever wanted to do. He feels that he has no further interests to pursue, he "has done it all" and "well", he has no further "passion" to pursue.
MSE:
Appearance: dress appropriately with good hygiene
Behavior: Appropriate.
Speech: normal rate and volume
Mood: mildly depressed
Affects: congruent with mood
Thought processes: coherent and logic.
Thought content: No delusion.
Suicidal ideation: thoughts, no plan or intent
Homicidal ideation: No
Cognition: alert and oriented.
Insight: good.
Judgment: Appropriate
INTERVENTIONS: Supportive counseling provided to the Veteran. We also discussed treatment options for his consideration which included referral for full assessment and medication evaluation and counseling in the mental health clinic or management of symptoms and counseling in the primary care setting. Cognitive Strategies utilized in this session include: identifying dysfunctional thinking, generating alternatives to ineffective thought processes and alteration of negative cognitions. Veteran was allowed to discuss the current issues, problem solving was used, also utilized life review and exploration of possible avenues for the Veteran to consider. Veteran and worker did discuss treatment options, however, he was not currently open to medication management and declined

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

referral for counseling. Session was unusually lengthy, but at the end of the session, Veteran was appreciative and did state that he had felt a spark of enthusiasm at the thought of future ventures that he could consider.
DIAGNOSTIC IMPRESSION: Hx of MDD, Adjustment disorder with depression.
LETHALITY: Today, Aug. 23,2012, the patient denied suicidal or aggressive ideation or plans. There were no indications, signs, or symptoms to indicate imminent danger. The Veteran and this worker did have a lengthy discussion about his comment about being ready to die. Veteran admits to thoughts of suicide in the past, but assures me that he has not now or then a plan or intent to actually do anything to hurt himself.
FOLLOW-UP: To be followed in Primary Care
PLAN:
1. Veteran declined referral to the mental health clinic for assessment and evaluation of medication management.
2. Instructed to call this mental health counselor for questions or concerns, if symptoms worsen.
3. Patient has the 24H VA Hotline suicide phone crisis number (1-

PATIENT NAME: HOPKINS, MARSHALL H

DATE: 04/05/2012

SUBJECTIVE: The patient follows up at 11 months for a routine checkup with the laboratory. Previous primary care physician was Dr. Burns. At the current interview, the patient did not have any new issues to discuss. All he wanted was a physical examination. Suggested that his chronic issues with back pain, neck pain, fibromyalgia, but all his complaints are managed by diet and he does not expect to be on any medications, but was interested in knowing his lab results.

PAST MEDICAL HISTORY: Significant for chronic back pain, dyslipidemia, microscopic hematuria and diabetes mellitus type 2.

CURRENT MEDICATIONS: None.

ALLERGIES: Patient is not known to have allergy to prescription medications.

REVIEW OF SYMPTOMS: Negative for most systems.

PHYSICAL EXAMINATION:
VITAL SIGNS: Temperature 97.5, pulse 61, respiratory rate is 18, blood pressure 140/85, weight is 201 pounds. Pulse oximetry 96% on room air. BMI is 27.
GENERAL: Alert, oriented x3, cooperative, in no acute distress.
HEENT: Head normal. Pupils equally reacting to the light. Conjunctivae pink. Tympanic membranes could not be seen because of the wax in both ear canals.
NOSE: Mucosa normal. Oropharynx mucosa normal.
CHEST: Lungs CTAP. No wheezes, no rales, no rhonchi.
HEART: Rhythm regular. S1, S2 normal. No murmur.
ABDOMEN: Soft and nontender. Bowel sounds heard.
EXTREMITIES: Pulses 2+. No pedal edema.
GENITOURINARY: Digital rectal examination done. Prostate minimally enlarged, bilobed, firm in consistency, smooth in contour. No nodularity, nontender.
NEUROLOGIC: Cranial nerves normal. Strength 5/5. Balance and gait normal. Sensation preserved. The patient has got an evidence of Athlete's foot in the form of macerated skin within the fourth and the fifth the toe web spaces of both the feet.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

LABORATORY DATA: The lab done today showed elevated LDL cholesterol of 131 and elevated A1c 8.1.

ASSESSMENT AND PLAN:
1. Dyslipidemia. Patient refuses to get started on any pharmacotherapy.
2. Elevated hemoglobin A1c, uncontrolled diabetes mellitus type 2. The patient does not want to get started on any pharmacotherapy. Dietary education provided regarding the need to go on a low-carb diet and eat a healthy protein in the form of either vegetable proteins consisting of beans and an animal protein consisting of chicken, turkey, and fish. The patient verbalized understanding.
3. Both ear wax. Both ears were lavaged at the clinic at the current interview.
4. Patient has been consistently refusing colorectal cancer screening, diabetic eye examination and pneumonia vaccine, and Fu vaccine.

The patient elected to have followup annually with the laboratory or earlier if needed.

URGENCY: STATUS: COMPLETED

Depression Screening:
PHQ-2
A PHQ-2 screen was performed. The score was 0 which is a negative screen for depression.

1. Little interest or pleasure in doing things
Not at all

2. Feeling down, depressed, or hopeless
Not at all
Alcohol Screening:
AUDC (Mental Health Instrument)
An alcohol screening test (AUDIT-C) was negative (score=0).

1. How often did you have a drink containing alcohol in the past year?
Never

2. How many drinks containing alcohol did you have on a typical day

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

when you were drinking in the past year?
Response not required due to responses to other questions.

3. How often did you have six or more drinks on one occasion in the past year?
Response not required due to responses to other questions.

Influenza Immunization:
Patient refused the influenza vaccine. Patient was advised of risks and benefits of influenza vaccine.

PNEUMOCOCCAL VACCINE-NURSE:
Patient declines Pneumococcal Vaccine.

Tetanus Reminder:
Patient refused Tetanus immunization.

Tobacco Use Screen:
Patient states they are a former tobacco user but has quit more than 12 months ago.
Meds offered, patient declined further treatment.

ELEVATED BP >140/90:
Blood Pressure taken at this visit.
B/P: 140/85
Patient is not on blood pressure medication.
Patient does not have a blood pressure cuff at home.
Patient can demonstrate/voice appropriate placement of cuff.

MINI-COGNITIVE IMPAIRMENT SCREENING:
Give 1 point for each recalled word after the CDT distracter.

Score=3 (0-3 for recall).

Give 2 points for a normal CDT, and 0 points for an abnormal CDT. The CDT is considered normal if all numbers are depicted, once each, in the correct sequence and position, and the hands readably display the requested time.

Score=2 (0 or 2 for CDT).

Total Score=5 (Add the word recall and CDT scores together to get the Mini-Cog Score).
Patient tested negative in the screen for cognitive impairment.

     URGENCY: STATUS: COMPLETED

Per PCP request, contacted pt to discuss hyperlipidemia and diabetes. Pt states
that he normally follows a very healthy diet but "fell off the wagon" the last
few weeks. He does not believe he has diabetes and states that he and his wife
do not believe in taking medications; they are into natural foods and herbals.
Discussed that A1c is a 90 day average of blood glucose. Pt would like to
repeat lab work in 3 months. Also, mentioned glucometer; pt indicated that his

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

wife may have a meter that he can use (was given to them by someone who was a diabetic and was able to discontinue medication). Pt also states that he usually has blood in his urine during most of his physicals. Transferred pt to TA to make appt in 3 months.

05/17/2011 ADDENDUM STATUS: COMPLETED
Per PCP request, contacted pt to discuss hyperlipidemia and diabetes. Pt states that he normally follows a very healthy diet but "fell off the wagon" the last few weeks. He does not believe he has diabetes and states that he and his wife do not believe in taking medications; they are into natural foods and herbals. Discussed that A1c is a 90 day average of blood glucose. Pt would like to repeat lab work in 3 months. Also, mentioned glucometer; pt indicated that his wife may have a meter that he can use (was given to them by someone who was a diabetic and was able to discontinue medication). Pt also states that he usually has blood in his urine during most of his physicals. Transferred pt to TA to make appt in 3 months.

05/17/2011 ADDENDUM   STATUS: COMPLETED
As discussed in the visit last Friday he DOES have diabetes based on his ^ FBS
and HbgA1c of 8.5%.He needs to restrict his carbohydrate intake, exercise daily,
and start meds as rx incld. metformin 500mg bid and his cholesterol is too high
for a diabetic so will rx pravastatin 40mg daily at bedtime.

05/17/2011 ADDENDUM   STATUS: COMPLETED
Per PCP request, contacted pt to discuss hyperlipidemia and diabetes. Pt states
that he normally follows a very healthy diet but "fell off the wagon" the last
few weeks. He does not believe he has diabetes and states that he and his wife
do not believe in taking medications; they are into natural foods and herbals.
Discussed that A1c is a 90 day average of blood glucose. Pt would like to

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

repeat lab work in 3 months. Also, mentioned glucometer; pt indicated that his wife may have a meter that he can use (was given to them by someone who was a diabetic and was able to discontinue medication). Pt also states that he usually has blood in his urine during most of his physicals. Transferred pt to TA to make appt in 3 months.

--- Original Document ---

10/05/10 CARDIOLOGY - OUTPATIENT (C):

PATIENT NAME: HOPKINS, MARSHALL H

DATE: 10/05/2010

DATE OF BIRTH: 07/20/1943

CHIEF COMPLAINT: Complaints of chest discomfort.

PAST MEDICAL HISTORY: The patient has no known coronary artery disease. He reports possible TIAs in the mid-1990s. He has a history of obesity. He has lost 100 pounds over the past several years. He also has dyslipidemia.

SUBJECTIVE: The patient reports about a month ago he was in his work area when he began to have a painful heaviness from the left mid-axilla to the right mid-axilla, across the chest wall and what appears to have gathered in the center of the chest. He states this again happened 2 days later, and again described it as feeling "constrict ed." What he has reported to me is that this lasted for several seconds and then disappeared. What he reported to his primary care provider is that it lasted several minutes. The patient is unable to recall exactly what he was doing or exactly how long this episode lasted. These have not occurred since, and he has been relatively active. He states he breaths okay except for at night he gets "stopped up a little bit." He has had some dizziness after standing, but is dealing with that. No feelings of palpitations . No syncope. No swelling of extremities. No tobacco or alcohol use. He stays active. He follows a very strict regimen and diet. His wife is a natural herbalist. He is on absolutely no medications, and is a very strong believer in homeopathic teachings.

OBJECTIVE: Vital signs: Temperature 98.3, pulse 78,

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

respirations 16, blood pressure 139/95 which is elevated from previous blood pressures, height 72 inches, weigh t 206 pounds, pulse oximetry 96% on room air.

General: This is a very pleasant gentleman who comes to the clinic ambulatory in no acute distress.
Neurological: Speech clear and appropriate. Follows commands. Alert and oriented to person, time, and place. Has strong and equal hand grips.
Neck: No carotid bruit appreciated. No JVD.
Lungs : Clear.
Heart: S1, S2 auscultated with a possible S1 splitting. No murmurs. No pain upon palpation of the chest wall. No rubs.
Abdomen: Nontender. Bowel sounds present.
Periphery: No pedal edema.

MEDICATIONS: None.

LABORATORY AND TESTS: The patient's EKG today shows a sinus rhythm with a first degree AV block, rate is 72. A lipid panel shows a total cholesterol of 188, LDL 120, HDL 30 and triglycerides 160.

ASSESSMENT:
1. Chest pain.
2. Dyslipidemia.

PLAN: Of course, there will be no addition of medication for this patient as he does not feel that he is treated appropriately with medications. This brings its own set of unique circum stances to this patient's presentation. His complaints of chest heaviness or "constriction" is compelling for ischemic heart disease. However, he has not been able to bring on these episodes since. He has an elevated blood pressure today, although it does not appear that it is chronic. His cholesterol levels are not at goal. However, he is of course not interested in any kind of statin. I have talked to him at length about the process should he have a stress test and should that stress test be positive. He would then be recommended for a left heart catheterization, which would require Plavix should he have an intervention. I have gone to explain that should he be found to have ischemic heart disease he would have to take Plavix for at least 1 year and other medications would be strongly recommended. I have also explained that there is a potential for bypass. He has verbalized understanding and is interested in having the stress test. He is also interested in having another lipid panel the day of that stress test to see if his wife will be able to help increase his HDL in the next month. I have encouraged appropriate routine exercise. I have also stressed when he should report to the Emergency Room, and he has verbalized understanding of that. We will follow him as appropriate.

Signature Informed Consent for
HEART - STRESS TEST EXERCISE MPI (EXERCISE STRESS TEST WITH MYOCARDIAL PERFUSION IMAGING)
1. Anatomical Location: See description of treatment/procedure.
2. Informed consent was obtained at 11:52 AM on November 19, 2010.
The full consent document can be accessed through Vista Imaging.
3. Patient name: HOPKINS, MARSHALL HUGH
4. The patient HAS decision-making capacity.
5. Surrogate (if applicable):
6. Condition or diagnosis: Your doctor has requested a cardiac (heart) scan to determine whether there are any important blockages in your coronary arteries (the blood vessels that feed the heart muscle). This could lead to reduced oxygen supply to part of the heart muscle.
7. Treatment/procedure: The purpose of this test is to evaluate the heart's blood supply and function during a controlled period of increasingly strenuous exercise, using a motor-driven treadmill or exercise bike.
During this procedure an IV will be inserted into the patient's arm. The patient will be connected to an electrocardiogram or ECG machine (test that records the electrical activity of the heart) to monitor the heart. The patient first starts out exercising at a slow pace, but will progressively increase effort.
As the patient exercises, heart function, as well as blood pressure, is monitored continuously. Exercise is stopped when the patient becomes fatigued, develops chest pain, reaches a target heart rate,

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

or at any time that monitoring personnel become concerned for patient safety. Once the desired level of exercise is achieved, the patient will be injected with a small amount of radioactive tracer. During and after the stress test the patient's heart and blood pressure will be frequently monitored. After a period of time, the patient will be placed under a camera and images of the heart will be obtained.

8. It is not expected that an anesthesia practitioner will be involved in this treatment/procedure.
9. Consent to Blood Products (if applicable):
It is not expected that blood products will be used in this treatment/procedure.
10. Practitioner obtaining consent: Allison,Walter M (MEDICAL DOCTOR)
11. Supervising practitioner:
12. Practitioner(s) performing or supervising treatment/procedure (if not listed above):
13. Witness Name: VIRGINIA GREEN

14. Comments:
In certain circumstances, the presence of a vendor representative (company representative) is important to the success of the procedure. Prior to the procedure the representative will sign an agreement to strictly adhere to VA's privacy rules. The representative may provide technical advice but will not physically participate in the procedure. The representative will be closely monitored by the VA treatment team.

URGENCY: STATUS: COMPLETED

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

PATIENT NAME: HOPKINS, MARSHALL H

DATE: 11/19/2010

PROCEDURE: Treadmill Cardiolite.

Resting EKG reveals nonspecific ST-T changes. During exercise, the T-waves become more inverted, but there is no pronounced ST depression. There is an occasional PVC and PAC.

Post exercise, again occasional PVC and PAC. The T-waves turn upright when the heart rate goes up, but there again is no ST segment shift of significance.

The patient walked on the treadmill for 7 minutes and 21 seconds, achieved a heart rate of 155. Heart rate stated by the computer of 171 is incorrect. Although he did achieve greater than 85% of his MPHR.

CONCLUSION:
1. No reproduction of symptoms.
2. Occasional premature ventricular contractions (PVC) and premature atrial complex (PAC).
3. ST-T changes as described above but no classic ischemia.
4. See image report.

--- Original Document ---

08/26/10 AMBULATORY CARE NOTE:

PATIENT NAME: Hopkins, Marshall

CHIEF COMPLAINT: This is a 67-year-old veteran presenting for an annual visit. He takes no medications.

SUBJECTIVE: He continues to use supplements and herbals for all of his needs. At this visit though he is complaining that he has experienced 2 episodes in the last month of chest pain and pressure running from one axilla to the other. He states that it felt like "a pulled muscle." It lasted for several minutes and he did have some lightheadedness associated with this, but denies any nausea, vomiting, or diaphoresis. Each episode is associated with mild exertion. He denies any episodes at rest.

PAST MEDICAL HISTORY: Significant for:
1. Motor vehicle accident in 1991 with neck and back injuries.
2. Fibromyalgia.
3. Tic to the right side of the face.
4. Hyperlipidemia.

ALLERGIES: No known allergies.

IMMUNIZATIONS: He takes none.

REVIEW OF SYSTEMS: Chest pain with chest pressure, 2 episodes within the past month with mild exertion. Pain reaching from the axilla to axilla and associated also with chest pressure and some lightheadedness. He denies any diaphoresis, syncope, and no peripheral or pedal edema. He also denies any changes with bowel or bladder habits. No diarrhea, constipation, melena, or abdominal pain. No changes with urination. No urgency, hesitancy. Nocturia is once per night, but he denies any dysuria or hematuria. His appetite remains robust. He denies any nausea, vomiting, or epigastric upset. He denies any problems with range of motion. He has some impairment to his back and his neck due to previous motor vehicle accident for which he continues to receive some chiropractic care. He denies any mood changes, anxiety, or depression.

OBJECTIVE:
VITAL SIGNS: Blood pressure is 112/60, pulse 56, respirations 16, temperature is 96.1. Weight 201.
GENERAL: He is alert, awake, and in no apparent distress.
HEENT: EOM's are intact. PERRL. TMs are gray and intact. Oropharynx is moist and pink. No lesions.
NECK: Supple. Trachea is midline. No thyromegaly, JVD, or

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

bruit.
CARDIOVASCULAR: Regular rate and rhythm. S1, S2. No gallops, murmurs, or rubs. I possibly hear a split.
RESPIRATORY: Clear to auscultation bilaterally. No rales, rhonchi, or wheezing.
ABDOMEN: Soft, nontender, and nondistended. Positive bowel sounds. No organomegaly is noted.
GU: Deferred per request.
MUSCULOSKELETAL: Fast range of motion in the upper and lower extremities. Pedal pulses are 2+ and equal. No pedal edema.

ASSESSMENT/PLAN:
1. Chest pain; submit for Cardiology consult. He is instructed that if the episodes do occur again he should present himself to the Emergency Department. He verbalizes understanding.
2. Hyperlipidemia; pending lab results. He takes no medications at this time. We will advise fish oil 2000 to 3000 mg daily.
3. Chronic neck and back pain; he does continue to seek care with chiropractic and also has continued pursuing care through the VA as well.
4. Fibromyalgia; stable.
5. I discussed the above examination with the gentleman and he will be notified of his Cardiology consult. He continues to take no medications, relying on supplements and herbals. He will be notified of his lab results when completed. He will be seen again as necessary and for his annual appointment.

3. Chronic neck and back pain; he does continue to seek care with chiropractic and also has continued pursuing care through the VA as well.
4. Fibromyalgia; stable.
5. I discussed the above examination with the gentleman and he will be notified of his Cardiology consult. He continues to take no medications, relying on supplements and herbals. He will be notified of his lab results when completed. He will be seen again as necessary and for his annual appointment.

Exercise Screening:

Yes--Are you physically active, exercise 3 times a week 20-30 min.

Weight/Nutrition Screening:

Yes Does your diet contain more fruit, grain, and vegetables than meats?
No Have you had your stool checked for blood in the last year?

Miscellaneous:

No 1. Have you had a flex sig by an outside provider or at the Amarillo VA within the last 5 years?
No 2. Have you had a colonoscopy by an outside provider or at the Amarillo VA within the last 10 years?
No 3. Do you have an advance directive or living will?
No 4. Do you take an aspirin daily?

Depression Screening:

PHQ-2

A PHQ-2 screen was performed. The score was 1 which is a negative screen for depression.

1. Little interest or pleasure in doing things
Not at all

2. Feeling down, depressed, or hopeless
Several days

Alcohol Screening:

AUDC (Mental Health Instrument)

An alcohol screening test (AUDIT-C) was negative (score=0).

1. How often did you have a drink containing alcohol in the past year?
Never

2. How many drinks containing alcohol did you have on a typical day when you were drinking in the past year?
Response not required due to responses to other questions.

3. How often did you have six or more drinks on one occasion in the past year?
Response not required due to responses to other questions.

Influenza Immunization:

Patient states he/she did not get a flu shot during the latest flu season.

Tetanus Reminder:

Patient refused Tetanus immunization.

Tobacco Use Screen:

Patient states they are a former tobacco user but has quit more than 12 months ago.

Influenza H1N1 Vaccine:

The patient declines to be vaccinated for Influenza H1N1.

MINI-COGNITIVE IMPAIRMENT SCREENING:

Give 1 point for each recalled word after the CDT distracter.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Score=3 (0-3 for recall).

Give 2 points for a normal CDT, and 0 points for an abnormal CDT. The CDT is considered normal if all numbers are depicted, once each, in the correct sequence and position, and the hands readably display the requested time.

Score=2 (0 or 2 for CDT).

Total Score=5 (Add the word recall and CDT scores together to get the Mini-Cog Score).
Patient tested negative in the screen for cognitive impairment.

AUTHOR: WATTS-HARKNESS,KATH EXP COSIGNER:
INSTITUTION: ZZ-LIBERAL KANSAS CBOC
DIVISION: VACBC LIBERAL
URGENCY: STATUS: COMPLETED

PATIENT NAME: HOPKINS,MARSHALL

CHIEF COMPLAINT: This is a 66-year-old gentleman presenting to the clinic with inquiry as to if the VA is going to approve his chiropractic treatments that he has been receiving and paying on his own for the past for approximately ten years due to a motor vehicle accident he was in in which he was rear-ended while he was working on duty in Colorado Springs, Colorado. He continues to complain of neck and back pain. He states that he has had difficulty over the past several months with his neck, in particular due to sleeping on some motel beds that placed his neck in misalignment. He states he had received chiropractic treatment from Dr. Buckley in Garden City, Kansas, but he states that in the past month now he has felt that his neck is becoming out of alignment again and wishes to have another treatment, but for the VA to pick this up. This gentleman has undergone the Amarillo VA and Case Management review of his medical records and some documentation to determine whether he had any cervical subluxation. Most recent x-ray reports said that subluxation was not present and that neck injuries were chronic in nature. Therefore, the VA could not cover any outside chiropractic treatments. His x-ray reports did show, though, that he does have cervical spur on C5 and C6 with a bilateral neural foramen encroachment by the spurs. At the time, though, this x-ray did show that he was in good alignment with no subluxation or spondylolisthesis.

PAST MEDICAL HISTORY:
1. Significant for motor vehicle accident in 1991, incurring neck and back injuries.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

2. Fibromyalgia.
3. He states he has tic douloureux.
4. Histoplasmosis.
5. Hyperlipidemia.

ALLERGIES: No known allergies.

OBJECTIVE: Examination on the gentleman shows:
HEENT: Normocephalic. Eyes: PERRL. EOMs are intact. Sclerae is white. Conjunctivae is pink. Ears: TMs are gray and intact with no lesions. External ears are clear. Oropharynx is moist and pink with no lesions.
NECK: Supple. Trachea is midline. No thyromegaly is noted. No JVD or bruit. No cervical adenopathy.
LUNGS: Clear to auscultation bilaterally. No rales, rhonchi, or wheezing.
HEART: Regular rate and rhythm. No murmur, gallop, or rub.
ABDOMEN: Soft, nontender, nondistended. Positive bowel sounds. No organomegaly.
RECTAL: Deferred.
EXTREMITIES: No peripheral edema. Peripheral pulses are 2+. Full range of motion. Grips are equal bilaterally.

ASSESSMENT AND PLAN: Chronic back and neck pain. Patient does not wish to take any medications whatsoever for his pain. He does continue to seek VA compensation for the injury that he stated was incurred while he was on military duty in Colorado Springs. I informed him that if he had documentation to support that, it needs to be submitted, as he states that he should be receiving compensation and the chiropractic care. He decided that he will contact his current chiropractor for documentation. Also, he will obtain documentation from his former chiropractor, who is now deceased, but the information is still available to him in Colorado Springs. He will return to clinic when he obtains this information, and we will discuss further plans.

DATE OF CONSULTATION:11/4/08
REFERRED FOR: Please provide therapeutic modalities for lower back ad left sciatica. Spinal manipulation if needed.
REHAB DX: clbp
GENERAL INFO: This is a pleasant 65 yo male seen as an outpatient. He lives in Oklahoma. He reports a hx of lbp which he has received a great deal of physical therapy for in the past. He has had relief in the past from a specific Chiropractor who uses the 'clicker techniques' (which are unavailable from PT services). He states it usually only takes a few treatments and his pain resolves for a year or more. We have recently fee basised him to a chiropractor near where he lives for neck pain. He states that he would prefer going to Colorado Springs instead of Garden City, though. 1 month ago he was lifting and twisting and had a

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

sudden onset of pain with continues and is not improving. Pain is worse with walking and when he first sits down, better with standing and changing positions.
PAIN INDEX: now:4/10, Worst:10/10, Best 0/10

O: DESCRIPTION OF IMPAIRMENT:
Pain provoked with flexion, extension slightly decreases pain.

A:Pt is appropriate for referral to Chiro close to his home as he has had quick relief in the past.
PATIENT EDUCATION - BARRIERS TO LEARNING:
(x)None

INSTITUTION: AMARILLO HCS
DIVISION: VAMC AMARILLO
URGENCY: STATUS: COMPLETED

PRIMARY DIAGNOSIS: Cervical pain
TREATMENT DIAGNOSIS: Cervical pain
ONSET DATE: 5/13/08 (date of rehab medicine consult)
EVALUATION DATE: 5/30/08

GENERAL INFO: 64 year old male referred to PT from his PCP. This pt relates a rather long and complicated history regarding his neck pain, dating back to 1991. He states that he was rear-ended while at a standstill. Impact was great enough to break his driver's seat away from the frame. He has had problems with severe neck pain since then. He states that he has had numerous treatments over the years- extensive PT for exercise, modalities, and traction, use of home cervical traction, chiropractic for manual adjustment, MD specialists, etc. He stated that the only treatment that provides relief is chiropractic. He currently goes to a chiropractor for rx 3-4 times per year, when his pain is severe. He no longer receives manual adjustments, instead his chiropractor uses an "actuator" treatment, which has been beneficial per his report.

PERTINENT MEDICAL HX: Noncontributory

S: CHIEF COMPLAINT: Cervical pain that is worse if he sleeps without adequate support for head and neck. Treatments for his neck pain have been unsuccessful

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

except for the chiropractic rx over the years. He is currently experiencing severe neck pain, 6-7/10, which happens periodically and is usually when he gets his care from chiropractic.

PATIENT'S GOAL(S): Would like to be considered for chiropractic care through the VA.

O:
RANGE OF MOTION- No ROM deficits noted for UEs on screening exam. Cervical ROM not tested.
STRENGTH TESTING- Deferred this date.

FUNCTIONAL ASSESSMENT
Mental status: A&O X 3
Communication: No deficits noted
Pt is independent with self care ADLs. He remains active, only limited by cervical pain.

OTHER INFORMATION- Further exam and testing for this pt is deferred at this time.

EQUIPMENT/MEDICAL DEVICES ISSUED- None

A:
Patient education barriers to learning- None

Description of disability- Pt presents with c/o chronic cervical pain. His only relief is with chiropractic rx using this "actuator" system. He is specific in that no other treatment has been effective for relief since his MVA injury.

An order was entered for case mgt for chiropractic care in 2007, but is was declined for lack of recent xrays and no documentation of acute flare up of current condition. At this time, I would recommend that he be considered for chiropractic care, via fee basis. He lives in Oklahoma, and goes to chiropractor in Garden City, KS when he needs rx. Will contact PCP with this information.

P:
Recommendations as noted above.

LOCAL TITLE: AUDIOLOGY OUTPATIENT (C)
STANDARD TITLE: AUDIOLOGY CONSULT
DATE OF NOTE: OCT 03, 2006@08:30 ENTRY DATE: OCT 03, 2006@15:36:39
AUTHOR: BACK,CATHERINE T EXP COSIGNER:
INSTITUTION: AMARILLO HCS
DIVISION: VAMC AMARILLO
URGENCY: STATUS: COMPLETED

The veteran was seen today for an audiological assessment.

Chief complaint(s) and case history:
Bilateral hearing loss. Pt reports military noise exposure as a C-130 Loadmaster for 24 years. He reports some occupational noise exposure with hearing protection. Pt denies recreational noise exposure. The veteran denies tinnitus, dizziness, otalgia, and aural pressure.

Audiological Assessment:
Otoscopic examinations revealed complete cerumen impaction, bilaterally. I requested a bilateral ear lavage from Team 2. When pt returned from his ear lavage, otoscopic examinations revealed clear external auditory canals. Normal tympanic membrane landmarks were observed in each ear. Puretone testing in the right ear revealed normal hearing sensitivity at 250 - 1500 Hz and a mild to moderate high frequency hearing loss at 2000 - 8000 Hz. All bone condution thresholds are WNL, but there are no air/bone gaps. Puretone testing in the left ear revealed normal hearing sensitivity at 250 - 6000 Hz and a mild hearing loss at 8000 Hz only. Today's word recognition scores are excellent at 96% correct in the right and left ears, respectively. Today's results were explained to the veteran. Discussed borderline candidacy for hearing aid in the right ear. Pt declined amplification at this time.

Recommendation(s):
Recommend annual audiograms to monitor mild hearing loss in the right ear and candidacy/readiness for amplification.

2. SCREEN FOR DEPRESSION
The 2 question depression screen was performed and the patient's depression screen is negative.
PTSD Screen:
(Answer all 4 questions)
A. Had nightmares about it or thought about it when you did not want to?
No
B. Tried hard not to think about it; went out of your way to avoid situations that remind you of it?
No
C. Have been constantly on guard, watchful, or easily startled?
No
D. Have felt numb or detached from others, activities, or your surroundings?
No
Patient had a Negative screen for PTSD.
Alcohol Screening:

AUDC (Mental Health Instrument)
An alcohol screening test (AUDIT-C) was negative (score=0).
Patient education was provided regarding alcohol usage.
Tobacco Screening:

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Yes--Have you ever used tobacco products of any kind?
No--Are you currently using tobacco products?

No--Do you want to quit using Nicotine?
Tobacco Education was provided to patient.
Exercise Screening:

No--Are you physically active, exercise 3 times a week
20-30 min.
Patient received education regarding exercise.
Weight/Nutrition Screening:

Yes Does your diet contain more fruit, grain, and vegetables
than meats?
No Have you had your stool checked for blood in the last
year?
Weight/Nutrition Education was provided to patient.
Miscellaneous:

No 1. Have you had a flex sig by an outside provider
or at the Amarillo VA within the last 5 years?
No 2. Have you had a colonoscopy by an outside provider
or at the Amarillo VA within the last 10 years?
No 3. Do you have an advance directive or living will?
No 4. Do you take an aspirin daily?

  Diet
    Comment: Pt. is on a diet, seem to know what he should eat.
  None
    Comment: Is on no medicationl

DISPOSITION:
  Patient scheduled for Diabetic Teleretinal Imaging
Patient Education :

Discussed with pt the ABC's of diabetic eye disease Aic, Blood pressure,
Cholesterol and the importance of keeping these numbers low. Discussed
etiology
of Diabetic Retinopathy, discussed terms in diabetes glossary, and longterm
complications of diabetes such as retinopathy. Spoke with pt about the
importance of every 1-2 year eye screening to prevent loss of eyesight. Gave
pt
(and discussed) the following Krames pt ed materials to take with him today:
1) What is Diabetic Retinopathy?
2) Diabetes Glossary
3) Longterm Complications of Diabetes

Also gave pt the following National Eye Institute material:
1) Don't Lose Sight of Diabetic Eye Disease

Reviewed eye anatomy; macula, optic nerve, blood vessels and viewed
and discussed normal retinal images and images with diabetic retinopathy
with patient, utilizing the Conditions of The Retina poster provided by
Topcon.

Pt verbalizes understanding of all above and has material to review at home.

Eye History: None

Ocular Surgery (excluding eyelid, cataract, laser refractive like lasik or
Photorefractive Keratectomy): none

Ocular Trauma? None

Ocular medications? None

Family History of ocular disease? None

Does pt give verbal consent for imaging today? Yes, has given consent.

/es/ Janice Gregory

ORGAN AND TISSUE DONATION

1. Upon notification of a patient's status of brain death or imminent death and before calling the Organ/Tissue Donation Program, the Designated Requestor (the Nursing Service Acute Care Supervisor)shall perform a preliminary review to determine if the medical record contains appropriate consent for release of information according to medical center policy and VHA Directive 2000-003. If appropriate consent is not available, the Designated Requestor will obtain it, if possible.

Was the Organ Donation Agency Contacted? yes
If, NO, Indicate Reason (s):

2. If appropriate consent has been executed, the Designated Requestor will Call Organ/Tissue Donation Program at (901) 366-6775 and complete the following information:

Name of Employee Calling Organ/Tissue Donation Program:
KATHY WALKER,RN

Date/TIME: Sep 18,2015@08:15

Name of Donor Program Representative Who Returned Call:
AMANDA ARRINGTON
Date/Time Call Received: Sep 18,2015@08:40

Was Patient Accepted or Declined by Donor Program?
Declined
If Declined, Indicate Reason(s): SEPSIS

Was Patient Accepted for Research Donation only? no

3. If Patient Is Accepted by Donor Program, indicate specifically which Organs/Tissues that are acceptable: N/A

4. If Accepted by Donor Program, indicate name of persons approaching patient and/or Next-of Kin: N/A

Name (Designated Requestor): Position/Title:

Date/Time:

Was Family Offered The Opportunity to Donate? yes

Indicate Name of Person Approaching Next-of-kin About Donation & Date/Time

Approach Made:

Name: Position/Title:
Date/Time: Sep 18,2015@08:10

5. Was Consent for Donation of Organs/Tissue Obtained?

09/17/2015 ADDENDUM   STATUS: COMPLETED
I have examined the patient and reviewed the patient's initial
presentation and
laboratory and test results.I agree with the diagnostic and therapeutic plans of
the housestaff.
        For this patient there is a moderate risk for surgical intervention ,but
I believe it is the best
option. The risk of failure or poor outcome is known and has been discussed with
the patient.
Complications explained include: Anesthetic adverse actions,perioperative
bleeding,infection,
injury to adjacent structures,reaction to medications and blood and death.The
patient understands the
alternatives treatment options as well as the sequelae of no intervention.

The diagnosis is acute abdomen

The intended procedure laparotomy

PAIN MANAGEMENT DISCUSSED iv pain meds

I have informed the patient, or the person authorized to extend the patient's consent, of the methods of anesthesia proposed. I have explained, consistent with accepted medical judgment, the nature and purposes of the anesthesia, the reasonable alternative methods,the risks involved and possiblity of complications.

I have explained that the anesthetic which is proposed to be used is a General but that an alternative form of anesthesia may be used if required by conditions arising before or during the procedure.

OTHER PROCEDURES DISCUSSED:
Anesthesia awareness
Risks, benefits, and postoperative pain management options have been discussed and are acceptable to the patient.

Patient states understanding and wishes to proceed.

--- Original Document ---

08/23/12 AMBULATORY CARE NOTE:

PATIENT NAME: HOPKINS, MARSHALL H

DATE: 08/23/2012

SUBJECTIVE: The patient reports today earlier than his annual followup. The patient was last seen in April 2012. Reported depression and wanted it to be evaluated. The patient has a depression listed as a service-connected disability. Discussed about his other chronic comorbidities, as well, at the current interview.

PAST MEDICAL HISTORY: Reviewed.

CURRENT MEDICATIONS:
1. Cholecalciferol.
2. Ergocalciferol.
3. Cyanocobalamin injections.

ALLERGIES: Patient is not known to have allergy to prescription medications.

REVIEW OF SYSTEMS: Negative for most systems.

PHYSICAL EXAMINATION:
VITAL SIGNS: Temperature 97.9, pulse 70. Respiratory rate is 18, blood pressure 142/90. Weight is 207 pounds. Pain is 4/10, 10 being the worst pain on a scale of 10, pulse oximetry 96% on room air. BMI is 28.
GENERAL: Alert, oriented x3, cooperative, in no acute distress.
ABDOMEN: Soft and nontender. Bowel sounds heard.
EXTREMITIES: No pedal edema.
NEUROLOGIC: Cranial nerves II through XII normal. Strength 5/5. Balance and gait normal. Sensation preserved.

ASSESSMENT AND PLAN:
1. Depression. Ran Patient Health Questionnaire-9 (PHQ9) questionnaire. Patient reported weired dreams recently and, hence, introduced patient to the Mental Health social worker for definitive management.
2. Vitamin B12 deficiency. The patient received vitamin B12 injection at the clinic, and we agreed to take on a once-a-week basis for a total of 18 more injections.
3. Vitamin D deficiency. As the patient did not have any financial obligation, gave not only ergocalciferol but also cholecalciferol through the Veterans Affairs (VA).
4. Patient consistently refusing preventive vaccines of influenza (flu) and pneumonia, colorectal cancer screening. Patient is refusing also treatment for diabetes mellitus type 2 and dyslipidemia. Offered patient to get started on aspirin for stroke and heart protection, which was also refused by the patient. Patient to be followed up as needed.

      AUTHOR: GREEN,VIRGINIA R     EXP COSIGNER:
     URGENCY:                          STATUS: COMPLETED

Signature Informed Consent for
   HEART - STRESS TEST EXERCISE MPI (EXERCISE STRESS TEST WITH
MYOCARDIAL PERFUSION IMAGING)
1. Anatomical Location: See description of treatment/procedure.
2. Informed consent was obtained at 11:52 AM on November 19, 2010.
  The full consent document can be accessed through Vista Imaging.
3. Patient name:  HOPKINS, MARSHALL HUGH
4. The patient HAS decision-making capacity.
5. Surrogate (if applicable):
6. Condition or diagnosis: Your doctor has requested a cardiac
(heart) scan to determine whether there are any important blockages
in your coronary arteries (the blood vessels that feed the heart
muscle).  This could lead to reduced oxygen supply to part of the
heart muscle.
7. Treatment/procedure: The purpose of this test is to evaluate the
heart's blood supply and function during a controlled period of
increasingly strenuous exercise, using a motor-driven treadmill or
exercise bike.
During this procedure an IV will be inserted into the patient's arm.
The patient will be connected to an electrocardiogram or ECG machine
(test that records the electrical activity of the heart) to monitor
the heart.  The patient first starts out exercising at a slow pace,
but will progressively increase effort.
As the patient exercises, heart function, as well as blood pressure,
is monitored continuously.  Exercise is stopped when the patient
becomes fatigued, develops chest pain, reaches a target heart rate,
or at any time that monitoring personnel become concerned for patient
safety.  Once the desired level of exercise is achieved, the patient
will be injected with a small amount of radioactive tracer. During
and after the stress test the patient's heart and blood pressure will
be frequently monitored. After a period of time, the patient will be
placed under a camera and images of the heart will be obtained.

8. It is not expected that an anesthesia practitioner will be
involved in this treatment/procedure.
9. Consent to Blood Products (if applicable):
It is not expected that blood products will be used in this
treatment/procedure.
10. Practitioner obtaining consent:  Allison,Walter M (MEDICAL
DOCTOR)
11. Supervising practitioner:
12. Practitioner(s) performing or supervising treatment/procedure (if
    not listed above):
13. Witness Name:  VIRGINIA GREEN

14. Comments:
  In certain circumstances, the presence of a vendor representative
(company representative) is important to the success of the
procedure.  Prior to the procedure the representative will sign an
agreement to strictly adhere to VA's privacy rules.  The
representative may provide technical advice but will not physically
participate in the procedure.  The representative will be closely
monitored by the VA treatment team.

CLINICAL HISTORY

PRESENTING CHIEF COMPLAINT/REFERRAL QUESTION:
Veteran was referred by primary care. He is complaining of tiredness/lethargy. He has noticed within the last 6 months a lack of energy. He says he has lived out every dream he has ever had and now life is boring. He spoke with Rita Sandoval last week who recommended that he come up with some new goals/dreams and he has done that. He has started on a new project which he says he enjoys and has energy while doing that but when he is not working on it he feels tired. His grand idea is to "build the world's largest railroad museum". He figures he "might as well go big or go home".

He also has some trouble sleeping, will wake up feeling just as tired as when he went to bed, not feeling rested and has started taking naps during the day. He is unsure of why he is feeling this way. He feels his PCP has not been very helpful in finding out the cause if it is medical so he is willing to try and figure out the reason for the symptoms if they may be mental health related.

HISTORY OF CURRENT ILLNESS:
Veteran reports symptoms for the last 6 months.

PAST PSYCHIATRIC HISTORY:
None

CURRENT AND HISTORY OF SUICIDAL ACTS AND SELF HARM
None
Passive thoughts but denies any plan or intent. Occasionally thinks "why live the
rest of my life like this". He has recently developed a faith in God and says that would be disappointing to God so he would never do that.

CURRENT AND HISTORY OF VIOLENCE/ASSUALTING OTHERS:
None

SUBSTANCE USE HISTORY TO INCLUDE PAST TREATMENT, RELAPSE HISTORY, AND RESPONSE TO TREATMENT:
Former alcoholic. Has been sober since 1972. He went to a rehab program. He says he did not know he had a drinking problem, it was just a way of life until he started having medical problems with his liver and kidneys.

MENTAL ILLNESS AND SUBSTANCE ABUSE IN FAMILY MEMBERS:
Nonveteran does not know much about his family.

PSYCHOSOCIAL HISTORY:

Childhood/Developmental History: Veteran grew up all over the US. His family were migrant farm workers so they
followed the crops. He was raised by both parents until age 12 when he was on his own after that. He had gotten a job and lied about his age and left his family behind to work that job. His family took off on to the next job and he never saw them again. He says he found his mother 35 years later and helped care for her until she died. He had two brothers. They have both passed.

He says his father was married 7 times and he has brothers and sisters he does not know. He has multiple half siblings.

FOR OFFICIAL USE ONLY (FOUO)
Disclaimer: "The information contained in this document may contain privileged and confidential information including patient information protected by federal and state privacy laws."
COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Physical, sexual and emotional trauma:
None

Family Circumstances: Veterans mother in law recently went under surgery for a hysterectomy and woke
up mentally "messed up". The anesthesia affected her brain.

Adult Relationship History: Veterans wife teaches health and wellness. He and his wife have a 9 year old daughter that they are raising.

Current significant family and/or peer group relationships:
Veteran was married once before. He currently has been married 10 years. He had 5 children in his first marriage whom he remains close with. He says they all turned out good and he is proud of them. He and his wife have a 9 yr old daughter together. His current wife did not have any kids or married before so they had one together. They are looking at adopting more children or providing foster care for teenagers. Veteran loves to travel. He says he has had "lots of windshield time".

MILITARY HISTORY:
Branch:
US Air Force, Air Force guard and reserve for a total of 32 years. He received disability retirement. He had a bad car wreck and was forced to retire due to medical issues that left him unable to fly anymore. He spent 24 years on the same plane. The wreck happened while on duty so he now gets SC disability.

He has been all over the world and was deployed to multiple places.

Veteran's perception of most distressing events while in the military:

MEDICAL INFORMATION

CURRENT AND PAST MEDICAL PROBLEMS:
Active problems - Computerized Problem List is the source for the following:

1. Chronic Back Pain
2. Hyperlipidemia *
3. Microscopic Hematuria
4. Diabetes Mellitus without mention of Complication, type II or unspecified ty
5. Depression *
6. Vitamin D Deficiency
7. Vitamin B 12 Deficiency

Are there any new medical problems to report?

CURRENT MEDICATIONS:
Active Outpatient Medications (including Supplies):

	Active Outpatient Medications	Status
1)	CHOLECALCIFEROL 1000IU TAB (OTC) TAKE TWO TABLETS BY MOUTH EVERY DAY VIT D	ACTIVE
2)	CYANOCOBALAMIN 1000MCG/ML INJ, (PER ML) INJECT 1000MCG (1ML) INTRAMUSCULAR EVERY 7 DAYS VIT B12	ACTIVE
3)	ERGOCALCIFEROL 50,000U CAP TAKE 50000UNT BY MOUTH EVERY WEEK VIT D	ACTIVE
4)	SYRINGE-NEEDLE COMBO,25G 5/8IN,3CC,(EA) USE SYRINGE EVERY 7 DAYS	ACTIVE

ALLERGIES AND ADVERSE DRUG REACTIONS:
Patient has answered NKA

ACTIVITIES OF DAILY LIVING ISSUES:
Are there any self care issues? No

PAIN ASSESSMENT:
PAIN INTENSITY (0-10 scale):
Patient's present level of pain: 2
Patient's acceptable level of pain:
Description of exacerbating factors or relieving measures: Veteran does not use medication, he says he has learned pain management
MENTAL STATUS EXAM:

ORIENTATION AND CONSCIOUSNESS:
APPEARANCE AND BEHAVIOR:
cooperative and reasonable
SPEECH:
normal rate/rhythm
LANGUAGE:
intact
MOOD AND AFFECT:
mood euthymic
affect is congruent with mood
PERCEPTUAL DISTURBANCE (hallucinations, illusions):
none
THOUGHT PROCESS AND ASSOCIATION:
normal, coherent
THOUGHT CONTENT (delusions, obsessions etc.):
no unusual thought content
INSIGHT:
good
JUDGMENT:
good
MEMORY:
impaired recent
details: normal forgetfulness

FUND OF KNOWLEDGE
Above Average
MENTAL STATUS COMMENTS:

Needs Assessment:
Education and Learning Needs Assessment

Educational Background:

Highest grade achieved: less than high school with GED8th grade then GED

Educational/learning difficulties: no known educational learning disability

Attitudes toward learning: not interested in academic achievement

Assessment of primary language spoken in the home and veteran's preference of language for clinical communication: English

Legal Status Screening:
Is there evidence from the interview that the veteran has legal issues or concerns that would warrant a more in-depth assessment?
No. No further assessment indicated.
Housing and Income Assessment:
Do you currently have a stable place to live?
Yes
What is your current income and sources of income?
$0 per month
Sources:

Nutritional Status Screening:
Is there evidence from the interview that the veteran has nutritional issues or concerns (including weight gain or loss of more than 5% in last 3 months or 10% in last year, dietary concerns, eating disorder signs or symptoms) that would warrant a more in-depth assessment?
No. No further assessment indicated.

Screening for Abuse, Neglect, or Exploitation:
Is there any evidence from the interview that the veteran is a victim of physical assault, rape, sexual molestation, domestic abuse, elder neglect or abuse, or other serious abuse or exploitation?
No. No further assessment indicated.

Screening for Bereavement Issues:
Is there evidence from the interview that the veteran is actively suffering

FOR OFFICIAL USE ONLY (FOUO)
Disclaimer: "The information contained in this document may contain privileged and confidential information including patient information protected by federal and state privacy laws."
COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

from bereavement issues?
No. No further assessment indicated.

Screening for Vocational Needs Assessment:
Is there evidence from the interview that the veteran has any vocational deficits or needs?
No. No further assessment indicated.

Spiritual and Religious Orientation: Personal spiritual beliefs but does not attend organized religious activities

INITIAL DSM-IV DIAGNOSES:
Axis I Clinical Disorder:
Depressive Disorder: NOS (Not Otherwise Specified)
General Categories None
Axis II Personality Disorders/Traits:
None
Axis III Current Medical Conditions: See Medical History above
Axis IV Current Psychosocial Stressors:
None

Axis V GAF Score (current level of functioning): 60-65
(past year level of functioning):

SUMMARY AND FORMULATION: This is a 69 yr old 70%SC Vietnam era veteran who was referred by primary care. He is reporting symptoms of lethargy and trouble sleeping. He is unsure if the cause of the problem is medical or mental so he is wanting to be evaluated and try therapy here in the mental health clinic. He denied any SI/HI today.

Preliminary Treatment Plan:
-The veteran was given social workers business card along with clinic numbers and the crisis hotline number
-The veteran was educated on all emergency procedures
-He will be referred for therapy

Patient does not desire to have family members, significant others, or advocates to participate in patient chart.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

DATE OF BIRTH: 07/20/1943

CHIEF COMPLAINT: Complaints of chest discomfort.

PAST MEDICAL HISTORY: The patient has no known coronary artery disease. He reports possible TIAs in the mid-1990s. He has a history of obesity. He has lost 100 pounds over the past several years. He also has dyslipidemia.

SUBJECTIVE: The patient reports about a month ago he was in his work area when he began to have a painful heaviness from the left mid-axilla to the right mid-axilla, across the chest wall and what appears to have gathered in the center of the chest. He states this again happened 2 days later, and again described it as feeling "constrict ed." What he has reported to me is that this lasted for several seconds and then disappeared. What he reported to his primary care provider is that it lasted several minutes. The patient is unable to recall exactly what he was doing or exactly how long this episode lasted. These have not occurred since, and he has been relatively active. He states he breaths okay except for at night he gets "stopped up a little bit." He has had some dizziness after standing, but is dealing with that. No feelings of palpitations . No syncope. No swelling of extremities. No tobacco or alcohol use. He stays active. He follows a very strict regimen and diet. His wife is a natural herbalist. He is on absolutely no medications, and is a very strong believer in homeopathic teachings.

OBJECTIVE: Vital signs: Temperature 98.3, pulse 78, respirations 16, blood pressure 139/95 which is elevated from previous blood pressures, height 72 inches, weigh t 206 pounds, pulse oximetry 96% on room air.

General: This is a very pleasant gentleman who comes to the clinic ambulatory in no acute distress.
Neurological: Speech clear and appropriate. Follows commands. Alert and oriented to person, time, and place. Has strong and equal hand grips.
Neck: No carotid bruit appreciated. No JVD.
Lungs : Clear.
Heart: S1, S2 auscultated with a possible S1 splitting. No murmurs. No pain upon palpation of the chest wall. No rubs.
Abdomen: Nontender. Bowel sounds present.
Periphery: No pedal edema.

MEDICATIONS: None.

LABORATORY AND TESTS: The patient's EKG today shows a sinus rhythm with a first degree AV block, rate is 72. A lipid panel shows a total cholesterol of 188, LDL 120, HDL 30 and triglycerides 160.

ASSESSMENT:
1. Chest pain.
2. Dyslipidemia.

PLAN: Of course, there will be no addition of medication for this patient as he does not feel that he is treated appropriately with medications. This brings its own set of unique circum stances to this patient's presentation. His complaints of chest heaviness or "constriction" is compelling for ischemic heart disease. However, he has not been able to bring on these episodes since. He has an elevated blood pressure today, although it does not appear that it is chronic. His cholesterol levels are not at goal. However, he is of course not interested in any kind of statin. I have talked to him at length about the process should he have a stress test and should that stress test be positive. He would then be recommended for a left heart catheterization, which would require Plavix should he have an intervention. I have gone to explain that should he be found to have ischemic heart disease he would have to take Plavix for at least 1 year and other medications would be strongly recommended. I have also explained that there is a potential for bypass. He has verbalized understanding and is interested in having the stress test. He is also interested in having another lipid panel the day of that stress test to see if his wife will be able to help increase his HDL in the next month. I have

encouraged appropriate routine exercise. I have also stressed when
he should report to the Emergency Room, and he has verbalized
understanding of that. We will follow him as appropriate.

DNR INFORMED CONSENT DISCUSSION
Date/time of the Discussion: Aug 27,2015
Persons present at the discussion:
  Patient

 DNR Status discussed and concurrence received from Dr. Bang Wan M.D.

Patient's mental status: alert   The patient has decision making capacity

 Name(s) of the practitioner(s) responsible for designation of DNR Status:

DNR Status discussed as described below: patient does not want to be
resuscitated if he arrested. does not want any heroic measures to bring
him back to life. stated that he lived a good live.

Diagnosis: Obstructive uropathy/uncontrolled DMII

Indications: patient wish

DNR Status has been discussed with the patient/surrogate decision maker in
language that they could understand; and that they indicated comprehension
of the discussion.

The diagnosis and indications have been explained and the opportunity to
ask questions was offered.

      AUTHOR: SANDOVAL,RITA A      EXP COSIGNER:
     URGENCY:                           STATUS: COMPLETED

SESSION DURATION: 90 Minutes
TYPE: Individual/warm hand off
REFERRING PCP: Dr. Kadakia
REASON FOR REFERRAL: Veteran voicing depressive symptoms.
BEHAVIORAL HEALTH PROVIDER ROLE EXPLAINED: Yes
SESSION FOCUS: This is a 69 year old Veteran who is 30% SC for Depressive
disorder. Veteran indicates that he has been feeling very tired lately, voices
being "tired of living". Veteran states that he experiences very poor sleep and
indicates that he had been diagnosed with sleep apnea,  but does not use a CPAP
machine. He states that for the last 3 months he has just been feeling "down"
and "tired", no real interest in anything. Veteran begins to describe a very
full and productive life during which he states that he has been very
successful. States that he has done everything he has ever wanted to do. He
feels that he has no further interests to pursue, he "has done it all" and
"well", he has no further "passion" to pursue.
MSE:
   Appearance: dress appropriately with good hygiene
   Behavior: Appropriate.
   Speech: normal rate and volume
   Mood: mildly depressed
   Affects: congruent with mood
   Thought processes: coherent and logic.
   Thought content: No delusion.
   Suicidal ideation: thoughts, no plan or intent
   Homicidal ideation: No
   Cognition: alert and oriented.
   Insight: good.
   Judgment: Appropriate
INTERVENTIONS: Supportive counseling provided to the Veteran. We also discussed
treatment options for his consideration which included referral for full
assessment and medication evaluation and counseling in the mental health clinic
or management of symptoms and counseling in the primary care setting. Cognitive
Strategies utilized in this session include: identifying dysfunctional thinking,
generating alternatives to ineffective thought processes and alteration of
negative cognitions. Veteran was allowed to discuss the current issues, problem
solving was used, also utilized life review and exploration of possible avenues
for the Veteran to consider. Veteran and worker did discuss treatment options,
however, he was not currently open to medication management and declined
referral for counseling. Session was unusually lengthy, but at the end of the
session, Veteran was appreciative and did state that he had felt a spark of
enthusiasm at the thought of future ventures that he could consider.
DIAGNOSTIC IMPRESSION: Hx of MDD, Adjustment disorder with depression.
LETHALITY: Today, Aug. 23,2012, the patient denied suicidal or aggressive
ideation or plans.  There were no indications, signs, or symptoms to indicate
imminent danger. The Veteran and this worker did have a lengthy discussion about
his comment about being ready to die. Veteran admits to thoughts of suicide in
the past, but assures me that he has not now or then a plan or intent to
actually do anything to hurt himself.
FOLLOW-UP: To be followed in Primary Care
PLAN:
1. Veteran declined referral to the mental health clinic for assessment and
evaluation of medication management.
2. Instructed to call this mental health counselor for questions or concerns, if
symptoms worsen.
3. Patient has the 24H VA Hotline suicide phone crisis number (1-

     URGENCY:                            STATUS: COMPLETED

PRIMARY DIAGNOSIS: Abnormality of gait
TREATMENT DIAGNOSIS: Abnormality of gait
ONSET DATE: 08/27/15
EVALUATION DATE: 08/27/15

GENERAL INFO: pt. is a 72 year old male presents to 3N medical floor for
evaluation of sudden onset abnormality of gait. Pt. underwent hernia surgery
last week, and incurred sudden onset of urinary incontinence and unsteady gait.
Pt. was admitted to a hospital in Kansas and subsequently transferred to this
VA. Pt. has folley catheter present and is supine in bed with no complaints of
pain upon arrival. Also noted in the medical record is previously uncontrolled
DM.

PRIOR FUNCTIONAL LEVEL: I with all ambulation, functional activities and
transfers

EXPECTED DC LOCATION: (x)Home with family/independent   ( )SNF   ( )LTC facility
                          ( )Hospice care  ( )Other:

PERTINENT MEDICAL HX: DM, hyperlipidemia, MDD, inguinal hernia (surgically
repaired)

S: CHIEF COMPLAINT: pt. states that he had experienced some unsteady gait and
imbalance, but now these sx's have resolved and he was able to walk to<>from the
bathroom independently this morning.

PAIN INDEX: none stated

PATIENT'S GOAL(S): to go home

O:
Pt assessed- (x)at bedside  ( )in PT clinic.

RANGE OF MOTION
        UE- WNL B

        LE- WNL B

STRENGTH TESTING

UEs-    (x)Functional UE strength testing exhibits no gross deficits
        ( )UE strength deficit noted as follows (specify):

LEs- B LE strength grossly 4+/5 throughout

FUNCTIONAL ASSESSMENT
Mental status: A&O X 3

Communication: (x)No deficits noted ( )Hard of hearing
                  ( )Other (specify):

Functional Mobility Status:
Bed mobility            ( )Stand by Assist
                        (x)Independent with siderails ( )Min assist of 1
                        ( )Mod assist of 1 ( )Max assist of 1 ( )Total assist

( )Min assist of 1 ( )Mod assist of 1 ( )Max assist of 1
( )Total assist

Bed<->chair transfer (x)Independent
( )Modified Independent with assistive device
( )Stand by Assist
( )Min assist of 1 ( )Mod assist of 1 ( )Max assist of 1
( )Total assist

Gait assessment: pt. ambulated 150' independently in hall way while this therapist carried catheter bag; pt. demonstrates good dynamic balance, cadence and equal stride length and toe clearance. Pt. reports no dizziness or feelings of unsteadiness; no LOB observed

Fall risk: ( )yes (x)no

BALANCE
Sitting: (x)Good ( )Fair ( )Poor
Static standing: (x)Good ( )Fair ( )Poor
Dynamic standing: (x)Good ( )Fair ( )Poor

OTHER INFORMATION- pt. reports he does not want to take any medications and has not taken any since 1991

PATIENT EDUCATION- educated pt. on the possibility of uncontrolled DM contributing to unsteady gait and dizziness; also educated on contacting primary care for prosthetics consult if grab bars are needed in his new home

A:
Patient education barriers to learning-
(x)None ( )Cognitive ( )Physical ( )Emotional
( )Cultural ( )Other(explain):

Description of disability- pt. demonstrates resolve of unsteady gait, good dynamic balance, independent ambulation and 4+/5 strength throughout B LE's. Pt. does not require skilled therapy services at this time, and is appropriate for d/c home when medically cleared.

Precautions: ( )cardiac ( )monitor vitals ( )frequent rests needed
( )limited WB status (specify):
(x)other: folley cath in place

One time evaluation, no goals needed

P: pt. does not require skilled therapy services at this time and will not be picked up for PT during hospital stay.

PATIENT NAME: HOPKINS, MARSHALL H

DATE: 04/05/2012

SUBJECTIVE: The patient follows up at 11 months for a routine checkup with the laboratory. Previous primary care physician was Dr. Burns. At the current interview, the patient did not have any new issues to discuss. All he wanted was a physical examination. Suggested that his chronic issues with back pain, neck pain, fibromyalgia, but all his complaints are managed by diet and he does not expect to be on any medications, but was interested in knowing his lab results.

PAST MEDICAL HISTORY: Significant for chronic back pain, dyslipidemia, microscopic hematuria and diabetes mellitus type 2.

CURRENT MEDICATIONS: None.

ALLERGIES: Patient is not known to have allergy to prescription medications.

REVIEW OF SYMPTOMS: Negative for most systems.

PHYSICAL EXAMINATION:
VITAL SIGNS: Temperature 97.5, pulse 61, respiratory rate is 18, blood pressure 140/85, weight is 201 pounds. Pulse oximetry 96% on room air. BMI is 27.
GENERAL: Alert, oriented x3, cooperative, in no acute distress.
HEENT: Head normal. Pupils equally reacting to the light. Conjunctivae pink. Tympanic membranes could not be seen because of the wax in both ear canals.
NOSE: Mucosa normal. Oropharynx mucosa normal.
CHEST: Lungs CTAP. No wheezes, no rales, no rhonchi.
HEART: Rhythm regular. S1, S2 normal. No murmur.
ABDOMEN: Soft and nontender. Bowel sounds heard.
EXTREMITIES: Pulses 2+. No pedal edema.
GENITOURINARY: Digital rectal examination done. Prostate minimally enlarged, bilobed, firm in consistency, smooth in contour. No nodularity, nontender.
NEUROLOGIC: Cranial nerves normal. Strength 5/5. Balance and gait normal. Sensation preserved. The patient has got an evidence of Athlete's foot in the form of macerated skin within the fourth and the fifth the toe web spaces of both the feet.

LABORATORY DATA: The lab done today showed elevated LDL cholesterol of 131 and elevated A1c 8.1.

ASSESSMENT AND PLAN:
1. Dyslipidemia. Patient refuses to get started on any pharmacotherapy.
2. Elevated hemoglobin A1c, uncontrolled diabetes mellitus type 2. The patient does not want to get started on any pharmacotherapy. Dietary education provided regarding the need to go on a low-carb diet and eat a healthy protein in the form of either vegetable proteins consisting of beans and an animal protein consisting of chicken, turkey, and fish. The patient verbalized understanding.
3. Both ear wax. Both ears were lavaged at the clinic at the current interview.
4. Patient has been consistently refusing colorectal cancer screening, diabetic eye examination and pneumonia vaccine, and Fu vaccine.

The patient elected to have followup annually with the laboratory or earlier if needed.

IMMUNIZATIONS - NONE FOUND
**********************************************
Reason for visit:  consult

**********************************************
Is the patient febrile?  No
Any travel or exposure to individuals who have traveled outside the US in past 6
months?  No
Patient has been in the hospital since last visit:
no
Patient has been seen by an outside provider:
no
Patient given new medications outside the VA:
no
Nicotine use:Pt states not a current tobacco user.
Inhaler use: No
Congestive Heart Failure:
Patient does not have a known diagnosis of Congestive Heart Failure
Cancer:
Patient does not currently have cancer.
PAIN ASSESSMENT:
VERBAL PAIN ASSESSMENT
PAIN INTENSITY (0-10 scale):
        Patient's present level of pain:    0
        Patient's acceptable level of pain: 0
PLAN:
Pain level will be reassessed at future appointments.
Fall Risk Assessment:
  History of Falling
15 = Yes Secondary diagnosis
 Ambulatory aid
 IV/Heparin Lock
 Gait/transferring
 Mental Status
15 TOTAL SCORE
Scoring:
0-24  Low Risk
        Implement Universal Fall Precautions
EDUCATION
  Person Being Assessed: Patient
   Barriers to Learning: None
  Desire and Motivation: Eager to learn
         Comphrehension: High
     Method of Teaching: Verbal
Evaluation of Education: Voiced understanding
         Topics Covered:

Notes ~ MHS-GENERAL NOTE (NON-S.O.A.P.)

```
     LOCAL TITLE: MHS-GENERAL NOTE (NON-S.O.A.P.)
STANDARD TITLE: MENTAL HEALTH NOTE
DATE OF NOTE: OCT 24, 2012@10:54     ENTRY DATE: OCT 24, 2012@10:54:35
      AUTHOR: HARRIS,HEATHER R     EXP COSIGNER:
     URGENCY:                            STATUS: COMPLETED

Mr. Hopkins was referred for individual counseling by Rosalinda Barrera, LMSW.
Veteran had a full intake on 9/20/12.  Mr. Hopkins stated his main concern is
that he is "tired of being tired."  He reports waking up tired and not having
energy throughout the day.  He stated he doesn't have any difficulty falling
asleep but he does wake up several times throughout the night.  He reports he
wakes up because he is snoring or quits breathing.  Per Mr. Hopkins, his wife
has also commented on his snoring.  Discussed sleep hygiene techniques which
veteran feels he is already doing.  He denied any nightmares or waking due to
dreams.

Mr. Hopkins denied feeling depressed, down, or hopeless.  He does report some
issues with motivation.  He feels that he has reached all of the goals he has
set for himself and doesn't have any goals he wants to work on.  He has started
a new project after talking to a social worker in primary care.  Mr. Hopkins is
skeptical of medication and prefers holistic/natural remedies to health
concerns.

Discussed counseling options and he declined counseling at this time.  He would
like a referral for a sleep study to rule out sleep apnea.  He believes his
sleep issues are "mechanical."  Will forward this request to his primary care
provider.

Impressions:
Appearance: dress appropriately with good hygiene
Behavior: Appropriate.
Speech: normal rate and volume
Mood: "good"
Affects: euthymic
Thought processes: coherent and logic.
Thought content: No delusion.
Suicidal ideation: thoughts, no plan or intent
Homicidal ideation: No
Cognition: alert and oriented.
Insight: good.
Judgment: good

Plan: Gave veteran clinic contact information should he desire counseling
services in the future.  Will forward request for sleep study to primary care
provider.

Mood:somel
Comments: unable to respond upon arrivial

RISK ASSESSMENT/MISSING PATIENT:
CRITERIA (HIGH RISK SCREEN)

Has patient been diagnosed with Alzheimers/Dementia? - No

Patient is independently mobile (Ambulatory or wheelchair) - Yes

Patient is disoriented or unable to care for own safety - Yes

Wander (brown label) visible on wristband -no

Does patient have any suicidal/homicidal thoughts? - No

A Yes answer to any question below must result in a consult to Social Work Service per Policy.

(To notify Social Service after 5 P.M., weekends, & holidays, contact the MAA)

Special Needs/Abuse Screening:

Patient shows signs of neglect or abuse - No
Patient has no Source of Support and/or Homeless - No
Patient's caregiver unable to meet patient's needs - No
Patient admitted from nursing home or other extended care facility - No
Patient has severe visual impairment - No

Patient has an Advance Directive/Living Will/Power of Attorney:
No If no: Do you want an Advance Directive?
NO -
Consult sent to Social Work Service - No

Review of Systems:

Neuro:

Level of Consciousness: obtunded/stuporous/semi coma

Glasgow Coma Score:(complete the Glasgow Coma Scale if the patient has an altered level of consciousness.
Date/Time: Sep 16,2015
Best Eye Opening Response: To Pain (2pts)
Best Verbal Response: No Response: (1pt)
Best Motor Response (Best Upper Limb/To Painful Stimuli):

LOCAL TITLE: NURSING ADMISSION
STANDARD TITLE: NURSING INPATIENT ADMISSION EVALUATION NOTE
DATE OF NOTE: SEP 17, 2015@04:14 ENTRY DATE: SEP 17, 2015@04:14:13
AUTHOR: DELA CRUZ,NOEMI R EXP COSIGNER:
URGENCY: STATUS: COMPLETED

NURSING ADMISSION HISTORY

OIF/OEF COMBAT STATUS:None Indicated

Arrived on unit at Sep 17,2015@02:35

Mental Status: unarousable

Home Environment:

Allergies: Patient has answered NKA
** Allergies Verified by nurse - no
Other: no family members around, pt. sedated

Reason for admission (from patient or other): small bowel obstruction

Patient Height: unknown

Patient Weight: 77kg

Past Medical History: (refer to H&P)
MRSA Swab Done? -
Yes
Education:
Patient educated on how, why, and outcome of possible positive MRSA swab test results. Patient acknowledges his understanding and consents to nares swab. Patient advised test may be performed multiple times throughout admission and prior to discharge. The benefit of hand hygiene on prevention of spread of MDRO was included. Handouts were provided for the patient and the family.
Tobacco Screen: Patient has quit tobacco (nicotine) use over one to seven (7) yrs

Alcohol Screen:

In the past 12 months, has the patient had ANY drinks containing alcohol?

no - no alcohol in the past 12 mths
Comments: per doctors note
PAIN ASSESSMENT-1st Location:
Patient states "experiencing pain" on a scale of 1-10.
Stated pain is: 99
OUTCOME: There will be a 50% reduction in pain (inpatients within 24 hours and outpatients within 2 encounters). Select at three interventions to achieve this goal. For pharmacological interventions see Pain Management Policy.
Patient/Family Outcome: Able to explain critical information about the following:
States understanding of rights and responsibilities of pain management.
Discharge Planning Screening Criteria:

A yes answer to any question below must result in a consult to Social Work Service per Policy.

(To notify Social Service after 5 P.M., weekends, & holidays, contact the MAA)

Special Needs Assessment Screening Criteria Questions:

Patient shows signs of neglect or abuse - n/a
Patient has no Source of Support and/or Homeless - n/a
Patient's caregiver unable to meet patient's needs - n/a
Patient admitted from nursing home or other extended care facility - n/a
Patient has severe visual impairment - n/a
Alcohol and /or substance abuse on admission - n/a

Patient has an Advance Directive/Living Will/Power of Attorney: n/a If no: Do you want an Advance Directive? n/a Consult sent to Social Work Service - n/a - Patient received educational information on Advance Directives -n/a
Fall Risk Screening:

FOR OFFICIAL USE ONLY (FOUO)
Disclaimer: "The information contained in this document may contain privileged and confidential information including patient information protected by federal and state privacy laws."

Frequent toileting - Unable to respond

How many times do you get up during the night? 0,
Catheter

What times do you usually get up to urinate at night?

Polypharmacy (6 or greater prescription medications)?
Unable to respond

Receiving outpatient Physical Therapy? Unable to respond

History of Falls (CV/light headed-dizzy, Dysequilibrium - loss of balance with no abnormal motion sensation, Vestibular/Vertigo, Musculoskeletal/give way, combination, other) -
Unable to respondMorse Fall Scale:

History of falling; immediate or within 3 months - (no = 0, yes = 25)
Score = 25

Secondary diagnosis - (No = 0, yes = 15)
Score = 15

Ambulatory aid - (None, bedrest, wheelchair, nurse = 0) Crutches, cane walker = 15; Furniture = 30) Score = 0

IV/Heparin Lock - (no = 0, yes = 20)
Score = 20

Gait/Transferring - (Normal, bedrest, immobile = 0; weak = 10; Impaired = 20) Score = 0

Mental Status - (Oriented to own ability = 0; Forget limitations = 15)
Score = 0

Total Score = 60

Risk Level/Intervention Required: > 50 points High Risk High Risk
Fall Prevention Interventions

Note: If patient is identified as a high risk for falls, implement fall prevention and management program.

Standard Fall Prevention Interventions:

Assess patient's fall risk upon admission, change in status, transfer to another unit and discharge.

Assign the patient to a bed that enables the patient to exist toward his/her stronger side whenever possible.

Assess the patient's coordination and balance before assisting with transfer and mobility activities.

Implement bowel and bladder programs to decrease urgency and incontinence.

Use treaded socks for all patients.

High Risk Fall Prevention Interventions: (Place on Falling Leaves Program)
Equipment: bed in low position, personal items and call light within reach
Environment: Patient's environment cleared of all hazards.

FUNCTIONAL SCREENING CRITERIA: - High Risk Screen
(If Answer Is Yes Appropriate Consult Must Be Sent)

Ability to carry out ADL: Total Care
Name of caregiver -

Patient has impaired mobility, ADL/needs adaptive equipment/Limb loss (past or present) n/a

Assistive Devices:

Instructions:

If any of the following Profound Risk Factors in Section I is present,
Go to Step IV and follow instructions given, "Do NOT complete sections
II and III."

If no Profound Risk Factors are noted in Step I, Proceed to Step II.

If any of the Mild to Moderate Risk Factors are present, Go to Step III.

If no Risk Factors are Identified in Step I and II, Go to Step IV.

Note: Testing of swallow is to be done by the nurse at bedside prior to
      sending a consult, using the procedure in Step III and Step IV #2.
Step I: Profound Risk Factors: none
Step II: Mild to Moderate Risk Factors:
 Other (NPO Admission, PEG, Etc.)
BRADEN SKIN RISK ASSESSMENT

Sensory Perception:2 = Very Limited
Moisture: 4 = Rarely Moist
Activity: 1 = Bedfast
Mobility: 2 = Very Limited
Nutrition: 2 = Probably Inadequate
Friction: 2 = Potential Problem
  13-14   Moderate Risk
    Score: 13

SKIN PATCHES
The patient has the following patches on the skin.

FOR OFFICIAL USE ONLY (FOUO)
Disclaimer: "The information contained in this document may contain privileged and confidential information including patient information protected by federal and state privacy laws."
COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

MAJOR RISK FACTORS / SPECIAL POPULATIONS
The patient does not have any spinal cord injury, paralysis or neurologic disease.

CURRENT SKIN ASSESSMENT
Skin Color:
Color: Normal for ethnic group
Skin Temperature
Temp: Cool
Skin Moisture
Moisture: Dry
Skin Turgor
Turgor: Within normal limits

SKIN PROBLEMS
Bruising
BUE's
Wound -location, type, description
midabdominal surgical incision open, covered with cassett
Other
redness to perineal area;redness/echymmosis to BLE's;scratches to left upper chest area

INTERVENTIONS
The pressure ulcer protocol was implemented.
Education
Provide patient/caregiver education regarding causes and prevention of pressure ulcers.
Pressure-Redistribution Measures
Turn and reposition every 2 hours while in bed, using pillows to separate pressure areas
Elevate heels using pillows or foam blocks
Apply heel/elbow pads
Maximize Mobilization
Perform range of motion exercises when turning/repositioning
Manage Moisture
Maintain clean and dry skin
Apply protective barrier ointment
Manage Nutrition
Provide or encourage oral care as needed
Monitor fluid/food intake
Reduce Friction and Shear
Use a bed trapeze or pull sheet to lift up in bed or turn
Raise the knee when elevating head of bed
Nursing Plan of Care:

NURSING PROBLEMS:
DECREASED CARDIAC OUTPUT:

Decreased cardiac output related to medical condition

Target date for review of problem: Sep 20,2015
Target date must be no less than 3 days and no greater than 5 days.

Goals:
Maintains cardiac output , Returns to and maintains normal sinus rhythm, Maintains therapeutic levels of anti-arrhythmic agents, Avoids toxicity/allergic reactions to drugs, Limits myocardial infarction area

Interventions:
Monitor vital signs, Monitor Intake and Output, Assess heart rate/rhythm , Monitor for drug toxicity

---

RISK FOR INFECTION:

Infection related to
surgery
Target date for review of problem: Sep 20,2015
Target date must be no less than 3 days and no greater than 5 days.

Goals:
Has normal sputum production, Afebrile, Maintain skin integrity, Absence of tenderness , Absence of inflammation, purulent drainage, Maintain optimal fluid balance

Interventions:
Monitor Vital Signs , Monitor Intake and Output, Provide adequate hydration and nutrition, Universal precautions maintained, Monitor lab

FOR OFFICIAL USE ONLY (FOUO)

ADMITTING PHYSICIAN: Abdelrazig Suliman, MD

ATTENDING PHYSICIAN: Bang Wan, MD

This patient will be admitted to team 1.

CHIEF COMPLAINT: The patient was transferred from Kansas because of obstructive uropathy and uncontrolled diabetes mellitus.

HISTORY OF PRESENTING ILLNESS: This is a 72-year-old male with past

FOR OFFICIAL USE ONLY (FOUO)
Disclaimer: "The information contained in this document may contain privileged and confidential information including patient information protected by federal and state privacy laws."
COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

medical history of diabetes mellitus type 2. The patient was not on any kind of medication. The patient's story started on August 20 after he underwent right hernia repair surgery here in Amarillo. Patient was discharged home the next day after the surgery. He stated that on his way to his home town in Kansas he noticed that he became incontinent with his urine. On the next day, the patient also stated that he had some transient hiccup and some sort of unsteady gait. The patient was send out here on hydrocodone to control his pain and he has been taking that as well. Because of the patient's urinary incontinence and hiccup, he called the Amarillo VA here and he was told to go to the nearest medical facility. The patient was admitted there in Southwest Medical Center in Kansas and CT scan abdomen was done and that showed bilateral hydronephrosis and hydroureters indicative of obstructive uropathy. The patient received a Foley catheter and he also was started on antibiotic for UTI infection. The patient also was found to have some mild kidney injury at that time with a creatinine level of 1.5, but he responded quite well to IV fluids and his creatinine went back to normal. The patient denied any history of prostatism or any kind of other urinary symptoms during the last few months. He also denied taking any kind of medication and he assumed that he was able to control his diabetes only with diet and he did not believe that he had diabetes but he kept saying that he had high blood sugar but his blood sugar was almost always controlled.

REVIEW OF SYSTEMS: All systems including head and neck, cardiovascular, pulmonary, gastrointestinal, hematology, neurology, musculoskeletal, genitourinary, and dermatology are all negative except what is mentioned above.

ALLERGIES: None.

PAST MEDICAL HISTORY: Type 2 diabetes mellitus and per records he has history of vitamin D deficiency, history of dyslipidemia, history of microscopic hematuria, history of vitamin B12 deficiency, and history of depression and have.

MEDICATION: Patient was not on any medication at home but his hospital medication that he came in taking from Kansas include per records:
1. Ambien 5 mg.
2. Flomax 0.4 mg.
3. Senna.
4. Ceftriaxone injection.

PAST SURGICAL HISTORY: Include right hernia repair, which is recent.

SOCIAL HISTORY: The patient quit smoking in 1972. He denied alcohol and denied drugs.

PHYSICAL EXAMINATION:
VITAL SIGNS: Blood pressure 125/74, heart rate 81, respiratory rate 16, temperature 97.8, and oxygen saturation 98% on ambient air.
SKIN EXAMINATION: Patient is alert, oriented, very nice veteran, in no acute distress.
HEENT: Normocephalic, atraumatic. Extraocular movements intact. Pupils are equal, round, reactive to light and accommodation. There is no conjunctival pallor, jaundice, or cyanosis.
NECK: Supple. No JVD. No lymphadenopathy. No thyromegaly.
PULMONARY EXAMINATION: Clear to auscultation bilaterally. There are no added sounds.
CARDIOVASCULAR EXAMINATION: Regular rate and rhythm. S1, S2 are normal. No murmur. No gallop. No rub.
ABDOMEN: Soft, nontender. No organomegaly. Bowel sounds are normoactive in all quadrants.
CNS EXAMINATION: Cranial nerves II through XII appear grossly to be intact. Strength 5/5 in all muscle groups with normal tone and normal deep tender reflexes, proximal and distal. Sensation intact to pinprick, touch, and temperature in all dermatomes, with normal proprioception and normal vibration sense. Coordination is intact on the right side. The patient is slightly having some sort of dysdiadochokinesia on repetitive movement on the left hand. This is probably because the patient is right handed.
EXTREMITIES: There is no pedal edema. Peripheral pulses are intact.

DIAGNOSTIC DATA: Laboratory data includes labs from August 24 in Kansas. CBC: White cell count 13.4; hemoglobin 13.7; hematocrit 40.9; and platelets 285,000,. Chemistry from August 25, also from Kansas, sodium 141, potassium 3.4, chloride 104, bicarbonate 25, BUN 24, creatinine 0.8, blood glucose 213, calcium 8.5, magnesium 1.3, total protein 5.9, albumin 2.8, alkaline phosphatase 56, AST 64, ALT

50. Cardiac markers are negative. Urinalysis shows rbc's 5 to 10. Imaging studies: EKG normal sinus rhythm with first-degree heart block and multiple PVCs. He also has T-wave inversion in the lateral leads and kind of flat T-waves in the anterior leads with left axis.

IMPRESSION AND PLAN:
1. Obstructive uropathy with overflow incontinence most likely secondary to enlarged prostate. We cannot rule out prostate cancer at this time. Patient is having Foley catheter right now and he is making a good amount of urine. He is also started on Flomax 0.4 milligrams and we will have the patient to be assessed by Urology for possible prostate surgery.
2. Urinary tract infection. The patient actually was on Rocephin that was started in Kansas. His urinalysis does not show much of infection, but his computed tomography (CT) scan showed some stranding in the perinephric area and in the periureteric area, second possible inflammation. Also, I could not find any bacteria in his urine that could also justify him being on Rocephin. For now, we will continue his Rocephin as he has some inflammatory markers and we will check his procalcitonin as well.
3. Uncontrolled diabetes. Patient has been diabetic for the last 4 years, but he has never been on any kind of antidiabetic medication. His hemoglobin A1c is 10.8, which is obviously uncontrolled, so we will keep him on sliding scale insulin for now and he will probably need to be started on oral antidiabetic medication to take care of his uncontrolled diabetes.
4. Deep vein thrombosis (DVT) prophylaxis. The patient is moderate risk for deep vein thrombosis (DVT), but he declined anticoagulant shots and he agreed on receiving sequential compression devices (SCDs) instead.
5. Resolved acute kidney injury. The patient's creatinine from 2 days ago was 1.5 and since yesterday it came back to his baseline of 0.8. So for now, we will increase oral hydration and we will monitor his kidney function as well.
6. Case will be discussed with the team in the morning.

    Veteran My HealtheVet brochure.

Pt ambulatory to clinic, unstable in gait, leaning against wall while walking
down hall, accompanied by wife.  States had right inguinal hernia repair at
Amarillo VA on 8/19/15 and was dismissed on 8/20/15.  States since 8/20/15  "I
have no bladder control.  I don't know when it is going to start or stop until
running down my leg."  Also states now having constant hiccups which interfers
with speech, sleep, and eating.  "I also have no coordination.  When I get up I
feel like I'm going to fall"  and states this started on 8/21/15.  C/o no
appetite and no energy.  Was taking acetaminophen 300mg with codeine 30mg tabs,
taking 1 tab every 4 hours prn for pain but has not had any medication since
yesterday.  Has diabetes but unwilling to take medication.  Fingerstick bs at
clinic is 360.  On exam abd is protruded, rounded, and firm with pain rated as
4-5/10.  No bowel sounds heard x 4 quadrants.  Last bowel movement was on
morning of 8/20.  Right inguinal incision open to air with staples intact.
Wound edges approximated well with no redness or drainage noted.  T 98.7, P 85,
R 20, b/p 137/90, SpO2 93%.

72YO WHITE MALE

CC: Decreased responsiveness

HPI: Pt is a 72 yo CM with PMH of Dm, Hl, BPH who was brought to the ER by his
wife due to decreased responsiveness and just generalized weakness. patient was
altered at the time of exam and most history was obtained from ER physician.
apparently pt and his wife were travelling from somewhere and he got sick on the
way.

Pt had a inguinal hernia repair about 1 month ago and  had been having issues
with urinary retention after that. he was admitted for bladder outlet
obstruction and was found to have hydronephrosis/pyelo and was treated with
rocephin. Pt

Has had lack of appetite for last 1-2 wks and more weakness.
Pt was very unsteady on his feet last 2 days and began vomiting coffee ground emesis last night. Also had dark melanotic stools. Some vague abd pain.
Subjective fevers/chills.

Pt initially presented with BP in 60s per ED physician but has responed to 2 L bolus. NG tube was put under suction which drained > 1400 ml black fluid.
patient was also found to have gas under the diaphragm on chest xray and surgery was consulted.

IMAGING:

Sept 17,2015

Impression:

No significant interval change in the left-sided pneumothorax
with chest tube now present.

Interval subcutaneous emphysema tracking along the left lateral
chest wall.

*** Exam date: SEP 16, 2015@22:48 Proc: PORTABLE CHEST ***
Impression:
1. Endotracheal tube tip is 4.6 and is above the carina.

2. There is left pneumothorax of approximately 40 % volume.

3. Lucency underneath the right hemidiaphragm consistent with
free intra-abdominal air. This is unchanged from prior.

*** Exam date: SEP 16, 2015@19:53 Proc: ABDOMEN 1 VIEW ***
Impression:

1. Findings consistent with partial small bowel obstruction.

*** Exam date: SEP 16, 2015@19:31 Proc: PORTABLE CHEST ***

ASSESSMENT/PLAN:

1. Severe sepsis/septic shock 2/2 small bowel necrosis and perforation and ?UTI
- has a history of bladder outlet obstruction and b/l pyelonephritis recently
- WBC increased, tachycardic, tachypneic,elevated lactate at 9.7
- given 4lt IVF in the ER 2/2 hypotension
- on maintainance IVF @ 125ml/hr
- started on vanc and zosyn; renally dose antibiotics 2/2 AKI
- also on vasopressors now
- surgery took the patient to the OR and found 75% necrotic bowels which were resected; condition critical

2. AMS
- likely 2/2 sepsis
- patient was more responsive since coming to the ER

3. DM
- has history of poorly controlled DM and non compliance with medications
- initial BS 755
- ketones negative in both blood and urine
- last A1c was >12
- was started on glipizide but likely non compliant
- was given 10U IV insulin in the ER and then started on insulin drip
- monitor BS and BMPs; not DKA; serum osmolality pending

4. ?UGIB
- pt had some coffee ground emesis
- NG tube was put in the ER and put under suction with >1400 ml of dark blackish liquid in around 2 hours
- pt was started on PPI drip
- also likley 2/2 ischemic gut

5. hematuria
- gross hematuria
- cause unknown
- pt taken to the OR

6. BPH
- hold BPH meds 2/2 hypotension

7. Bowel perforation
- free air seen under the diaphragm on the CXR
- surgery was consulted and took the patient to the OR asap; found frankly gangrenous necrotic small bowel.

8. ? CHF
- pro- BNP elevated at >18000
- will order a TTE

9. Pneumothorax
- iatrogenic
- 2/2 subclavian line placement
- s/p chest tube placement

10. hyponatremia
- new onset
- will recommend slow correction to prevent brain injury

11. Anion gap metabolic acidosis
- 2/2 lactic acidosis
-

12. AKI
- s/p fluid resuscitation; repeat creatinine check awaited
- baseline creatinine around 1; came with 4.4 in ER

13. atrial fibrillation
- new onset A fib
- patient hypotensive and on pressors so will avoid beta blocker or CCB
- recommend checking electrolytes and replacing them.
- keep K>4 and Mg>2; replace calcium for normal Ionized calcium levels
- can give bolus amiodarone and start on amidarone drip if needed.

13. Code status
- full code but patient doesnt want to be on prolonged life sustaining machines

DISPO: pt was taken by surgery on their service post-op. MICU will follow as consult and continue to give recs about management.

Patient has had Retinopathy/Optometry appointment:  YES 04-18-13 in ALBQ.

Education provided:      Instructed Mrs. Hopkins the pt.'s A1c is 13.4 and the
normal is <6.0 but we would like to get his down to 9 then within the normal
range.  I instructed her the A1c and average of what his blood sugar levels have
been in the past 3 months.  The patient is currently monitoring his blood sugars
every other day and I instructed her an appt., will be rescheduled soon in order
to change his finger sticks to daily and offer him a few more services he may
benefit from,  maybe tele-health and a dietary consult.  Patient was given
insulin during this hospital stay.  Labs will be repeated at the next scheduled
appt., with Team Patriot.

Handouts/Pamphlets given:
Team discussion/comments:  The team agrees with the above instructions.

Time: 15-18 minutes.

INTERVENTIONS
  Education
    Provide patient/caregiver education regarding causes and prevention of
    pressure ulcers.
  Pressure-Redistribution Measures
    Use specialty bed
      Specify type: Hill Rom
    Turn and reposition every 2 hours while in bed, using pillows to
    separate pressure areas
  Maximize Mobilization
    Perform range of motion exercises when turning/repositioning
  Manage Moisture
    Maintain clean and dry skin
    Apply protective barrier ointment
  Manage Nutrition
    Monitor fluid/food intake
  Reduce Friction and Shear
    Use a bed trapeze or pull sheet to lift up in bed or turn
    Raise the knee when elevating head of bed
    Keep head of bed at or below 30 degrees when not eating

Isolation - no

Maintenance/Site Care:(Peripheral/Central Lines)
Central Line Maintenance:
Cordis Maintenance:
Maximum Barrier Precautions:
 ("Always Required" for Insertion and Dressing Changes) If a dressing
change is not needed, a N/A
response is applicable for all questions

Patient seen, examed and discussed with team.

72 y/o male with h/o HLD, DM2, and depression was transferred from Liberal, Kasas hospital for urinary retention and b/l hydronephrosis and hydroureter. He had right inguinal hernia repair on 8/19/15 here. According to the patient, after he was discharged after the surgery, he had unsteady gait, urinary incontinence and hick up. On questioning, he reported that he did not have urinary hecitency or dribbling. No feelings or incomplete voiding or urinary urgency. He went to Liberal OPC and was sent to local hospital on 8/24/15. There CT abd/pelvis revealed b/l hydronephrosis and hydroureter. Bladder scan showed 700cc residue. A Foley was inserted that resulted in 500cc of urine. He was hospitalized and started on flomax and rocephin there. At admission, he has mildly elevated BUN/creatinine. These went back to baselin in 2 days. Transferred here for further care because it was unsure there if he was able to walk since the patient declined rehab evaluation there. During mmorning round, the patient reported that he fould his unsteadiness resolved this morning and he was able to walk to the bathroom and back with no difficulty. He was not taking any medicine before he was hospitalized in Liberal although he has DM2. His BS was >400 when he presented to Liberal Hosital.

Assessment:
1) Urinary incontinence, most commen cause in a male at this age is overflow
incontinence 2' to BPH. The patient's lack of subjective incomplete voiding or
urinary urgency and his uncontroled DM2 makes neurogenic bladder another
possibility.
2) DM2, BS not well controlled.

Plan:
1) Discharge with indwelling Foley, leg bag and follow in Urology Clinic in 1 to
2 weeks for voiding trial. He had a Surgical Clinic follow up on 9/1/15, will
try to arrange the Urology Clinic follow up on the same day.
3) He needs out patient hypoglycemics. will start him on glipizide and ask him
to follow up with PCP in Liberal Clinic.

      AUTHOR: ALLISON,WALTER M     EXP COSIGNER:
     URGENCY:                            STATUS: COMPLETED

PATIENT NAME:  HOPKINS, MARSHALL H

DATE:  11/19/2010

PROCEDURE: Treadmill Cardiolite.

Resting EKG reveals nonspecific ST-T changes. During exercise, the T-
waves become more inverted, but there is no pronounced ST depression.
There is an occasional PVC and PAC.

Post exercise, again occasional PVC and PAC. The T-waves turn upright
when the heart rate goes up, but there again is no ST segment shift of
significance.

The patient walked on the treadmill for 7 minutes and 21 seconds,
achieved a heart rate of 155. Heart rate stated by the computer of 171 is
incorrect. Although he did achieve greater than 85% of his MPHR.

CONCLUSION:
1. No reproduction of symptoms.
2. Occasional premature ventricular contractions (PVC) and premature
atrial complex (PAC).
3. ST-T changes as described above but no classic ischemia.
4. See image report.

Temporary Address Start: MAR 27,2014
Temporary Address Stop: MAY 27,2014

Dear MARSHALL HUGH HOPKINS,

This letter is written in followup of your recent visit.

As we discussed, you have diabetes with very high blood sugar (BS) on average. We know this because your A1C is 9.8, average BS for the last 3 months is 240.

We will provide a glucose meter and supplies, so that you can monitor your home BS readings. Please call the clinic to arrange provision of the meter and instructions.

Your surgery appointment is 4/23/14 at 9:30am. It is not the surgery but a pre-surgery evaulation.

If you have any questions, please call.

Sincerely,

Elizabeth Dean, D.O.

MEDICAL NUTRITION THERAPY
SEP 17, 2015
PATIENT: HOPKINS,MARSHALL HUGH
Reason for visit: Initial Evaluation/Screening

NUTRITION ASSESSMENT: Veteran is a 72 y/o with PMHx significant for DM, BPH, and
recent hernia repair and hospital stay for " hydronephrosis/pyelo", BOO presents
to the VAMC with sepsis secondary to bowel necrosis, perforation, and ?UTI. Pt
s/p exploratory laparotomy, small bowel resection, and temporary abdominal
closure, POD#1. Pt remains critical, hemodynamically unstable, and poor
prognosis per review of the medical record and discussion on ICU rounds. Of
note, pt has 120cm of small bowel remaining per MD.

Energy Intake: unable to assess energy intake. Per H&P, pt with poor appetite x
1-2 weeks pre-admission. Per review of nutrition note completed in Amarillo, pt
was eating 100%/adequately in August. No family present to obtain further
nutritional history.

Current Diet Order: NPO
Current/Pertinent Meds: Vasopressin (10cc/hr), Levo (running), Propofol (OFF), Insulin gtt (22cc/hr), Protonix, NS @ 125mL/hr

Laboratory Data:

HCT3	25.4L	%	40 - 51	17-Sep-15
PO4	5.1H	mg/dl	2.2 - 4.5	17-Sep-15
MAGNESIUM	2.0	mg/dl	1.5 - 2.2	17-Sep-15
UREANITROGEN,BL	93H	mg/dl	7 - 23	17-Sep-15
SODIUM	135	mmol/	134 - 144	17-Sep-15
POTASSIUM	4.0	mmol/	3.5 - 5.0	17-Sep-15
GLUCOSE	337H	mg/dl	70 - 110	17-Sep-15
CALCIUM	6.5L	mg/dl	8.5 - 10.2	17-Sep-15
ALBUMIN	1.9L	g/dL	3.4 - 5.2	17-Sep-15
CREACTIVEPROTEI	467.6H	mg/L	0.0 - 4.0	17-Sep-15
CREATININE2	3.7H	mg/dl	.7 - 1.6	17-Sep-15

Blood Pressure: 125/76 (09/16/2015 22:00)
Comments: hemoglobin a1c in July is uncontrolled at 13.4%, pt currently ordered an insulin gtt to help better control glucoses (236-436mg/dL). Hypocalcemic (primary repleting). Renal function noted.

Skin Integrity: +surgical incision
BRADEN SCALE: 12-13 indicating moderate risk for HAPU

Assessment of Inflammation: marked inflammation as evidenced by CRP, sepsis

Physical Assessment:
Subjective evaluation noted patient to have deficits in the following aspects of body composition: none noted.

Anthropometrics:
BMI: 23; acceptable
HT: 182 cm (8/2015)
WT: 77 kg (RN admission note, 169 lbs)
WT: 175 lbs (8/2015)
DBW: 178 lbs
%DBW: 100%
UBW: 180 lbs (wife report back in August, pt was intentionally trying to lose this weight)
Weight Loss: possible 6 lbs weight loss x 1 month (3%)

Estimated Nutrition Needs (PENN State)
REE: 1552, Ve: 11, Tmax: 98
Calorie range: 1742 kcal
Protein range: 77-92g pro/day (1-1.2g pro/kg for AKI)
Fluid range: 1 ml/kcal or per PCP

Nutrition Status: NS3/Moderate

Based on the above findings malnutrition classification per AND/ASPEN criteria is as follows: n/a

NUTRITION DIAGNOSIS - Inadequate oral food and beverage intake related to bowel necrosis, hemodynamic instability as evidenced by NPO status

NUTRITION INTERVENTION:
Nutrition Prescription: avoid prolonged NPO status

Food/and/or Nutrient Delivery: NPO status to continue as pt receiving high dose pressors and currently hemodynamically unstable. Will continue to evaluate appropriateness of nutrition support with ICU team.

Nutrition Education: n/a; pt intubated/sedated. Will need nutrition education on an outpatient basis.

NUTRITION MONITORING
-NPO status (< 7-10 days)
-Labs: (Hemoglobin a1c and accuchecks)

05/13/2011 ADDENDUM STATUS: COMPLETED
Contacted pt and informed of CT results and recommendation to repeat UA in 3 months (can do this at Liberal clinic). Pt verbalized understanding.

/es/ Elma Fletcher
RN, BSN
Signed: 05/13/2011 13:58

05/17/2011 ADDENDUM STATUS: COMPLETED
Per PCP request, contacted pt to discuss hyperlipidemia and diabetes. Pt states that he normally follows a very healthy diet but "fell off the wagon" the last few weeks. He does not believe he has diabetes and states that he and his wife do not believe in taking medications; they are into natural foods and herbals. Discussed that A1c is a 90 day average of blood glucose. Pt would like to repeat lab work in 3 months. Also, mentioned glucometer; pt indicated that his wife may have a meter that he can use (was given to them by someone who was a diabetic and was able to discontinue medication). Pt also states that he usually has blood in his urine during most of his physicals. Transferred pt to TA to make appt in 3 months.

Signature Informed Consent for
GROIN - HERNIA INGUINAL (OPEN) (HERNIA INGUINAL (OPEN))
1. Anatomical Location: Repair of right inguinal hernia
2. Informed consent was obtained at 2:03 PM on August 13, 2015.
The full consent document can be accessed through Vista Imaging.
3. Patient name: HOPKINS, MARSHALL HUGH
4. The patient HAS decision-making capacity.
5. Surrogate (if applicable):
6. Reason for the treatment (diagnosis, condition, or indication):
This procedure is performed in patients with an inguinal hernia (an abnormal bulge in the groin area, due to a weakness in the abdominal wall).

7. Treatment/procedure: The goal of this procedure is to surgically repair an inguinal hernia (the intestines push through a weak spot on the inguinal canal, a triangle-shaped opening in the abdominal wall near the groin).

During the operation, the surgeon makes an incision (cut) in the groin. The segment of intestine that is bulging through the abdominal wall is located and placed back into the abdominal cavity. Next, the muscle and fascia (a sheet of tissue that envelops or binds soft body structures together) are stitched closed to repair the opening in the abdominal wall. Often, a piece of plastic mesh is used to reinforce the closure.
Once the hernia repair is performed, the surgeon closes the incision in layers and places a dressing over the surgical site.

8. Anesthesia will be administered.
9. Consent to Blood Products (if applicable):
It is not expected that blood products will be used in this treatment/procedure.
10. Practitioner obtaining consent: Ahmed,Syed H (PHYSICIAN)
11. Supervising practitioner:
12. Practitioner(s) performing or supervising treatment/procedure (if not listed above):
13. Witness Name(s):

14. Comments:
Tissues removed during the course of this treatment/procedure will be disposed of in accordance with hospital procedures.

 --- Original Document ---

09/18/15 DEATH PRONOUNCEMENT:
I have identified the patient by first name, last name and Social Security
number. Patient's code status at the time of death was DNR - Do Not Resuscitate
The attending physician of record is Gayle Minard and
the attending physician has been notified

This patient does not respond to verbal or tactile stimuli.  There is no
carotid pulse. There are no respirations. The pupils are fixed, midline and do
not respond to light. I have listened for a heartbeat and observed for
respirations for at least 1 minute.  There is no heartbeat and no respirations.

Date and time of death: Sep 18,2015@08:38
Name of person contacted:HOPKINS,DARLENE R
The Family/NOK or concerned individual contacted? Yes contact made with spouse

The family declines an autopsy

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

How often did you have a drink containing alcohol in the past year? Never (0 points)

How many drinks containing alcohol did you have on a typical day when you were drinking in the past year? 0 drinks (o points)

How often did you have six or more drinks on one occasion in the past year? Never (0 points)

Total score of above questions: 0

DRUG USE SCREENING

In the last 6 months, have you used any illegal drugs or misused any prescription medications?
NO

MENTAL STATUS SCREENING
Is the patient threatening to hurt or kill self?
No
Is the patient looking for ways to kill self; seeking access to pills, weapons or other means?
No
Is the patient talking or writing about death, dying or suicide?
No
Does the patient have concerns about hospitalization? No
If yes, please explain:

Does the patient have trouble sleeping? No
If yes, please explain:

Does the patient have any fears about this admission or the treatment plan? No
If yes, please explain:

Does the patient have family or friends for emotional support? Yes

What usually helps the patient relieve stress? uses mental relaxation, work

Affect: appropriate

Mood: calm

Behavior: cooperative, friendly

Thought process: organized

TOBACCO SCREENING
Patient has not used any forms of tobacco in the past 30 days.

NUTRITIONAL/METABOLIC SCREENING
The patient has the following nutritional/metabolic issues:
No problems identified.
ORAL SCREEN

Patient:
has own natural teeth
DYSPHAGIA SCREENING

Dysphagia Risk Factors:
No problems identified
Swallowing Status Screen:
No abnormality observed

ADVANCE DIRECTIVE SCREENING
Patient has an advance directive and it is scanned into record. (see postings)

Does the advance directive still reflect the patient's wishes?
Yes

ORGAN/TISSUE DONATION
Patient is an organ/tissue donor.

OBSERVATION FOR ABUSE/NEGLECT

*** AMBULATORY CARE NOTE Has ADDENDA ***

PATIENT NAME: HOPKINS, MARSHALL H

DATE: 08/23/2012

SUBJECTIVE: The patient reports today earlier than his annual followup. The patient was last seen in April 2012. Reported depression and wanted it to be evaluated. The patient has a depression listed as a service-connected disability. Discussed about his other chronic comorbidities, as well, at the current interview.

PAST MEDICAL HISTORY: Reviewed.

CURRENT MEDICATIONS:
1. Cholecalciferol.
2. Ergocalciferol.
3. Cyanocobalamin injections.

ALLERGIES: Patient is not known to have allergy to prescription medications.

FOR OFFICIAL USE ONLY (FOUO)
Disclaimer: "The information contained in this document may contain privileged and confidential information including patient information protected by federal and state privacy laws."
COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

REVIEW OF SYSTEMS: Negative for most systems.

PHYSICAL EXAMINATION:
VITAL SIGNS: Temperature 97.9, pulse 70. Respiratory rate is 18, blood pressure 142/90. Weight is 207 pounds. Pain is 4/10, 10 being the worst pain on a scale of 10, pulse oximetry 96% on room air. BMI is 28.
GENERAL: Alert, oriented x3, cooperative, in no acute distress.
ABDOMEN: Soft and nontender. Bowel sounds heard.
EXTREMITIES: No pedal edema.
NEUROLOGIC: Cranial nerves II through XII normal. Strength 5/5. Balance and gait normal. Sensation preserved.

ASSESSMENT AND PLAN:
1. Depression. Ran Patient Health Questionnaire-9 (PHQ9) questionnaire. Patient reported weired dreams recently and, hence, introduced patient to the Mental Health social worker for definitive management.
2. Vitamin B12 deficiency. The patient received vitamin B12 injection at the clinic, and we agreed to take on a once-a-week basis for a total of 18 more injections.
3. Vitamin D deficiency. As the patient did not have any financial obligation, gave not only ergocalciferol but also cholecalciferol through the Veterans Affairs (VA).
4. Patient consistently refusing preventive vaccines of influenza (flu) and pneumonia, colorectal cancer screening. Patient is refusing also treatment for diabetes mellitus type 2 and dyslipidemia. Offered patient to get started on aspirin for stroke and heart protection, which was also refused by the patient. Patient to be followed up as needed.

      AUTHOR: HARRIS,HEATHER R     EXP COSIGNER:
     URGENCY:                          STATUS: COMPLETED

Mr. Hopkins was seen for 60 minutes to address depression.  He was last seen in
this clinic on 10/24/12.  He stated he continues to struggle with sleep issues
despite having a sleep study and starting on the CPAP.  Mr. Hopkins also reports
lack of motivation, loss of interest in activities, and emotional numbing.  He
feels like he has ran out of dreams and has accomplished everything he wants to
accomplish.  He is struggling with finding a purpose in life.  He stated he is
volunteering and finds that to be rewarding and also likes to study religion.
He is working but does not enjoy what he is doing.  He stated he has retired in
the past and doesn't like not having a job.  He does not relate his purpose with
his family saying "they're doing fine on their own."

Mr. Hopkins stated he wants to know why he is depressed.  Provided information
to veteran regarding depression, however; he appeared fixated on wanting to know
the exact cause of his depression.

Impressions:
Appearance: dress appropriately with good hygiene
Behavior: Appropriate.
Speech: normal rate and volume
Mood: depressed
Affects: dysthymic

RESIDENT SURGEONS:
1. Elena Paulus, MD
2. Zachary Stiles, MD

INDICATIONS FOR OPERATION: 72-year-old male who presented with the onset of coffee ground emesis, melena, abdominal pain. On physical examination, he had findings consistent with peritonitis, and on workup he was found to have a lactic acidosis, as well as free air underneath his diaphragm on imaging, with dilated loops of bowel. After the risks, benefits, and alternatives of surgery were discussed in detail with the patient and with his wife, he was taken emergently to the Operating Room. He was on 50 mcg of Levophed en route to the Operating Room.

OPERATIVE PROCEDURE IN DETAIL: The patient was brought to the Operating Room, placed in the supine position. General endotracheal anesthesia was then induced per Anesthesia. He received antibiotics with Cipro and Flagyl, and the patient's abdomen was then prepped and draped in the standard sterile fashion. A time out was performed according to protocol.

The operation began with a midline incision, with a #10 blade from below the xiphoid process to below the umbilicus. Dissection continued down through the subcutaneous tissue with the Bovie electrocautery. The abdomen was then entered sharply and then it was opened the length of the incision with the Bovie electrocautery.

Upon entering the abdomen, there was noted to be a frankly necrotic, dead, gangrenous small bowel. The proximal portion of the small bowel was spared and there was 120 cm of pink, small bowel that was healthy from the ligament of Treitz, and then afterwards there was frankly necrotic areas for the remaining of the small bowel. The Doppler was used and there was a pulse that was detected within the superior mesenteric artery. Afterwards, at the point of frankly necrotic bowel, the point of transection was demarcated with the hemostat and then a GIA-55 stapler was used in order to transect the small bowel. Just proximal to the ileocecal valve, the point of distal transection was also demarcated and a GIA stapler was used in order to divide this portion of the bowel. Next, the LigaSure was used in order to divide the mesentery and then the small bowel was sent off as a specimen. At this point, inspection continued and there was noted to be no perforation in the duodenum, stomach, and the lesser sac was entered and there was noted to be no perforation in the posterior wall of the stomach. The bladder appeared very shriveled and irregular appearing. The area of the plug mesh in the patient's right groin was identified. The abdomen was then irrigated with normal saline and then a temporary cassette cover was sewn to the skin with a PDS suture. Kerlix, ABD pads, and an abdominal binder were then placed on the patient's abdomen.

Next, the patient's left neck was then prepped and draped in the sterile fashion, and using an ultrasound-guided technique, a left IJ Cordis catheter was then placed using sterile Seldinger technique. It was placed on the first stick. Subsequently, the Cordis catheter was threaded through. The patient then was transferred to the Surgical ICU in critical condition on Levophed as well as Neo-Synephrine.

Attending physician, Dr. Santiago Vera, was present and scrubbed throughout all critical portions of this operation, with an attending level of involvement B.

The patient's wife was discussed with at the end of this operation, the critical nature of the patient's state, and the

May 17, 2011	Addendum to PRIMARY CARE NP (T)(S)		FLETCHER,MARIA ELMA		AMA-PC AMARILLO			VistA	AMA

Notes ~ Addendum to PRIMARY CARE NP (T)(S)

     LOCAL TITLE: Addendum
STANDARD TITLE: ADDENDUM
DATE OF NOTE: MAY 17, 2011@08:55:41 ENTRY DATE: MAY 17, 2011@08:55:41
      AUTHOR: FLETCHER,MARIA ELMA EXP COSIGNER:
     URGENCY: STATUS: COMPLETED

Per PCP request, contacted pt to discuss hyperlipidemia and diabetes. Pt states
that he normally follows a very healthy diet but "fell off the wagon" the last
few weeks. He does not believe he has diabetes and states that he and his wife
do not believe in taking medications; they are into natural foods and herbals.
Discussed that A1c is a 90 day average of blood glucose. Pt would like to
repeat lab work in 3 months. Also, mentioned glucometer; pt indicated that his
wife may have a meter that he can use (was given to them by someone who was a
diabetic and was able to discontinue medication). Pt also states that he usually
has blood in his urine during most of his physicals. Transferred pt to TA to
make appt in 3 months.

*******FUNCTIONAL ASSESSMENT***********
  Dress/Groom: Self Care
  Feeding: Self Care
  Home routine: Self Care
  Toileting: Self Care
  Bathing: Self Care
Wandering/ Missing Patient Risk**
Does the patient:
No Lack cognitive ability (either permanently or temporarily) to make
            relevant decisions.
No Have physical or mental impairments that increase their risk of
            harm to self or others.
No Are considered dangerous to self or others
No Have a court-appointed legal guardian

If any above answers are yes the patient is incapacitated.
 Is the patient independently mobile?

If patient is independently mobile, contact police service (dial 66)for
enrollment in the LifeSaver program

If patient is not independently mobile, continue to monitor for changes in
mobility.

If patient is absent from the treament area, contact charge nurse and refer
to facility MCM.

*******SPIRITUAL - CULTURAL***********
          Other
Are there religious practices or spiritual concerns you want the chaplain,
your physician, an other health care team members to immediately know about?
No If so, explain and initiate a consult to Chaplin Services.
Mormon
Physical Assessment (for Med/Surg patients)

Respiratory:
Regular, unlabored, no abnormal breath sounds
Cardiovascular:
Peripheral pulses present bilaterally, no edema, regular heart rate. Red swollen
scrotum "It's been like that since surgery last week."
Neurologic
Alert, oriented x 3, follows commands.
Musculo Skeletal:
ROM all joints, hand grips equal.
Other:
States "I am unsteady on my feet lately"

Gastrointestinal:
Abdomen soft, bowel sounds present, no nausea/vomitting/diarrhea.
Other:
Last BM: 8-26-15

Genito-Urinary:

      AUTHOR: WATTS-HARKNESS,KATH EXP COSIGNER:
     URGENCY: STATUS: COMPLETED

PATIENT NAME: HOPKINS,MARSHALL

CHIEF COMPLAINT: This is a 66-year-old gentleman presenting to the clinic with inquiry as to if the VA is going to approve his chiropractic treatments that he has been receiving and paying on his own for the past for approximately ten years due to a motor vehicle accident he was in in which he was rear-ended while he was working on duty in Colorado Springs, Colorado. He continues to complain of neck and back pain. He states that he has had difficulty over the past several months with his neck, in particular due to sleeping on some motel beds that placed his neck in misalignment. He states he had received chiropractic treatment from Dr. Buckley in Garden City, Kansas, but he states that in the past month now he has felt that his neck is becoming out of alignment again and wishes to have another treatment, but for the VA to pick this up. This gentleman has undergone the Amarillo VA and Case Management review of his medical records and some documentation to determine whether he had any cervical subluxation. Most recent x-ray reports said that subluxation was not present and that neck injuries were chronic in nature. Therefore, the VA could not cover any outside chiropractic treatments. His x-ray reports did show, though, that he does have cervical spur on C5 and C6 with a bilateral neural foramen encroachment by the spurs. At the time, though, this x-ray did show that he was in good alignment with no subluxation or spondylolisthesis.

PAST MEDICAL HISTORY:

FOR OFFICIAL USE ONLY (FOUO)
Disclaimer: "The information contained in this document may contain privileged and confidential information including patient information protected by federal and state privacy laws."
COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

1. Significant for motor vehicle accident in 1991, incurring neck and back injuries.
2. Fibromyalgia.
3. He states he has tic douloureux.
4. Histoplasmosis.
5. Hyperlipidemia.

ALLERGIES: No known allergies.

OBJECTIVE: Examination on the gentleman shows:
HEENT: Normocephalic. Eyes: PERRL. EOMs are intact. Sclerae is white. Conjunctivae is pink. Ears: TMs are gray and intact with no lesions. External ears are clear. Oropharynx is moist and pink with no lesions.
NECK: Supple. Trachea is midline. No thyromegaly is noted. No JVD or bruit. No cervical adenopathy.
LUNGS: Clear to auscultation bilaterally. No rales, rhonchi, or wheezing.
HEART: Regular rate and rhythm. No murmur, gallop, or rub.
ABDOMEN: Soft, nontender, nondistended. Positive bowel sounds. No organomegaly.
RECTAL: Deferred.
EXTREMITIES: No peripheral edema. Peripheral pulses are 2+. Full range of motion. Grips are equal bilaterally.

ASSESSMENT AND PLAN: Chronic back and neck pain. Patient does not wish to take any medications whatsoever for his pain. He does continue to seek VA compensation for the injury that he stated was incurred while he was on military duty in Colorado Springs. I informed him that if he had documentation to support that, it needs to be submitted, as he states that he should be receiving compensation and the chiropractic care. He decided that he will contact his current chiropractor for documentation. Also, he will obtain documentation from his former chiropractor, who is now deceased, but the information is still available to him in Colorado Springs. He will return to clinic when he obtains this information, and we will discuss further plans.

==========

--- Original Document ---

09/01/15 UROLOGY-OUTPATIENT (C):
PATIENT NAME: HOPKINS, MARSHALL

DATE: 09/01/2015

HISTORY OF PRESENT ILLNESS: 72-year-old gentleman presents in consultation regarding postoperative urinary retention. Patient underwent hernia repair last month and developed postoperative urinary retention. He initially presented to the hospital in Liberal, Kansas. CT at that time reported bilateral hydroureteronephrosis and bladder distention (films are not available for my review). Foley catheter was placed and patient was transferred to this facility for continued care.

Hospital course was uneventful and patient was discharged with indwelling catheter. No previous history of urinary retention or bothersome lower urinary tract symptoms prior to surgery. He currently denies fever, chills, dysuria, or gross hematuria.

LABORATORY DATA: PSA 1.04 and serum creatinine 0.77 a few weeks ago.

PHYSICAL EXAMINATION: EXTERNAL GENITALIA: Indwelling Foley catheter with clear urine output. DIGITAL RECTAL EXAMINATION: Prostate estimated be 40 cc in volume with a boggy consistency. No suspicious induration or nodularity appreciated.

ASSESSMENT/PLAN: Postoperative urinary retention, as above. Foley catheter is removed for voiding trial. Patient will continue tamsulosin as prescribed. Will issue an empiric course of antibiotics and repeat computed tomography (CT) abdomen and pelvis today. Return to clinic later this month for a postvoid residual. Routine urinary retention warnings were given. Schedule routine urology follow up in 3 months for re-evaluation.

09/03/2015 ADDENDUM STATUS: COMPLETED
Pt presented to the Emergency Department 09-03-15 due to inability to void. PVR was > 999 mL. Foley catheter was replaced and left indwelling. Have scheduled diagnostic cystoscopy 09-10-15. Pt was called and message left regarding upcoming appointment. He was encouraged to call this clinic if any questions.

AUTHOR: WATTS-HARKNESS,KATH EXP COSIGNER:
URGENCY: STATUS: COMPLETED

*** AMBULATORY CARE NOTE Has ADDENDA ***

PATIENT NAME: Hopkins, Marshall

CHIEF COMPLAINT: This is a 67-year-old veteran presenting for an annual visit. He takes no medications.

SUBJECTIVE: He continues to use supplements and herbals for all of his needs. At this visit though he is complaining that he has experienced 2 episodes in the last month of chest pain and pressure running from one axilla to the other. He states that it felt like "a pulled muscle." It lasted for several minutes and he did have some lightheadedness associated with this, but denies any nausea, vomiting, or diaphoresis. Each episode is associated with mild exertion. He denies any episodes at rest.

PAST MEDICAL HISTORY: Significant for:
1. Motor vehicle accident in 1991 with neck and back injuries.
2. Fibromyalgia.
3. Tic to the right side of the face.
4. Hyperlipidemia.

ALLERGIES: No known allergies.

IMMUNIZATIONS: He takes none.

REVIEW OF SYSTEMS: Chest pain with chest pressure, 2 episodes within the past month with mild exertion. Pain reaching from the axilla to axilla and associated also with chest pressure and some lightheadedness. He denies any diaphoresis, syncope, and no peripheral or pedal edema. He also denies any changes with bowel or bladder habits. No diarrhea, constipation, melena, or abdominal pain. No changes with urination. No urgency, hesitancy. Nocturia is once per night, but he denies any dysuria or hematuria. His appetite remains robust. He denies any nausea, vomiting, or epigastric upset. He denies any problems with range of motion. He has some impairment to his back and his neck due to previous motor vehicle accident for which he continues to receive some chiropractic care. He denies any mood changes, anxiety, or depression.

OBJECTIVE:
VITAL SIGNS: Blood pressure is 112/60, pulse 56, respirations 16, temperature is 96.1. Weight 201.
GENERAL: He is alert, awake, and in no apparent distress.
HEENT: EOM's are intact. PERRL. TMs are gray and intact. Oropharynx is moist and pink. No lesions.
NECK: Supple. Trachea is midline. No thyromegaly, JVD, or bruit.
CARDIOVASCULAR: Regular rate and rhythm. S1, S2. No gallops, murmurs, or rubs. I possibly hear a split.
RESPIRATORY: Clear to auscultation bilaterally. No rales, rhonchi, or wheezing.
ABDOMEN: Soft, nontender, and nondistended. Positive bowel sounds. No organomegaly is noted.
GU: Deferred per request.
MUSCULOSKELETAL: Fast range of motion in the upper and lower extremities. Pedal pulses are 2+ and equal. No pedal edema.

ASSESSMENT/PLAN:
1. Chest pain; submit for Cardiology consult. He is instructed that if the episodes do occur again he should present himself to the Emergency Department. He verbalizes understanding.
2. Hyperlipidemia; pending lab results. He takes no medications at this time. We will advise fish oil 2000 to 3000 mg daily.
3. Chronic neck and back pain; he does continue to seek care with chiropractic and also has continued pursuing care through the VA as well.

FOR OFFICIAL USE ONLY (FOUO)
Disclaimer: "The information contained in this document may contain privileged and confidential information including patient information protected by federal and state privacy laws."
COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

4. Fibromyalgia; stable.
5. I discussed the above examination with the gentleman and he will be notified of his Cardiology consult. He continues to take no medications, relying on supplements and herbals. He will be notified of his lab results when completed. He will be seen again as necessary and for his annual appointment.

Pt presents to ED ambulatory from home c/o not being able to urinate the last 2 days. While driving to the ER pt felt urge to void so he pulled over and was able to get some relief. Pt made 3 simular stops like this on his way to the VA today. On arrival to ER post void bladder scan revealed >999ml. An 18c foley using sterile technique was inserted and 1350ml was drained from pt's bladder. Pt voiced relief put c/o lower abdominal pain. I instructed pt that he had a urology appt on 9/17/2015 for PVR, pt will need to keep this foley in place until he follows up with urology. Pt not happy but willing to do so. A leg bag with stat lock was applied to pt's rt leg to keep in place. Pt denies any complaints with todays visit and will follow up with urology as scheduled.

DATE OF CONSULTATION:11/4/08
REFERRED FOR: Please provide therapeutic modalities for lower back ad left
sciatica. Spinal manipulation if needed.
REHAB DX: clbp
GENERAL INFO: This is a pleasant 65 yo male seen as an outpatient.  He lives in
Oklahoma.  He reports a hx of lbp which he has received a great deal of physical
therapy for in the past.  He has had relief in the past from a specific
Chiropractor who uses the 'clicker techniques' (which are unavailable from PT
services). He states it usually only takes a few treatments and his pain resolves
for a year or more.  We have recently fee basised him to a chiropractor near where
he lives for neck pain.  He states that he would prefer going to Colorado Springs
instead of Garden City, though. 1 month ago he was lifting and twisting and had a
sudden onset of pain with continues and is not improving. Pain is worse with
walking and when he first sits down, better with standing and changing positions.
PAIN INDEX: now:4/10, Worst:10/10, Best 0/10

O: DESCRIPTION OF IMPAIRMENT:
Pain provoked with flexion, extension slightly decreases pain.

A:Pt is appropriate for referral to Chiro close to his home as he has had quick
relief in the past.
PATIENT EDUCATION - BARRIERS TO LEARNING:
          (x)None

P: Feebasis for referral.

 --- Original Document ---

08/26/10 AMBULATORY CARE NOTE:

PATIENT NAME:  Hopkins, Marshall

CHIEF COMPLAINT:  This is a 67-year-old veteran presenting
for an annual visit.  He takes no medications.

SUBJECTIVE:  He continues to use supplements and herbals for all
of his needs.  At this visit though he is complaining that he has
experienced 2 episodes in the last month of chest pain and
pressure running from one axilla to the other.  He states that it
felt like "a pulled muscle."  It lasted for several minutes and
he did have some lightheadedness associated with this, but denies
any nausea, vomiting, or diaphoresis.  Each episode is associated
with mild exertion.  He denies any episodes at rest.

PAST MEDICAL HISTORY:  Significant for:
1.  Motor vehicle accident in 1991 with neck and back injuries.
2.  Fibromyalgia.
3.  Tic to the right side of the face.
4.  Hyperlipidemia.

ALLERGIES:  No known allergies.

IMMUNIZATIONS:  He takes none.

REVIEW OF SYSTEMS:  Chest pain with chest pressure, 2 episodes
within the past month with mild exertion.  Pain reaching from the
axilla to axilla and associated also with chest pressure and some
lightheadedness.  He denies any diaphoresis, syncope, and no
peripheral or pedal edema.  He also denies any changes with bowel
or bladder habits.  No diarrhea, constipation, melena, or
abdominal pain.  No changes with urination.  No urgency,
hesitancy.  Nocturia is once per night, but he denies any dysuria
or hematuria.  His appetite remains robust.  He denies any
nausea, vomiting, or epigastric upset.  He denies any problems
with range of motion.  He has some impairment to his back and his
neck due to previous motor vehicle accident for which he
continues to receive some chiropractic care.  He denies any mood
changes, anxiety, or depression.

OBJECTIVE:
VITAL SIGNS:  Blood pressure is 112/60, pulse 56, respirations
16, temperature is 96.1.  Weight 201.
GENERAL:  He is alert, awake, and in no apparent distress.
HEENT:  EOM's are intact.  PERRL.  TMs are gray and intact.
Oropharynx is moist and pink.  No lesions.
```

FOR OFFICIAL USE ONLY (FOUO)
Disclaimer: "The information contained in this document may contain privileged and confidential information including patient information protected by federal and state privacy laws."
COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

NECK: Supple. Trachea is midline. No thyromegaly, JVD, or bruit.
CARDIOVASCULAR: Regular rate and rhythm. S1, S2. No gallops, murmurs, or rubs. I possibly hear a split.
RESPIRATORY: Clear to auscultation bilaterally. No rales, rhonchi, or wheezing.
ABDOMEN: Soft, nontender, and nondistended. Positive bowel sounds. No organomegaly is noted.
GU: Deferred per request.
MUSCULOSKELETAL: Fast range of motion in the upper and lower extremities. Pedal pulses are 2+ and equal. No pedal edema.

ASSESSMENT/PLAN:
1. Chest pain; submit for Cardiology consult. He is instructed that if the episodes do occur again he should present himself to the Emergency Department. He verbalizes understanding.
2. Hyperlipidemia; pending lab results. He takes no medications at this time. We will advise fish oil 2000 to 3000 mg daily.
3. Chronic neck and back pain; he does continue to seek care with chiropractic and also has continued pursuing care through the VA as well.
4. Fibromyalgia; stable.
5. I discussed the above examination with the gentleman and he will be notified of his Cardiology consult. He continues to take no medications, relying on supplements and herbals. He will be notified of his lab results when completed. He will be seen again as necessary and for his annual appointment.

09/10/14 KC-GENERAL SURGERY:
Mr Hopkins is a 71yo M who ptc for f/u RIH. Was last seen on 8/30 with concerns
of reducible RIH. However, HgA1C 9.8 with BS >240. Decision was made to attempt
to reduce BS and follow up. Pt refuses medications of any kind. Today, pt states
has cut out almost all sweets and is eating a lot of fruits since last visit.
Hernia continues to be present, and reducible at all times. Still has truss
which he wears occasionally

Mr. Hopkins was seen for 45 minute follow up to address depression.  He was last
seen in this clinic on 4/8/13.  He stated he continues to struggle with sleep
issues and has a follow up appt. for his CPAP this afternoon.  He stated since
his last visit he has done a lot of thinking and has decided his issues are
physical and not mental health related.  He also stated he has been talking to
his friends which has helped him with his perspective.  Most of session spent in
supportive counseling.  Will remain available as needed.

Impressions:
Appearance: dress appropriately with good hygiene
Behavior: Appropriate.
Speech: normal rate and volume
Mood: depressed
Affects: dysthymic
Thought processes: coherent and logic.
Thought content: No delusion.
Suicidal ideation: thoughts, no plan or intent
Homicidal ideation: No
Cognition: alert and oriented.
Insight: fair.
Judgment: good

Dx:
MDD, recurrent

PT CALLED IN REQUESTING INFORMATION.

I RETURNED HIS CALL
 HE HAD  RIH REPAIR ON 8/19/2015 . STAYED IN THE HOSPITAL OVERNIGHT AND THEN
FELT NORMAL AND WENT HOME

  TODAY HE REPORTS  NEW SEVERE HICKUPS AND MAY PASS OUT DUE TO NO AIR IF HE HAS
3 IN A ROW.
NEW: NO BALANCE. WEAK, INC OF URNIE, NO APPETITE.
IS PASING RECTAL GAS. FEELS VERY WRONG.
DENIES NAUSEA OR VOMITING,

I ENCOURAGED HIM TO COME IN TO THE ER FOR LABS AND POSIBLE CT OF HIS ABD IF
NEEDED.

HE STATES HE HAS A 12 YR OLD DAUGHTER AND HE CAN NOT COME IN AS SHE WOULD COME
HOME TO A EMPTY HOUSE.  HE WILL TRY TO COME TOMORROW.
 I ENCOURAGED HIM TO COME TODAY.

05/17/2011 ADDENDUM STATUS: COMPLETED
As discussed in the visit last Friday he DOES have diabetes based on his ^ FBS
and HbgA1c of 8.5%.He needs to restrict his carbohydrate intake, exercise daily,
and start meds as rx incld. metformin 500mg bid and his cholesterol is too high
for a diabetic so will rx pravastatin 40mg daily at bedtime.

                  RN, BSN

05/17/2011 ADDENDUM STATUS: COMPLETED
Per PCP request, contacted pt to discuss hyperlipidemia and diabetes. Pt states
that he normally follows a very healthy diet but "fell off the wagon" the last
few weeks. He does not believe he has diabetes and states that he and his wife
do not believe in taking medications; they are into natural foods and herbals.
Discussed that A1c is a 90 day average of blood glucose. Pt would like to
repeat lab work in 3 months. Also, mentioned glucometer; pt indicated that his
wife may have a meter that he can use (was given to them by someone who was a
diabetic and was able to discontinue medication). Pt also states that he usually
has blood in his urine during most of his physicals. Transferred pt to TA to
make appt in 3 months.

      AUTHOR: BLACKWELL,APRIL L    EXP COSIGNER:
     URGENCY:                            STATUS: COMPLETED

NURSING DIAGNOSIS:
1. Potential for injury related to allergies to medications, prep solutions,
   contrast dyes.
2. Potential for injury related to prosthetic devices.
3. Potential for injury related to jewelry
4. Potential for injury related to electrical equipment used during surgical
   procedure.
5. Alterations in urine elimination related to altered level of consciousness
   and sensation.
6. Potential for skin impairment related to physical immobilization during
   surgery.
7. Potential for skin impairment related to hypothermia.
8. Potential for skin impairment related to altered circulation & sensation.
9. Potential for skin impairment related to use of protective devices.
10.Potential for infection related to break in skin integrity.

Goals:
1. No evidence of injury during or immediately post-op related to medications
   or prep solutions
2. No evidence of injury related to prosthetic device left on during surgical
   procedure
3. No injury related to jewelry worn during surgical procedure
4. No evidence of injury resulting from use of electrical equipment
```

FOR OFFICIAL USE ONLY (FOUO)
Disclaimer: "The information contained in this document may contain privileged and confidential information including patient information protected by federal and state privacy laws."
COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

5. Prevent bladder distention during procedure and immediately post op
6. Absence of preventable injuries incurred while in the OR area
7. Patient will maintain temperature of 35 degrees C. (95 F.)
8. Patient will present with adequate airway
9. DNR status will be communicated
10.Adequate information will be communicated to receiving nurse upon transfer

Interventions:
1. Ask about allergies to medications, prep solutions, contrast dyes
2. Verify NPO status, procedure and site with patient; communicate to surgical team.
3. Verify Informed Consent for procedure, (Blood consent obtained when required), History and Physical completed as required.
4. Ask patient about prosthetic devices
5. Remove prosthetic devices
6. Visual check to assure that all jewelry is removed prior to coming to OR
7. If jewelry not removable, it will be secured with tape
8. Ambient room temperature warmed prior to prepping and draping
9. Assure warming blanket in place prior to draping
10. Remind anesthesia about prophylactic antibiotics prior to incision
11. Use grounding pads, check connections and placement
12. Insure no body part touching uncovered bed sections
13. Check length of proposed surgical procedure and type of procedure
14. Pad bony prominences
15. Position carefully, pad and/or support body parts as needed
16. Check pressure points
17. Apply Safety straps
18. Establish sterile field
19. Monitor for breaks in sterile technique, correct and document as needed
20. Maintain sterile field
21. Apply sterile wound cover
22. Assist with maintaining patient airway during transport post procedure
23. Verbally communicate procedure, meds given, type of anesthesia
24. Verbally communicate patient's condition
25. Surgical site infection prevention teaching conducted.

Goals met upon discharge to: PACU
-- No evidence of injury during or immediately post-op related to medications or prep solutions
-- No evidence of injury related to prosthetic device left on during surgical procedure
-- No injury related to jewelry worn during surgical procedure
-- No evidence of injury resulting from use of electrical equipment
-- Prevent bladder distention during procedure and immediately post op
-- Absence of preventable injuries incurred while in the OR area
-- Surgical site infection prevention teaching completed.
-- No evidence of infection on post-op period
-- Patient will maintain temperature of 35 degrees C. (95 F.)
-- Patient will present with adequate airway
-- DNR status will be communicated
-- Adequate information will be communicated to recieving nurse upon transfer

    Veteran My HealtheVet brochure.

Pt ambulatory to clinic states he is dizzy and eyes are blurring.  Primary
residence is in Hooker, OK and pt was driving to Kansas City this am and
developed sx while driving.  States he waited a few minutes and continued
feeling light headed and somewhat confused.  States had dizziness 3-4 times in
past 2 weeks and just thought maybe he was getting up too fast.  Night before
last vomited x 5, denies having fever.  Unsteady gait while walking down hall in
clinic this am, used wall to support self at times. States "my body just feels
strange." Hx of diabetes but refuses medication.  Latest hgb a1c 13.6 on
5/19/15. States has lost approx. 20 lbs in last month. Oriented x 4.  Pulse
irregular and weak.  Denies chest pain or nausea.  Lungs sounds clear to
auscultation.  Hand grips strong bilaterally.  Denies SOB.

Oct 03, 2006	AUDIOLOGY OUTPATIENT (C)	Audiology Consult note	BACK,CATHERINE T	Speech, Language and Hearing Service Providers	AMARILLO HCS			VistA	AMA

Notes ~ AUDIOLOGY OUTPATIENT (C)

```
     LOCAL TITLE: AUDIOLOGY OUTPATIENT (C)
STANDARD TITLE: AUDIOLOGY CONSULT
DATE OF NOTE: OCT 03, 2006@08:30     ENTRY DATE: OCT 03, 2006@15:36:39
      AUTHOR: BACK,CATHERINE T     EXP COSIGNER:
     URGENCY:                          STATUS: COMPLETED

The veteran was seen today for an audiological assessment.

Chief complaint(s) and case history:
Bilateral hearing loss. Pt reports military noise exposure as a C-130 Loadmaster
for 24 years. He reports some occupational noise exposure with hearing
protection. Pt denies recreational noise exposure. The veteran denies tinnitus,
dizziness, otalgia, and aural pressure.

Audiological Assessment:
Otoscopic examinations revealed complete cerumen impaction, bilaterally. I
requested a bilateral ear lavage from Team 2. When pt returned from his ear
lavage, otoscopic examinations revealed clear external auditory canals. Normal
tympanic membrane landmarks were observed in each ear. Puretone testing in the
right ear revealed normal hearing sensitivity at 250 - 1500 Hz and a mild to
moderate high frequency hearing loss at 2000 - 8000 Hz. All bone condution
thresholds are WNL, but there are no air/bone gaps. Puretone testing in the left
ear revealed normal hearing sensitivity at 250 - 6000 Hz and a mild hearing loss
at 8000 Hz only. Today's word recognition scores are excellent at 96% correct in
the right and left ears, respectively. Today's results were explained to the
veteran. Discussed borderline candidacy for hearing aid in the right ear. Pt
declined amplification at this time.

Recommendation(s):
Recommend annual audiograms to monitor mild hearing loss in the right ear and
candidacy/readiness for amplification.

X-RAY: RIGHT SHOULDER PENDING

ASSESSMENT/PLAN:
1. DIABETES - PT. DECLINES ANY THERAPY. DISCUSSED A1C INTERPRETATION, AVERAGE BS IN LAST 3 MOS OF 240. ALSO ADVISED PT. THAT IMPLICATIONS OF HIGH BS ARE RISK OF CARDIOVASCULAR DISEASE. LOW CHO DIET DISCUSSED AND INFORMATOIN DISPENSED.

2. SCREENING FOR MALIGNANT NEOPLASMS OF COLON - PT. DECLINES TO HAVE COLONOSCOPY. HE AGREED TO COMPLETE STOOL CARDS. DISPENSED.

3. HYPERLIPIDEMIA - DECLINES THERAPY. DISCUSSED RESULTS AND GOALS.

4. RIGHT SHOULDER PAIN - XRAY PENDING.

5. RIH RECURRENT - SURGERY CONSULT. PT. ADVISED THAT SINCE HIS BS IS HIGH THEY MAY BE RELUCTANT TO PERFORM THE SURGERY.

6. SLEEP APNEA - PT. HAS CPAP BUT DECLINES TO USE IT.

7. ALCOHOLISM IN REMISSION - ACCOLADES.

8. TOBACCO USE IN REMISSION - ACCOLADES.

PATIENT EDUCATION:
(X)Diet: weight and cholesterol management. LOW CHO, LOW FAT
()Exercise: 20 minutes or to capacity; four days per week minimum.
(X)Medications: benefits and side effects. NA. NOT TAKING AND REFUSING

MEDICATIONS.
(X)Lab: reviewed with patient. COPIES OF LABS TO PT AND DISCUSSED W/HIM TODAY.
(X)Smoking cessation: advised and supported. ACCOLADES
()Other:

CLINICAL REMINDER ACTIVITY:
  Zoster/Shingles Vac Candidate (KC):
    Zoster/Shingles vaccine (Zostavax)
      Patient counseled on health risks/benefits of Zoster/Shingles vaccine, but declined vaccine at this time.

  Screen for PTSD (KC):
    PC PTSD
      A PTSD screening test (PTSD 4Q) was negative (score=0).

      1. Have had any nightmares about it or thought about it when you did not want to?
      No

      2. Tried hard not to think about it or went out of your way to avoid situations that remind you of it?
      No

      3. Were constantly on guard, watchful, or easily startled?
      No

      4. Felt numb or detached from others, activities, or your surroundings?
      No
  Elopement Risk Assessment (KC):
    ELOPEMENT RISK ASSESSMENT
      Conditions that might lead to this decision may include but not limited to:

      High risk elopement factor(s) no longer apply
  Homelessness Screening(KC):
        In the past 2 months, have you been living in stable housing that you own, rent, or stay in as part of a household? Yes - Living in stable housing.
          Are you worried or concerned that in the next 2 months you may NOT have stable housing that you own, rent, or stay in as part of a household?
            No - Not worried about housing near future
  Medication Reconciliation (KC):
    MEDICATION RECONCILIATION
    1. I have reviewed the list of medications the patient is taking with the patient and/or caregiver and reconciled the medications to the extent appropriate to the scope of this visit.
      No differences identified
    3. Copy of reconciled medication list given to patient and/or caregiver.
    Patient verbalizes understanding:

        yes.

    Patient educated on:
      - Medication side effects
      - Importance of taking medications as prescribed
      - Updating medication list when medications are discontinued, changed, or new medications are added
      - Always bringing a list of current medication information to all doctor visits
      - Always carrying current medication information in the event of emergency situations
  Quit Tobacco Intervention:
    This patient is not a current tobacco user.
  KC-MOVE!:

      Patient was provided with weight loss counseling about risks of being overweight and/or obese by this provider. Recommendation was made for the Veteran to increase activity and participate in a weight management program.

        Patient declined/or would not benefit referral to MOVE!/Weight

==========================================================================

 --- Original Document ---

09/16/15 SURGERY:
SURGERY CONSULT

CONSULTING SERVICE: Emergency Dept Dr. Kari

REASON FOR CONSULTATION: pneumoperitoneum, SBO

HPI: Called by ED physician to evaluate pt. who had presented to Memphis VA with
complaints of vomiting coffee ground emesis and lethargy. Pt is from out of
town. Had RIH repaired in Texas 1 month ago. Per op report pt had marlex plug
and patch repair. This was a recurrent RIH. Pt also has had LIH in past.

Pt lethargic and progressively more obtunded on evaluation in ED. Most of
history obtained from wife. Pt had issues with urinary retention and
incontinence post op requiring catheterization, cystoscopy and in and out
catheterizations. Has had lack of appetite for last 1-2 wks and more weakness.
Pt was very unsteady on his feet last 2 days and began vomiting coffee ground
emesis last night. Also had dark melanotic stools. Some vague abd pain.
Subjective fevers/chills.

Pt initially presented with BP in 60s per ED physician but has responed to 2 L
bolus and is now in 90s.
```

FOR OFFICIAL USE ONLY (FOUO)
Disclaimer: "The information contained in this document may contain privileged and confidential information including patient information protected by federal and state privacy laws."
COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

ROS: unable to be accurately obtained at this time 2/2 patients mental status

PMHx:
1. DM

PSHx:
1. LIHR
2. RIHR
3. Repair of recurrent RIH in August

Allergies: NKDA

Meds: per wife only takes insulin and flomax

Social History: former smoker but quit many years ago, former heavy drinker but quit several years ago. Wife denies illicits.

Family Hx: mult family members with hernias, otherwise non contributory

Exam:
Initial VS in ED: afebrile, HR 100-120, SBP 90-100, Saturating 93-98% on nasal cannula
Neuro: awake but lethargic, at times nearly obtunded. Slurring speech. MAE. No gross deficits
HEENT: NCAT. pupils 4 mm bilaterally. Sclerae non icteric. Dry oral mucosa
Neck: No JVD
Chest: coarse breath sounds bilaterally. Tachypneic to 30. Respirations somewhat labored
Cardiac: tachycardic. HR regular
Abd: firm, diffusely tender to palpation with rebound tenderness, consistent with peritonitis. No masses palpable. Well healed L groin scar. R groin scar healing well. Some steri strips still in place. No erythema or fluctuance
Genitalia: Scrotum large and fluid filled, somewhat firm near R inginal canal
Extremities: no edema, pedal and radial pulses easily palpable

Labs reviewed:
WBC 29.4
Hct 33.3
Plt 192
Na 118
K 4.2
BUN 96
Cr 4.4
BG 755
Mg 2.4
BNP 18800
Lactate 9.7
INR 1.5

Imaging: Upright CXR shows what appears to be free air under the diaphragm on the right and possibly also on the left. No chest abnormalities. KUB shows multiple dilated loops of small bowel concerning for obstructive process

Assessment:
1. Pneumoperitoneum, likely perforated viscus
2. GIB
3. Sepsis
4. Hyperglycemia
5. AKI
6. Profound hyponatremia

Plan:
1. Pt has physical exam findings consistent with peritonitis and severely deranged laboratory values. At this point the patient needs to proceed to the operating room emergently for an exploratory laparotomy. Operative intervention was discussed with the patient and his wife at the bedside. The critical nature of the patient was conveyed to both the patient and his wife. Risks including death were discussed. It was also related to patient that there is a good chance he may die he does not go to the operating room. They have both agreed to proceed and his wife will sign the consent form on his behalf
2. Pt is in critical condition. At this point he desires to be full code
3. To SICU post op

Seen and examined with Dr. Elena M. Paulus, chief

PHQ-2
  A PHQ-2 screen was performed. The score was 1 which is a negative screen
  for depression.

  1. Over the past two weeks, how often have you been bothered by the
  following problems? Little interest or pleasure in doing things: Several
  days

  2. Over the past two weeks, how often have you been bothered by the
  following problems? Feeling down, depressed, or hopeless: Not at all
AUDC (Mental Health Instrument)
  An alcohol screening test (AUDIT-C) was negative (score=0).

  1. Please read each item carefully and select the correct answer for
  you. How often did you have a drink containing alcohol in the past year?
  Never

  2. Please read each item carefully and select the correct answer for
  you. How many drinks containing alcohol did you have on a typical day
  when you were drinking in the past year? 0 drinks

  3. Please read each item carefully and select the correct answer for
  you. How often did you have six or more drinks on one occasion in the
  past year? Never
Exercise Screening:

    No--Are you physically active, exercise 3 times a week
    20-30 min.
Patient received education regarding exercise.
Weight/Nutrition Screening:

    Yes Does your diet contain more fruit, grain, and vegetables
    than meats?
    No Have you had your stool checked for blood in the last
    year?
Miscellaneous:

     No 1. Have you had a flex sig by an outside provider

  Signature Informed Consent for
   BLADDER - CYSTOSCOPY DIAGNOSTIC (POSSIBLE INTERVENTIONS)
1. Anatomical Location: See description of treatment/procedure.
2. Informed consent was obtained  at 3:09 PM on September 10, 2015.
  The full consent document can be accessed through Vista Imaging.
3. Patient name:  HOPKINS, MARSHALL HUGH
4. The patient HAS decision-making capacity.
5. Surrogate (if applicable):
6. Reason for the treatment (diagnosis, condition, or indication): To
examine the urethra and bladder for disease or abnormality.
Treatment(s) may be performed depending on findings.
7. Treatment/procedure: Your doctor will look at your bladder and
urethra with a scope.  A scope is a thin, lighted tube.  It is used
to see inside the urethra and bladder.  The scope is passed through
the urethra into the bladder.  In males, it passes through the
prostate. Your doctor may also do other procedures, including:
Bladder biopsy: a small amount of tissue is taken for examination.
Cytology: the bladder is flushed with a salt-water solution.  The
fluid is collected and examined.
Dilation: narrow parts of your urethra may be stretched.

8. Neither anesthesia nor moderate sedation will be used.

     URGENCY:                           STATUS: COMPLETED

DNR NOTE:

Does patient have decision-making capacity? No
Person contacted:
  Surrogate
    Surrogate's name: Darlene Hopkins
    Surrogate's relationship: wife

Diagnosis: necrotic small bowel
Prognosis: poor

Recommendations of treating team/consultants: Patient went for emergency
surgery on night of 9/16/15- found to have necrotic  small bowel and
underwent resection with temporary closure- has remained on  multiple
pressors with little improvement in his clinical status and has remained
a GCS of 3 despite no sedation medications- wife stated her husband would
not  want to live like this on "life support"
Names of treating team/consultants: General Surgery
DNR Attending Name/Notification: Santiago Vera Discussed with attending by
phone.

Explanation of DNR consequences (informed consent): With withdrawal of
care- patient will likely die
Patient's/Surrogate's wishes: Per surrogate (patient's wife), pt would not
not pressors and to be on the  ventilator for prolonged periods of time
with grim prognosis
Medical efforts that will be maintained: IVF

--- Original Document ---

09/01/15 UROLOGY-OUTPATIENT (C):
PATIENT NAME: HOPKINS, MARSHALL

DATE: 09/01/2015

HISTORY OF PRESENT ILLNESS: 72-year-old gentleman presents in consultation regarding postoperative urinary retention. Patient underwent hernia repair last month and developed postoperative urinary retention. He initially presented to the hospital in Liberal, Kansas. CT at that time reported bilateral hydroureteronephrosis and bladder distention (films are not available for my review). Foley catheter was placed and patient was transferred to this facility for continued care.

Hospital course was uneventful and patient was discharged with indwelling catheter. No previous history of urinary retention or bothersome lower urinary tract symptoms prior to surgery. He currently denies fever, chills, dysuria, or gross hematuria.

LABORATORY DATA: PSA 1.04 and serum creatinine 0.77 a few weeks ago.

PHYSICAL EXAMINATION: EXTERNAL GENITALIA: Indwelling Foley catheter with clear urine output. DIGITAL RECTAL EXAMINATION: Prostate estimated be 40 cc in volume with a boggy consistency. No suspicious induration or nodularity appreciated.

ASSESSMENT/PLAN: Postoperative urinary retention, as above. Foley catheter is removed for voiding trial. Patient will continue tamsulosin as prescribed. Will issue an empiric course of antibiotics and repeat computed tomography (CT) abdomen and pelvis today. Return to clinic later this month for a postvoid residual. Routine urinary retention warnings were given. Schedule routine urology follow up in 3 months for re-evaluation.

/es/ ERIC T. RICE, PA-C
PHYSICIAN ASSISTANT
Signed: 09/03/2015 10:44

09/03/2015 ADDENDUM STATUS: COMPLETED
CT revealed bilateral renal cysts without nephrolithiasis. No clinically significant hydroureteronephrosis appreciated. Nonspecific bladder wall thickening without obvious mass. Will likely need to consider cystoscopy in the future.

    The patient declines to receive the recommended dose of pneumococcal
    conjugate vaccine PCV13 (Prevnar 13).
      Comment: "I don't take any medicines or shots"
  HEALTHY LIVING/COPING SKILLS:
    Exercise Screening:

        Yes--Are you physically active, exercise 3 times a week
        20-30 min.
    Patient received education regarding exercise.
    Weight/Nutrition Screening:

        Yes Does your diet contain more fruit, grain, and vegetables
        than meats?
        No Have you had your stool checked for blood in the last
        year?
    Weight/Nutrition Education was provided to patient.
    Miscellaneous:

         No 1. Have you had a flex sig by an outside provider
    or at the Amarillo VA within the last 5 years?
         No 2. Have you had a colonoscopy by an outside provider
    or at the Amarillo VA within the last 10 years?
         No 4.  Do you take an aspirin daily?
```

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Depression Screening:
PHQ-2
A PHQ-2 screen was performed. The score was 4 which is a positive screen for depression.

1. Little interest or pleasure in doing things
More than half the days

2. Feeling down, depressed, or hopeless
More than half the days

Alcohol Screening:
AUDC (Mental Health Instrument)
An alcohol screening test (AUDIT-C) was negative (score=0).

1. How often did you have a drink containing alcohol in the past year?
Never

2. How many drinks containing alcohol did you have on a typical day when you were drinking in the past year?
Response not required due to responses to other questions.

3. How often did you have six or more drinks on one occasion in the past year?
Response not required due to responses to other questions.

Tetanus Reminder:
Patient refused Tetanus immunization.

ELEVATED BP >140/90:
Blood Pressure taken at this visit.
B/P: 146/92
Patient is not on blood pressure medication.

Tobacco Use Screen:
Patient states they are a former tobacco user but has quit more than 12 months ago.

MINI-COGNITIVE IMPAIRMENT SCREENING:
Give 1 point for each recalled word after the CDT distracter.

Score=3 (0-3 for recall).

Give 2 points for a normal CDT, and 0 points for an abnormal CDT. The CDT is considered normal if all numbers are depicted, once each, in the correct sequence and position, and the hands readably display the requested time.

Score=2 (0 or 2 for CDT).

Total Score=5 (Add the word recall and CDT scores together to get the Mini-Cog Score).
Patient tested negative in the screen for cognitive impairment.

My HealtheVet Education:
The patient does not have access and does not use the internet.

Homelessness Screening:
In the past 2 months, have you been living in stable housing that you own, rent, or stay in as part of a household? Yes - Living in stable housing.
Are you worried or concerned that in the next 2 months you may NOT have stable housing that you own, rent, or stay in as part of a household?
No - Not worried about housing near future

PRIMARY CARE PRESSURE ULCER RISK:
1. Is the Veteran bed-confined or a wheelchair-user (wheelchair-user defined as being wheelchair bound for >50% of wake hours)?
No

2. Does the Veteran require assistance to transfer/change positions?
No

3. Does the Veteran report any current pressure ulcers, a history of pressure ulcers, or a wound from a medical device, such as artificial limb, braces, spling, implanted pump, automatic implanted cardioverter-defibrillator, oxygen tubing, Foley or condom catheter, tracheostomy, feeding tube, or other medical device?
No

The patient is NEGATIVE for pressure ulcer risk.

Skin Turgor
Turgor: Within normal limits

SKIN PROBLEMS
Wound -location, type, description
surgical wound to right leg/groin, redness and swelling to scrotum

INTERVENTIONS
Education
Provide patient/caregiver education regarding causes and prevention of pressure ulcers.
Teach patient/caregiver importance of changing position frequently for pressure ulcer prevention.
Provide patient/caregiver with education materials.
Pressure-Redistribution Measures
Use specialty bed
Specify type: atmos air
Encourage small, frequent position changes
Turn and reposition every 2 hours while in bed, using pillows to separate pressure areas
Avoid turning/position on side at greater than 30 degree angle
Maximize Mobilization
Encourage activity as tolerated
Limit sitting out of bed to less than two hours at a time
Manage Moisture
Maintain clean and dry skin
Offer bedpan or urinal at scheduled intervals if patient is bed-bound
Instruct patient/caregiver to request assistance as needed
Manage Nutrition
Encourage eating and assist with meals
Encourage meals and assist with meals as needed
Provide or encourage oral care prn
Offer liquids every 2 hours when turning
Monitor fluid/food intake
Reduce Friction and Shear
Use a bed trapeze or pull sheet to lift up in bed or turn
Elevate head of bed for meals, then lower within 1 hour after eating (unless contraindicated)

If any of the below indications are marked, pressure ulcer risk interventions must be initiated and added to the care plan. These should be reviewed and updated with each assessment and PRN as the patient's needs change.

Please mark all that apply: Medical Device (artificial limb, brace, splint, oxygen tubing, Foley or condom catheter, tracheostomy, feeding tube, compression stockings, SCD's, restraints, cushions)

Notes ~ Addendum to SURGERY PRE-OP NOTE

```
     LOCAL TITLE: Addendum
STANDARD TITLE: ADDENDUM
DATE OF NOTE: SEP 17, 2015@07:16:43  ENTRY DATE: SEP 17, 2015@07:16:43
      AUTHOR: VERA,SANTIAGO RAFAE  EXP COSIGNER:
     URGENCY:                          STATUS: COMPLETED

I have examined the patient and reviewed the patient's initial
presentation and
laboratory and test results.I agree with the diagnostic and therapeutic plans of
the housestaff.
        For this patient there is a moderate risk for surgical intervention ,but
I believe it is the best
option. The risk of failure or poor outcome is known and has been discussed with
the patient.
Complications explained include: Anesthetic adverse actions,perioperative
bleeding,infection,
injury to adjacent structures,reaction to medications and blood and death.The
patient understands the
alternatives treatment options as well as the sequelae of no intervention.

The diagnosis is acute abdomen

The intended procedure laparotomy

09/16/15 SURGERY PRE-OP NOTE:
GENERAL SURGERY

                              PRE-OPERATIVE SURGEON'S NOTE

1.Proposed Procedure(s):exploratory laparotomy

2.Surgeon:
  Paulus Elena

3.Attending(s):
  VERA, SANTIAGO

4.Date and Time of Consent:Sep 16,2015@22:43

5.Patient has decision-making capacity to give informed consent.Yes

6.Reviewed the procedure with patient and discussed major potential
risks. Patient indicated understanding of procedure, its risks and
benfits, as well as alternative therapies.  Patient was given opportunity
to ask questions and wishes to proceed with procedure as planned.

7.Risks of procedure discussed:
Death, Bleeding, Infection, Failure of Procedure, Procedure affecting other
organs or systems
   Other Risks Include:
```

72 year old veteran male from Kansas. PMH of DMII not on meds. Has been
transfered to VA amarillo for obstructive uropathy. patient underwent surgery
for hernia repair a week ago here in the VA and was discharged the next day.
stated that On his way to Kansas he some urinary incontinence accident for the
first time. No prior history of prostatism or diagnosis of BPH. He aslo had a
few episodes of hiccups and what he describes as unsteady gait. He called VA
amarillo and was told to seek a medical advice close to his residence. He was
admitted to southwest medical center in Kansas after his CT scan showed
bilateral hydronephrosis and hydroureters with periureteric and perinephric
stranding, prominent prostate and distended bladder. Placement of indweling
foley catheter retrieved considerable amount of urine. He was also found to have
some kidney injury with creatinine of 1.5 that came back to normal after 24
hours of obstruction relief.
He was also not on any antidiabetic meds with HbA1c of 10.8.  patient has an
unshakable believes in not taking meds, he would prefer taking herbs to treat
his medical problems.
VS BP125/74. HR 81. RR 16. Tem 97.8. physical exam unremarkable except for mild
dysdiadochokinesia in left hand. patient is right-handed.  DRE  not done.
most recent labs from yesterday remarkable for: WCC 13.4, HB 13.7, BUN/Crea
24/0.8, HbA1c 10.8, Albumin 2.8.

plan: Admitted for:
1. Obstructive uropathy 2/2 to elarged prostate (BPH vs malignancy). will check
DRE and PSA for possible cancer. keep foley cather and urology consult .
2. UTI VS bactriuria in presence of obstructive uropathy which necessiate Abx
treatment. No evidence of urine infection from urinalysis reports obtained from
kansas. will continue Rocephin and team will decide upon it.
3. Uncontrolled DM II. SSI with aspart.
4. AKI. resolved.
5. VTE. declined anticoagulations. kept on SCDs.
6. Moderate protein cal malnutrition.

09/20/12 MHS-INITIAL BIOPSYCHOSOCIAL ASSESSMENT(T):
xxxAge:69
SERVICE CONNECTION:SERVICE CONNECTED % - 70 GENDER:MALE RACE: WHITE
MARITAL STATUS: Married.

CLINICAL HISTORY

PRESENTING CHIEF COMPLAINT/REFERRAL QUESTION:
Veteran was referred by primary care. He is complaining of tiredness/lethargy. He has noticed within the last 6 months a lack of energy. He says he has lived out every dream he has ever had and now life is boring. He spoke with Rita Sandoval last week who recommended that he come up with some new goals/dreams and he has done that. He has started on a new project which he says he enjoys and has energy while doing that but when he is not working on it he feels tired. His grand idea is to "build the world's largest railroad museum". He figures he "might as well go big or go home".

He also has some trouble sleeping, will wake up feeling just as tired as when he went to bed, not feeling rested and has started taking naps during the day. He is unsure of why he is feeling this way. He feels his PCP has not been very helpful in finding out the cause if it is medical so he is willing to try and figure out the reason for the symptoms if they may be mental health related.

HISTORY OF CURRENT ILLNESS:
Veteran reports symptoms for the last 6 months.

PAST PSYCHIATRIC HISTORY:
None

CURRENT AND HISTORY OF SUICIDAL ACTS AND SELF HARM
None
Passive thoughts but denies any plan or intent. Occasionally thinks "why live the
rest of my life like this". He has recently developed a faith in God and says that would be disappointing to God so he would never do that.

CURRENT AND HISTORY OF VIOLENCE/ASSUALTING OTHERS:
None

SUBSTANCE USE HISTORY TO INCLUDE PAST TREATMENT, RELAPSE HISTORY, AND RESPONSE TO TREATMENT:
Former alcoholic. Has been sober since 1972. He went to a rehab program. He says he did not know he had a drinking problem, it was just a way of life until he started having medical problems with his liver and kidneys.

MENTAL ILLNESS AND SUBSTANCE ABUSE IN FAMILY MEMBERS:
Nonveteran does not know much about his family.

PSYCHOSOCIAL HISTORY:

Childhood/Developmental History: Veteran grew up all over the US. His family were migrant farm workers so they
followed the crops. He was raised by both parents until age 12 when he was on his own after that. He had gotten a job and lied about his age and left his family behind to work that job. His family took off on to the next job and he never saw them again. He says he found his mother 35 years later and helped care for her until she died. He had two brothers. They have both passed.

He says his father was married 7 times and he has brothers and sisters he does not know. He has multiple half siblings.

FOR OFFICIAL USE ONLY (FOUO)
Disclaimer: "The information contained in this document may contain privileged and confidential information including patient information protected by federal and state privacy laws."
COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Physical, sexual and emotional trauma:
None

Family Circumstances: Veterans mother in law recently went under surgery for a hysterectomy and woke
up mentally "messed up". The anesthesia affected her brain.

Adult Relationship History: Veterans wife teaches health and wellness. He and his wife have a 9 year old daughter that they are raising.

Current significant family and/or peer group relationships:
Veteran was married once before. He currently has been married 10 years. He had 5 children in his first marriage whom he remains close with. He says they all turned out good and he is proud of them. He and his wife have a 9 yr old daughter together. His current wife did not have any kids or married before so they had one together. They are looking at adopting more children or providing foster care for teenagers. Veteran loves to travel. He says he has had "lots of windshield time".

MILITARY HISTORY:
Branch:
US Air Force, Air Force guard and reserve for a total of 32 years. He received disability retirement. He had a bad car wreck and was forced to retire due to medical issues that left him unable to fly anymore. He spent 24 years on the same plane. The wreck happened while on duty so he now gets SC disability.

He has been all over the world and was deployed to multiple places.

Veteran's perception of most distressing events while in the military:

MEDICAL INFORMATION

CURRENT AND PAST MEDICAL PROBLEMS:
Active problems - Computerized Problem List is the source for the following:

1. Chronic Back Pain
2. Hyperlipidemia *
3. Microscopic Hematuria
4. Diabetes Mellitus without mention of Complication, type II or unspecified ty
5. Depression *
6. Vitamin D Deficiency
7. Vitamin B 12 Deficiency

Are there any new medical problems to report?

CURRENT MEDICATIONS:
Active Outpatient Medications (including Supplies):

	Active Outpatient Medications	Status
1)	CHOLECALCIFEROL 1000IU TAB (OTC) TAKE TWO TABLETS BY MOUTH EVERY DAY VIT D	ACTIVE
2)	CYANOCOBALAMIN 1000MCG/ML INJ, (PER ML) INJECT 1000MCG (1ML) INTRAMUSCULAR EVERY 7 DAYS VIT B12	ACTIVE
3)	ERGOCALCIFEROL 50,000U CAP TAKE 50000UNT BY MOUTH EVERY WEEK VIT D	ACTIVE
4)	SYRINGE-NEEDLE COMBO,25G 5/8IN,3CC,(EA) USE SYRINGE EVERY 7 DAYS	ACTIVE

ALLERGIES AND ADVERSE DRUG REACTIONS:
Patient has answered NKA

ACTIVITIES OF DAILY LIVING ISSUES:

FOR OFFICIAL USE ONLY (FOUO)
Disclaimer: "The information contained in this document may contain privileged and confidential information including patient information protected by federal and state privacy laws."
COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Are there any self care issues? No

PAIN ASSESSMENT:
PAIN INTENSITY (0-10 scale):
Patient's present level of pain: 2
Patient's acceptable level of pain:
Description of exacerbating factors or relieving measures: Veteran does not use medication, he says he has learned pain management
MENTAL STATUS EXAM:

ORIENTATION AND CONSCIOUSNESS:
APPEARANCE AND BEHAVIOR:
cooperative and reasonable
SPEECH:
normal rate/rhythm
LANGUAGE:
intact
MOOD AND AFFECT:
mood euthymic
affect is congruent with mood
PERCEPTUAL DISTURBANCE (hallucinations, illusions):
none
THOUGHT PROCESS AND ASSOCIATION:
normal, coherent
THOUGHT CONTENT (delusions, obsessions etc.):
no unusual thought content
INSIGHT:
good
JUDGMENT:
good
MEMORY:
impaired recent
details: normal forgetfulness

FUND OF KNOWLEDGE
Above Average
MENTAL STATUS COMMENTS:

Needs Assessment:
Education and Learning Needs Assessment

Educational Background:

Highest grade achieved: less than high school with GED8th grade then GED

Educational/learning difficulties: no known educational learning disability

Attitudes toward learning: not interested in academic achievement

Assessment of primary language spoken in the home and veteran's preference of language for clinical communication: English

Legal Status Screening:
Is there evidence from the interview that the veteran has legal issues or concerns that would warrant a more in-depth assessment?
No. No further assessment indicated.
Housing and Income Assessment:
Do you currently have a stable place to live?
Yes
What is your current income and sources of income?
$0 per month
Sources:

Nutritional Status Screening:
Is there evidence from the interview that the veteran has nutritional issues or concerns (including weight gain or loss of more than 5% in last 3 months or 10% in last year, dietary concerns, eating disorder signs or symptoms) that would warrant a more in-depth assessment?
No. No further assessment indicated.

Screening for Abuse, Neglect, or Exploitation:
Is there any evidence from the interview that the veteran is a victim of physical assault, rape, sexual molestation, domestic abuse, elder neglect or abuse, or other serious abuse or exploitation?
No. No further assessment indicated.

FOR OFFICIAL USE ONLY (FOUO)
Disclaimer: "The information contained in this document may contain privileged and confidential information including patient information protected by federal and state privacy laws."
COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Screening for Bereavement Issues:
Is there evidence from the interview that the veteran is actively suffering from bereavement issues?
No. No further assessment indicated.

Screening for Vocational Needs Assessment:
Is there evidence from the interview that the veteran has any vocational deficits or needs?
No. No further assessment indicated.

Spiritual and Religious Orientation: Personal spiritual beliefs but does not attend organized religious activities

INITIAL DSM-IV DIAGNOSES:
Axis I Clinical Disorder:
Depressive Disorder: NOS (Not Otherwise Specified)
General Categories None
Axis II Personality Disorders/Traits:
None
Axis III Current Medical Conditions: See Medical History above
Axis IV Current Psychosocial Stressors:
None

Axis V GAF Score (current level of functioning): 60-65
(past year level of functioning):

SUMMARY AND FORMULATION: This is a 69 yr old 70%SC Vietnam era veteran who was referred by primary care. He is reporting symptoms of lethargy and trouble sleeping. He is unsure if the cause of the problem is medical or mental so he is wanting to be evaluated and try therapy here in the mental health clinic. He denied any SI/HI today.

Preliminary Treatment Plan:
-The veteran was given social workers business card along with clinic numbers and the crisis hotline number
-The veteran was educated on all emergency procedures
-He will be referred for therapy

Patient does not desire to have family members, significant others, or advocates to participate in patient chart.

Notes ~ ICU DAILY NURSING ASSESSMENT

```
     LOCAL TITLE: ICU DAILY NURSING ASSESSMENT
STANDARD TITLE: CRITICAL CARE UNIT ADMISSION EVALUATION NOTE
DATE OF NOTE: SEP 17, 2015@12:00     ENTRY DATE: SEP 17, 2015@21:16:24
      AUTHOR: MASTERS,AMANDA L     EXP COSIGNER:
     URGENCY:                           STATUS: COMPLETED

                          ICU Daily Nursing Assessment

Date Adm/Tran to ICU: Sep 17,2015

Code Status: Full

Can patient be directly discharged from ICU? no

Mental Health:
 Mood:
 Comments:

Activity: Bedrest
PAIN ASSESSMENT-1st Location:
  Patient states "experiencing pain" on a scale of 1-10.
    Stated pain is: 99
  OUTCOME:  There will be a 50% reduction in pain (inpatients within 24
  hours and outpatients within 2 encounters).  Select at three
  interventions to achieve this goal.  For pharmacological interventions
  see Pain Management Policy.
Pain Interventions:
 Med given -
 Effective  -
 Score (after interventions) 0
 Level of pain is well controlled
 (define discomfort)

REVIEW OF SYSTEMS:
Neuro:

 Level of Consciousness:

 Glasgow Coma Score:
  Date/Time: Sep 17,2015@12:00
  Best Eye Opening Response: No Response (1pt)
  Best Verbal Response:      No Response: (1pt)
  Best Motor Response (Best Upper Limb/To Painful Stimuli):
  No Response (1pt)
```

SEP 17, 2015@00:22:12 Ward: 3-SICU DX: UGIB SMALL BOWEL OBSTRUCTION

Change in patient's condition warrants an update to the Nursing Care
Plan
(If YES, continue with Care Plan below and make changes) no
Nursing Plan of Care:

 NURSING PROBLEMS:
CURRENT CARE PLAN IN PLACE--risk for infection, review date 09/20/15

Assummed care @ 11:45. Pt on the vent, 8cm ETT, 24 @ teeth, SIMV rate 16, FiO2
60%, PEEP 5, Ps 10, Vt 600. Brown sputum noted. Lungs sound clear to
auscultaiton. Tele-Afib rate 115. Left PA and cordis patent w/ blood rtrn noted.
Left A-Line patent w/ blood rtrn noted. Abd has binder in place, kerlix and abd
pads covering open wound w/ clear cassett. Surgeons instructions to keep pt
still due to risk of bowels dislodging. Abd drsg changed by surgeons. Foley in
place w/ hematuria. MDs aware. BLE w/ SCDs in place. Generalized edema.
Summarized charting:
Pt is on multiple gtts including the following: protonix @ 10ml/hr. Amiodarone @
17ml/hr. NS @ 125ml/hr. Vasopressin @ 10ml/hr. Levophed titrating to MAP >65.
Bicarb gtt @ 75 ml/hr. Fentanyl @ 10ml/hr. Throughout my shift MDs orderd 500
ALbumin, x2 NS 1L bolus, 2 amps Bicarb, Electrolye replacements, and
Phynelephrine to titrate to MAP>65. 2 units FFP given.
Dr. Busby informed of labs and pt oozing from abd wound. New orders for
electrolytes and 2U PRBCs and repeat ABG, orderd placed and all care transferred
to night nurse

am traveling to his home in Missouri. States he is feeling fine. Denies dizziness, confusion, n/v, or blurred vision. Blood sugar by EMS on 6/26/15 was 355 and at hospital lab 408. Pt does not admit that he has diabetes and states "I am working on some things regarding my pancreas." Nurse strongly encouraged pt to follow-up with provider at KC VA due to high blood sugars. States he would.

Will forward Southwest Medical Center ED notes to provider for review.

A letter of condolence as well as a copy of the "Butterfly Poem" and bereavement handouts on loss and grief was placed in the USPS mail Wednesday October 14, 2015

Packet of materials was addressed to: Wife-Darlene Hopkins

A copy (one-page-two-sided) of "VA Burial Benefits and Information For Survivors"" from the Chaplain's Service was included in the mailing.

The condolence letter referenced the Memorial Service which will be held in the future. Further information will be mailed separately. Usually two-three weeks prior to service.

Decedent Affairs is an essential service of chaplain's office. A letter from Decedent Affairs is mailed approximately two-three weeks prior to the Memorial Service.

Contact information (business card) was included in the mailing. Chaplain will be available to family members as needed. Will refer to other resources as appropriate.

08/24/15 TELEPHONE CONTACT:
PT CALLED IN REQUESTING INFORMATION.

I RETURNED HIS CALL
 HE HAD  RIH REPAIR ON 8/19/2015 . STAYED IN THE HOSPITAL OVERNIGHT AND THEN
FELT NORMAL AND WENT HOME

  TODAY HE REPORTS  NEW SEVERE HICKUPS AND MAY PASS OUT DUE TO NO AIR IF HE HAS
3 IN A ROW.
NEW: NO BALANCE. WEAK, INC OF URNIE, NO APPETITE.
IS PASING RECTAL GAS. FEELS VERY WRONG.
DENIES NAUSEA OR VOMITING,

I ENCOURAGED HIM TO COME IN TO THE ER FOR LABS AND POSIBLE CT OF HIS ABD IF
NEEDED.

HE STATES HE HAS A 12 YR OLD DAUGHTER AND HE CAN NOT COME IN AS SHE WOULD COME
HOME TO A EMPTY HOUSE.  HE WILL TRY TO COME TOMORROW.
 I ENCOURAGED HIM TO COME TODAY.

(If the patient secured cash with the Agent Cashier, information to contact the
Agent Cashier at 806-355-9703 ext. 7364 was provided.)
```

FOR OFFICIAL USE ONLY (FOUO)
Disclaimer: "The information contained in this document may contain privileged and confidential information including patient information protected by federal and state privacy laws."
COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

NA--Did you get assistance with any fears or anxieties that
you had during your admission?
NA--Do you have any further concerns that we can help you
with before you are discharged?
Explanation of above responses:

****
Does Patient have Congestive Heart Failure?
No
****
Is the patient going home with a Foley catheter? No
If yes, Foley Catheter Care pamphlet provided NA
****
Does the patient have MRSA? No
MRSA pamphlet provided NA
****
Post-op instructions (Pacemaker/ICD/Loop recorder) provided NA
****
Central Line IV Site Care pamphlet provided NA
****
Post Cardiac Procedure Education Sheet provided NA
****
Pain Scale at discharge:
(See Focus note or Daily Assessment note for comphrehensive assessment of pain
greater than 0)
****
Patient has Wound(s) or unhealed Pressure Ulcer(s).
Patient/caregiver received instructions for performing care
Wound Care:
May remove dressing on:Aug 21,2015
Diet: Resume the diet you were on before
****
Call your doctor for any signs / or symptoms of: Reddened wound,
wound drainage, swelling,red streaks, increased pain, temperature
101 or higher, or bleeding.
CALL:
Your admitting doctor (name at top of page) 355-9703 ask operator anytime.
Your primary care provider (8am - 4pm) 355-9703 ask operator.
Emergency Department(anytime) 355-9703, ask operator for Emergency Department.
Day Surgery (6am-6pm) 355-9703 ext. 7200 or ask operator.

As part of your discharge today, you will receive a printout of upcoming
appointments;
including this post-discharge follow-up phone call. At any time after leaving
today,
if you know you will be unavailable for the scheduled phone call; please
contact Telephone Triage at (806)354-7837 or 1 (800) 687-8633 between the hours
of 8:00a.m to 4:00p.m. Monday through Friday.

Keep all previously scheduled appointments.
Your return appointment is: Sep 1,2015@11:00
Or you will receive a letter in the mail with your appointment. IF YOU DO NOT
RECEIVE A
LETTER, PLEASE CALL YOUR ADMITTING DOCTOR to arrange an appointment.
Other instructions:
Mode of Discharge: Wheelchair
Accompanied by: WIFE
Relationship:
****
Patient was given a current list of medications on discharge.
Patient verbalizes understanding of discharge instructions: Yes

This patient has received Healthy Lifestyle Instructions which include

MEDICAL NUTRITION THERAPY -- INITIAL NUTRITIONAL ASSESSMENT

Food and Nutrition History:

--Appetite: Pt reports having a good appetite and eating well. Pt reports he ate 100% of his breakfast this morning.
--Diet followed prior to admission: Pt reports he follows a regular diet at home. Pt reports he was eating well prior to admission
--Feeding Assistance Required: No
--N/V: None reported
--Diarrhea or constipation: None reported
--Chewing or swallowing difficulties: None reported
--Food Allergies: None reported
--Food Preferences: Honored via select menus/room service.
--Ethnic/Religious Food Preferences: None reported
--Pertinent Meds: aspart
--OTC Herbal Supplements/Vitamins: None reported
--Skin Assessment Score: Braden score is 21 (no risk for skin impairment); surgical incision from recent hernia repair noted.

Admitting Diagnosis: hydronephrosis

Past Medical History includes: DM

Current Diet: 1800 ADA

Height: 5' 11.5" (182 cm)
Weight: 175 lbs (79.5 kg) Weight Taken: 26-Aug-15
Usual Weight: 180 lbs (81.8 kg) % Usual Wt: 97%
Target Weight: 175 lbs (79.5 kg) % Target Wt: 100%
Frame Size: Medium Body Mass Index: 24.1

-- Pt reports he has lost about 10# over past year d/t eating less and being more active. Pt reports his UBW is around 180#. Pt reports his wt does fluctuate some. Reviewed wt chart. Current wt is up 4# from previous wt. BMI: 24.1 (normal). Goal for this admission with wt maintenance.

Laboratory Data

Test	Result	units	Ref. range	Date
GLUCOSE	246 H	mg/dL	74 - 118	27-Aug-15
UREA NITROGEN	12	mg/dl	7 - 18	27-Aug-15
CREATININE, SERUM	0.77	mg/dL	.6 - 1.3	27-Aug-15
POTASSIUM	4.2	mmol/L	3.5 - 5.0	27-Aug-15
ALBUMIN	2.6 L	g/dL	3.5 - 4.8	27-Aug-15
TRIGLYCERIDE	153 H	mg/dL	0 - 150	14-Jul-15
PAB	14.3 L	mg/dL	18 - 38	27-Aug-15
HGB	12.3 L	gm/dL	14 - 18	27-Aug-15
HCT	38.6	%	37 - 52	27-Aug-15
HEMOGLOBIN A1C %	13.4 H	%	- 6.0	14-Jul-15

-- Glucose is elevated- pt is on insulin and receives a diabetic diet. A1C indicates poor glucose control. PAB and Albumin are low indicating visceral protein depletion.

Energy Requirements: 2064 Kcal/day Kcal:N 161:1
Energy calculation is based on: Energy Factor of 1, Harris-Benedict, and Actual Body Wt
Protein Requirements: 80 gm/day NPC:N 136:1
Protein calculation is based on: Actual Body Wt and protein level of 1
Fluid Requirements: 2386 ml/day

Appearance: well-nourished male
Nutrition Status: Mildly Compromised

Nutrition Diagnosis: Altered nutrition related lab values related to DM as evidenced by glucose of 246 and A1C of 13.4.

Nutrition Intervention: Will continue 1800 ADA diet as ordered to meet nutritional needs and to help with glucose control. Encourage adequate po intake. Will honor food preferences as voiced, when appropriate.

FOR OFFICIAL USE ONLY (FOUO)
Disclaimer: "The information contained in this document may contain privileged and confidential information including patient information protected by federal and state privacy laws."
COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Nutrition Monitoring/Evaluation:
1. Meet greater than 75% of estimated nutritional needs.
2. Follow weight trends -- Goal for maintenance of 1-2% of admission weight
3. Monitor nutritionally pertinent labs as available-- Gluc, PAB, Alb.
4. Monitor skin integrity for changes.

09/20/12 MHS-INITIAL BIOPSYCHOSOCIAL ASSESSMENT(T):
xxxAge:69
SERVICE CONNECTION:SERVICE CONNECTED % - 70 GENDER:MALE   RACE: WHITE
MARITAL STATUS:  Married.

                          CLINICAL HISTORY

PRESENTING CHIEF COMPLAINT/REFERRAL QUESTION:
Veteran was referred by primary care. He is complaining of tiredness/lethargy.
He has noticed within the last 6 months a lack of energy. He says he has lived
out every dream he has ever had and now life is  boring. He spoke with
Rita Sandoval last week who recommended that he come up with some new
goals/dreams and he has done that. He has started on a new project which he
says he enjoys and has energy while doing that but when he is not working on it
he feels tired. His grand idea is to "build the world's largest railroad
museum". He figures he "might as well go big or go home".
```

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

He also has some trouble sleeping, will wake up feeling just as tired as when he went to bed, not feeling rested and has started taking naps during the day. He is unsure of why he is feeling this way. He feels his PCP has not been very helpful in finding out the cause if it is medical so he is willing to try and figure out the reason for the symptoms if they may be mental health related.

HISTORY OF CURRENT ILLNESS:
Veteran reports symptoms for the last 6 months.

PAST PSYCHIATRIC HISTORY:
None

CURRENT AND HISTORY OF SUICIDAL ACTS AND SELF HARM
None
Passive thoughts but denies any plan or intent. Occasionally thinks "why live the
rest of my life like this". He has recently developed a faith in God and says that would be disappointing to God so he would never do that.

CURRENT AND HISTORY OF VIOLENCE/ASSUALTING OTHERS:
None

SUBSTANCE USE HISTORY TO INCLUDE PAST TREATMENT, RELAPSE HISTORY, AND RESPONSE TO TREATMENT:
Former alcoholic. Has been sober since 1972. He went to a rehab program. He says he did not know he had a drinking problem, it was just a way of life until he started having medical problems with his liver and kidneys.

MENTAL ILLNESS AND SUBSTANCE ABUSE IN FAMILY MEMBERS:
Nonveteran does not know much about his family.

PSYCHOSOCIAL HISTORY:

Childhood/Developmental History: Veteran grew up all over the US. His family were migrant farm workers so they
followed the crops. He was raised by both parents until age 12 when he was on his own after that. He had gotten a job and lied about his age and left his family behind to work that job. His family took off on to the next job and he never saw them again. He says he found his mother 35 years later and helped care for her until she died. He had two brothers. They have both passed.

He says his father was married 7 times and he has brothers and sisters he does not know. He has multiple half siblings.

Physical, sexual and emotional trauma:
None

Family Circumstances: Veterans mother in law recently went under surgery for a hysterectomy and woke
up mentally "messed up". The anesthesia affected her brain.

Adult Relationship History: Veterans wife teaches health and wellness. He and his wife have a 9 year old daughter that they are raising.

Current significant family and/or peer group relationships:
Veteran was married once before. He currently has been married 10 years. He had 5 children in his first marriage whom he remains close with. He says they all turned out good and he is proud of them. He and his wife have a 9 yr old daughter together. His current wife did not have any kids or married before so they had one together. They are looking at adopting more children or providing foster care for teenagers. Veteran loves to travel. He says he has had "lots of windshield time".

FOR OFFICIAL USE ONLY (FOUO)
Disclaimer: "The information contained in this document may contain privileged and confidential information including patient information protected by federal and state privacy laws."
COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

MILITARY HISTORY:
Branch:
US Air Force, Air Force guard and reserve for a total of 32 years. He received disability retirement. He had a bad car wreck and was forced to retire due to medical issues that left him unable to fly anymore. He spent 24 years on the same plane. The wreck happened while on duty so he now gets SC disability.

He has been all over the world and was deployed to multiple places.

Veteran's perception of most distressing events while in the military:

MEDICAL INFORMATION

CURRENT AND PAST MEDICAL PROBLEMS:
Active problems - Computerized Problem List is the source for the following:

1. Chronic Back Pain
2. Hyperlipidemia *
3. Microscopic Hematuria
4. Diabetes Mellitus without mention of Complication, type II or unspecified ty
5. Depression *
6. Vitamin D Deficiency
7. Vitamin B 12 Deficiency

Are there any new medical problems to report?

CURRENT MEDICATIONS:
Active Outpatient Medications (including Supplies):

	Active Outpatient Medications	Status
1)	CHOLECALCIFEROL 1000IU TAB (OTC) TAKE TWO TABLETS BY MOUTH EVERY DAY VIT D	ACTIVE
2)	CYANOCOBALAMIN 1000MCG/ML INJ, (PER ML) INJECT 1000MCG (1ML) INTRAMUSCULAR EVERY 7 DAYS VIT B12	ACTIVE
3)	ERGOCALCIFEROL 50,000U CAP TAKE 50000UNT BY MOUTH EVERY WEEK VIT D	ACTIVE
4)	SYRINGE-NEEDLE COMBO,25G 5/8IN,3CC,(EA) USE SYRINGE EVERY 7 DAYS	ACTIVE

ALLERGIES AND ADVERSE DRUG REACTIONS:
Patient has answered NKA

ACTIVITIES OF DAILY LIVING ISSUES:
Are there any self care issues? No

PAIN ASSESSMENT:
PAIN INTENSITY (0-10 scale):
Patient's present level of pain: 2
Patient's acceptable level of pain:
Description of exacerbating factors or relieving measures: Veteran does not use medication, he says he has learned pain management
MENTAL STATUS EXAM:

ORIENTATION AND CONSCIOUSNESS:
APPEARANCE AND BEHAVIOR:
cooperative and reasonable
SPEECH:
normal rate/rhythm
LANGUAGE:
intact
MOOD AND AFFECT:
mood euthymic
affect is congruent with mood
PERCEPTUAL DISTURBANCE (hallucinations, illusions):
none
THOUGHT PROCESS AND ASSOCIATION:
normal, coherent

THOUGHT CONTENT (delusions, obsessions etc.):
  no unusual thought content
INSIGHT:
  good
JUDGMENT:
  good
MEMORY:
  impaired recent
  details: normal forgetfulness

FUND OF KNOWLEDGE
    Above Average
MENTAL STATUS COMMENTS:

Needs Assessment:
Education and Learning Needs Assessment

Educational Background:

   Highest grade achieved: less than high school with GED8th grade then GED

   Educational/learning difficulties: no known educational learning disability

   Attitudes toward learning: not interested in academic achievement

   Assessment of primary language spoken in the home and veteran's preference of language for clinical communication: English

Legal Status Screening:
Is there evidence from the interview that the veteran has legal issues or concerns that would warrant a more in-depth assessment?
No. No further assessment indicated.
Housing and Income Assessment:
Do you currently have a stable place to live?
Yes
What is your current income and sources of income?
$0 per month
Sources:

Nutritional Status Screening:
Is there evidence from the interview that the veteran has nutritional issues or concerns (including weight gain or loss of more than 5% in last 3 months or 10% in last year, dietary concerns, eating disorder signs or symptoms) that would warrant a more in-depth assessment?
No. No further assessment indicated.

Screening for Abuse, Neglect, or Exploitation:
Is there any evidence from the interview that the veteran is a victim of physical assault, rape, sexual molestation, domestic abuse, elder neglect or abuse, or other serious abuse or exploitation?
No. No further assessment indicated.

Screening for Bereavement Issues:
Is there evidence from the interview that the veteran is actively suffering from bereavement issues?
No. No further assessment indicated.

Screening for Vocational Needs Assessment:
Is there evidence from the interview that the veteran has any vocational deficits or needs?
No. No further assessment indicated.

Spiritual and Religious Orientation: Personal spiritual beliefs but does not attend organized religious activities

INITIAL DSM-IV DIAGNOSES:
Axis I Clinical Disorder:
  Depressive Disorder: NOS (Not Otherwise Specified)
General Categories None
Axis II Personality Disorders/Traits:
  None
Axis III Current Medical Conditions: See Medical History above
Axis IV Current Psychosocial Stressors:
None

Axis V GAF Score (current level of functioning): 60-65
                 (past year level of functioning):

SUMMARY AND FORMULATION: This is a 69 yr old 70%SC Vietnam era veteran who was referred by primary care. He is reporting symptoms of lethargy and trouble sleeping. He is unsure if the cause of the problem is medical or mental so he is wanting to be evaluated and try therapy here in the mental health clinic. He denied any SI/HI today.

Preliminary Treatment Plan:
-The veteran was given social workers business card along with clinic numbers and the crisis hotline number
-The veteran was educated on all emergency procedures
-He will be referred for therapy

Patient does not desire to have family members, significant others, or advocates to participate in patient chart.

URGENCY: routine STATUS: COMPLETED
SUBJECT: Case #: 65578

PATIENT NAME: HOPKINS,MARSHALL

DATE: 08/19/2015

PREOPERATIVE DIAGNOSIS: Right inguinal hernia.

POSTOPERATIVE DIAGNOSIS: Right inguinal hernia.

PROCEDURE: Repair of right inguinal hernia with Bard mesh plug.

SURGEON: Syed Ahmed, MD

ASSISTANT: Jaime Tindall

ANESTHESIA: General with endotracheal intubation.

JUSTIFICATION FOR THE PROCEDURE: The patient was seen in the Surgical Clinic with very large right inguinal scrotal swelling. The patient had it for several years. According to him he had repair of a right inguinal hernia done twice in the 1970s. On examination, there was a very large inguinal scrotal hernia. Patient was able to reduce it but with difficulty. Diagnosis of right inguinal hernia was discussed with the patient. Repair with mesh was offered as a treatment. The procedure was explained in detail. Risks and benefits of the operation were discussed. These included, but were not limited to, bleeding, infection, nonhealing of the wound, testicular swelling, hematoma formation and possible recurrence of the hernia. The patient had opportunity to ask questions. These were answered to his satisfaction. The patient agreed to proceed with the operation.

DESCRIPTION OF PROCEDURE: After general anesthesia was administered, the skin of the lower abdomen and genitalia was prepared with ChloraPrep and draped. Incision was made in the right groin 2.5 cm above and parallel to the inguinal ligament. The incision was deepened. Subcutaneous fat and the Scarpa fascia was divided and external oblique aponeurosis was identified. External ring was visualized and a very large inguinal scrotal hernia was seen coming out of the external ring and going to the scrotum. The external ring was divided. Superior and inferior flaps were raised in the external oblique aponeurosis to reveal the deep ring. The hernia sac was then mobilized at the level of the pubic tubercle and a Penrose drain was passed around it. The hernia sac was then gradually dissected removing it's coverings. The sac was entered. The sac was then completely separated from the contents of the inguinal canal. The sac was held at the fundus with 2 hemostats and opened with Metzenbaum scissors. The sac was opened up to the level of the deep ring. At that level it was divided and excised. The opening in the sac was then closed with a running suture of 0 Vicryl. The defect was then repaired by placement of a Marlex mesh plug in the deep ring. Sutured in place with interrupted 2-0 Prolene. Adequate tension-free repair was obtained. The spermatic cord, vas deferens and vessels were protected throughout the course of the operation. The wound was irrigated thoroughly with normal saline containing antibiotic solution Ancef. External oblique was closed with a running suture of 0 Vicryl. Subcutaneous fat was approximated with interrupted 3-0 Vicryl. Then, 30 mL of 0.5% Marcaine was infiltrated in the skin edges. The skin was approximated with staples.

Patient tolerated procedure well, was extubated, and transferred to recovery in a stable condition.

ESTIMATED BLOOD LOSS: 25 mL.

SPECIMEN: Hernia sac.

Nursing Care Comments:
  0754 - Received report from C Rivera RN and assumed care of pt. 0755 - Pt transferred from DSU2 to OR3 via stretcher with side rails up x 2 by A Blackwell RN. Pt moved onto OR table with minimal assistance into supine position. Monitors applied at HOB by Dr Warren. General anesthesia induced without incident. Pillow placed underneath head, arms abducted to 90 degrees and supinated on padded armboards with eggcrate foam padding and secured with pillow cases and tape. Safety strap placed across pt thorax. Pt head/thorax/sacrum on megadyne gel bovie pad. Upper body bair hugger applied and turned on. Remaining hair clipped from right groin/scrotum with clippers by A Blackwell RN. Pt RLQ/right groin/scrotum prepped with Chloraprep solution by A Blackwell RN. No pooling of prep solution noted and pt draped by T Bryant CFA. 0824 - Time out performed with all personnel in agreement. 0825 - Procedure begun. 1gm Ancef powder verified and placed on backtable for use as irrigation to soak mesh. Procedure tol well - concluded at 0950. Medium jock strap applied to apply pressure dressing with fluffed kerlix. Pt emerged from anesthesia easily and transferred back onto stretcher via OR personnel with assistance of roller board. Pt transferred to PACU via stretcher with side rails up x 2. 1004 - arrived in PACU, report given to J Gerald RN who assumes care of pt. Monitors placed, VSS, blood glucose checked with result of 258, pt resting comfortably.

Procedure:Right inguinal hernia
Physician:Dr Ahmed
Admission Date:Aug 19,2015
Discharge Date:
Current condition:

Were discharge instructions understood?

Do you know what medications were prescribed for you? Do you understand how and when to take it?

Emotional support: Was the staff caring and supportive during your visit?

How is your pain (related to the procedure)? Is it adequately controlled with your pain medicine?

Do you have a dressing? Is it clean and dry and still on? Do you know when to remove it?

Could we have done anything to make the stay more pleasant?

Do you have any questions or comments for me?

Follow up call attempted on this date: AUG 20, 2015
No follow up call accomplished:
Patient admitted, follow up call deferred.

Notes ~ PHARMACY MEDICATION REVIEW

```
     LOCAL TITLE: PHARMACY MEDICATION REVIEW
STANDARD TITLE: PHARMACY MEDICATION MGT NOTE
DATE OF NOTE: SEP 17, 2015@16:28     ENTRY DATE: SEP 17, 2015@16:28:16
      AUTHOR: GUIDRY,TOMMIE JO     EXP COSIGNER: WELLS,LINDSEY DAWN
     URGENCY:                           STATUS: COMPLETED

S: Pt is a 72 yo CM s/p RIHR 1 mo ago who presented in septic shock due to
ischemic bowel. Pt POD #0 ex lap, SBR, temporary abdominal closure. Developed
post-op afib and started on amio gtt. Pt currently intubated and on pressors.
Started on PPI gtt for GIB. Pt being empirically treated with vanc/zosyn 2/2
sepsis.

HPI: Pt brought to the ER by his wife due to decreased responsiveness and
generalized weakness. Pt with lack of appetite for ~1-2 weeks. Pt with coffee
ground emesis beginning last night. Pt is from out-of-town with most recent care
at the VA in Amarillo. Pt initially presented with BP in 60s per ED physician
but responded to 2 L bolus. NG tube was put under suction which drained > 1400
ml black fluid. Patient was also found to have gas under the diaphragm on chest
xray and surgery was consulted.

PMH: DM, HLD, BPH

Vancomycin Dosing

Date/Time	Dose	Level	Comments
9/17 1037	1500mg	--	~19mg/kg
9/17 0852	--	18.67	
9/16 2000	2000mg	--	~25mg/kg

A/P:
NEURO: Fentanyl/propofol being held at this time.

PULM: Pt intubated, on SIMV.

CV: Norepi running @ 100mcg/min. Vasopressin @ 0.04units/min. Recommend starting phenylephrine @50mcg/min based on pt's persistent increased HR on NE. Continue amiodarone, currently running @ 17ml/hr.

FENGI: Pt presented with hyperglycemia. Insulin gtt started but now held for BG of 62. Recommend starting renally adjusted insulin gtt once BG warrants. Hypocalcemic, bolused with 6g of calcium gluc. Hypokalemic, bolused with 80 mEq of KCL IV. Hyponatremia now resolved. Continue NaBicarb gtt, currently running @ 75ml/hr. Continue pantoprazole gtt @10ml/hr for GIB.

ID:
-Pt received vancomycin 2g (~25mg/kg) loading dose in ED at 2000. Level this AM was 18.67 so 1500mg (~19mg/kg) vancomycin was given. Will pulse-dose vanc based on renal function. Random level ordered to be drawn with AM labs. Will redose if level <20.
-Zosyn 4.5g x1 in ED. Dose changed to zosyn 2.25g Q6H based on renal function and indication. Will continue to monitor and adjust as needed.

DVT Prophylaxis: Will not start at this 2/2 GIB.

GI Prophylaxis: pantoprazole gtt

All changes discussed with SICU team during rounds.

Questions or concerns, contact Pharmacist at 6729 or pgr 1436

TEACHING PHYSICIAN ATTESTATION

I have seen and examined the patient together with the housestaff.  I agree with
the findings and plan as documented in Dr. Ulm's note.  Pt remains critically
ill with increasing pressor support.  PA catheter placement.  Supportive care.
Poor prognosis.

MEDICAL NUTRITION THERAPY -- INITIAL NUTRITIONAL ASSESSMENT

Food and Nutrition History:

--Appetite: Pt reports having a good appetite and eating well. Pt reports he ate 100% of his breakfast this morning.
--Diet followed prior to admission: Pt reports he follows a regular diet at home. Pt reports he was eating well prior to admission
--Feeding Assistance Required: No
--N/V: None reported
--Diarrhea or constipation: None reported
--Chewing or swallowing difficulties: None reported
--Food Allergies: None reported
--Food Preferences: Honored via select menus/room service.
--Ethnic/Religious Food Preferences: None reported
--Pertinent Meds: aspart
--OTC Herbal Supplements/Vitamins: None reported
--Skin Assessment Score: Braden score is 21 (no risk for skin impairment); surgical incision from recent hernia repair noted.

Admitting Diagnosis: hydronephrosis

Past Medical History includes: DM

Current Diet: 1800 ADA

Height: 5' 11.5" (182 cm)
Weight: 175 lbs (79.5 kg) Weight Taken: 26-Aug-15
Usual Weight: 180 lbs (81.8 kg) % Usual Wt: 97%
Target Weight: 175 lbs (79.5 kg) % Target Wt: 100%
Frame Size: Medium Body Mass Index: 24.1

-- Pt reports he has lost about 10# over past year d/t eating less and being more active. Pt reports his UBW is around 180#. Pt reports his wt does fluctuate some. Reviewed wt chart. Current wt is up 4# from previous wt. BMI: 24.1 (normal). Goal for this admission with wt maintenance.

Laboratory Data

Test	Result	units	Ref. range	Date
GLUCOSE	246 H	mg/dL	74 - 118	27-Aug-15
UREA NITROGEN	12	mg/dl	7 - 18	27-Aug-15
CREATININE, SERUM	0.77	mg/dL	.6 - 1.3	27-Aug-15
POTASSIUM	4.2	mmol/L	3.5 - 5.0	27-Aug-15
ALBUMIN	2.6 L	g/dL	3.5 - 4.8	27-Aug-15
TRIGLYCERIDE	153 H	mg/dL	0 - 150	14-Jul-15
PAB	14.3 L	mg/dL	18 - 38	27-Aug-15
HGB	12.3 L	gm/dL	14 - 18	27-Aug-15
HCT	38.6	%	37 - 52	27-Aug-15
HEMOGLOBIN A1C %	13.4 H	%	- 6.0	14-Jul-15

-- Glucose is elevated- pt is on insulin and receives a diabetic diet. A1C indicates poor glucose control. PAB and Albumin are low indicating visceral protein depletion.

Energy Requirements: 2064 Kcal/day Kcal:N 161:1
Energy calculation is based on: Energy Factor of 1, Harris-Benedict, and Actual Body Wt
Protein Requirements: 80 gm/day NPC:N 136:1
Protein calculation is based on: Actual Body Wt and protein level of 1
Fluid Requirements: 2386 ml/day

Appearance: well-nourished male
Nutrition Status: Mildly Compromised

Nutrition Diagnosis: Altered nutrition related lab values related to DM as evidenced by glucose of 246 and A1C of 13.4.

Nutrition Intervention: Will continue 1800 ADA diet as ordered to meet nutritional needs and to help with glucose control. Encourage adequate po intake. Will honor food preferences as voiced, when appropriate.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Nutrition Monitoring/Evaluation:
1. Meet greater than 75% of estimated nutritional needs.
2. Follow weight trends -- Goal for maintenance of 1-2% of admission weight
3. Monitor nutritionally pertinent labs as available-- Gluc, PAB, Alb.
4. Monitor skin integrity for changes.

Nursing Narrative:**********
19:30-20:00 Received report from April McCary, RN. Assumed care of patient.
Patient resting in bed. Patient states he wants to get some rest and not to
disturb him as much as possible.
23:00 Patient resting with eyes closed. No distress noted.
01:00 Med Pass, charted in BCMA.
04:30 Med Pass, charted in BCMA. Assisted patient to scoot up in bed.
07:15 Received verbal orders from Dr. Ahmed, S. to dc tele. Dr. Ahmed said he
will put the orders in the computer when he gets to his office. Called telemetry
to notified them about Dr. Ahmed's verbal orders.
07:30-08:00 Report given to oncoming nurse during walking rounds.

Physical Assessment:**********
Assessment
Respiratory:
Regular, unlabored, no abnormal breath sounds
Supplemental O2 : 2L NC

Cardiovascular:
Peripheral pulses present bilaterally, no edema, regular heart rate.
Telemetry: #:
Neurological:
Alert, oriented x 3, follows commands, PERRLA
Musculo Skeletal:
ROM all joints, hand grips equal.
GastroIntestinal
Abdomen soft, bowel sounds present, no nausea/vomitting/diarrhea.
Appetite:
Date Last BM:
Genito-Urinary
Voids without difficulty, clear urine, no distention.
Skin - Document on form:
Patient has No Pain (Patient rates pain as "0" on a scale of 0-10)
****
IVs:**********
Site #1
Catheter size: 20 IV Fluids
Date sited: Aug 19,2015
Location: L upper arm
IV Care: IV fluids infusing well., Site inspected and palpated; clean w/o s/s
infiltration or infection.
Site Appearance: Palpated & inspected, Drsg clean, dry and intact

 --- Original Document ---

09/20/12 MHS-INITIAL BIOPSYCHOSOCIAL ASSESSMENT(T):
xxxAge:69
SERVICE CONNECTION:SERVICE CONNECTED % - 70 GENDER:MALE   RACE: WHITE
MARITAL STATUS:  Married.

                          CLINICAL HISTORY

PRESENTING CHIEF COMPLAINT/REFERRAL QUESTION:
Veteran was referred by primary care. He is complaining of tiredness/lethargy.
He has noticed within the last 6 months a lack of energy. He says he has lived
out every dream he has ever had and now life is  boring. He spoke with
Rita Sandoval last week who recommended that he come up with some new
goals/dreams and he has done that. He has started on a new project which he
says he enjoys and has energy while doing that but when he is not working on it
he feels tired. His grand idea is to "build the world's largest railroad
museum". He figures he "might as well go big or go home".
```

He also has some trouble sleeping, will wake up feeling just as tired as when he went to bed, not feeling rested and has started taking naps during the day. He is unsure of why he is feeling this way. He feels his PCP has not been very helpful in finding out the cause if it is medical so he is willing to try and figure out the reason for the symptoms if they may be mental health related.

HISTORY OF CURRENT ILLNESS:
Veteran reports symptoms for the last 6 months.

PAST PSYCHIATRIC HISTORY:
None

CURRENT AND HISTORY OF SUICIDAL ACTS AND SELF HARM
None
Passive thoughts but denies any plan or intent. Occasionally thinks "why live the
rest of my life like this". He has recently developed a faith in God and says that would be disappointing to God so he would never do that.

CURRENT AND HISTORY OF VIOLENCE/ASSUALTING OTHERS:
None

SUBSTANCE USE HISTORY TO INCLUDE PAST TREATMENT, RELAPSE HISTORY, AND RESPONSE TO TREATMENT:
Former alcoholic. Has been sober since 1972. He went to a rehab program. He says he did not know he had a drinking problem, it was just a way of life until he started having medical problems with his liver and kidneys.

MENTAL ILLNESS AND SUBSTANCE ABUSE IN FAMILY MEMBERS:
Nonveteran does not know much about his family.

PSYCHOSOCIAL HISTORY:

Childhood/Developmental History: Veteran grew up all over the US. His family were migrant farm workers so they
followed the crops. He was raised by both parents until age 12 when he was on his own after that. He had gotten a job and lied about his age and left his family behind to work that job. His family took off on to the next job and he never saw them again. He says he found his mother 35 years later and helped care for her until she died. He had two brothers. They have both passed.

He says his father was married 7 times and he has brothers and sisters he does not know. He has multiple half siblings.

Physical, sexual and emotional trauma:
None

Family Circumstances: Veterans mother in law recently went under surgery for a hysterectomy and woke
up mentally "messed up". The anesthesia affected her brain.

Adult Relationship History: Veterans wife teaches health and wellness. He and his wife have a 9 year old daughter that they are raising.

Current significant family and/or peer group relationships:
Veteran was married once before. He currently has been married 10 years. He had 5 children in his first marriage whom he remains close with. He says they all turned out good and he is proud of them. He and his wife have a 9 yr old daughter together. His current wife did not have any kids or married before so they had one together. They are looking at adopting more children or providing foster care for teenagers. Veteran loves to travel. He says he has had "lots of windshield time".

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

MILITARY HISTORY:
Branch:
US Air Force, Air Force guard and reserve for a total of 32 years. He received disability retirement. He had a bad car wreck and was forced to retire due to medical issues that left him unable to fly anymore. He spent 24 years on the same plane. The wreck happened while on duty so he now gets SC disability.

He has been all over the world and was deployed to multiple places.

Veteran's perception of most distressing events while in the military:

MEDICAL INFORMATION

CURRENT AND PAST MEDICAL PROBLEMS:
Active problems - Computerized Problem List is the source for the following:

1. Chronic Back Pain
2. Hyperlipidemia *
3. Microscopic Hematuria
4. Diabetes Mellitus without mention of Complication, type II or unspecified ty
5. Depression *
6. Vitamin D Deficiency
7. Vitamin B 12 Deficiency

Are there any new medical problems to report?

CURRENT MEDICATIONS:
Active Outpatient Medications (including Supplies):

	Active Outpatient Medications	Status
1)	CHOLECALCIFEROL 1000IU TAB (OTC) TAKE TWO TABLETS BY MOUTH EVERY DAY VIT D	ACTIVE
2)	CYANOCOBALAMIN 1000MCG/ML INJ, (PER ML) INJECT 1000MCG (1ML) INTRAMUSCULAR EVERY 7 DAYS VIT B12	ACTIVE
3)	ERGOCALCIFEROL 50,000U CAP TAKE 50000UNT BY MOUTH EVERY WEEK VIT D	ACTIVE
4)	SYRINGE-NEEDLE COMBO,25G 5/8IN,3CC,(EA) USE SYRINGE EVERY 7 DAYS	ACTIVE

ALLERGIES AND ADVERSE DRUG REACTIONS:
Patient has answered NKA

ACTIVITIES OF DAILY LIVING ISSUES:
Are there any self care issues? No

PAIN ASSESSMENT:
PAIN INTENSITY (0-10 scale):
Patient's present level of pain: 2
Patient's acceptable level of pain:
Description of exacerbating factors or relieving measures: Veteran does not use medication, he says he has learned pain management
MENTAL STATUS EXAM:

ORIENTATION AND CONSCIOUSNESS:
APPEARANCE AND BEHAVIOR:
cooperative and reasonable
SPEECH:
normal rate/rhythm
LANGUAGE:
intact
MOOD AND AFFECT:
mood euthymic
affect is congruent with mood
PERCEPTUAL DISTURBANCE (hallucinations, illusions):
none
THOUGHT PROCESS AND ASSOCIATION:
normal, coherent

THOUGHT CONTENT (delusions, obsessions etc.):
  no unusual thought content
INSIGHT:
  good
JUDGMENT:
  good
MEMORY:
  impaired recent
  details: normal forgetfulness

FUND OF KNOWLEDGE
    Above Average
MENTAL STATUS COMMENTS:

Needs Assessment:
Education and Learning Needs Assessment

Educational Background:

   Highest grade achieved: less than high school with GED8th grade then GED

   Educational/learning difficulties: no known educational learning disability

   Attitudes toward learning: not interested in academic achievement

   Assessment of primary language spoken in the home and veteran's preference of language for clinical communication: English

Legal Status Screening:
Is there evidence from the interview that the veteran has legal issues or concerns that would warrant a more in-depth assessment?
No. No further assessment indicated.
Housing and Income Assessment:
Do you currently have a stable place to live?
Yes
What is your current income and sources of income?
$0 per month
Sources:

Nutritional Status Screening:
Is there evidence from the interview that the veteran has nutritional issues or concerns (including weight gain or loss of more than 5% in last 3 months or 10% in last year, dietary concerns, eating disorder signs or symptoms) that would warrant a more in-depth assessment?
No. No further assessment indicated.

Screening for Abuse, Neglect, or Exploitation:
Is there any evidence from the interview that the veteran is a victim of physical assault, rape, sexual molestation, domestic abuse, elder neglect or abuse, or other serious abuse or exploitation?
No. No further assessment indicated.

Screening for Bereavement Issues:
Is there evidence from the interview that the veteran is actively suffering from bereavement issues?
No. No further assessment indicated.

Screening for Vocational Needs Assessment:
Is there evidence from the interview that the veteran has any vocational deficits or needs?
No. No further assessment indicated.

Spiritual and Religious Orientation: Personal spiritual beliefs but does not attend organized religious activities

INITIAL DSM-IV DIAGNOSES:
Axis I Clinical Disorder:
  Depressive Disorder: NOS (Not Otherwise Specified)
General Categories None
Axis II Personality Disorders/Traits:
  None
Axis III Current Medical Conditions: See Medical History above
Axis IV Current Psychosocial Stressors:
None

Axis V GAF Score (current level of functioning): 60-65
                 (past year level of functioning):

SUMMARY AND FORMULATION: This is a 69 yr old 70%SC Vietnam era veteran who was referred by primary care. He is reporting symptoms of lethargy and trouble sleeping. He is unsure if the cause of the problem is medical or mental so he is wanting to be evaluated and try therapy here in the mental health clinic. He denied any SI/HI today.

Preliminary Treatment Plan:
-The veteran was given social workers business card along with clinic numbers and the crisis hotline number
-The veteran was educated on all emergency procedures
-He will be referred for therapy

Patient does not desire to have family members, significant others, or advocates to participate in patient chart.

URGENCY: routine STATUS: COMPLETED
SUBJECT: Case #: 65578

PATIENT NAME: HOPKINS,MARSHALL

DATE: 08/19/2015

PREOPERATIVE DIAGNOSIS: Right inguinal hernia.

POSTOPERATIVE DIAGNOSIS: Right inguinal hernia.

PROCEDURE: Repair of right inguinal hernia with Bard mesh plug.

SURGEON: Syed Ahmed, MD

ASSISTANT: Jaime Tindall

ANESTHESIA: General with endotracheal intubation.

JUSTIFICATION FOR THE PROCEDURE: The patient was seen in the Surgical Clinic with very large right inguinal scrotal swelling. The patient had it for several years. According to him he had repair of a right inguinal hernia done twice in the 1970s. On examination, there was a very large inguinal scrotal hernia. Patient was able to reduce it but with difficulty. Diagnosis of right inguinal hernia was discussed with the patient. Repair with mesh was offered as a treatment. The procedure was explained in detail. Risks and benefits of the operation were discussed. These included, but were not limited to, bleeding, infection, nonhealing of the wound, testicular swelling, hematoma formation and possible recurrence of the hernia. The patient had opportunity to ask questions. These were answered to his satisfaction. The patient agreed to proceed with the operation.

DESCRIPTION OF PROCEDURE: After general anesthesia was administered, the skin of the lower abdomen and genitalia was prepared with ChloraPrep and draped. Incision was made in the right groin 2.5 cm above and parallel to the inguinal ligament. The incision was deepened. Subcutaneous fat and the Scarpa fascia was divided and external oblique aponeurosis was identified. External ring was visualized and a very large inguinal scrotal hernia was seen coming out of the external ring and going to the scrotum. The external ring was divided. Superior and inferior flaps were raised in the external oblique aponeurosis to reveal the deep ring. The hernia sac was then mobilized at the level of the pubic tubercle and a Penrose drain was passed around it. The hernia sac was then gradually dissected removing it's coverings. The sac was entered. The sac was then completely separated from the contents of the inguinal canal. The sac was held at the fundus with 2 hemostats and opened with Metzenbaum scissors. The sac was opened up to the level of the deep ring. At that level it was divided and excised. The opening in the sac was then closed with a running suture of 0 Vicryl. The defect was then repaired by placement of a Marlex mesh plug in the deep ring. Sutured in place with interrupted 2-0 Prolene. Adequate tension-free repair was obtained. The spermatic cord, vas deferens and vessels were protected throughout the course of the operation. The wound was irrigated thoroughly with normal saline containing antibiotic solution Ancef. External oblique was closed with a running suture of 0 Vicryl. Subcutaneous fat was approximated with interrupted 3-0 Vicryl. Then, 30 mL of 0.5% Marcaine was infiltrated in the skin edges. The skin was approximated with staples.

Patient tolerated procedure well, was extubated, and transferred to recovery in a stable condition.

ESTIMATED BLOOD LOSS: 25 mL.

SPECIMEN: Hernia sac.

Patient was discharged to home/self care.

Patient Discharge Instructions
Today's Date: AUG 27, 2015
Patient's Doctor/Provider: Wan
Patient's Discharge Diagnosis: Urinary incontinance, diabetes, Inguinal hernia
s/p surgical repair
Discharge Instructions given to Patient
Patient Assessment at time of discharge:
OrientedStable
****NOTE TO PATIENT: PLEASE CAREFULLY FOLLOW THE INSTRUCTIONS BELOW*******
Resume home medications as prescribed? Yes
Activity:
Up and about as desired and tolerated
List personal items brought to hospital documented on the Nursing Admission
Assessment:
    black cell phone, glasses, phone charger, Grey overalls, brown
    sandal, hygiene items
YES--Were these items returned to Patient at discharge?
NO--Did the patient acknowledge having cash in the Nursing Admission Assessment
Note?
NA--If yes, did the patient secure cash with the Agent Cashier?
(If the patient secured cash with the Agent Cashier, information to contact the
Agent Cashier at 806-355-9703 ext. 7364 was provided.)
NA--Did you get assistance with any fears or anxieties that
                 you had during your admission?
NA--Do you have any further concerns that we can help you
                 with before you are discharged?
Explanation of above responses:

************************************************************
Does Patient have Congestive Heart Failure?
No
************************************************************
Is the patient going home with a Foley catheter? Yes
If yes, Foley Catheter Care pamphlet provided Yes
************************************************************

Does the patient have MRSA? No
MRSA pamphlet provided NA
****
Post-op instructions (Pacemaker/ICD/Loop recorder) provided NA
****
Central Line IV Site Care pamphlet provided NA
****
Post Cardiac Procedure Education Sheet provided NA
****
Pain Scale at discharge: 0
(See Focus note or Daily Assessment note for comphrehensive assessment of pain greater than 0)
****
Patient does not have Wounds or Pressure Ulcer.
Diet: Other: Diabetic
****
Call your doctor for any signs / or symptoms of: Reddened wound, wound drainage, swelling,red streaks, increased pain, temperature 101 or higher, or bleeding.
CALL:
Your admitting doctor (name at top of page) 355-9703 ask operator anytime.
Your primary care provider (8am - 4pm) 355-9703 ask operator.
Emergency Department(anytime) 355-9703, ask operator for Emergency Department.
Day Surgery (6am-6pm) 355-9703 ext. 7200 or ask operator.

As part of your discharge today, you will receive a printout of upcoming appointments;
including this post-discharge follow-up phone call. At any time after leaving today,
if you know you will be unavailable for the scheduled phone call; please contact Telephone Triage at (806)354-7837 or 1 (800) 687-8633 between the hours of 8:00a.m to 4:00p.m. Monday through Friday.

Keep all previously scheduled appointments.
Your return appointment is: Sep 4,2015@10:00 with Dr Rodriquez
Letter will be sent for follow up date and time, approx 1 week

Or you will receive a letter in the mail with your appointment. IF YOU DO NOT RECEIVE A
LETTER, PLEASE CALL YOUR ADMITTING DOCTOR to arrange an appointment.
Other instructions:
Mode of Discharge: Wheelchair
Accompanied by: friend
Relationship: Friend
****
Patient was given a current list of medications on discharge.
Patient verbalizes understanding of discharge instructions: Yes

This patient has received Healthy Lifestyle Instructions which include instructions
for Heart Failure including: activity level, diet/fluid intake, discharge medications,
follow-up care, weight monitoring, and what to do if symptoms worsen.

This patient has received a copy of the Passport to Healthy Living which includes the following list of stroke symptoms:
Sudden numbness or weakness of the face, arm or leg, especially on one side of the body
Sudden confusion, trouble speaking or understanding
Sudden trouble seeing in one or both eyes

PNEUMOCOCCAL VACCINE-NURSE:
Patient declines Pneumococcal Vaccine.
HEALTHY LIVING/COPING SKILLS:
PHQ-2
A PHQ-2 screen was performed. The score was 1 which is a negative screen for depression.

1. Little interest or pleasure in doing things
Not at all

2. Feeling down, depressed, or hopeless
Several days
Exercise Screening:

Yes--Are you physically active, exercise 3 times a week 20-30 min.
Weight/Nutrition Screening:

Yes Does your diet contain more fruit, grain, and vegetables than meats?
No Have you had your stool checked for blood in the last year?
Miscellaneous:

No 1. Have you had a flex sig by an outside provider or at the Amarillo VA within the last 5 years?
No 2. Have you had a colonoscopy by an outside provider or at the Amarillo VA within the last 10 years?
No 3. Do you have an advance directive or living will?
No 4. Do you take an aspirin daily?
Depression Screening:
PHQ-2
A PHQ-2 screen was performed. The score was 1 which is a negative screen for depression.

1. Little interest or pleasure in doing things
Not at all

2. Feeling down, depressed, or hopeless
Several days
Alcohol Screening:
AUDC (Mental Health Instrument)
An alcohol screening test (AUDIT-C) was negative (score=0).

1. How often did you have a drink containing alcohol in the past year?
Never

2. How many drinks containing alcohol did you have on a typical day when you were drinking in the past year?
Response not required due to responses to other questions.

3. How often did you have six or more drinks on one occasion in the past year?
Response not required due to responses to other questions.
Influenza Immunization:
Patient states he/she did not get a flu shot during the latest flu season.
Tetanus Reminder:
Patient refused Tetanus immunization.
Tobacco Use Screen:
Patient states they are a former tobacco user but has quit more than 12 months ago.
Influenza H1N1 Vaccine:
The patient declines to be vaccinated for Influenza H1N1.
MINI-COGNITIVE IMPAIRMENT SCREENING:
Give 1 point for each recalled word after the CDT distracter.

Score=3 (0-3 for recall).

Give 2 points for a normal CDT, and 0 points for an abnormal CDT. The CDT is considered normal if all numbers are depicted, once each, in the correct sequence and position, and the hands readably display the requested time.

LOCAL TITLE: Discharge Summary
STANDARD TITLE: DISCHARGE SUMMARY
DICT DATE: SEP 18, 2015 ENTRY DATE: SEP 23, 2015@08:50:18
DICTATED BY: ULM,IRENE E ATTENDING: VERA,SANTIAGO RAFAEL
URGENCY: routine STATUS: COMPLETED

PATIENT NAME: HOPKINS, MARSHALL H.

DATE OF DISCHARGE: 09/18/2015.

DIAGNOSES:
1. Ischemic small bowel.
2. Sepsis.

PROCEDURES: On September 17, 2015, exploratory laparotomy with bowel resection and temporary abdominal closure.

HISTORY OF PRESENT ILLNESS: The patient is a 72-year-old Caucasian male who presented to the VA Medical Center, on September 16, 2015, with complaints of coffee ground emesis and lethargy that had been present for roughly two days. His wife reports that he had an inguinal hernia repair roughly one month prior to his presentation and had been persistently tired since that time. He was also noted to have some hematuria. They were traveling across the country and presented to the VA Medical Center in Memphis after he was found to have worsening altered mental status.

Upon evaluation in the Emergency Department, the patient had a KUB which was concerning for pneumoperitoneum. Therefore, the General Surgery Service was consulted. He was found to be grossly obtunded with hypertension noted in the low 60s. A central line was placed in the ED. However, he sustained an iatrogenic pneumothorax. Therefore, a chest tube was placed on the left. He ultimately had additional iv access placed and the patient was taken emergently to the Operating Room.

In the Operating Room, the patient had already been started on blood pressure support. An exploratory laparotomy was performed where he was found to have grossly dead bowel. This was resected and he was found to have a total of 120 cm of small bowel remaining. These were stapled and the patient underwent temporary abdominal closure for stabilization prior to reexploration.

He was taken to the ICU where he was continued on both Levophed and vasopressin with attempts to wean as tolerated. However, the next day and a half, the patient's condition progressed and unfortunately he was maximized on blood pressure therapy. At this time, a discussion with his wife for current goals of care and she decided that, per the patient's wishes, she no longer wanted any further blood pressure support. Therefore, the pressors were stopped and the patient passed.

   *** CARDIOLOGY - OUTPATIENT (C) Has ADDENDA ***

PATIENT NAME:  HOPKINS, MARSHALL H

DATE:  10/05/2010

DATE OF BIRTH:  07/20/1943

CHIEF COMPLAINT:  Complaints of chest discomfort.

PAST MEDICAL HISTORY:  The patient has no known coronary
```

Disclaimer: "The information contained in this document may contain privileged and confidential information including patient information protected by federal and state privacy laws."
COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

artery disease. He reports possible TIAs in the mid-1990s. He has a history of obesity. He has lost 100 pounds over the past several years. He also has dyslipidemia.

SUBJECTIVE: The patient reports about a month ago he was in his work area when he began to have a painful heaviness from the left mid-axilla to the right mid-axilla, across the chest wall and what appears to have gathered in the center of the chest. He states this again happened 2 days later, and again described it as feeling "constrict ed." What he has reported to me is that this lasted for several seconds and then disappeared. What he reported to his primary care provider is that it lasted several minutes. The patient is unable to recall exactly what he was doing or exactly how long this episode lasted. These have not occurred since, and he has been relatively active. He states he breaths okay except for at night he gets "stopped up a little bit." He has had some dizziness after standing, but is dealing with that. No feelings of palpitations . No syncope. No swelling of extremities. No tobacco or alcohol use. He stays active. He follows a very strict regimen and diet. His wife is a natural herbalist. He is on absolutely no medications, and is a very strong believer in homeopathic teachings.

OBJECTIVE: Vital signs: Temperature 98.3, pulse 78, respirations 16, blood pressure 139/95 which is elevated from previous blood pressures, height 72 inches, weigh t 206 pounds, pulse oximetry 96% on room air.

General: This is a very pleasant gentleman who comes to the clinic ambulatory in no acute distress.
Neurological: Speech clear and appropriate. Follows commands. Alert and oriented to person, time, and place. Has strong and equal hand grips.
Neck: No carotid bruit appreciated. No JVD.
Lungs : Clear.
Heart: S1, S2 auscultated with a possible S1 splitting. No murmurs. No pain upon palpation of the chest wall. No rubs.
Abdomen: Nontender. Bowel sounds present.
Periphery: No pedal edema.

MEDICATIONS: None.

LABORATORY AND TESTS: The patient's EKG today shows a sinus rhythm with a first degree AV block, rate is 72. A lipid panel shows a total cholesterol of 188, LDL 120, HDL 30 and triglycerides 160.

ASSESSMENT:
1. Chest pain.
2. Dyslipidemia.

PLAN: Of course, there will be no addition of medication for this patient as he does not feel that he is treated appropriately with medications. This brings its own set of unique circum stances to this patient's presentation. His complaints of chest heaviness or "constriction" is compelling for ischemic heart disease. However, he has not been able to bring on these episodes since. He has an elevated blood pressure today, although it does not appear that it is chronic. His cholesterol levels are not at goal. However, he is of course not interested in any kind of statin. I have talked to him at length about the process should he have a stress test and should that stress test be positive. He would then be recommended for a left heart catheterization, which would require Plavix should he have an intervention. I have gone to explain that should he be found to have ischemic heart disease he would have to take Plavix for at least 1 year and other medications would be strongly recommended. I have also explained that there is a potential for bypass. He has verbalized understanding and is interested in having the stress test. He is also interested in having another lipid panel the day of that stress test to see if his wife will be able to help increase his HDL in the next month. I have encouraged appropriate routine exercise. I have also stressed when he should report to the Emergency Room, and he has verbalized understanding of that. We will follow him as appropriate.

    Is the patient diabetic?
      Yes - patient is a diabetic.

      Last HGBA1c value and time done: 13.6  3/19/15

      HGBA1c < 7, repeat in 6 months HGBA1c > 7, repeat in 3 months
  Are you registered for My HealtheVet (MHV)?
    No - Are you interested in registering? No If 'yes' please hand
    Veteran My HealtheVet brochure.

Pt ambulatory to clinic, unstable in gait, leaning against wall while walking
down hall, accompanied by wife.  States had right inguinal hernia repair at
Amarillo VA on 8/19/15 and was dismissed on 8/20/15.  States since 8/20/15  "I
have no bladder control.  I don't know when it is going to start or stop until
running down my leg."  Also states now having constant hiccups which interfers
with speech, sleep, and eating.  "I also have no coordination.  When I get up I
feel like I'm going to fall"  and states this started on 8/21/15.  C/o no
appetite and no energy.  Was taking acetaminophen 300mg with codeine 30mg tabs,
taking 1 tab every 4 hours prn for pain but has not had any medication since
yesterday.  Has diabetes but unwilling to take medication.  Fingerstick bs at
clinic is 360.  On exam abd is protruded, rounded, and firm with pain rated as
4-5/10.  No bowel sounds heard x 4 quadrants.  Last bowel movement was on
morning of 8/20.  Right inguinal incision open to air with staples intact.
Wound edges approximated well with no redness or drainage noted.  T 98.7, P 85,
R 20, b/p 137/90, SpO2 93%.

CC: recurrent right inguinal hernia

HPI: Mr. Hopkins is a 70 y/o M who presents to the clinic for evaluation of a
right inguinal hernia. The patient has had two operations to fix his RIH
previously, the first in 1969 and the second in 1974 (which was done with mesh).
The patient states he again noticed a bulge in his right groin about 3 mo ago.
It is soft and reducible, but not painful. He has been wearing a truss for
support. The patient recently moved to KC from Oklahoma. Of note, Mr. Hopkins is
a diagnosed diabetic with an A1c of 9.8 and blood glucose >240, but refuses any
medical therapy. He states "I do not believe in medication" and states he will
work on his diet to bring down his blood glucose.

LAB RESULTS FOR: APR 30, 2014 - NONE FOUND, no imaging

A/P: 70 y/o M with recurrent RIH:

The patient is a candidate for open repair with mesh. However, his diabetes needs to be better controlled. We discussed the risk of operative complications including mesh infection and poor wound healing, secondary to his diabetes. The patient adamantly refuses accepting medical therapy for his diabetes, and states he will improve his blood glucose levels with diet alone. We will have him follow up in 1 mo with a fasting blood glucose and HbA1c level checked on the morning of the visit.

Patient seen and discussed with Dr. Stark.

Team: TEAM PATRIOT
SPOUSE called in for HOPKINS,MARSHALL HUGH (b) (6) Phone: (620)272-4825.
Contact Phone Number: (620)272-4825
Caller Area: AMARILLO
Type of call: INFORMATION.

Comments:
Caller states her husband had hernia repair on 8/19, reports his wound is doing good and he is not requiring pain meds. Her concern today is "he has no bladder control and no balance". Stated he has had not bladder control since he went home 4 days ago and has been in bed for the past 3 days.

She reports concern that they live 2 1/2 hours away from Amarillo and she feels he needs to be seen. Encouraged her to bring him to the ED for evaluation, she did NOT want to because of the distance. Spouse stated she plans to try to have him seen at the Liberal, Kansas VA Clinic if possible. She did acknowledge that he needs to be evaluated and the ED is available 24/7. She did verbalize a plan to have him seen today.

Chief Complaint: Not applicable to call.
Identified problem: OTH UNSP COUNSEL.

Spouse will bring the Vet to the ED if unable to access care at the Liberal VA Clinic.

Caller Response: *OTHER

Patient/Caller agrees with plan.

SUICIDE RISK ASSESSMENT

SADPERSONS 10-POINT SUICIDE RISK ASSESSMENT

Each letter represents one risk factor and one point. The scale emphasizes long term risk. High scores may occur due to demographic risk factors in the absence of imminent suicidal ideation or intent. The scale does not correct for mitigating factors such as investment in family, treatment, or religious beliefs.

S (gender)	M = 1 Fem = 0	1
A (age)	>65 = 1 <65 = 0	1
D (depression)	Yes = 1 No = 0	1
P (prev attempt)	Yes = 1 No = 0	0
E (EtOH excess)	Yes = 1 No = 0	0
R (Irrational)	Yes = 1 No = 0	0
S (low social support)	Yes = 1 No = 0	0
O (organized plan)	Yes = 1 No = 0	0
N (no spouse)	Yes = 1 No = 0	0
S (serious sickness)	Yes = 1 No = 0	0
	TOTAL SCORE:	3

Interpretation: 0-2="no" risk; 3-4=low risk; 5-6=moderate risk; 7-10=high risk

Additional Suicide Risk Assessment

1. CURRENT IDEATION, INTENT and PLAN
The patient denies having current thoughts or plans of harming self.

2. RISK FACTORS:

Is Male gender, Does have some signs of depression, Has chronic pain syndrome

3. PROTECTIVE FACTORS:

Veteran has significant attachments to a family member, dependent, friend, pet, or other, Has some family and friend social support, Has cultural or religious beliefs deterring suicide, Shows capacity to make treatment alliance, Is concerned about self and family , Is future oriented

4. CLINICIAN'S OVERALL IMPRESSION

Based on risk factors and protective factors and my interview and history, it is my opinion that this patient :

Is not at imminent danger to self at this time , Is appropriate for continued outpatient management

5. Interventions and Follow-up

National VA suicide prevention hotline was provided: 1-800-273-TALK 1-800-273-8255)., The patient was advised on how to reach this clinic at numbers provided or go to our emergency department at any time.

--- Original Document ---

06/29/15 WI-PRIMARY CARE FOLLOW-UP:
Primary Care Follow-Up

Patient recently treated in:
Non-VA Emergency Room
Southwest Medical Center Liberal, KS

Diagnoses were: Hyperglycemia, dizziness

Medications added, stopped or changed:
None- SWMC ED notes: "pt strongly refused to take any medication or any medical intervention to lower his blood sugar."

Follow-up issues: Spoke with pt via phone this am. States he was discharged from ED on 6/26/15 and spent the weekend at his residence at Hooker, OK. This am traveling to his home in Missouri. States he is feeling fine. Denies dizziness, confusion, n/v, or blurred vision. Blood sugar by EMS on 6/26/15 was 355 and at hospital lab 408. Pt does not admit that he has diabetes and states "I am working on some things regarding my pancreas." Nurse strongly encouraged pt to follow-up with provider at KC VA due to high blood sugars. States he would.

Will forward Southwest Medical Center ED notes to provider for review.

PACT Nursing Note

Nursing
Returned call to patient per message of "feeling tired/run down". Patient
reports that for the past 3-5 months he has had ^ fatigue. "I feel worn out in
the evenings and have periods of depression". When questioned on SI, patient
stated "thoughts cross my mind". Patient denies plan or HI at this visit.
Patient denies other symptoms at this visit. Patient feels that he is missing a
mineral/vitamin in his body and is requesting lab orders prior to appointment.
Encouraged patient to speak with R. Sandoval SW for MH concerns. Patient is in
agreement. Encouraged patient to present to ED for nursing evaluation and
disposition if symptoms ^ or worsen. Patient scheduled with PCP on 8/23/12 @
0800. Patient verbalized understanding with information given at this visit.
Patient contact#(580)652-2430

05/17/2011 08:34 /es/ Elma Fletcher
RN, BSN

05/17/2011 ADDENDUM STATUS: COMPLETED
Per PCP request, contacted pt to discuss hyperlipidemia and diabetes. Pt states that he normally follows a very healthy diet but "fell off the wagon" the last few weeks. He does not believe he has diabetes and states that he and his wife do not believe in taking medications; they are into natural foods and herbals. Discussed that A1c is a 90 day average of blood glucose. Pt would like to repeat lab work in 3 months. Also, mentioned glucometer; pt indicated that his wife may have a meter that he can use (was given to them by someone who was a diabetic and was able to discontinue medication). Pt also states that he usually has blood in his urine during most of his physicals. Transferred pt to TA to make appt in 3 months.

Notes ~ PHYSICAL THERAPY ASSESSMENT NOTE

LOCAL TITLE: PHYSICAL THERAPY ASSESSMENT NOTE
STANDARD TITLE: PHYSICAL MEDICINE REHAB OUTPATIENT INITIAL EVALU
DATE OF NOTE: MAY 30, 2008@15:19 ENTRY DATE: MAY 30, 2008@15:19:18
AUTHOR: NICHOLSON,R KEVIN EXP COSIGNER:
URGENCY: STATUS: COMPLETED

PRIMARY DIAGNOSIS: Cervical pain
TREATMENT DIAGNOSIS: Cervical pain
ONSET DATE: 5/13/08 (date of rehab medicine consult)
EVALUATION DATE: 5/30/08

GENERAL INFO: 64 year old male referred to PT from his PCP. This pt relates a rather long and complicated history regarding his neck pain, dating back to 1991. He states that he was rear-ended while at a standstill. Impact was great enough to break his driver's seat away from the frame. He has had problems with severe neck pain since then. He states that he has had numerous treatments over the years- extensive PT for exercise, modalities, and traction, use of home cervical traction, chiropractic for manual adjustment, MD specialists, etc. He stated that the only treatment that provides relief is chiropractic. He currently goes to a chiropractor for rx 3-4 times per year, when his pain is severe. He no longer receives manual adjustments, instead his chiropractor uses an "actuator" treatment, which has been beneficial per his report.

PERTINENT MEDICAL HX: Noncontributory

S: CHIEF COMPLAINT: Cervical pain that is worse if he sleeps without adequate support for head and neck. Treatments for his neck pain have been unsuccessful except for the chiropractic rx over the years. He is currently experiencing severe neck pain, 6-7/10, which happens periodically and is usually when he gets his care from chiropractic.

PATIENT'S GOAL(S): Would like to be considered for chiropractic care through the VA.

O:
RANGE OF MOTION- No ROM deficits noted for UEs on screening exam. Cervical ROM not tested.
STRENGTH TESTING- Deferred this date.

FUNCTIONAL ASSESSMENT
Mental status: A&O X 3
Communication: No deficits noted
Pt is independent with self care ADLs. He remains active, only limited by cervical pain.

OTHER INFORMATION- Further exam and testing for this pt is deferred at this time.

EQUIPMENT/MEDICAL DEVICES ISSUED- None

A:
Patient education barriers to learning- None

Description of disability- Pt presents with c/o chronic cervical pain. His only relief is with chiropractic rx using this "actuator" system. He is specific in that no other treatment has been effective for relief since his MVA injury.

An order was entered for case mgt for chiropractic care in 2007, but is was declined for lack of recent xrays and no documentation of acute flare up of current condition. At this time, I would recommend that he be considered for chiropractic care, via fee basis. He lives in Oklahoma, and goes to chiropractor in Garden City, KS when he needs rx. Will contact PCP with this information.

P:
Recommendations as noted above.

/es/ R. Kevin Nicholson

[redacted]

Dear MARSHALL HUGH HOPKINS,

I wanted to update you on your recent lab/test results:

LIPIDS
CHOL: 239 (04/08/14 08:15)
HDL: 44 (04/08/14 08:15)
LDL-CAL: 145 (04/08/14 08:15)
RISK FA: 18 (04/08/14 08:15)
TGL: 249 (04/08/14 08:15)
(LDL is the "bad" cholesterol)
(HDL is the "good" cholesterol. Target is >40. Exercise can increase HDL) (TGL = triglycerides. Target is <150. A nonfasting sample, sweets, alcohol, weight gain, and diabetes can increase these.)
Your goal LDL is <100 (vascular disease or diabetes or chronic kidney disease)

HEMOGLOBIN A1C 9.8 % H (04/08/2014 08:15)
Your target Hgb A1C is 6.5
(The Hgb A1C tells us information about your diabetes control over the past 3 months)

LIVER PANEL
ALB: 4.3 (04/08/14 08:15)
ALKPHOS: 58 (04/08/14 08:15)
ALT: 19 (04/08/14 08:15)
AST: 15 (04/08/14 08:15)
TBIL: 0.7 (04/08/14 08:15)
TP: 8.1 (04/08/14 08:15)
Results are normal

HEMOGLOBIN 15.4 g/dl (04/08/2014 08:15) (red blood cell count)
Results are normal

CHEM 7
ANI GAP: 14.0 (04/08/14 08:15)
BUN: 12 (04/08/14 08:15)
CA: 9.4 (04/08/14 08:15)
CL : 99 (04/08/14 08:15)
CO2 : 29 (04/08/14 08:15)
CRT: 0.90 (04/08/14 08:15)
EGFR: 83.4 (04/08/14 08:15)
GLU: 244 (04/08/14 08:15)
K: 3.8 (04/08/14 08:15)
NA: 142 (04/08/14 08:15)
(BUN and CRT measure kidney function)
Results are normal

TSH 2.310 uIU/mL (04/08/2014 08:15)
This is a thyroid function test. The results are normal.

IN SUMMARY:
1. TC GOAL IS <200, LDL (BAD) GOAL <100 DUE TO DIABETES. YOU HAVE INDICATED THAT YOU DECLINE TO TAKE MEDICATION AT THIS TIME.

2. DIABETES - THE A1C REFLECTS AVERAGE BLOOD SUGAR OF 227. NORMAL A1C IS 5.8, AVERAGE BLOOD SUGAR OF 107. GOAL FOR APPROPIRATELY TREATED DIABETES IS 6.5, AVERAGE BLOOD SUGAR OF 130. YOU HAVE DIABETES. TREATMENT FOR DIABETES IS NEEDED. AT YOUR RECENT VISIT YOU DECLINED THERAPY.

3. INGUINAL HERNIA - PER SURGEON'S NOTE, HE IS UNABLE TO TO PERFORM SURGERY DUE

CC: hematuria

HPI: Pt is a 72 yo M with PMH of Dm, Hl, BPH who was en route to north carolina
and had hematemesis and melena and was found to be hypotensive when brought to
the ER last night. Pt. had free air in abdomen on KUB and was taken for
exploratory laparotomy during which he was found to have ischemic bowel now s/p
resection. He remains in ICU with temporary abdominal closure and is being
treated for septic shock. He was noted to have hematuria, for which urology is
being consulted along with a request to be present for his repeat exploration
tomorrow 9/18 to evaluate the bladder.

Of note pt had a inguinal hernia repair about 1 month ago and  had been having
issues
with urinary retention after that. he was admitted for bladder outlet
obstruction and was found to have hydronephrosis/pyelo and was treated with
rocephin. per the wife, he has since been seen by Urology in amarillo, texas and
had cystoscopy, which was negative for concerning findings.

chart reviewed. VistaWeb reviewed.
below are the amarillo VA notes for surgery, pcp and some recent lab on this patient. he is NOT taking any diabetes medications.
being sent to local ER today for acute ABD s/p right inguinal repair.
significant history of non-compliance with medical therapy for his diabetes.
hgba1c in july 2015 was 13.4
fsbg on 8-19-15 was 247 am of surgery.
only meds noted in VistaWeb is tylenol with codeine

LOCAL TITLE: OPERATION REPORT
STANDARD TITLE: OPERATIVE REPORT
DATE OF NOTE: AUG 19, 2015@07:55 ENTRY DATE: AUG 19, 2015@10:10:34
SURGEON: AHMED,SYED H ATTENDING: AHMED,SYED H
URGENCY: routine STATUS: COMPLETED
SUBJECT: Case #: 65578

PATIENT NAME: HOPKINS,MARSHALL

DATE: 08/19/2015

PREOPERATIVE DIAGNOSIS: Right inguinal hernia.

POSTOPERATIVE DIAGNOSIS: Right inguinal hernia.

PROCEDURE: Repair of right inguinal hernia with Bard mesh plug.

SURGEON: Syed Ahmed, MD

ASSISTANT: Jaime Tindall

ANESTHESIA: General with endotracheal intubation.

JUSTIFICATION FOR THE PROCEDURE: The patient was seen in the Surgical Clinic with very large right inguinal scrotal swelling. The patient had it for several years. According to him he had repair of a right inguinal hernia done twice in the 1970s. On examination, there was a very large inguinal scrotal hernia. Patient was able to reduce it but with difficulty. Diagnosis of right inguinal hernia was discussed with the patient. Repair with mesh was offered as a treatment. The procedure was explained in detail. Risks and benefits of the operation were discussed. These included, but were not limited to, bleeding, infection, nonhealing of the wound, testicular swelling, hematoma formation and possible recurrence of the hernia. The patient had opportunity to ask questions. These were answered to his satisfaction. The patient agreed to proceed with the operation.

DESCRIPTION OF PROCEDURE: After general anesthesia was administered, the skin of the lower abdomen and genitalia was prepared with ChloraPrep and draped. Incision was made in the right groin 2.5 cm above and parallel to the inguinal ligament. The incision was deepened. Subcutaneous fat and the Scarpa fascia was divided and external oblique aponeurosis was identified. External ring was visualized and a very large inguinal scrotal hernia was seen coming out of the external ring and going to the scrotum. The external ring was divided. Superior and inferior flaps were raised in the external oblique aponeurosis to reveal the deep ring. The hernia sac was then mobilized at the level of the pubic tubercle and a Penrose drain was passed around it. The hernia sac was then gradually dissected removing it's coverings. The sac was entered. The sac was then completely separated from the contents of the inguinal canal. The sac was held at the fundus with 2 hemostats and opened with Metzenbaum scissors. The sac was opened up to the level of the deep ring. At that level it was divided and excised. The opening in the sac was then closed with a running suture of 0 Vicryl. The defect was then repaired by placement of a Marlex mesh plug in the deep ring. Sutured in place with interrupted 2-0 Prolene. Adequate tension-free repair was obtained. The spermatic cord, vas deferens and vessels were protected throughout the course of the operation. The wound was irrigated thoroughly with normal saline containing antibiotic solution Ancef. External oblique was closed with a running suture of 0 Vicryl. Subcutaneous fat was approximated with interrupted 3-0 Vicryl. Then, 30 mL of 0.5% Marcaine was infiltrated

in the skin edges. The skin was approximated with staples.

Patient tolerated procedure well, was extubated, and transferred to
recovery in a stable condition.

ESTIMATED BLOOD LOSS: 25 mL.

SPECIMEN: Hernia sac.

Nursing Care Comments:
  0754 - Received report from C Rivera RN and assumed care of pt. 0755 - Pt transferred from DSU2 to OR3 via stretcher with side rails up x 2 by A Blackwell RN. Pt moved onto OR table with minimal assistance into supine position. Monitors applied at HOB by Dr Warren. General anesthesia induced without incident. Pillow placed underneath head, arms abducted to 90 degrees and supinated on padded armboards with eggcrate foam padding and secured with pillow cases and tape. Safety strap placed across pt thorax. Pt head/thorax/sacrum on megadyne gel bovie pad. Upper body bair hugger applied and turned on. Remaining hair clipped from right groin/scrotum with clippers by A Blackwell RN. Pt RLQ/right groin/scrotum prepped with Chloraprep solution by A Blackwell RN. No pooling of prep solution noted and pt draped by T Bryant CFA. 0824 - Time out performed with all personnel in agreement. 0825 - Procedure begun. 1gm Ancef powder verified and placed on backtable for use as irrigation to soak mesh. Procedure tol well - concluded at 0950. Medium jock strap applied to apply pressure dressing with fluffed kerlix. Pt emerged from anesthesia easily and transferred back onto stretcher via OR personnel with assistance of roller board. Pt transferred to PACU via stretcher with side rails up x 2. 1004 - arrived in PACU, report given to J Gerald RN who assumes care of pt. Monitors placed, VSS, blood glucose checked with result of 258, pt resting comfortably.

Reason for Study: chest tube, intubated

Clinical History:
General Radiology - Chest (Portable)

You are ordering a portable chest X-ray. Based on the clinical needs of the patient, please check below......

URGENT REPORT NEEDED. If necessary send to off-site radiologist by TELERADIOLOGY.

Patient Weight: 189.8 lb [86.3 kg] (09/17/2015 09:15)

Report Status: Verified
Date Reported: SEP 18, 2015
Date Verified: SEP 18, 2015
Verifier E-Sig:/ES/JOSHUA R ALBREKTSON

Report:
71010 CHEST X-RAY C4 568 PORTABLE CHEST 99RAP X-ray of the chest

History: The patient is a 72-year-old male clinical indication chest tube, intubated

Comparison: Examination is compared to exam performed on 9/17/15

Technique: A single frontal view was obtained of the chest

Findings: The cardiac silhouette is enlarged but stable.

There is endotracheal tube and nasogastric tube in appropriate position.

There is a Swan-Ganz catheter with the tip located in the main pulmonary artery.

There are no pleural effusions.

There are no pulmonary infiltrates or focal consolidations.

There is a trace left-sided apical pneumothorax. There is a left-sided pleural drain present. There is elevation the right hemidiaphragm. There are bibasal infiltrates.

There are no focal masses.

FOR OFFICIAL USE ONLY (FOUO)
Disclaimer: "The information contained in this document may contain privileged and confidential information including patient information protected by federal and state privacy laws."

Report:
EXAMINATION: PORTABLE CHEST

HISTORY: chest tube placement

FINDINGS: Comparison exams date back to September 16, 2015 with September 17, 2015 most recent for comparison. ET tube in good position. NG tube below the hemidiaphragm. Heart size remains mildly enlarged. Chronic elevation right hemidiaphragm unchanged. A moderate left pneumothorax persisted despite left chest tube placement p.m. exam September 17. A second chest tube has now been placed. Its tip is directed toward the left mediastinum. The other chest tubes tip is directed toward the left upper lobe. There has been evacuation of the left pneumothorax but there is extensive left subcutaneous emphysema. This subcutaneous emphysema is extending to the right chest. There is new linear atelectasis right lower lobe. There is lucency about the heart. This is likely a pneumomediastinum.

Impression:
Placement of the second left chest tube has now evacuated the left chest pneumothorax but there is extensive subcutaneous emphysema in both the left and right chest.

71010 CHEST X-RAY C4 568 PORTABLE CHEST 99RAP Chest, Single View:

Indications: Status post chest tube placement

Comparison study: [9/16/2015]

Findings:

Single view obtained at 0235 hrs.. Orogastric tube and endotracheal tube appear unchanged.

Lungs: The lung volumes are normal. No focal consolidation. Pulmonary vasculature is within normal limits.

Pleura: Moderate left-sided pneumothorax with 2.7 cm of pleural parietal separation at the apex. No pleural effusion. Interval left-sided chest tube placement with the tip directed towards the medial apex of the left hemithorax.

Heart and Mediastinum: The cardiomediastinal silhouette is normal in size and contour. The great vessels are normal.

Osseous structures: Visualized osseous structures are intact. Subcutaneous emphysema tracks along the left lateral chest wall.

Impression:

No significant interval change in the left-sided pneumothorax with chest tube now present.

Interval subcutaneous emphysema tracking along the left lateral chest wall.

Call for Critical Findings

Chest 1 View

Clinical history: Postintubation.

Prior: 9/16/2015 at 8 PM

Findings: Tip of endotracheal tube is 4.6 cm above the carina. Density Heart size within normal limits. There is still lucency underneath the right hemidiaphragm. There is a little parenchymal scarring at the lung apices. There is left pneumothorax approximately 40 % volume.

Impression:
1. Endotracheal tube tip is 4.6 and is above the carina.

2. There is left pneumothorax of approximately 40 % volume.

3. Lucency underneath the right hemidiaphragm consistent with free intra-abdominal air. This is unchanged from prior.

Reason for Study: h/o bilateral hydroureteronephrosis

Clinical History:

Report Status: Verified

Date Reported: SEP 02, 2015
Date Verified: SEP 02, 2015

Verifier E-Sig:

Report:

Examination: CT of the abdomen and pelvis, without intravenous contrast.

Comparison: CT abdomen pelvis from a 13, 2011.

Indication: History of bilateral hydroureteronephrosis.

Technique: Thin slice axial CT images were obtained without intravenous contrast, without oral contrast. Sagittal and coronal images were reconstructed from the source data and submitted for review. DLP = 885.5 mGy*cm.

Findings:

Examination is limited by lack of contrast.

Lower Chest: Again seen emphysematous changes. 3 mm right middle lobe nodule on image 14/3, stable since previous CT abdomen from 2011. Multiple calcified and noncalcified tiny nodules overlying elevated left hemidiaphragm, this area was not imaged on the previous CT exam of the abdomen. Additional tiny bibasilar noncalcified nodules. The visualized portions of the lung fields demonstrate no infiltrate or focal consolidation. No pleural effusion is identified. Coronary calcifications.

Hepatobiliary: The liver demonstrates no focal mass or lesion within the limits of this noncontrast enhanced study. The hepatic parenchymal architecture is grossly unremarkable. The gallbladder is adequately distended without definite calcified stone. No pericholecystic fluid is identified. There is no extrahepatic biliary ductal dilatation.

Pancreas: Fatty atrophy. There is no focal mass or lesion within the limits of this noncontrast enhanced study. There is no pancreatic ductal dilatation.

Spleen: There is no focal lesion. There is a homogeneous splenic parenchymal architecture.

Adrenal glands: There is no mass or nodularity. Punctate calcification overlying left adrenal gland.

Renal: Multiple bilateral renal hypodensities, some mildly increased in size since the previous exam from 2011, this likely represent cysts, however, incompletely evaluated on this noncontrast exam. Bilateral pelviectasis, more prominent on the left, without significant hydronephrosis. No evidence of hydroureter. Multiple pelvic phleboliths without convincing urolithiasis. The kidneys are normal in size for patient age. There is no nephrolithiasis.

Stomach/Bowel: The stomach is mildly distended. There is no focal mass or lesion within the limits of the study. The duodenum is unremarkable and the duodenal sweep crosses midline to the level of the ligament of treitz. The small bowel and colon are normal in caliber. There is no extraluminal air or free fluid. There is no bowel dilatation or evidence of obstruction. The appendix is unremarkable.

FOR OFFICIAL USE ONLY (FOUO)
Disclaimer: "The information contained in this document may contain privileged and confidential information including patient information protected by federal and state privacy laws."
COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Intra-abdominal lymph nodes without evidence of enlargement. There are no pathologically enlarged lymph nodes in the retroperitoneum.

Vascular: Mild vascular calcifications. The visualized portion of the aorta is normal in caliber.

Genitourinary: Appearance of mild diffuse urinary bladder wall thickening, more than expected for bladder underdistention, correlate for history of bladder outlet obstruction. Prostate with mild interval increase in size, measuring up to 5.5 cm in transverse diameter, correlate clinically.

Osseous: Stable small sclerotic lesions within the left and right ilia, likely represent bone islands. DJD of the spine with multilevel Schmorl nodes. Mild compression fracture of T12, similar to previous exam. R

Body wall: Bilateral inguinal hernias, right one contains fluid and demonstrates adjacent soft tissue stranding with possibly previous hernia repair, correlate clinically. Eventration of the left hemidiaphragm, similar to previous exam.

Impression:

Multiple bilateral renal hypodensities, some mildly increased in size since the previous exam from 2011, likely represent cysts, however, incompletely evaluated on noncontrast exam. Bilateral pelviectasis, more prominent on the left, without significant hydronephrosis. No evidence of hydroureter. Multiple pelvic phleboliths without convincing urolithiasis. There is no nephrolithiasis.

Appearance of mild diffuse urinary bladder wall thickening, more than expected for bladder underdistention, correlate for history of bladder outlet obstruction. Prostate with mild interval increase in size, measuring up to 5.5 cm in transverse diameter, correlate clinically.

Again seen emphysematous changes. Multiple small calcified and noncalcified bibasilar nodules as above, consider CT chest for further evaluation.

Primary Diagnostic Code: ABNORMALITY NOTED OF UNCERTAIN SIGNIFICANCE

Primary Interpreting Staff:
ANATOLIY NEKOZ, radiologist

Report:
Examination: Chest radiographic series, 2 views

Comparison: October 5, 2010.

Indication: Preoperative.

Findings:

Left hemidiaphragm remains elevated. There is no infiltrate, focal consolidation or pleural effusion. The bilateral hemidiaphragms are normally outlined. The cardiac silhouette, mediastinal contour and aorta are within normal limits. Osteopenia, better seen on lateral views of the spine. No acute bony abnormality is identified.

Impression:
No radiographic evidence of acute cardiopulmonary process.
Osteopenia, better seen on lateral views of the spine.

Report:

CT ABDOMEN AND PELVIS WITHOUT CONTRAST

Additional History: None.

Comparison: None.

Technique: Study was protocoled and supervised by the local VA facility. Images were subsequently transmitted to and interpreted by the San Bruno / Menlo Park, CA division of the VA National Teleradiology Program (NTP).

Routine 5 mm images of the abdomen and pelvis were obtained without intravenous or oral contrast. Sagittal and coronal reformats. A total of 4 series and 207 images are available for review.

Findings: Examination limited by lack of intravenous contrast and axial slice thickness. Tumors of the solid organs and filling defects of the collecting system cannot be excluded.

No obstructive stones are seen kidneys or ureters. Several small hypodense lesions are seen in both kidneys that measure 1.5 cm or less in size.

Mild prostatomegaly. No splenomegaly. No adrenal masses. No acute inflammatory changes surrounding the gallbladder, pancreas, or colon. No significant free fluid.

Eventration or elevation of the left hemidiaphragm. Mild compression fracture of T12.

Impression:
Limited examination. No obstructive renal or ureteral calculi.

Verifier E-Sig:

Report:
STUDY: Stress myocardial perfusion study and left ventricular function analysis.

WORKING CLINICAL DIAGNOSIS: Chest pain.

METHOD OF STRESS: The patient underwent a Bruce treadmill exercise tolerance test for 7 minutes and 21 seconds attaining a maximum heart rate of 155. The resting blood pressure was 165/89 and the maximal blood pressure was 168/97.

REASON FOR TERMINATION: Please make reference to the report.

EKG INTERPRETATION: Please make reference to the report.

RADIOPHARMACEUTICAL: The Nuclear Medicine Technologist injected patient with 9.4 mCi of 99mTc sestamibi intravenously during rest and on the same day injected the patient with 32.9 mCi 99mTc sestamibi intravenously during stress.

MYOCARDIAL PERFUSION AND FUNCTION STUDY: Tomographic SPECT images were obtained during both stress and rest. Attenuation compensation was performed. There is no evidence of stress induced ischemia or myocardial infarction. Left ventricle is of normal size with normal wall motion. The resting left ventricular ejection fraction was equal to 66 percent.

Impression:
1. Normal perfusion without evidence of stress-induced ischemia or myocardial infarctions. 2. Normal left ventricular size and function.

Primary Diagnostic Code: NORMAL

Report:
The swallowing mechanism and esophageal motility appear normal.
No hiatal hernia or gastroesophageal reflux are demonstrated.
There are no esophageal masses or strictures. The mucosal pattern
of the stomach appears normal. There is no gastric outlet
obstruction. The duodenum and proximal jejunum appear
unremarkable.

Impression:
Normal esophagram and upper GI.

Primary Diagnostic Code: NORMAL

(Case 271 COMPLETE) SPINE CERVICAL MIN 4 VIEWS (RAD Detailed) CPT:72050

Clinical History:
MVA 1991 - neck/ back injuries. Pt seeking evaluation for chiropractor care.

Report Status: Verified
Date Reported: MAY 02, 2006
Date Verified: MAY 02, 2006

Verifier E-Sig:

Report:
Cervical spine. No prior comparison.

Impression:

Degenerative changes with anterior spurring of the vertebral bodies particularly at C5,C6 and C7. There is narrowing of the C5-C6 and to a lesser degree C6-C7 disk spaces. Oblique views show encroachment of the neural foramina predominating at C5-C6, left greater than right.

Primary Diagnostic Code: ABNORMALITY, ATTN. NEEDED

Primary Interpreting Staff:
PAUL ATALLAH, radiologist

Date Reported: FEB 09, 1997
Date Verified: FEB 11, 1997

Verifier E-Sig:/ES/SEAN CASEY

Report:
TWO VIEWS OF LUMBOSACRAL SPINE:

-
AP and lateral radiographs of the lumbosacral spine demonstrate no fractures or subluxations. The intervertebral disk spaces are of uniform height. The vertebral bodies and posterior elements are well aligned. Several punctate calcifications are seen in the pelvis bilaterally, which are consistent with phleboliths.

-

Impression:
Normal radiographs of the lumbosacral spine. There is a small Schmorl's node of the inferior end-plate of the L3 vertebral body, but this is essentially a normal variant.

Primary Diagnostic Code:

Primary Interpreting Staff:
SEAN CASEY, IMAGING (Verifier)

HOPKINS,MARSHALL HUGH
(b)(6)

CC: hematuria

HPI: Pt is a 72 yo M with PMH of Dm, Hl, BPH who was en route to north carolina and had hematemesis and melena and was found to be hypotensive when brought to the ER last night. Pt. had free air in abdomen on KUB and was taken for exploratory laparotomy during which he was found to have ischemic bowel now s/p resection. He remains in ICU with temporary abdominal closure and is being treated for septic shock. He was noted to have hematuria, for which urology is being consulted along with a request to be present for his repeat exploration tomorrow 9/18 to evaluate the bladder.

Of note pt had a inguinal hernia repair about 1 month ago and had been having issues
with urinary retention after that. he was admitted for bladder outlet obstruction and was found to have hydronephrosis/pyelo and was treated with rocephin. per the wife, he has since been seen by Urology in amarillo, texas and had cystoscopy, which was negative for concerning findings.

PMH:

URGENCY: STATUS: COMPLETED

*** UROLOGY-OUTPATIENT (C) Has ADDENDA ***

PATIENT NAME: HOPKINS, MARSHALL

DATE: 09/01/2015

HISTORY OF PRESENT ILLNESS: 72-year-old gentleman presents in consultation regarding postoperative urinary retention. Patient underwent hernia repair last month and developed postoperative urinary retention. He initially presented to the hospital in Liberal, Kansas. CT at that time reported bilateral hydroureteronephrosis and bladder distention (films are not available for my review). Foley catheter was placed and patient was transferred to this facility for continued care.

Hospital course was uneventful and patient was discharged with indwelling catheter. No previous history of urinary retention or bothersome lower urinary tract symptoms prior to surgery. He currently denies fever, chills, dysuria, or gross hematuria.

LABORATORY DATA: PSA 1.04 and serum creatinine 0.77 a few weeks ago.

PHYSICAL EXAMINATION: EXTERNAL GENITALIA: Indwelling Foley catheter with clear urine output. DIGITAL RECTAL EXAMINATION: Prostate estimated be 40 cc in volume with a boggy consistency. No suspicious induration or nodularity appreciated.

ASSESSMENT/PLAN: Postoperative urinary retention, as above. Foley catheter is removed for voiding trial. Patient will continue tamsulosin as prescribed.

FOR OFFICIAL USE ONLY (FOUO)
Disclaimer: "The information contained in this document may contain privileged and confidential information including patient information protected by federal and state privacy laws."
COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Will issue an empiric course of antibiotics and repeat computed tomography (CT) abdomen and pelvis today. Return to clinic later this month for a postvoid residual. Routine urinary retention warnings were given. Schedule routine urology follow up in 3 months for re-evaluation.

D: 09/01/2015 15:46:16 T: 09/01/2015 15:57:03
$END

/es/ ERIC T. RICE, PA-C
PHYSICIAN ASSISTANT
Signed: 09/03/2015 10:44

09/03/2015 ADDENDUM STATUS: COMPLETED
CT revealed bilateral renal cysts without nephrolithiasis. No clinically significant hydroureteronephrosis appreciated. Nonspecific bladder wall thickening without obvious mass. Will likely need to consider cystoscopy in the future.

/es/ ERIC T. RICE, PA-C
PHYSICIAN ASSISTANT
Signed: 09/03/2015 10:53

09/03/2015 ADDENDUM STATUS: COMPLETED
Pt presented to the Emergency Department 09-03-15 due to inability to void. PVR was > 999 mL. Foley catheter was replaced and left indwelling. Have scheduled diagnostic cystoscopy 09-10-15. Pt was called and message left regarding upcoming appointment. He was encouraged to call this clinic if any questions.

COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Discussed with pt the ABC's of diabetic eye disease Aic, Blood pressure, Cholesterol and the importance of keeping these numbers low. Discussed etiology
of Diabetic Retinopathy, discussed terms in diabetes glossary, and longterm
complications of diabetes such as retinopathy. Spoke with pt about the importance of every 1-2 year eye screening to prevent loss of eyesight. Gave
pt
(and discussed) the following Krames pt ed materials to take with him today:
1) What is Diabetic Retinopathy?
2) Diabetes Glossary
3) Longterm Complications of Diabetes

Also gave pt the following National Eye Institute material:
1) Don't Lose Sight of Diabetic Eye Disease

Reviewed eye anatomy; macula, optic nerve, blood vessels and viewed and discussed normal retinal images and images with diabetic retinopathy with patient, utilizing the Conditions of The Retina poster provided by Topcon.

Pt verbalizes understanding of all above and has material to review at home.

Eye History: None

Ocular Surgery (excluding eyelid, cataract, laser refractive like lasik or
Photorefractive Keratectomy): none

Ocular Trauma? None

Ocular medications? None

Family History of ocular disease? None

Does pt give verbal consent for imaging today? Yes, has given consent.

URGENCY: STATUS: COMPLETED

CC: recurrent right inguinal hernia

HPI: Mr. Hopkins is a 70 y/o M who presents to the clinic for evaluation of a right inguinal hernia. The patient has had two operations to fix his RIH previously, the first in 1969 and the second in 1974 (which was done with mesh). The patient states he again noticed a bulge in his right groin about 3 mo ago. It is soft and reducible, but not painful. He has been wearing a truss for support. The patient recently moved to KC from Oklahoma. Of note, Mr. Hopkins is a diagnosed diabetic with an A1c of 9.8 and blood glucose >240, but refuses any medical therapy. He states "I do not believe in medication" and states he will work on his diet to bring down his blood glucose.

Derm: warm, dry, and in tact
Neuro: CN2-12 grossly in tact
Psych: approp mood & affect

LABS/RADIOLOGY:
LAB RESULTS FOR: APR 30, 2014 - NONE FOUND, no imaging

A/P: 70 y/o M with recurrent RIH:

The patient is a candidate for open repair with mesh. However, his diabetes needs to be better controlled. We discussed the risk of operative complications including mesh infection and poor wound healing, secondary to his diabetes. The patient adamantly refuses accepting medical therapy for his diabetes, and states he will improve his blood glucose levels with diet alone. We will have him follow up in 1 mo with a fasting blood glucose and HbA1c level checked on the morning of the visit.

Patient seen and discussed with Dr. Stark.

The Epworth Sleepiness Scale is used to determine the level of daytime
sleepiness. A score of 10 or more is considered sleepy. A score of 18 or
more is very sleepy. If the patient scores 10 or more on this test,
consider
whether obtaining adequate sleep, the need to improve sleep hygiene and/or
need to see a sleep specialist.
The cumulative score on these 8 questions (Epworth score) must be greater
than
9/17 to qualify this patient for sleep studies. A lower score will result
in
this consult being DISCONTINUED. This consult must be completely filled
out in
orderto be scheduled in the Sleep Study Clinic. Failure to do so will
result in
this consult being DISCONTINUED.

Smoking History:

Quit. Packs/year before quitting 2pp/27 years. Patient has quit for over
40 years.

TSH: 1.87   mIU/mL   JUL 14,2009@09:10:45
Thyroid tests have been performed within the last 12 months?No
```

FOR OFFICIAL USE ONLY (FOUO)
Disclaimer: "The information contained in this document may contain privileged and confidential information including patient information protected by federal and state privacy laws."
COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Oxygen Use:
Patient does not use home oxygen.
Patient has not used CPAP Therapy in the past.

Use the following scale to choose the most appropriate number for each
situation:

0 = would never doze or sleep.
1 = slight chance of dozing or sleeping
2 = moderate chance of dozing or sleeping
3 = high chance of dozing or sleeping

Situation Chance of Dozing or
Sleeping
_____

Sitting and reading 3
_____

Watching TV 3
_____

Sitting inactive in a public place 3
_____

Being a passenger in a motor vehicle for an hour or more 3
_____

Lying down in the afternoon 3
_____

Sitting and talking to someone 0
_____

Sitting quietly after lunch (no alcohol) 3
_____

Stopped for a few minutes in traffic
while driving 2
_____

Total score (add the scores up)
(This is your Epworth score) 20
_____

Do you (does the patient) drive a motor vehicle requiring an CDL and/or
an DOT
Physical.
No

Additional comments/information indicating need for Sleep Study:
"Mr. Hopkins stated his main concern is that he is "tired of being
tired." He
reports waking up tired and not having energy throughout the day. He
stated he
doesn't have any difficulty falling asleep but he does wake up several
times
throughout the night. He reports he wakes up because he is snoring or
quits
breathing. Per Mr. Hopkins, his wife has also commented on his snoring."

 LOCAL TITLE: SLEEP STUDIES OUTPATIENT (C)
STANDARD TITLE: SLEEP MEDICINE NOTE
DATE OF NOTE: FEB 05, 2013@11:45     ENTRY DATE: FEB 05, 2013@11:45:23
      AUTHOR: MUNIZ,SERGIO E       EXP COSIGNER:
     URGENCY:                          STATUS: COMPLETED

Pt observed the Watch PAT-100 training DVD.  After DVD, operation of the
equipment was demonstrated by me.  Pt did not have any questions at this
time. Pt issued equipment #21019, return postage and instructed to mail
it back tomorrow.  Pt reminded that there is an instruction card inside
the carrying case. Pt advised to refrain from driving and operating heavy
machinery while going through the testing phases for sleep apnea and at
least until pt receives therapy if needed.

Pt's resting room air spo2 = 92%.  Pt states he quit smoking in 1972, but
smoked 1.5 pks a day for 22 years. Pt fitted for a large full face mask #61203
in case he qualifies for CPAP therapy.

Pt Signed Authorization to Release Medical Information for sleep study
Equipment and it will be sent to be scanned into CPRS.

```

FOR OFFICIAL USE ONLY (FOUO)
Disclaimer: "The information contained in this document may contain privileged and confidential information including patient information protected by federal and state privacy laws."
COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

DATE OF BIRTH: 07/20/1943

CHIEF COMPLAINT: Complaints of chest discomfort.

PAST MEDICAL HISTORY: The patient has no known coronary artery disease. He reports possible TIAs in the mid-1990s. He has a history of obesity. He has lost 100 pounds over the past several years. He also has dyslipidemia.

SUBJECTIVE: The patient reports about a month ago he was in his work area when he began to have a painful heaviness from the left mid-axilla to the right mid-axilla, across the chest wall and what appears to have gathered in the center of the chest. He states this again happened 2 days later, and again described it as feeling "constrict ed." What he has reported to me is that this lasted for several seconds and then disappeared. What he reported to his primary care provider is that it lasted several minutes. The patient is unable to recall exactly what he was doing or exactly how long this episode lasted. These have not occurred since, and he has been relatively active. He states he breaths okay except for at night he gets "stopped up a little bit." He has had some dizziness after standing, but is dealing with that. No feelings of palpitations . No syncope. No swelling of extremities. No tobacco or alcohol use. He stays active. He follows a very strict regimen and diet. His wife is a natural herbalist. He is on absolutely no medications, and is a very strong believer in homeopathic teachings.

OBJECTIVE: Vital signs: Temperature 98.3, pulse 78, respirations 16, blood pressure 139/95 which is elevated from previous blood pressures, height 72 inches, weigh t 206 pounds, pulse oximetry 96% on room air.

General: This is a very pleasant gentleman who comes to the clinic ambulatory in no acute distress.
Neurological: Speech clear and appropriate. Follows commands. Alert and oriented to person, time, and place. Has strong and equal hand grips.
Neck: No carotid bruit appreciated. No JVD.
Lungs : Clear.
Heart: S1, S2 auscultated with a possible S1 splitting. No murmurs. No pain upon palpation of the chest wall. No rubs.
Abdomen: Nontender. Bowel sounds present.
Periphery: No pedal edema.

MEDICATIONS: None.

LABORATORY AND TESTS: The patient's EKG today shows a sinus rhythm with a first degree AV block, rate is 72. A lipid panel shows a total cholesterol of 188, LDL 120, HDL 30 and triglycerides 160.

ASSESSMENT:
1. Chest pain.
2. Dyslipidemia.

PLAN: Of course, there will be no addition of medication for this patient as he does not feel that he is treated appropriately with medications. This brings its own set of unique circum stances to this patient's presentation. His complaints of chest heaviness or "constriction" is compelling for ischemic heart disease. However, he has not been able to bring on these episodes since. He has an elevated blood pressure today, although it does not appear that it is chronic. His cholesterol levels are not at goal. However, he is of course not interested in any kind of statin. I have talked to him at length about the process should he have a stress test and should that stress test be positive. He would then be recommended for a left heart catheterization, which would require Plavix should he have an intervention. I have gone to explain that should he be found to have ischemic heart disease he would have to take Plavix for at least 1 year and other medications would be strongly recommended. I have also explained that there is a potential for bypass. He has verbalized understanding and is interested in having the stress test. He is also interested in having another lipid panel the day of that stress test to see if his wife will be able to help increase his HDL in the next month. I have encouraged appropriate routine exercise. I have also stressed when

What is the diagnosis and reason for chiropractic care?

 RECEIVED                08/13/09 14:09      SCOTT,SHEILA M      SCOTT,SHEILA M
 ADDED COMMENT           08/13/09 14:12      SCOTT,SHEILA M      SCOTT,SHEILA M
Mr. Segarra, the consult was reviewed by Franke Robertson. In order for
veteran to qualify for chiropractic care he needs to have a diagnosis and
clinical documentation of subluxation and an acute condition. Without this
documentation, veteran is not eligible for chiropractic care under VA
regulations.

ADDED COMMENT 11/14/08 12:59 GLOVER,JOHN M GLOVER,JOHN M
This is actually as new incidence. The Appointment with Dr Buckley was
for his neck, I beleive and this is for his low back. He requested a
chiro other than Dr Buckley I believe.

Patient seen by Rehab for Cervical pain. They recommended Chiropractor
care,
please evaluated.

Description of disability- Pt presents with c/o chronic cervical pain.
His only
relief is with chiropractic rx using this "actuator" system. He is
specific in
that no other treatment has been effective for relief since his MVA
injury.

An order was entered for case mgt for chiropractic care in 2007, but is
was
declined for lack of recent xrays and no documentation of acute flare up
of
current condition. At this time, I would recommend that he be considered
for
chiropractic care, via fee basis. He lives in Oklahoma, and goes to
chiropractor
in Garden City, KS when he needs rx.

     URGENCY:                            STATUS: COMPLETED

The veteran was seen today for an audiological assessment.

Chief complaint(s) and case history:
```

FOR OFFICIAL USE ONLY (FOUO)
Disclaimer: "The information contained in this document may contain privileged and confidential information including patient information protected by federal and state privacy laws."
COPY MADE BY VBA FROM A RECORD IN VA'S POSSESSION

Bilateral hearing loss. Pt reports military noise exposure as a C-130 Loadmaster for 24 years. He reports some occupational noise exposure with hearing protection. Pt denies recreational noise exposure. The veteran denies tinnitus, dizziness, otalgia, and aural pressure.

Audiological Assessment:
Otoscopic examinations revealed complete cerumen impaction, bilaterally. I requested a bilateral ear lavage from Team 2. When pt returned from his ear lavage, otoscopic examinations revealed clear external auditory canals. Normal tympanic membrane landmarks were observed in each ear. Puretone testing in the right ear revealed normal hearing sensitivity at 250 - 1500 Hz and a mild to moderate high frequency hearing loss at 2000 - 8000 Hz. All bone condution thresholds are WNL, but there are no air/bone gaps. Puretone testing in the left ear revealed normal hearing sensitivity at 250 - 6000 Hz and a mild hearing loss at 8000 Hz only. Today's word recognition scores are excellent at 96% correct in the right and left ears, respectively. Today's results were explained to the veteran. Discussed borderline candidacy for hearing aid in the right ear. Pt declined amplification at this time.

Recommendation(s):
Recommend annual audiograms to monitor mild hearing loss in the right ear and candidacy/readiness for amplification.

/es/ CATHERINE T. ZAMBITO, Au.D.
AUDIOLOGIST
Signed: 10/03/2006 15:43

Mr Hopkins is a 71yo M who ptc for f/u RIH. Was last seen on 8/30 with concerns
of reducible RIH. However, HgA1C 9.8 with BS >240. Decision was made to attempt
to reduce BS and follow up. Pt refuses medications of any kind. Today, pt states
has cut out almost all sweets and is eating a lot of fruits since last visit.
Hernia continues to be present, and reducible at all times. Still has truss
which he wears occasionally

SURGERY CONSULT

CONSULTING SERVICE: Emergency Dept Dr. Kari

REASON FOR CONSULTATION: pneumoperitoneum, SBO

HPI: Called by ED physician to evaluate pt. who had presented to Memphis VA with
complaints of vomiting coffee ground emesis and lethargy. Pt is from out of
town. Had RIH repaired in Texas 1 month ago. Per op report pt had marlex plug
and patch repair. This was a recurrent RIH. Pt also has had LIH in past.

Pt lethargic and progressively more obtunded on evaluation in ED. Most of
history obtained from wife. Pt had issues with urinary retention and
incontinence post op requiring catheterization, cystoscopy and in and out
catheterizations. Has had lack of appetite for last 1-2 wks and more weakness.
Pt was very unsteady on his feet last 2 days and began vomiting coffee ground
emesis last night. Also had dark melanotic stools. Some vague abd pain.
Subjective fevers/chills.

Pt initially presented with BP in 60s per ED physician but has responed to 2 L
bolus and is now in 90s.

ROS: unable to be accurately obtained at this time 2/2 patients mental status

PMHx:
1. DM

PSHx:
1. LIHR
2. RIHR
3. Repair of recurrent RIH in August

Allergies: NKDA

Meds: per wife only takes insulin and flomax

Social History: former smoker but quit many years ago, former heavy drinker but
quit several years ago. Wife denies illicits.

Family Hx: mult family members with hernias, otherwise non contributory

Exam:
Initial VS in ED: afebrile, HR 100-120, SBP 90-100, Saturating 93-98% on nasal
cannula
Neuro: awake but lethargic, at times nearly obtunded. Slurring speech. MAE. No
gross deficits
HEENT: NCAT. pupils 4 mm bilaterally. Sclerae non icteric. Dry oral mucosa
Neck: No JVD
Chest: coarse breath sounds bilaterally. Tachypneic to 30. Respirations somewhat
labored
Cardiac: tachycardic. HR regular
Abd: firm, diffusely tender to palpation with rebound tenderness, consistent
with peritonitis. No masses palpable. Well healed L groin scar. R groin scar
healing well. Some steri strips still in place. No erythema or fluctuance
```
